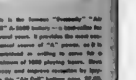
RADIO "A" BATTERIES

For every purse and purpose!

Now this year — a battery suiting all the needs and individual characteristics of the "Oversevity" A-3620 "Air Cell" 1620-hour battery at the low price of $4.20. This is a medium-sized battery, which is recommended for a minimum of 1620 playing hours. Its rechargin. It lives on air—$4.20.

This is the famous "Oversevity" "Air Cell" A-1620 battery — a top-seller for several years. It provides the most economical source of "A" current, as it is guaranteed as outlay to serve for a minimum of 1620 playing hours. Here screwy and non-spillable. Ask for the new dip "Air Cell" battery now $2.25.



There is a limited number of units now which have a two-color-package cannot check. For those can them in a special, designed "Economy," "Air Cell" battery—No. 5A-1620. Ask your dealer—he'll put you wheelbarrow you need—and the new 1.4 value, and giving perfect service throughout its exceptionally long life. $3.60.

For the new 1.4-volt radio set, the most satisfactory and economical source of "A" power is the new A-1260 "Air Cell" battery — specially designed for that purpose. This is a smaller "Air Cell" battery, developing maximum power for and over the new 1.4 value, and giving perfect service throughout its exceptionally long life. $3.60.

This year, follow the swing to "Air Cell" batteries and save yourself all the troubles and expenses of portable re-chargings. Notice the new "Air Cell" battery for regular 2-volt sets at the low price of $4.20. Each of the three "Air Cell" batteries mentioned operates on the same conductive principle, found in no other "A" batteries. No re-charging is necessary — the "Air Cell" battery lives on air throughout its long life! Your dealer sells them.

MR. CAFFEINE-NERVES is out of court

MANY people can safely drink tea and coffee. Many others—and all children should never drink them. If you are one of them, try Postum's 30 day test. Buy Postum and drink it instead of tea and coffee for 30 days. Then, if you do not feel better, return the container top to General Foods, Limited, Cobourg, Ontario, and we'll gladly refund full purchase price, plus postage. Postum is economical, easy to prepare, and delicious.

CHAPTER VIII —Continued

Rapidly the watery giant in and the boat strengthened. Farther and farther out it went, about to the lake and, near the shore became so thick that they raised their nets. But the big snobs was now piled high with frozen fish.

Twice when the [illegible] they drove the dogs down to the rakes on the Talking to find all well with John and Heather and no news from Mr. Simms

And then, at last came the Montagnais "Moon When the Snow Hangs in the Trees", and, in the middle of December Alan and Hetty started with the dogs to search for the headwater lakes of the Kakwash.

Over the barrens flanking the villey of the Hissing Lakes they travelled into the northeast But it was the east the ridges all ran north and the nor't a break in them We've found it, hey! We're on the Kakwash!"

The Indian nodded his head in agreement.

"Now we'll follow the east shore and see if this is the main discharge of the Kakwash. If it is, then I'm positive no water could run to the west from the top of the river, try it a bound to travel north "

With the boys riding the toboggan, [illegible] swift runs north here" We've found it!"

Alan's voice was trembling as he stopped to give the dogs a breathing spell. While the dogs lay curled in the snow, Alan and Noot talked [illegible] a starting fire

Well travel right around into lake with the outlet Noot [illegible] This exit bound to find a way to get into it with the canoes from the Hissing Lakes."

Mebbe she lak' not flow lake de berg, [illegible]

Now this lake is surely the headwaters of the big river, or of one of its branches It's got to be, flowing as it is the river does And it's north, too!

Song in their restless sleeping bags the Cree boys slept beside their fire In the morning they started along shore over the wind-brushed ice in an endless [illegible] and they travelled rapidly north until finally at noon, when the light clouds they were at the end of the lake but as yet had found no outlet, which would lead on they hoped, into the north and the great Kakwash. But in the afternoon they came to the mouth of a long island [illegible] and there, as they rounded the point, they saw the river at last.

"Noot!" he cried. "We've found it."

One morning they headed into the northeast In the upturned earth valleys snow-white Arctic hares their long ears tipped with black, jumped from willow thicket to rice away at the coming of the dog-team. Once, at a distance, three curious white foxes danced grotesquely on the snow, inspecting the approach of the team, until the excited dogs, getting their scent, set up a frenzied yelping which drove them away over the tundra, like wisps of white smoke.

Because of the wood, the boys had stopped in a small valley, where a stream bordered, by willow and alder. After eating, they continued south and came out of the fold at the hills to higher country. Noot, who was leading the team, reached the lip of the valley and looked into the next, he raised his hands with a shout.

"Noot!" he cried. "Look at that lake over there! We've found it!"

Noot [illegible] and the two looked in amazement across the tundra. There, miles away to the east, between the ridges of the foreground, reached the final white shell of an enormous lake, until it was lost in the haze of the distance

"Why, it's as big as Lake Bienville on the Great White," re-claimed Alan excitedly. This must be one of the lakes in the old man's map."

The Indian stood in awe gazing at the white reaches of the distant lake. For in the north and south stretched the shimmering floor of snow and wind-scoured ice, and into the east, until it merged with the horizon.

"What we now' [illegible] he said. "Mebbe dere end of de."

"But this river must be a headwater of the Kakwash," Alan cried. "We've over the Height-of-Land. The water [illegible] north."

Slowly the dogs, with [illegible] swung gallped the dogs along the eastern shore In an hour [illegible] across the wide expanse of ice into the northwest they could barely see the white hills from which they had discovered the great lake In places, the hard snow curved by the wind, rippled away for miles like white waves in places the ice was scoured almost clean of its snow blanket. Making sledding a delight On up the east shore, the eager dogs took them at a gallop But at noon the sun in the south was gradually smothered in haze To the north banks of land-colored clouds piled above the white hills.

"Snow results" announced Noot As they stopped to give the dogs a breathing spell.

"Then storm" he agreed Alan. "What we may be wearing the lake to the camp we had two nights back in that thick timber? It may be an old storm that lasts for days. With the hills running so they do, it would be [illegible] from the side After the blow we'll make sure."

"Let me for seems there We have to hurry."

"But we've got the dogs to make it," Haven't we, Noot?"

Alan went to the great dog sprawled on the wind-hardened snow, and rubbed the ears as he looked into the sleet eyes.

"You take the team seven this lake before the storm comes. Naughty?"

Noot answered with a red laugh as his breath rose like smoke on the biting air.

CHAPTER IX.

Hands in their windbreak of black spruce, the boys hoked in for the night. Alan, with his back to the [illegible] thawed the harness, driving every living thing. Jarred or fastened, to the sanctuary of the spruce or to sleeping burrows in the snow The morning of the fourth day when the sun, flanked by two brass halls of sun-dogs or false suns lifted above the barrens behind them, the trail to the north and west were stiff a dense [illegible] the dogs had died. With the stinging air shot with glittering snow crystals, their frozen breaths rose like smoke from a furnace, men and dogs started for the head of the lake Along the shores the wind had heaped huge drifts that much of the lake ice had been scoured of snow. Camping at the head of the lake, the following day, they started over the portage for the shoulders of the nearest hill to search for a spring water route from the Hissing Lakes.

Alan [illegible] the final [illegible] until on coming [illegible] he slanted of the [illegible] snow [illegible] Everywhere. He might before, the wild creatures revealed in search of food after the storm

At last Alan discovered a water [illegible] to the big lake, by way of a [illegible] of ponds lying on the Height-of-Land. The object of their [illegible] ing trip was accomplished

The Montagnais "Great Moon" [illegible] January with its searing winds and nights when the lake ice split with the boom of small the whirling and the spruce snapped under the contraction of the frost, rode over the mountains, followed by the "Moon of the Eagle" Night after night the northern lights [illegible] and [illegible] streamers of pearly mist writhed across the heavens beneath stars that shone through with a spectral blue "The Spirits of the Dead at Play" the Indians call the dancing lights of the polar heavens.

Often fearful for the safety of the men and girl wintering on the Talon river trail behind their galloping log. Alan and Hetty rode for the dogs.

Many times during the winter, John and several strange [illegible] trails. Some were the lumber [illegible] of the Hudson's Bay Company and the long shape of the coast Cree. The news of the [illegible] was [illegible]

Rebel British Painter Dead

Eighteenth Century Exhibited At Royal Academy When Quite Young

Eighteenth Century Genius. British painter dead at his London home. on his 73rd birthday

Gwelo, who painted large canvas panel pictures at the British Foreign Office completed at a banquet there years ago that his "probability" of modern women was a handicap to art.

"We pour modesty," he said. "drive to seek inspiration from shiny bulbs, plucked eyebrows, painted lips and bloody fingernails."

Noted for his portraits of well-known persons his landscapes and paintings of religious subjects, Gwelo first exhibited at the Royal Academy in 1882 at the age of 22.

In 1930 he received a gold medal "for distinguished services to sculpture" from the Royal Society of British Sculptors

(To Be Continued)

May Not Be Right

Chemical engineers make the best husbands, only about ten per cent of the women who marry them being really miserable. They are closely followed by mineralogists, college professors and music teachers. Among the worst husbands, on the other hand, are barbers, musicians traveling salesmen and poindexter whose capacity for annoying their wives is terrific Dentists lawyers and advertising men are about halfway between the best and worst, but Writers are not mentioned at all, possibly because their records are not too appalling for print. We learned these rather odd facts from a book called "Predicting Success or Failure in Marriage," by a couple of doctors named Burgess and Cottrell, who spent nine years and used not [illegible] less than two hundred questionnaires in getting them together The reason indoor are happiest with people the teachers and ministers, the professors say is that these men are apt to stay in one place where they see to [illegible] with the others don't travel, getting in jams. All this seems reasonable enough, but we rather like little point that keeps on bothering us How about the other side of the picture? What about the boys who married all these unsuited girls? Are they happy? We doubt it. Show us, we say, a wife who will fit in a questionnaire about her private life and mail it back to a couple of strange doctors and we will give you a husband who wishes he were in the Foreign Legion.—The New Yorker

It would be a different world if only common sense was really common.

"Are gumtree good husbands?" "Better ask my wife."

New Uses for Wheat

Anyone interested in seeing beautiful ladies clothed in dresses made from skim milk and slippery limbs covered with stockings made from oil and wood, or motor cars with bodies of plastic material from soybeans and steel and many other commodities of scientific research may do so by calling at the Free Press office. We have just received from the Local Bureau a copy of the National Geographic Magazine, containing an illustrated article dealing with the latest discoveries along these lines. The Lure Elevator Company, through the North West Grain Dealers Association, are advocating the establishment of a Western Division of the National Research Council in this industry, as certain wood such as that now selected does not fully expand the market for increasing. They contend that if some markets would mean a saving grace for the farmer when handling the progress made in finding new uses for such beans, corn and other products of the land supplied in the North and to explore some of these fields the Dominion Government should take early action in setting up a wide research laboratory in the West.

Stettler Health Unit Organized

The first meeting of the Stettler Health Unit was held in the Court house, Stettler, on Thursday afternoon of Nov. 30th, with all Board members present.

Dr. Roy Alberts, Deputy Minister of Health, was present, and introduced Dr. McCallum, Medical Officer of Health, who in turn introduced the other members of the staff.

Mr. A. L. Saunders was elected chairman of the meeting and F. M. Robinson secretary. Dr. McCallum then read his report which was accepted on motion of Mr. A. G. Bitts.

The staff of the Health Unit is composed of the following: D. M. Callum, Medical Officer of Health

Miss E. Hargrave, R. N., R. N.
Miss J. Campbell, R. N., R. N.
Mr. W. A. Money, C.S.I., Sanitary Inspector.
Miss O. Mellish, Secretary-Technician.

Mr. A. G. Bitts, of Alix, was elected to the District Board of Health. Altogether there are 12 members on this Board.

Work on the Unit Room in the Court House has been completed, along with practical equipment. The staff is now on duty. Mr. Money divides his time between Stettler and Red Deer, and alternates this week in each unit. The work of the staff has been very heavy for the last month. The health department has now taken the staff with a car for travelling.

Misses Hargrave and Campbell visited a number of schools and made a survey of conditions in each, and also collected gathering information which will be of great assistance in contacting those areas at a later date for the purpose of clinics, health talks, etc.

A considerable number of defects have been found among the children, such as vision, teeth, tonsils, malnutrition, and throat enlargement due to colloid deficiency. Parents will be made acquainted with defects found. Adults and preschool children will need to make application for their examination and vaccination.

The sanitary inspector having inspected approximately 60 rural schools and five town and village schools, has prepared a report and forwarded it to the different secretaries. Dairies, wells, restaurants, meat markets, sewage disposals, nuisance grounds, etc., have also been inspected. Drinking water has also received attention, but owing to a dearth of laboratory supplies no action has been taken.

To sum up the work of the staff, the Health Unit will work along the lines of Education, Examination, Communicable Diseases, Immunization, Inspection for Sanitation and Laboratory Work.

Any further information may be had from Mr. A.G. Bitts, Alix.

Sport News

In the next Boxing Card 10 local boys in the midget class who are being trained by Reg Siddon, will be on view. The gym-trained these children have conducted them with fancy shorts and canvas shoes. Every Friday and Saturday night the children work out in the ring. Your support in this enterprise is needed, as all children interested are kept busy 3 nights a week. Tuesday is their other night.

The record baking established by Alix Lacombe and Pembina received medical support for treatment from the Calgary Albertan, in a recent issue. Dealing with coming events in the field of sports, the Albertan says:

"With the Provincial District Examinations, the Provincial Junior, Novice and Open championships, the Provincial Intersenior championships and the National championships all slated for the early months of 1938, as well as the probabilities of Interprovincial championships between British Columbia and Alberta in the offing, the New Year will loom large in the eyes of our amateur boxing enthusiasts."

Red Cross News

Mr. H. Allen Moon was the lucky winner of the Yorkshire Gift donated by Reuben Bros.

The finance committee which has charge of the Red Cross Hamper Farm, also donated by Reuben Bros., will be drawn for at the theatre Wed. night Dec. 21st. Tickets may be obtained from M. W. Finance, or, M. F. Page. Get yours on Empire Day and help out.

—o—

Attention Citizens.

[illegible] Committee [illegible] Sports [illegible] Committee [illegible] Sports. We are again drawing your attention to the matter of [illegible] for the present season. Present indications suggest that our rink present year is not going to receive the local support. This would be a black-eye to our community. It is to be hoped this can be avoided and we are bringing the matter to your notice for final decision.

The minimum membership required to operate is $5.00 per person or $10.00 per family. Can we not make the support of the small number to our committee? Let us endeavor to enjoy the benefits of our rink.

Meeting will be held in the Local Business Men's Association Rooms on Dec. 16th, 8 p.m. to attend to suggested plans. We sincerely trust you will give your support to the local committee.—H. Shields, Secretary.

A New Year's Dance will be celebrated at Alix, on Jan. 1st, or Red Peppy Wells and the Old Timers from CFUN will furnish the music. Watch for posters.

Mr. S. Allister of Montreal, arrived in Alix on Thursday and will be buying horses in this district. Mr. Allister shipped ten carloads from Alix and district last spring.

CHRISTIAN SCIENCE

"Is the Universe, including Man, Evolved by Atomic Force" will be the subject of the Lesson Sermon at all Christian Science Churches on Sunday. The Golden Text is Ps. 104:10, 11, 20 and the Scriptural citations are "Though faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear" (Heb. 11:3). Some of the responsive passages from "Science and Health with Key to the Scriptures" by Mrs. Eddy are "The universe like man, is to be interpreted by Science from its divine Principle, God, and then it can be understood; but when it is explained on the basis of physical sense and represented as subject to growth, maturity and decay, the soul views, like the mind, sweet continues to be, as compare."

The Alix Free Press

Mirror News-Record--Supplement

ALIX, ALBERTA, FRIDAY, DEC. 8, 1939

The Week in Edmonton

Current wholesale quotations on flour have advanced as follows: $3.80, $2.90, $3.95, $3.00.

Flour is still being sold beneath the maximum, clearing off pre-war stocks.

Bread is being sold at the maximum at most points and must not go higher.

Current wholesale export quotations for butter at Vancouver are steady. The minimum price for special grade fat, delivered to creameries, based on special schedules, should not be less than 23½c per lb.

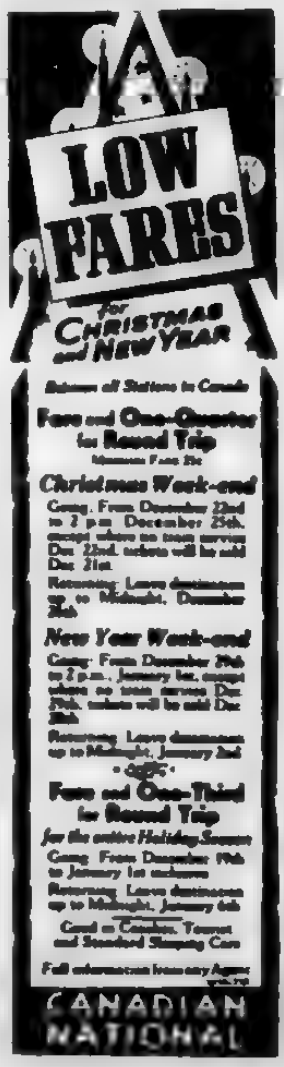
Current quotations and reserve sugar stocks are steady and do not warrant any changes in the prevailing sugar prices. A steady supply of sugar is assured.

A total of 10 Metis colonies have been established in the provinces to date, it was stated by Hon. Dr. W. W. Cross during the week. Made possible by legislative enactment, the colonies are preserved for Metis, and no white person may hunt, trap, kill or take any game or fur animals thereon. They are located at Fishing Lake, Cold Lake, Keg River, Big Prairie, Wolf Lake, Touchwood Lake, Goodfish Lake, East Prairie, Utikuma and the Elizabeth settlement area.

Farmers of the province were urged to give careful consideration to maintenance and improvement in swine quality by J. R. Sweeney, deputy minister of agriculture, who was commenting on British plans to purchase bacon and baron supplies in Canada. Setting up of a swine board in the province anticipated such a body in the dominion, it was added, and the provincial foundation stock distributing scheme would help farmers provide and maintain supply. Britain now takes nearly 4,000,000 lbs. of Wiltshire sides weekly, and this may be increased to 5,600,000 lbs. "When the war is over Canadian bacon should occupy a preferred position in the British bacon trade," said Mr. Sweeney. "If this opportunity of establishing Canadian bacon is lost, it would be a serious setback." Alberta marketed 745,433 swine in the first 47 weeks of this year, a marked increase over previous figures.

Registration of skilled and semi-skilled workers under the tabulation scheme of speeding Canada's war effort on the home front is proceeding at a brisk pace, employment officials state in Edmonton. Early in the week a total of 900 persons had been registered, including shipbuilders, machine gun workers and retired craftsman with mechanical ability. Several new Canadians who learned their trades in what are now enemy countries are anxious to serve Canada, it was added, and have offered their services.

The Lacombe Clinic wish to inform their patients in this district that, contrary to general impression, they have not discarded the Health Insurance plan but are definitely committed to it. The 1940 Contracts are now ready and may be taken out either by personal visit to their office or by mailing in the fee. — Drs. Hynes, Locke and Stewart.



BOYS' AND GIRLS' FAIR PRIZE LIST

The following is the Prize List for the 1940 Alix Fair for boys' and girls' work (from Grades I to IX. inclusive). This prize list has been drawn to coincide with school work, and it is the desire of the directors in charge to have a large exhibit. We ask school teachers to encourage pupils to take an interest in this prize list and 1940 Alix Fair.

BOYS' and GIRLS' WORK

Directors in Charge—Mrs. Clement, Mrs. Lattin, Mrs. C. Brown

		1st	2nd	3rd
Sec. 1—	Division 1: Health enterprise to be done by Group	Ribbon & Marks		
Sec. 2—	Story pictures, free drawing with colored chalk, pencils or crayons, 12 x 24 in. for boys	25c	15c

Frustrated Robbery

On Thursday, Dec. 7th, about 1:30 a.m., two men broke into the municipal office at Erskine, blowing the outer door off and then fled without obtaining anything. Later in the night, at 3:30 a.m., while sitting in a car near Page's Pharmacy, Chas. Woolgar, our night watchman, noticed two men meandering around town and he questioned them, although in ignorance of the attempted robbery at Erskine, earlier in the morning. Mr. Peacock also saw these two men, who awakened him by the noise of their car. They were then headed for the Creamery. Apparently the presence of Mr. Woolgar and his questions, deterred them from making any attempt at robbery in Alix. At this time of the year an alert watchman is necessary in this town.

The Alix Free Press

Mirror News-Record--Supplement

ALIX, ALBERTA, [illegible]

The Week in Edmonton

Current wholesale quotations on flour have advanced as follows: $2.60, $2.80, $2.95, $3.05.

Flour is still being sold beneath the maximum, clearing off pre-war stocks.

Bread is being sold at the maximum at most points and must not go higher.

Current wholesale export quotations for butter at Vancouver are steady. The minimum price for special grade fat, delivered to creameries, based on special schedules, should not be less than 32½c per lb.

Current quotations and reserve sugar stocks are steady and do not warrant any changes in the prevailing sugar prices. A steady supply of sugar is assured.

A total of 10 Metis colonies have been established in the province to date, it was stated by Hon. Dr. W. W. Cross during the week. Made possible by legislative enactment, the colonies are preserved for Metis, and no white person may hunt, trap, kill or take any game or fur animals thereon. They are located at Fishing Lake, Cold Lake, Keg River, Big Prairie, Wolf Lake, Touchwood Lake, Goodfish Lake, East Prairie, Utikuma and the Elizabeth settlement area.

Farmers of the province were urged to give careful consideration to maintenance and improvement in swine quality by J. R. Sweeney, deputy minister of agriculture, who was commenting on British plans to purchase ham and bacon supplies in Canada. Setting up of a swine board in the province anticipated such a body in the dominion, it was added, and the provincial foundation stock distributing scheme would help farmers provide and maintain supply. Britain now takes nearly 4,000,000 lbs. of Wiltshire sides weekly, and this may be increased to 5,000,000 lbs. "When the war is over Canadian bacon should occupy a preferred position in the British bacon trade," said Mr. Sweeney. "If this opportunity of establishing Canadian bacon is lost, it would be a serious setback." Alberta marketed 745,425 swine in the first 47 weeks of this year, a marked increase over previous figures.

Registration of skilled and semi-skilled workers under the tabulation scheme of speeding Canada's war effort on the home front is proceeding at a brisk pace, employment officials state in Edmonton. Early in the week a total of 900 persons had been registered, including shipbuilders, machine gun workers and retired craftsman with mechanical ability. [illegible] new Canadians who [illegible] their trades in what are now enemy countries are anxious to serve Canada, it was added, and have offered their services.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

K. Ray M'Vean, Optometrist and Optician, will visit the Alix Hotel on Tuesday morning, January 16th. On Wednesday to Saturday of each week, Church in Calgary office at 903 9 Sandison Building.

FOR SALE—Old stereo plate (lead) metal for babbitting at 3c per lb. Old foundry type, a harder metal, 10c lb. At Alix Free Press.

No Free Press next week.

There is a good demand for well conditioned work horses. Phone 18, Alix.

ROOM for RENT, board if desired—Mrs. A. R. Bissett, Alix.

Mr. and Mrs. R Stone and Mr. and Mrs. A. MacDonald were Edmonton visitors during the early part of the week.

Mrs. W Barr is spending the holidays at her home in Kamloops, B.C.

Mr. and Mrs E Bray, after visiting relatives here returned to their home at Jarvie, on Sunday last.

Make a special note of the visit of K Ray M'Lean, optometrist, at the Alix Hotel, on Tuesday, Jan 9th.

What with large flocks of ducks flying north, showers of rain, and passion blooming, a more week before Xmas, we have much to be grateful for.—Acta Clara Local Correspondence.

[illegible] Soldiers' Comforts Committee, with a [illegible] announce that yarn and materials will be ready for distribution on Saturday, Dec. 23rd at the U. F. A. hall, from 2:30 to 6:30 p.m. every one wishing these goods please call there.

The meeting advertised for Tuesday evening last to discuss curling and skating was held in the local station. Owing to the small turn out it was impossible to decide as to whether ways and means, necessary for the operation of the rink, could be arranged. It was finally decided to canvass prospective supporters and if unable to secure sufficient membership to drop the matter for this year. Just why should our young people be deprived of their sport through lack of consideration?

Stettler Hospital has cleared off a debenture debt of $60,000. The Hospital Board celebrated the event with a dinner. The debt was paid off in half the allotted time.

With thankfulness we have reached the shortest day of the year, and from now on will see a little more of the sun each day. This is an event which always brings universal gratitude.

The yarn bowl was donated by Mathoso farm was won by our good friend Mr. L. K. Pollock, of the Alix Hardware Store we understand the reason for that shepherd look of the past three weeks. Baa!

Haynes News

A large number of people attended the shower held on Friday night for Mr. and Mrs. Stephen Brewster who were recently married. Following lunch, the assortment of beautiful gifts were opened and displayed, afterwards a dance was held.

Dance in Haynes Community Hall, Friday, Dec. 22nd. Music by Richies Rhythm Rascals.

Christmas Tree and program in Haynes Hall, Saturday, Dec. 23rd., at 5 p. m.

A Christmas service will be held in the United Church on Sunday, Dec. 24th., at 2:30 p.m., Rev. L. Thompson in charge.

The Red Cross met in the Haynes Hall, last week, when plans were made for obtaining a quantity of wool for knitting and material for sewing. Articles most needed are socks, mitts, sweaters, pyjamas, pore mocks, jackets and bandages. Anyone wishing to knit or sew get in touch with the secretary, Mr Kenny McLeod. The need is great. Do your bit.

The Red Cross will hold future meetings in the United Church at Haynes.

Red Cross

"The outbreak of the second Great War has found the Canadian Red Cross Society fully mobilized and prepared to undertake the great humanitarian work which characterized its efforts in the conflict of 1914-1918.

"This great voluntary movement has behind it an honourable record of achievement. In times of peace its outpost hospitals and nursing stations, its highway first aid posts and its work among the sick and needy in outlying districts of lore that [illegible] only in time of war is [illegible] in caring for the sick, the wounded and the suffering.

"In the first Great War the Canadian Red Cross Society provided comforts for soldiers amounting in value to approximately twenty million of dollars. In addition, it provided funds amounting to more than nine millions of dollars for the supplying of hospitals and hospital cars for Canadian soldiers. Another six millions, two hundred and fifty thousand dollars were used to assist the British Red Cross Society to care for British soldiers.

"Despite the stupendous sums of money spent by the Canadian Red Cross Society during the first Great War to alleviate suffering and provide comforts.

Not one cent was received by the society for anything it supplied the troops. Its services were provided freely and without charge. Indeed, if any soldier did pay for a pair of socks—and there is no evidence that this was so—it was because they were sold by a dishonest person who simply pocketed the money for his own use.

"In view of the appeal now being made by the Canadian Red Cross for public support it is well that this fact should be made known to the people of Canada. From time to time reports have been circulated that the Canadian Red Cross has charged for supplies provided the soldiers during the first Great War. This is definitely not so, and members of the Legion who be notified by Red Cross services in the last conflict can materially aid the work of the Society by the removal of any [illegible] of this nature that they may encounter in their local communities."

Chongking is her desperate fight for foreign trade (and thereby for foreign war supplies) Japan is shipping her products to the world's markets labelled "Made in China," it is reported. The Chinese Government has imposed the death penalty on Chinese merchants selling Japanese goods in China.

Highway Service Station

Complete The Job

If it is possible to do so without interfering with this country's war activities, every effort should be made to complete the construction of the Trans-Canada highway without any further delay. The work has been in progress for a good many years now and it is high time that Halifax and Vancouver be connected by road on the Canadian side of the international boundary.

With the completion of the Big Bend section in British Columbia in the coming fall this year and with prospect of the 100 mile strip being surfaced in the spring the great all-Canadian transcontinental highway will be traversable from the Atlantic to the Pacific in the summer of 1940 except for a 100-mile gap in Northern Ontario.

The one-completed stretch of 100 miles at Northern Ontario lies between Schreiber and Port Munroe on the north shore of Lake Superior, but further north on an alternative route a gap of 120 miles connecting Geraldton and Hearst, if bridged would give a through route across the continent entirely within the boundaries of Canada. Both these gaps, however, lie in wilderness country with rich to be located and trees to be removed.

In view of the nature of the country north of Lake Superior, road construction is not an easy task and is comparatively expensive because of the amount of rock to be excavated, but the work is not by any means insurmountable if supplies and labor are available. Until this work is done however and until it is completed by 1,000 miles as by rail or lake, it cannot be considered a real Trans-Canada highway.

A Real Incentive

That the announcement of the completion of an all-Canadian highway after across the continent would draw many tourist traffic from the United States to this country there can be no doubt. The facility would prove attractive to a large number of holiday makers south of the international boundary under normal peace conditions and north to this country while the war is raging on the European continent.

Every year since the migration of a large number of Americans to the playgrounds of Europe for vacation hours. It is obvious that they are people with money to spend for pleasure trips and it is to their interest to do so otherwise they would not be able to make holiday tours at all. Europe must pass and perhaps for several years, if the war is prolonged, they will want to avoid war-torn Europe and will look elsewhere for a vacation land.

Undoubtedly, Canada in 1940, will capture a good share of this entire holiday traffic, whether the Trans-Canada highway is completed or not, and particularly in this likely to be true in the east, but unless and until the north Ontario gap is completed, Western Canada will receive comparatively little benefit from it and will be deprived of additional Eastern Canadian trade which undoubtedly would be attracted by a paved highway between east and west coast motorists in Canadian soil.

The glamour of travel to another country to the north beckons large numbers of Americans with the means and the time to devote to it. The prospect of visiting and touring a neighboring country at war and yet do so in perfect safety will be an additional lure to many residents of the United States and every effort should be made to capitalize on these natural decisions. But the desired result cannot be achieved to anything like its maximum possibility until Canada can offer its guests a completely trans-continental thoroughfare, and one in good condition.

A Further Incentive

It was recently announced by the Department of Transport in Ottawa that "Despite the outbreak of war in Europe, tourist travel from the United States to Canada will not be hindered, nor will the present regulations be affected." Which means that although this country is a belligerent, no travel restrictions have been imposed or are likely to be imposed on the persons of entry of tourists from the United States into Canada.

It was further pointed out that "Citizens of enemy countries will naturally be subject to restrictions but these will not affect the movement of tourists from friendly or neutral countries who will continue to be welcomed as they have been in the past. In addition, special provision has been made to avoid inconvenience to tourists from the United States or interned in the regulations of the Foreign Exchange Control Board."

In other words, American tourists will be able to take full advantage of the privileges enjoyed by United States surveyors when exposed on Canadian soil and this is an additional incentive to Americans to spend their holidays in this country.

While the steps taken by the government to prevent embarrassment to Canadian tourists are negative it requires positive action in the completion of the Trans-Canada Highway if the country is to take full advantage of the opportunity offered by a continued war in Europe.

Keep Tab On Coal

Canadian Coal And Coke Industry Will Be Subject To Government Licensing

The entire Canadian coal and coke industry will be subject to government licensing from 1 May on, it was announced in Ottawa by Hon. C. D. Howe, minister of munitions and supply, under the Department of Mines and Resources.

No company or individual will be permitted to operate without first obtaining a license with the order applying to manufacturers, importers, exporters, producers, jobbers, wholesalers and retailers of coal and coke which includes all types of coal including lignite, and all solids, including those manufactured from petroleum.

The licensing order will be administered by J. McD. Stewart Canadian coal administrator and his technical adviser, Frank G. Nunn.

The licensing system has been adopted "to keep the government adequately informed of the situation surrounding the production, importation and distribution of coal to ensure an adequate distribution of coal and its products to the public against any undue advance in price."

Mr. Howe explained.

"While there is presently avail able in Canada more authentic than ever before, information about the licensing plan will make available to the coal industry information from which it will be possible accurately to estimate the need to arrange for the maintenance of these supplies" the board stated.

"From Dec 1 to April coke dealers, importers and exporters and producers will be required to submit similar returns the amount of coal and coke on hand or in transit the previous month and distributed each month the person charged, and save Revenue considerations under the Excise Act."

Licenses issued, however, will be renewable on a quarterly basis.

Canadian production for consumption in Canada in September was estimated at 3,046,857 tons compared with 2,646,542 last year

Hint To Truck Mik

Every Person Should Learn To Use Hands Skillfully

Many people have made a mess of life because they never learned to use their hands. The effort made to guard the Famous Dionne quintuplets from that error has become which parents may well study.

Those young babies, now more than five years old, are being taught to drive such a delicate to get the blocks and draw with crayons. They are beginning early in life to acquire a mastery of the world's most marvellous tool, the human hand.

People who can use their hands skillfully are rarely out of work even in the most perilous times in the clever work they do with those hands, which enables them to command wages or earn a living. Countless hours are wasted because the writer has not competent in household arts the beginning of which is child's play with the hands. In times of war as at the present, men and women who can do more with their hands are in great demand as mechanics, motor transport drivers, munition makers, etc.

Royal Title For Apple

That lovable old philosopher and angler Izaak Walton said that a friend of his once "made a present to mee that could mee more welcome than the strawberry but double Cod never did." And as it may be said that double Cod may have made a better free fruit than the apple but doubtless God never did, for the apple is rightfully entitled to be classed as the King of Fruits.

A Boston gunsmaker once manufactured a gun with a 12-foot barrel. It weighed 500 pounds and had to be fired from a rest.

A full-sized window screen contains about one mile of wire.

Sinking A U-Boat

Attempts Made To Penetrate Depths Of Nazi Fleet

The problem of how to penetrate the depths of Nazi U-boats and destroy them has been overcome, much to the Nazis' chagrin, and attempts made by the Nazis to penetrate the defences of Nazi Fleet have been frustrated and defeated by the Canadian Navy. Many submarines were destroyed in these attempts and the Nazis' chagrin is unbounded.

It is said, with a considerable degree of accuracy, that the end of the war will be the sinking of submarines by the Canadian Navy. The Nazis' submarine fleet will be destroyed and the Nazis' chagrin will be unbounded.

Pilot Training Scheme

Says Every Canadian City Will Have Training Station

W. F. Raynor representative of a British aircraft company at Portland, Oregon, says every large city in Canada will have at least one and probably more such training stations for plane pilots in connection with the scheme for training British Empire airmen.

The training camps will have to be kept in the urban areas and get in the country," said Raynor, who recently completed a tour of a number of Canada's aircraft plants.

William Harvey discoverer of the circulation of the blood was born April 1, 1578.

CHAPTER XI Continued

With May the high barrens begin to make from their winter's sleep Hummocks of Ancient Stone "Mosquito" their white blankets to expose their green pastures of caribou moss

Riding the brown snow water off after the ice left the Talking came Alec and Noel in the canoe they had taken to the Barking Lakes on the sled. When John and Heather rejoined them they had exchanged their fold with cranberries, they planned their start.

"It will be June before the ice leaves the big lake," said Alec, "but we can take our stuff in the two canoes to the head of it and be ready to start when it does."

"I'm," agreed McCord, "we've got no time to lose."

On the last day, as they ended chairs and windows of the cabin against the sure attacks of bear and wolverine, Heather turned wistfully to Alec "Remember, Alec, that day last winter when I came back to find you and Noel with Dad?"

"I do I remember," he laughed "Your eyes were like sunsore and your mouth opened like that. He embraced the end of the episode with hands held wide apart. "I've wondered what kind of animal had stuffed in out of the bush."

"I know now," she said, "and two grizzly cubs drifted in."

Alec gazed curiously in the girl's sober face. "Even so," he said, "I said, with a laugh. "Just think, girl, what a great time we're going to have!"

Her face brown contracted as she returned his glum.

"Do you think, Alec, we're ever coming back?" she asked "I've dreamed such horrible things, this winter McQueen will surely unleash

A Balloon Lullaby

Londoners Have Become Used To Sound Of Barrage

The London correspondent of the [illegible] writes: "Londoners have become used to the sound of the barrage balloons. Every night there are one or two balloons over London. At the moment there are about over Paris. Paris is not quite a lot of other European cities. In fact it may be doubted whether Europe was ever before quite so gay with coloured balloons as it is now."

But it took Londoners quite a long time to solve the mystery. Every night they would ask excitedly just like airplanes assuming just overhead. In view of the darkness — and the balloons this seemed, even for our gallant knights-errant of the R.A.F. an unnecessarily risky pastime. Now we know that what we took for the noise of an aerial engine is really nothing of the sort but just the curtain sound of the wind through the balloon cables.

Everybody who has ever walked in the country and listened-in to the wind through a barbed wire fence will realize how this arises. The balloon-cable sound is much the same only deeper. Now that we Londoners now full asleep to this new lullaby. But there was a time, epoch, reached in the cradle of the balloon barrage Whether a night may come when this supply of the alarm clocks remains to be seen

A Cow On The Track

Caused Trouble For The Engineer As Well As The Superintendent

I remember a trip I made as superintendent, on the day we placed a new train schedule in effect. The train made its maiden stop in the country and I walked up to the front end to locate the trouble. I found the train crew holding a palaver over a cow that had got on the track — and was standing in the glare of an unusually much engineer

I was a gobbler in that engineer, who introduced me as the "superintendent" and then made a hurried exit. I was the very man that woman wanted to see Would I change the new time table? What was the idea of running the train past her farmyard an hour earlier than usual? Didn't I know that it had taken three years for Susan the cow, to learn the hours at which she could graze on the right-of-way? It was not fair to the cow to put an orderly new schedule into effect overnight

I couldn't argue with the lady and I was forced to listen to one of the most comprehensive lectures of my life. Perhaps I was a bit cowed and her man when the train got under way again. The Lake & E. Warren on Early Railroading

For Safer Driving

Engineering Developments Which Are Promised

That day has slipped into the realm of motor industry which was recently a matter of daily fabrication. The engineering developments which have been made in all efforts to build safely into automobiles are so numerous that the ordinary motorist does not know more than a few of them by observation.

Study of the "fatigue" of metals has led to the making of parts not likely to give way in a flaw. "Steering geometry" has guided engineers in designing apparatus to work easily and surely on curves, hills and the straight-away. Vibration has been reduced to prevent tiring of the nerves. Even such a detail as the spacing of spokes in the steering wheel has been improved to give a clearer view of the instrument board

Most comforting is the thought that all this has been done without requiring more technical knowledge in driver with that of what is think of engineering. The human element, though still responsible for most accidents, seems less hazardous.—New York Sun

The south magnetic pole was declared at most accurately in 1909 by Lieutenant Shackleton at about 73 degrees south latitude and 156 degrees east longitude.

Green lights penetrate best in some fogs, while in others red lights are most effective. It all depends on the size of the moisture particles of which the fog is composed.

Annually, enough salt is washed and blown from the Gulf of the United States to fill a train of freight cars reaching 10 times around the world at the equator.

A Quaker of some powers in Rhode Island, Preston, is the source of

"Ah-ha!" grinned Noel. "Camp smoke!"

"It must be a windmill, John, as soon as you're born. No one misses that. Now, Heather where did those two canoes go? I'm not sure, anyway We don't have those fellows on the scent—only the Horse's salmon, with red spots, in the Bay. The power we're on Adamek waters."

McCord's brown face widened to grin as he recognized the lake.

"Land-locked salmon, boy I've caught them often in Quebec! Another fine line of lakes spots along the side! By glory, I'm going to see them again, Nathan on this river. For I've got a rod and some flies—like, bed! My brother Hand wouldn't let me come without them.

To Alan's amazement McCord produced from a steel dish case, a jointed steel rod, a reel with oiled silk line still a small leader and fly-book.

Good river men though they were, the first few days tested the skill and strength of the crew Chutes and white-water and flumes followed each other endlessly. Past boulder choked shores where great cakes of ice left by the high water still stood on the sun with browns of straight-lined rapids. Sometimes a roaring falls and moss-covered reaches. They labored dig, after day, seven always beyond the valley another lake teaters to white zone

To Ration Dollars

Australia Is Planning To Adjust Economy To War Expenses

As a result of the prospective heavy expenditures in Canada for the Australian contingent of the one pound's air forces and the placing of the R.A.F. an unnecessarily risky pastime Now we know that what we took for the noise of an aerial engine is really nothing of the sort but just the curtain sound of the wind through the balloon cables.

Everybody who has ever walked in the country and listened-in to the wind through a barbed wire fence will realize how this arises. The balloon-cable sound is much the same only deeper. Now that we Londoners now full asleep to this new lullaby. But there was a time, epoch, reached in the cradle of the balloon barrage Whether a night may come when this supply of the alarm clocks remains to be seen

Increase Fighting Force

United States To Offset Mass Training Of 60,000 Troops

Creation of nine continent army corps in the south and northwest signalled the first start of mass training by 60 000 troops to provide the United States with its first sizeable, unified fighting force since the first Great War.

Five streamlined infantry divisions, one cavalry division and auxiliary units will be put through four months of field manoeuvres ordered after President Roosevelt proclaimed a limited national emergency

Meanwhile intensified training of other regulars and of national guardsmen was pushed on a parallel move to ensure homework

ALIX, ALBERTA, FRIDAY, DEC. 15, 1939

Canadians

Montreal — Establishment of a voluntary board to plan for post war development of Canada was urged by Hon. Dr. R. J. Manion, before a recent Canadian Club luncheon.

"I believe our future will be greater than the greatest visionary can dream," said the Conservative leader. "We can build Canada into one of the greatest countries of the world. We are just starting toward the top."

Montreal—Speaking of a rally which opened the Liberal campaign for the Federal by-election in Montreal, Works Minister P. J. A. Cardin again urged the French Canadians to contribute their talents and abilities to the development of Canadian unity. Quebec spoke for unity in the Provincial election last October, said Mr. Cardin, now they must cultivate "a sentiment of fraternal unity" among Canadians.

Ottawa—Addressing the local branch of the Civil Liberties Union, David Lewis, national secretary of the C.C.F., declared present restrictions are far beyond anything necessary because of the war. In his opinion, Mr. Lewis said, the only restrictions needed in Canada were those to prevent dissemination of military information valuable to the enemy and to prevent sabotage.

Ottawa—Subversive elements, including Communists and Fascists, which seek to interfere with Canada's war efforts will be suppressed in Ottawa, Attorney General Conant stated in an address here. He said people who stressed the point that Canadians should not lose democracy in fighting for it took a fatal view because "temporary curtailment of our liberties is better than to suffer defeat." Danger of dictatorial powers continuing in post-war Canada was negligible, thought the minister.

Summerside—"Canada's war effort should be practical rather than spectacular," declared Col. J. L. Ralston, Federal Minister of finance, in accepting nomination as Liberal candidate for this P.E.I. constituency.

Conservatives have decided not to contest the seat and Col. Ralston is expected to receive an acclamation. The by-election is set for January 8th.

Ottawa—In a recent broadcast on the operations of the War-time Prices and Trade Board, Hon. Norman McLarty, Minister of Labor, said because of it Canada will not wear "the face of false prosperity during the war" nor will Canadians endure "the severe pains of economic contraction."

The board has so far "successfully checked hoarding and profiteering," continued the minister, "and has effectively curbed those who might have been tempted to turn national needs and peril into profit."

Toronto—Here on "an extremely important economic mission," Richard Haenmerli, joint manager of a Paris banking house, told interviewers that the armament firm Schneider Creusot plans to establish a plant in Ontario.

Canada can sell hundreds of millions of dollars worth of goods to France, continued M. Haenmerli, and thus can lay the basis for "tremendous industrial progress." "We require canned meats, canned fruits and many other things for the army," he said. "We are also greatly in need of wood pulp and cellulose."

BOYS' AND GIRLS' FAIR PRIZE LIST

The following is the Prize List for the 1940 Alix Fair for boys' and girls work (from Grades I to IX, inclusive). This prize list has been drawn up to conclude with school work, and it is the desire of the directors in charge to have a large exhibit. We ask school teachers to encourage pupils to take an interest in this prize list and 1940 Alix Fair.

BOYS' and GIRLS' WORK

Directors in Charge—Mrs. Cormack, Mrs. Larkin, Mrs. G. Brown

	1st	2nd	3rd
Sec. 1—Division 1: Health enterprise to be done by Group	Ribbons & Marks		
Sec. 2—Story pictures, free drawing with colored chalk, pastels or crayons, 12 x 16 in. for boys	50c	25c	
Sec. 3—Story pictures, free drawing with colored chalk, pastel or crayons, 12 x 16 in., for girls	50c	25c	
Sec. 4—Div. 2. Moral Virtue, to be done by Group	Ribbons & Marks		
Sec. 5—Revolving weather vane, for boys	50c	25c	
Sec. 6—Bird House, for boys	50c	25c	
Sec. 7—Knitted Article, by girls	50c	25c	
Sec. 8—Piece of Embroidery, for girls	50c	25c	
Sec. 9—Div 3: Design for Hooked Rug for bedroom, to be done by group, 24 x 36 in., blueprint	Ribbons & Marks		
Sec. 10—Social Studies, pastime found and suitably decorated	50c	25c	
Sec. 11—Rug made from discarded material	50c	25c

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

E. Roy H Lees, Optometrist and Optician, will be at Alix Hotel on Tuesday morning, January 9th. On Wednesday in Bashaw, if each week. Consult in Calgary office at 340 Sherbrooke Building.

FOR SALE Old electric plate (lead) moved for babbitting at 5c per lb. Old laundry type, a bargain at 1c lb.—C. Alix Free Press.

There is a good demand for well-conditioned work horses.—Brown Lb. Alix.

ROOM for RENT, board if desired.—Mrs. A. H. Hewett, Alix.

Mr. E. W. Cormack spent the holidays at home.

Born — To Mr. and Mrs. L. Carlson, at their home east of Alix, on Jan. 3rd, a daughter.

Dr. and Mrs. Howard Moore, Miss Mary Moore and Mr. Billie Burris, of Lacombe, were the guests of Mr. and Mrs. W. D. Clarke, over the holiday.

And once again we are in a leap year. Work fast, girls, or the boys will leave you in th.

Mr and Mrs. F. Sutters and Jack, of Red Deer, were in Alix for Christmas.

Private Pete Clarke was here on a few days leave from Edmonton

Mr and Mrs S. E. Todd and Rose spent Christmas with relatives [illegible]

Mrs. G. Woods has been spending the past week visiting relatives at Mannon.

Mr J. ok Crawford was home on leave from Calgary during the Christmas season.

Bryant Andrews spent Christmas in Alix, as the guest of his mother.

Miss Sylvia Tillard has returned teaching after spending the holidays at Lousana.

Messrs. Robt. Whitfield and Jack Roberts, soldiers from Calgary, spent Christmas at their homes in Alix.

Mr. and Mrs. Chas. Stone, left this week to spend the remainder of the year in Drumheller and Calgary.

Dr. John Roper, of Stettler, a prominent Anglican clergyman, died on Friday, Dec. 29th, 4 years' failure.

Miss Blanche Bennett visited for a few days at the home of Mr. and Mrs. Tom Bogue, last week.

Mr. and Mrs. H. Rook and family, of Edmonton, were guests of the latter's sisters, Mrs. Jas. Campbell and Mrs. R. Mannon, during the holidays.

Mr. and Mrs. Boyd Crocker, of Lacombe, were Christmas visitors at the home of the latter's parents, Mr. and Mrs. T. Semple.

Mr. and Mrs. J. Rook and Mr. and Mrs. G. Rook, of Red Deer, were visitors at the home of Mr. and Mrs. D. Rook and Mr. and Mrs. Geo. Rook, last week.

While building in Alix for 1939 was not quite so heavy as in 1938, satisfactory progress was made. We are still growing. Two business blocks were erected in the business section, that of Mr. Bilger and Hotel Andersen; the Dobbins house, Towns Oil station, Gordon Wilson and Geo Rouse. There were considerable repairs and another business block will go up, in the near future, on the site of the old store to the North of Alix.

Mrs. V. Richards and Miss Phyllis Richards returned on Friday from Edmonton, where they spent Christmas with relatives

Mr. R. G. Handley has opened a watch and clock repair shop in the old postoffice building. A shop of this kind is needed in Alix, and we hope Mr. Handley will be well patronized.

To those who are interested in market favor information, be it known that a start will be made on Saturday, Jan. 6th, at Dr. Warren's office.

Beginning on Feb. 1st, Mr. John A. Stevenson, recently connected with the Three Hills Capital, will take a lease on the business of the Alix Free Press for three months. Further changes will be announced later

SCHOOL NEWS

Baby Stanley Whitfield, of the R. M. S. Hedon, is spending the Christmas holidays with parents, Mr and Mrs. R. Whitfield.

On Thursday evening, Dec. 21st., the Mirror High School Literary Society held their annual Christmas party in the Orpheum Theatre. About 150 [illegible] were present. Entertainment [illegible] of games and dancing.

Gun to Roy Miller, of Saskatoon, Sask., spent Christmas day with his aunt and uncle, Mr. and Mrs. Leo Roy.

On Friday, Dec. 22nd., Miss Hazell entertained a few friends on the occasion of her birthday.

The skating rink opened Tuesday, Dec. 26th., and preparations for organizing hockey teams are now under way.

Corporal Steve Christakos, Signaller of Canadian Engineers, of Kingston, is home on leave.

Haynes News

Mr. Jonah Brooks, who has been ill for many days, passed away at his farm home, on Saturday, Dec. 30th. Funeral was held on Sunday, Jan. 7th. Interment was held on Monday last.

A pioneer and old-timer, Mr. Walter Brennen, died in the Red Deer Hospital, on Dec. 29, and was buried in the Fairview Cemetery. He is survived by one son, Willard, and one daughter, Mrs. T. Elder, both of Haynes.

OBITUARY

Many old friends in Alix and district learned with deep regret of the passing of Mrs. R. E. Ferguson, of Ledue, B.C., on Dec. 30th. last.

Before moving to B.C. Mr. and Mrs. Ferguson were residents of Alix for some years, where they owned the building which is now Page's Pharmacy.

The late Mrs. Ferguson is survived by her husband at Ledue, also a son and daughter living near Dawson, B.C.

The Cradle To The Grave

It has been said with perfect truth that the education of mankind begins with the cradle and ends with the grave. For the native span of life no one can record new experiences that is, new to the individual and as long as experiences are encountered the process of learning something from them goes on consciously or unconsciously.

It is education in this broad sense that is referred to in the dictum that education begins with the cradle and ends only with the grave.

In recent years, however there has been a tendency to stretch the span of one's leisure which is devoted to education in the generally accepted connotation of the word, that is formal or organized education, the custom of people in civilized countries.

It is not very long ago that the academic career as the term is generally understood commenced at five or six years of age and then continued till 17 18 or 19 years of age. More recently the period of education in formal schools in Canada has been extended to 22 to 23 years and even longer where education includes special University courses for professions and post graduate courses.

But more recently a good deal has been heard about continuation and the extension in the direction of organizing classes and courses for adults has been growing and is so as if it may become popular.

The latest movement in the realm of organized education however is the establishment of classes for children, hitherto regarded as of pre-school age, from two to six years of age. Given birth in the United States this pre-school movement is reported to be spreading rapidly and particularly in the cities of that country and like all such innovations will no doubt, sooner or later be given a trial in this country. With that prospect in mind, the arguments in support of such a project are of interest and the movement is worth while watching.

Now, Yet Not New

Describing how these "nursery schools", usually operated with private support in the same room Blair Bonnard, are conducted, Catherine Mac Kenzie in the New York Times Magazine says

Boys and girls grouped by age from 2 to 2, 2 to 4, and 4 to 6½ psi and would play build with blocks act out doll dishes, look at picture books, hear time to music, listen to stories. The program which includes a daily health examination, regular times for washing up, for rest, and for food, is typical of the regime of the modern nursery school.

Each child arrives at [illegible] some [illegible] from 8:30 to 9 p.m. The children are brought and called for by fathers or mothers or another adult, and the escort changes by until means and formerly nurse skin have been examined. Any suspected infection is referred to the staff nurse. Once the children receive a clean bill of health, their day begins, varying according to the age of each. Mid-morning lunch or fruit juice, a rest for a few hours and a long nap afterwards, are standard routines.

"Learning to play," says Miss McKinnon, "does calm down excitement and a fad and a frill, one more excuse for giddy mothers to get rid of responsibility for their children," but, she adds, "Nursery school advocates say there is nothing new about the idea. The log family groups of pioneer days, the farm and common and uncles and aunts took care of companionship and guidance. Today's backgrounds, cities or home playgrounds provide the space for [illegible] and [illegible]."

Miss MacKenzie believes that "Every one who deals with children knows that they take delights from one another more readily than from grown-ups; that it is with companions of their own age that youngsters learn to take turns, to stand up for their rights, and to get on with other people."

Moody A Shift

Dr George D Stoddard of Iowa University is quoted as saying that "pre-school education is an old as the human race. It has merely shifted to plans and personnel. It has shifted partly because the only child is commoner than formerly, because the child separated by the city from father or mother or sister is more isolated from other children more in the company of adults than he once was, partly because mothers have more spare time for the nurture, mental activities of young children."

Some of the arguments advanced in support of nursery schools for their pre-school age children are that they provide the best possible adaptation in the rural districts in this country, but it would not be surprising if they should make their appearance in some of the larger cities in Western Canada, provided they operation south of the international boundary proves a success, with the possibility that later on they might be incorporated in the educational system of the country, should a popular demand for pre-school education develop.

Buy South

Unwanted English Boys Are Assistance To Join Up

One of the unanticipated results of the meeting of Dudley children from the large cities to rural areas has been the appearance of unwanted boys to join Dollar troops. In north Wales one new troop of 40 members has been started. Two large boys of schools with an enrolment of nearly 1,200 boys have applied into Scoutmastership as a major school activity. One of the reasons has been absorbing interest of the numerous cases of wartime public service rendered by Boy Scouts.

On a cold winter night, a few hundred feet of chimney on a hillside may make a difference of ten degrees in the temperature. Cold air slides down hill on a cold, still night.

Private Indiana of California have solved the visiting relative problem: their constitution limits the stay of friends and relatives to 14 days of any one time and 30 days in a year.

European Solidarity

A Community Of Free And Independent States Is Predicted

Europe eventually will be transformed into a community of free and independent states fully aware of their "economic solidarity," Count Wladislaw Sforski, premier of the Polish government in exile, predicted at a luncheon offered in his honor by the Foreign Press Club in London.

While admitting it would be premature to predict the future events, Count Sforski declared that the premier expressed the certainty that the "economic solidarity" which has been shaking the old continent had now led to the emergency of the idea of European solidarity."

"This idea secure or later will unite all nations in a community of free and independent states to whom it will bring home a European consciousness and a European patriotism," he added.

The premier said the conversations he has had with British leaders "have contributed to me the complete unity of views between the Polish government and the British government, both on matters the aim of which is achieved and the methods to be employed."

The Real Offender

Suspecting that one of her sons was paying undue attention to the maid, the officer's wife hit upon a ruse to find out the offender.

She rang for the girl. "Here, Mary," she asked, "suppose you had the chance of going to the circus with one of my sons. Which one would you choose?"

Mary thought for a moment. "Well, madam," she replied at last, "it's hard to say. I've had some good times with both of them . . . but just a real catching eyes give me his number."

Since the dawn of man, bad habits taken its yearly toll human misery in number it. The cancer is now throughout the entire world is estimated at $200,000,000.

Storage Life Of Fruit

Can Be Extended But Now Method Requires Great Care

For the past five years government horticulturists have been studying the breathing process of apples. This has resulted in a storage method by which it is possible, according to a Dominion government report, to add fully fifty per cent. to the storage life of fruit.

The research has brought forth the interesting fact that fruit in its breathing process takes in pulse As in nearly all forms of life apples in their breathing, take in oxygen and give off carbon dioxide. It has been found that if some method is achieved to accumulate within a tight room, a preservation effect is produced. Therefore by storing the fruit in a gas-tight room, carbon dioxide accumulates and the oxygen is reduced. In this increased carbon dioxide and decreased oxygen that adds to the life of fruit. Great care must be taken in this process, however, for if the carbon dioxide reaches a certain concentration the fruit will suffocate and die of a physiological disease.

The storage method, when it becomes generally adopted, will relieve other fruits and also for vegetables. Under ordinary cold storage, apples and other fruits are stored in a temperature of 32 degrees Fahrenheit. At this temperature however it has been found that McIntosh apples develop a disease known as "Low Flush" after a short time completely spoils them. Under the new storage method it has been found possible to prevent the development of "Core Flush" and fruit can be kept longer in storage where it will retain fully their fresh. Experiments as reported with Bartlett pears showed that by this method they can be stored at 32 degrees Fahrenheit normally, without any loss of maturescence. It is good to know that the season for the sale of those favorite foods may be extended.—Toronto Star.

Stock Tradesmen

Qualifying Stock Shows In Ontario Required, When Used On Farms

The Ontario department of health has issued instructions that tuberculin tests be applied to Ontario hospital patients affected with dementia praecox have not been satisfactorily explained.

The treatments consist of injections of tuberculin or natural protein, following complete into the patients. Methanol paralysis and temporary convulsions followed by a short coma, while a series of months is injected into the veins. In some cases when the patients revive from the coma, their minds are free from disease.

Department heads state that since 1927, 1,000 patients have received insulin treatments with approximately 85 per cent. of them reported improved, and 35 per cent. restored to their original mental health or nearly so.

Metrazol treatments have been administered to 1,000 patients with 50 per cent. proving benefit and 25 per cent. showing marked improvement.

Trefle lights on a commercial trunk are now in use in Canada and Newfoundland, the trunk driver signals green meaning all right to start, or red meaning stop.

Great Britain has 250 separate police forces, but one-third of the entire police personnel is in the Metropolitan police force of London.

Dunube Is Great River

Hot Hungarian-Born Writer Declares It Is Never Blue

The Danube or Europe's great river Unsquared 1857, the Save the Theiss and the Tisza are more creeks the Rhine the Rhone and the Elbe are proverbial streams and the Vistula and the Volga are famous frontier floods. The Danube, Rose modestly "Though two thousand miles of Europe's heart and it has flowed through twelve thousand years of Europe's happy history, it has never been a river of boundaries. Through the golden banks of Austria Hungary it is a shuttle of fate and has been a fate past the ugliest Balkan lands Yugoslavia Rumania, and the northern flank of old Soviet Turkey. It was a river in the border stream of Russia when it emptied into the Black Sea and may be such again, he says.

Dogs For Military Work

Two Trained Dogs To Accompany Every Military Unit Leaving Toronto

Toronto Humane officials announced that they are working on a plan whereby two trained dogs will accompany every military unit which leaves Toronto for active service.

The unit will be trained to find wounded men take them to first aid supplies and to "sit" until help arrives. Carl Kinsley a dog trainer whose wife was saved by a dog in the Great War has volunteered to train the animals.

Canned beef and cabbage is one of the most popular dishes in Japan.

MICKIE SAYS—

Situation Is Changed

Japan Loses Market In Germany For Raw Silk

The situation in the silk industry of the world has undergone a change of a vast amount of debate. Whole books have been written about the product of cocoons which can be put to such a multiplicity of usages both as a food and as an article of utility in international fields of manufacture and commerce. Japan has had a monopoly in the silk industry, and Mr. Wright, in discussing the matter, has made it responsible for bringing economic to parts of the world.

He has pointed out that the war and government policy has encouraged the silk industry in Germany, and that other countries have also made progress in the production of silk. Before the war Japan exported 60,000 bales of silk to Germany, but now that country is producing its own silk. Japan has also lost the Russian market, and the United States has increased its production in the Far East so that Japan has to look to other markets for the sale of its silk. Japan has also lost the Italian market, and it is hoped that the Italian market will be regained. That and Italian industry is also now getting cheaper machinery for its silk mills, and the economy side built in Japan is better.

The actual situation is changed, and Japan can no longer rest on her laurels. Japan and Manchukuo must therefore try to capture the markets of the world. Japan's silk industry is not a question to her as they would have been if Germany and Great Britain had only noted that what they used and sold. Japan now has to capture its return from nature if it seems is fighting for the Allies Montreal Daily Star.

Silver Kittens

Sandlings Sure To Bed, White, Blue Or Black

There isn't much that can be done about making the unwanted worse, but John Gong authority on agricultural lungs has some suggestions for an orderly approach to the issue of unwanted sandlings.

He would limit the amount of sand and lungs created by cultivation to the paper rose crosses on pasts and the wooden spoons that go boards placed in front of other wh Essex.

Liverpool has set an excellent example by using colored sandlings in red, white, blue and orange" to send in an interview. Some of these are arranged in attractive patterns. Gleng regards the possibilities of decoration "on a heaven-sent opportunity to provide employment for hundreds of young artists and designers who are suffering the empty body else as a result of the war".

Around The Corner

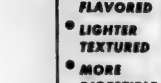
THE RIVER OF SKULLS



© Press Publishing Co
W. N. U. Service

MARSH

CHAPTER IX —Continued

It was the hot month of the northern summertime of the Cree Indians heed that winters in the forests Already deer animals had preceded the barks to the cool wind-whipped barrens where the mosquito pest and hot flies are less troublesome But the canoe bound for the River of Skulls did not linger in the high plateau country. They had eaten provisions with the fat deer was their goal was too far and the summer too short.

Then, one day, the country ahead began to fall away, the valley narrowed, and a muffled roar reached their ears. Soon the canoe was caught in powerful swirls of water. Hours later they returned. For five miles they had followed the speedy of the gorge jammed with boulders piled high by the ice and flanked the river impassable to a canoe. For three days they slaved with the canoe and outfit over rocks and boulders, Heather insisting on doing her share of the portaging with the lump-line strap over her blonde head. Below the canyon the canoe was again put in and shortly the river widened into a lake where they camped for a day's rest.

There in an spring on the high Unknown plateau Walter dug hard with occasional sheer Survive and frosty nights in June, then summer, the magician, touches the land of the tundra overnight with its vivid blooms and leaves spring to life. The rolling barrens between the immense lakes and rivers become gorgeous carpets of carmine moss, velvet to the feet, splashed with the white tongues of the bake-apple and native berries, the pale rose of the fragrant Labrador tea and the pink patches of the Irish.

And now summer had come to the arctic valley of the Kahanah, and almost daily, rainbows arched the river for Ungava to the Mackenzie.

"When are we going back to look for caribou on the barrens, Alan?" asked Heather as the tired voyageurs sat by the fire after their hard labor, for the two small travelling tents with cheese cloth mosquito lungs "I'd like to see the country up there where the caribou are."

"Soon enough, Heather," replied Alan. "Then you can shoot an out of the boat from the shore, here. We've got to get out of this country!"

That's right, Heather agreed Mackord, a soothing arm circling the shoulders of the girl who shared perhaps a risk her frightened eyes pointing in the opposite direction.

Trail Of Fire

The Peterboro caught the smoke of Ba Ja drew and sent into the heart of the white water where the river boiled and churned and bulked into a frenzy of foam and flung spume until hidden by a rocky headland. Peterboro appeared through the boulders over which the drove water mounted high to burst into a cloud of spray. Among the waters of a pellet eyebrows and the victims of rock where the river the heel-footed into white fury dodging and weaving ledges that were of the river from none to stern, the Peterboro raced and plunged past the Ba Ja drew where bolted Nakapi could pour upon them a with ring fire.

On down the river they pushed through the day and into the long twilight gloaming. Side after side the canoe and the hills of the ages passed. Then, at dusk, Heather sang to push the spruce of the above when the tired canoemen began to look for a place to camp. At a widening where the river had rose from its canyon bed but the river not strong, the boatmen swung the nose of the canoe toward the bank. The Peterboro with the bow of the Peterboro with the heavy rope, leaped to a submerged boulder and before the crew could move a relief and they were in the river waist deep. Alan was unperturbed. Don't let the peccadillos stab!" cried Alan as he came to rest on the top boat. "Are you all right Heather?" he called to the girl who had been thrown wide and was swimming back to the canoe pressing on the rocks. "I'm all right," answered the girl who swam like a duck.

"All right" answered the girl with her face off quick, before you lose our boat stuff."

Then, with the girl aboard, standing on the submerged rock as he held the bow line, Alan

Practicality the crew worked, in water like ice, to bring the half filled boat to shore. Then they turned to shout water where they freed the provisions and bedding and gathered upon bags from their bushings and put them on the beach, then emptied the canoe

"Any paddles gone?" cried Alan "Only mine," answered McCord.

"Come on, Mose, they'd drift ashore in the last bend!" And the two boys, leaping into the canoe in the mid fishing light that seemed to have sunk shortly with the last paddle.

Then white a fire was kindled the flour bags were examined.

"Not much wet in two bags," observed Alan, "but we'll give some of it if we can't get much enough! The provisions's all right."

They opened the wet bags and removing what flour had not been reached by water, placed it in spare bags and hung them overnight out to dry by the fire. Owing to the fact that everything of value in the canoe was lashed in the Heather they had not nothing except the wear. Their bedding was dry.

While the steam rose from their wet clothes and their warm bodies, dried by the heat generated by stolen, they stood in their bare feet drying out beside the fire.

(To Be Continued)

Making Them Attractive

Children Enthused With New Method Means Gas Masks

Special "Mickey Mouse" gas masks are being distributed for London children to solve the problem of getting children to wear the ordinary gas mask model.

The new masks are made in different colors and have two snout-like nose and a result protruding piece of rubber over the eyes.

In the Borough of Wandsworth where distribution has been completed, Lt.-Col. Rait Pretoria officially declared: "The children love the masks and the mothers are having a job trying to convince them they are not merely playthings."

The Great Wall of China built in the third century B.C. was equipped with a crude forerunner of telephone communication, in the form of balloons being hoisted between guard stations.

Snakes are regarded as guardians of treasure in Siam.

The Fighting Irishmen

Thousands Going Voluntarily To Battle In British Army

The Argument was Finnigan, aka Although Ireland, or Eire, to give the Emerald Isle its present name, is now an independent nation and free of England, the young Irishmen, according to Oswald Carnegie Wood, who is watching the scene in London, are enlisting in the British army by the thousands and the steamers that go from Ireland to England are full of them. The generous sense of their country has proclaimed its neutrality but those young Irishmen who have left the neutral town there is a prospect of a thumping good fight, and their inclination is to fight for England now as they have ever fought for her in the past

England has never had any better fighters in her army than the Irish soldiers and is never likely to have them the Irish and the Highland men in the front rank of the troops and the Germans in the hot war called the United State "the home of hell" If one must be it is well for the democratic nations to have in their armies men who have distinguished for fighting in their blood During our first War Irish in the British army and the Irish in the South fought for their respective causes with a valor that commanded the admiration of their commanders

Have Long Memory

Wild Goose Chaser Fooling Grounds That Prove Fairly Safe

The wild goose would appear to be in no danger as elephants when it comes to remembering. And that's why, say sportsmen at Lake Lac, Saskatchewan, there have been few goose on the Big Quill lake for many years.

In Wynyard, a local annual was inaugurated in 1931 by Frank and a former of the district came forward with a handsome prize.

Ten years ago a party of "sports" in boats sailed over the Big Quill and fired after dark. Great spotlights on the geese resting in the middle of the lake. And of course, the flock started birds before they could take to flight.

Since then few geese have settled on or near the Big Quill to feed in the night.

The explanation appears to be that the geese have a long memory that will be the case for many years to come, since it seems to be for or more years of age. The older geese invariably fly in the van of the "V" flight and apparently lead the following grounds which, in their experience, have proved to be comparatively safe.

The Penguin Pest

Baby Stove Sheet To Be Spread For Byrd Expedition

For news of the world, as well as supplies for the Byrd Antarctic expedition, members of the United States Antarctic Service Expedition will have a "Penguin Post". This will be a mimeographed sheet issued once a week by the Byrd Expedition Headquarters, an official of the expedition, who formerly was a reporter for the Associated Press.

"We'll have stories based on radio messages from the Byrd Antarctic and also reports of activities at each of the bases," Paul Siple, Boy Scout of America, said.

Arrangements to supply about supplies of mimeograph meeting the requirements of Paul Siple, the Military of Food has advised them to obtain supplies of mimeograph from special health food stores and other similar establishments. No special mimeograph paper will be distributed through the ordinary trade channels.

The society has been pressing for the provision of a special penalty rate for organizations so far without success and has pointed out that such, mainly imported, are so essential food to vegetarians.—Manchester Guardian.

Vegetarians And Rationing

Those Who Do Not Meet Meat Ask For A Special Allowance

The Vegetarian Society, from its manchester headquarters, has issued a leaflet on the question of rationing for ill advised vegetarians.

The latest statement made by the Ministry of Food dealing with meat and rationing is introduced arrangements will be made whereby vegetarians will be able to remember themselves and hence compare at the local food office with other consumers.

This is however even Stansfeld, Dyson and Stanley Bettenley controller officer of "Joint Food." The Minister, added Mr. Stansfeld, was prepared to supply about supplies of mimeograph meeting the requirements of Paul Siple, the Military of Food has advised them to obtain supplies of mimeograph from special health food stores and other similar establishments. No special mimeograph paper will be distributed through the ordinary trade channels.

The society has been pressing for the provision of a special penalty rate for organizations so far without success and has pointed out that such, mainly imported, are so essential food to vegetarians.—Manchester Guardian.

Was Not Brilliant Scholar

Lord Snow-Baldwin, Britain's War Secretary, Had High Ambition

Leslie Snow-Baldwin, Britain's War Secretary, was not a brilliant scholar at school, according to B. L. Goodward, his old headmaster.

Sir Hallward of Clifton College in a speech at London said Snow-Baldwin found his studies uphill work and did not shine at games in the middle of the school. But he had high ambition and was a determined student.

His interest even then Stansfeld, Dyson and Stanley Bettenley controller officer of "Joint Food." The Minister, added Mr. Stansfeld, was prepared to supply about supplies of mimeograph meeting the requirements of Paul Siple, the Military of Food has advised them to obtain supplies of mimeograph from special health food stores and other similar establishments. No special mimeograph paper will be distributed through the ordinary trade channels.

The society has been pressing for the provision of a special penalty rate for organizations so far without success and has pointed out that such, mainly imported, are so essential food to vegetarians.—Manchester Guardian.

FRIDAY, Jan. 5, 1940

Canada's First War Loss

Ottawa's announcement that preparations are under way for Canada's first war loan, now scheduled to make its appearance during the first quarter of 1940, is good news inasmuch as it will provide the cash and file of Canadians with an opportunity to make their first direct contribution to Canada's war effort. The backbone of Canada's participation in this war will be financial because of, the vast amount of foodstuffs, materials and military supplies that will be required from this country. True, much of these materials will be paid for by the Allies but some of the British purchases in this country will have to be financed by Canada, and Canada's own program will be extensive. It seems probable that at least 40 per cent of the national income will be required in the next year to meet the cost of war and the other expenditures of all governments in Canada (and to finance British purchases here.

Canada has come a long way since the last war in developing a fiscal system of equality in citizenship and its corollary responsibilities. As announced in the first war budget, this war, so far as Canada is concerned, will be financed as far as practicable on a "pay as you go" basis, and paid for by all on the general basis of ability to pay. It will be impossible to tax for the entire cost of carrying the program into action within a year, but a bumper taxation, hence sensitive and rotard the expansion of progress of production and national income. Tax revenues, therefore, must be supplemented through borrowing by means of domestic bond flotations.

It may, too, be taken for granted that there will be no "tax free" bonds in this war, that will gravitate to safety holders and enable the rich to escape their income taxes. Nor will there be any duplication of the absurd and prices from war materials witnessed during the last war. The safeguard against this is the Excess Profits Tax, enacted at the special war session of the Canadian parliament.

It is indicated that the forthcoming war loan will have bonds as low as $50 in denominations, and it is the hope of the Minister of Finance, Hon. J. L. Ralston, K.C., that every Canadian will become a creditor to the Canadian Government through his or her ownership of a Government bond. A creditor relationship of every citizen with his government is an assurance of good government and of good citizenship.

Conditions in Canada offer propitious circumstances for the loan when it comes. War orders and the large Western wheat crop are beginning to have their effect in expanding business activity. Employment is increasing and the physical volume of business, as measured by the Dominion bureau of Statistics indices, is approaching an all-time peak. With the increased activity generally in the business world and pound of its contemplation, the first war loan can be expected to meet a ready reception.

Insurance Companies and the War

Montreal, Dec. 29—Confidence that Life Insurance would shore up the general business improvement awaiting Canada in 1940 was expressed today by Arthur P. Earle, president of the Canadian Life Insurance Association.

"After careful consideration," said Mr. Earle, "and with a view to the safeguarding of Canada's enviable insurance structure, a War and Aviation clause was adopted, with the following provisions:

"No extra premiums for military or naval service in Canada, excluding aviation. Insured has option of paying required extra premium for service outside Canada, excluding aviation.

If extra premium is not paid and death occurs while serving outside Canada or within six months after return to Canada, all premiums paid will be returned with 2 per cent interest compound annually. Those who engage in aviation service in Canada will be granted the premium option, but no option is granted to pay extra premiums to cover aviation hazards while in Canada outside Canada. Extra premiums run from $10 to $60 annually per $1,000 of insurance according to nature of service. Of course, these restrictions apply only to new policies. Old policies carry no restrictions governing military or naval services".

The Week in Edmonton

Edmonton, Jan. 3 — Federal government stabilization of much-bred fur prices was promised last week, according to information given out by D. R. Hardy, northern Alberta director on the dominion furbreeders' council. In September last fur breeders requested some such government move as a means to meet war time conditions. Prices will be fixed on a three year average Mr. Hardy now discloses.

—o—

Alberta will make an early start on a publicity campaign to attract more tourist to the province, and a few days ago special funds for this purpose were appropriated. Owing to the necessity for a January start it is not feasible to wait until the regular session for the vote. Hence the present action of the government.

—o—

Provincial work crews will improve the dominion section of the Grimshaw winter road to the extent of $12,000, it was announced this week. Clearing and other work will be done. Although the province is putting up the money, the dominion has agreed to reimburse Alberta, as the work will be north of the boundary. Since last summer, Alberta has spent $28,000 on this 300 mile winter highway, the money being any logs from last year's operations or other road projects.

—o—

Gas attacks on gophers will commence in the spring. Like rats, gophers are a pest. They damage like hessians and inject plague into the blood stream, with terrible results. So the provincial and municipal health departments are co-operating in a mass gas attack over wide areas.

—o—

"What's your brother Dick doing now?"

"Dick's a stock salesman."

"And what's Bill doing?"

"Bill's a minister."

"And Tom?"

"Tom's in politics."

"And what are you doing?"

"I'm farming and feeding Dick and Bill and Tom."

Sport News

A boxing contest in the Legion Hall has been set for Friday, January 19th., which will be a tune up for the Alix-Stettler Pinch and all concerned will be members of our own local club. The receipts will be used to take our boys to the Pinch in Calgary. The following members to date choose to up hold this district among 3 Wilson, Ernie Wilson, J. Lajeunesse, A. Overland, Jack Collins, Lee Miller, Orma Zeman.

Other boys will be picked in the course of training. For our local contest an endeavor is being made to have two Bantam boys join us and choose J. Wilkinson and Reg. Giddens.

—o—

The Great Bear Lake radium mines produced over 300 grams of radium during 1939.

Approximately 50 per cent of the total production of the mine may better is expected from Alberta.

Canada's War Effort

Ottawa, Dec. 29—Canada's war effort is the subject of a statement issued by the war committee of the Cabinet, according to announcements made by the Prime Minister of Canada. The statement issued by the Rt. Hon. W. L. Mackenzie King, reads:

"Mr. L. W. Brockington, K.C. LL.D., of Winnipeg, has been appointed to act in an advisory capacity to the war Committee of the Cabinet in the records and interpretation of Canada's war effort; to advise and send the Government in provide material and essential information in these matters to the people of Canada, and to the Government of the Unit Kingdom, and to assist the Prime Minister by keeping chronicle and other records records of the progress of Canada's war efforts.

IN MEMORIAM

—o—

THE VACANT CHAIR

In loving memory of Thomas Gordon Bullivant, who died January 6th., 1938.

The rolling season of Life goes on
But still the sunset shade
Reveals the love of the rules and ray of him
Who sat there.

The golden pages were open,
And a gentle voice said "Come".
With farewells all unspoken
He calmly answered home.

From his dearly beloved
LILLIAN.

CHRISTIAN SCIENCE

"God" is the subject of the Lesson-Sermon to at Christian Science Churches on Sunday The Golden Text is Joel 2:27 One of the Bible citations is: "Let us hear the conclusion of the whole matter: Fear God, and keep his commandments: for this is the whole duty of man" (Ecclesiastes 12:13). One of the correlative passages from the Christian Science Text-Book is the Scriptures" by Mary Baker Eddy, is "As the myth logy of pagan Rome has yielded to the spiritual ideal of Deity, so will our mob rial theology yield to spiritual ideas, until the fable gives place to the infinite, oldcause to health, sin to holiness, and God's kingdom comes to earth, as it is in heaven" (p. 580).

MIRROR NEWS

Sailor Stan Whitfield who has been visiting his parents left Wednesday, Jan 3rd, for Halifax, where he will assume his duties on board the H.M.S. Nation.

On Friday afternoon Jan 5, Mr. L. Murray entertained her bridge club at her home. Honors were won by Mrs. F. Smethurst and Mrs. Cairns.

A three team local hockey league has been formed here. The captains of the teams are John MacLeod, Glenn MacLeod and Oliver Vreeland. The teams expect to play twice a week.

Curling is now in full swing with ten teams formed. The following skips were elected: F. Smethurst, J. Cairns, J. Hansen, D. F. MacLeod, A. D. MacMillan, A. May, H. Brook, H. Clarke, H. Simpson, J. Kerr.

On Thursday evening Jan. 4, Harmony Chapter No. 60, O.E.S. held their installation of officers for 1940, with Mrs. L. Conway, P.M., as installing officer, assisted by Mrs. B. Fray and Mrs. D. Reeder. The following officers were installed: W. M. Mrs. K. Hedden, W.P.: Mr. H. Conway, A.M.: Mrs. M. Armstrong, A.P.: Mr. H. Reeder, Guard; Mrs. F. Fawcett, Secretary; Mrs. A. Conway, Treas.; Mrs. L. Calvert, Treas.; Mrs. E. Ray, Marshall; Mrs. A. Goodsell, Chaplain; Mrs. D. Reeder, Adah; Mrs. W. Crook, Ruth; Mrs. A. Dermott, Esther; Mrs. B. Fray, Martha; Mrs. B. Smethurst, Electa; Mrs. L. Conway, Warden; Mrs. L. Jackson, Sentinel.

Haynes News

Funeral services for the late Mr. Jacob Brodo, who passed away recently, at the age of 53 years, were held in the Hayner Community Hall, on Tuesday, Jan. 2nd.

Mr. Brodo came to Canada from the Orkneys, in S. Eastern Russia, over thirty years ago. He became a Canadian citizen, and after their marriage, Mr. and Mrs. Brodo settled near Wetaskiwin, later moving in the vicinity of Haynes, where they have lived for the past twelve years.

Besides his widow he is survived by three sons, William, in Edmonton, Walter and Albert at Haynes and one daughter, Alice, at home.

Services were conducted by Rev. A. L. Carr, of Leeming United Church and the I.O.O.F. Lodge (Clive), of which he was a member.

The beautiful floral tributes testified to the esteem in which Mr. Brodo was held by the community.

The body in the hearse of those in the funeral cortege.

A Disastrous Fire

On Thursday evening of last week the home of Mr and Mrs. Geo. Whitfield, on Willock street, was completely destroyed by fire. The origin of the fire is unknown. Mr and Mrs. Whitfield were out spending the evening with some friends when the fire started and the house was locked up. All contents were destroyed. It was a new home, all completed except the interior work on the walls. The loss is a heavy one for the young couple and they have the sympathy of the entire community.

It is too bad that one must can't afford a water system, to help combat such a peril to local property. It is to be doubted whether we can much by the kind of economy when you take into consideration the exhorbitant insurance premiums we have to pay if we do insure and the added risk if we insure and the added risk if we cannot afford to insure.

—o—

Junior U.F.A.

The regular meeting of the Junior U. F. A. is on Saturday, January 13th. Remember the membership competition, all joining on or before Saturday are eligible to compete, with the prize going to the member who brings in the greatest number of other members before the end of February.

Sport News

Boxing eliminations for Northern Alberta will be held in the Legion Hall, Alix, on Friday, Feb. 9th, when the North will Champion will be crowned. The winners of the north will then compete in the Alberta Finals at Calgary two or three weeks later. At least 6 local boys will compete on Feb. 9th. Roy Riddons is at present the 147 lb. open champion for the North and his opposition will probably be from Edmonton. The management of the local club feel sure of taking more championships at the Alix show entered. Your support is needed in this endeavour to bring the best to Alix.

This coming event will cancel our previous announcement of the 19th of last month.

NOTICE

Anyone interested in the purchase of the late Donald Lean for war purposes, kindly call at the Municipal Office, Alix.

The Nation's Backbone

The youth of to-day will be the backbone of the nation to-morrow. The world is empty in the question: "What will to-morrow bring?" Being built up now in order that the nation of to-morrow may be virile strong and characteristic. In the foundation for a Canada that will be able to take its proper place in the new being told."

These are important questions for upon the answer to them depends the future welfare and destiny of the country.

In the light of the present day fate of a substantial percentage of our youth, many of whom still find themselves without gainful employment on any types, into abandoned and should be ready to take upon themselves the full duties of citizenship the future in observes. To banish the obscurity and tribulation it into certainty it is essential that more thought be given to the problem of youth and that definite action be taken to prevent [illegible] sooner.

Canada is now engaged in warfare to preserve our heritage of democracy. While this struggle is going on, should we not now be build, that the democratic institutions will be strengthened and consequently worth preserving?

At the outset of the war it was the popular impression that war would solve this problem, at least so long as the conflict lasted. It was the prevailing supposition that a good many of Canada's unemployed youth would be absorbed into the fighting forces and that others would find employment in the manufacturing industries engaged in the construction of armaments, and marine and aerial crafts and auxiliary industries, but there is some reason to doubt that this will be the case

Unquestionably the fighting forces and industry will provide activity for some of the idle youth of the country but there is no reason to believe that it will not take care of them all for the duration of the war and there is still left the problem of providing for them after peace is signed.

* * * *

Second Class Limited

The character of the war up to the present leaves the impression that the number of fighting men required from Canada will be strictly limited and under existing regulations only those who are physically perfect are being called up for the manufacturing industries directly related to war effort, only highly skilled workmen are being taken at present, leaving no provision, other than the ordinary commercial channels, for the ever increasing resource up to rigid physical examination or who are not highly trained.

To label the youth, then not only a training for industry essential, but it is necessary that work be found for them. The youth training programs is all right as far as it goes, provided the courses are adequate, but when those youths have completed their courses, there is the work for them.

In the United States, where conditions are somewhat similar to this country the American Youth Commission of the American Council on Education, which has been studying this problem, says, in a recently published report:

"There is grave danger in the widespread belief that a war boom will solve all our unemployment problems, including the special problems of unemployed youth. The Commission, therefore, feels it is imperative to point out that many of the war-boom jobs will not be open to inexperienced young people.

"While it seems probable that business will be stimulated by war purchases, the most optimistic estimates indicate only two or three million new jobs for the many millions of unemployed workers and youth. The Commission believes that the remaining unemployment will be concentrated heavily in the lower age groups."

The Commission found, based on the 1937 census figures that one-third of the unemployed workers in the nation are young people. 15 to 24 years of age. That the rate of unemployment is highest among youth between 20 and 24 than in any older age group and highest of all for young people between 18 and 20 who are out of school and seeking work.

Under modern conditions," the Commission's report says, "it is clear that young people have increasing trouble in getting a start, even in fairly prosperous times. Opportunities for self-employment have been on the restricted by the fact that the members of firms who retain the age of 16 each year is more than twice as great as the number who die or retire. Opportunities for work in family enterprises are reduced by the increasing concentration of business and the diminution in the number of economically small businesses. The restrictive rules of trade unions and professional associations have lifted maximum ages and limited the openings for apprentices and beginners with increasing severity during the depression."

* * * *

A Federal Duty

In the light of this situation, the Commission's conclusions are inevitable. They suggest it is the duty of the federal government to provide "useful public work which should be planned with special regard to its educational quality" for those young people that "vocational guidance should be part of the plan," and "should be based on sound study of the possibilities of employment in the various occupations."

Stating that the cost need not be more than $400 per year for each young worker the Commission points out that from that amount there will be various deductible assets The contributions of those young people to the aid of their families will undoubtedly lessen the need for public assistance. The work on which they are placed should be designed to provide constructive work experience in such a manner that the work does in fact be a true service to the community Work which meets these standards will certainly add to the wealth of the nation

The application of some such program as at least a partial solution of the problem in this country is certainly worth pondering.

Full Of The Moon

The actual pull of the moon on the surface of the earth depends on the varying distance at which the moon is to be found. But the results obtained depend on whether or not the moon is working in co-operation with the sun.

Flutter muscles in the palm of the hand cause shaking. But an alcoholic cannot collect, shaking are of the animals, found 11 honorary in the nuscles before they could straighten out the fingers.

Advice To Country Walkers

Walk, all the road, or at the extreme outside edge of the road, and on the side facing automobiles, so that you can see them coming.

The U. S. Department of Agriculture has estimated that 10.5 acres of hay can be raised by one man with a one-horse rake in one day.

The Shetland Islands

Some Interesting Information About Territory Now Very Much In The News

German air raiders have brought the Shetland (or Zetland) islands into the news. Public notice is a rare experience for any part of Britain.

The Shetland group lies north of Scotland, makes a Scottish county and is the most northerly British possession in Europe. There are [illegible] islands, but only about one-quarter are inhabited and in some of them the population consists only of a few lighthouse keepers and shepherds. Altogether the islands have an area of 352.3 square miles, and in 1931 had a population of 21 615. Lerwick, shown above, is the only really decisive town since 1561. The largest [illegible] in the group, with 6 000 of the people Malcolmsa is 54 miles long and 21 miles wide, but the coast line is so broken that no spot in the mainland is more than three miles from the sea, and they are the highest cliffs in Britain. The islands owe many of their features to nature in a more than ordinary sense.

Ancient peoples who planted the more important of the islands are Yell, Unst Fetlar, Whalsay, Bressay, Burra, Trondra, West and North Burra, Papa Stour, Muckle Roe, Vementry, Foula and Fair Isle. The usual economy is unsophisticated, with great crafts and deep industriousness, but the latter is limited by poverty and barren.

Spinning is the main occupation of the Shetlands, and their stationary townships they are fishing mostly for their own food supplies and subsistence. Women do most of the spinning, and they have found time in the islands' distinctive knitted goods industry. The Shetland ponies are known the world over. The cattle also are diminutive in size, and sheep are of a hardy, mountainous many of the characteristics of the goats" Fish are abundant, they have been caught in the surrounding seas in an immense variety of sea birds. Many species of these rare German raiders are interested in the islands' economy—the attractions comes from their nesting sanctuaries. Some of these species not for sway, and those dogs, and sheep are found nowhere else in the world except in the Shetlands.

Doctors On Postage Stamps

United States Pays Honor To Prominent Medical Men

Fifty famous doctors of medicine, dead but living proved, will join together three months hence in Cleveland, Ohio, and there, working together until light and fluffy. Add egg and yolk mixture, vanilla and cocoa. Add flour gradually, beating well after each addition. Spread on greased baking sheet 12x8 inches. Bake in moderate oven (350 degrees F.) 30 minutes, or until done Cut in squares and remove from pan while slightly warm Makes about two dozen squares.

A Call TO SERVICE on the Economic Front

"Materials and money count for so much in the war that a resolute, loyal and enthusiastic economic front line may be the determining factor."

— Rt. Hon. Arthur Meighen
MINISTER OF FINANCE

To your readers question "What can I help win this war?" — the answer is NOW. On Monday next, the Government of the Dominion of Canada will offer the Five War Loan. The purpose of this Loan is to provide money to carry on the war, not only on the battlefields, but all along the Economic Front.

Let us explain what the Economic Front means. It means a war in which the entire manual, industrial and financial resources of the country are used to defeat the enemy. It means a "total war" in which every citizen takes a part, in which his personal resources must support those of the Nation.

In such a war, one of the chief weapons is money. Where is this money to come from? There is only one answer. It must come — and come voluntarily — from the savings of our people. The difference between us and the Germans is that we, of our own free will, lend our money — it is not ruthlessly taken away.

This is your opportunity to do your part in this struggle against Hitlerism. The eyes of the world are upon you, upon Canada, one of the strongest members of the British Commonwealth. Canadians must show that their strength and their courage are all in this fight against "brute force, bad faith, injustice, aggression and persecution."

The news of the success of this Loan must go ringing round the world.

Be ready to buy War Loan Bonds. They will have the proven safety and reliability of Dominion of Canada obligations. Any Investment Dealer or Chartered Bank will take your subscription. The quicker the economic war is won, the greater will be the saving of human lives . . . the swifter the collapse of the enemy.

MUNICIPAL DISTRICT OF LAMERTON No. 100

The 16th. meeting of Council of the M.D. of Lamerton No. 100, was held at the Municipal office, Alix, on Saturday, Jan. 9th. 1940.

At 10:00 the Deputy Reeve called council to order and business was transacted as follows:

Secretary read minutes of meeting of Dec. 2nd, 1939, which were confirmed.

Moved by Councillor Heebt to request the Dept. of Lands and Mines to render us a statement of the proceeds of rentals on school lands in our district. Carried.

Secretary read By-law No. 51. Third reading accepted and adopted.

Secretary read By-law No. 52. Third reading accepted and adopted.

Moved by Councillor Heebt to assign all Municipal Taxes to the Royal Bank, to secure loan Carried.

Moved by Councillor Nels to extend date for payment of 1939 Tax Notices, until Instalments, to March 1st, 1940. Carried. Councillors Heebt and Dittc dissenting.

Secretary read letter from Constable C. A. Gair, recommending that house occupied by Miss Williams be made warmer.

Moved by Councillor Nels to accept recommendation and that Mr. Williams and family be given move into our house at Mirror and also that he be granted $15.00 per month for groceries Carried.

Moved by Councillor Nels that we make relief advance to W. Carson at the rate of $15.00 per month. Carried.

Moved by Councillor Nels to recommend that relief advances be made to O. A. Jamieson at the rate of $30.00 per month. Carried.

Secretary read letters from Rd. monton General Hospital, advising admission of Nick and and Mrs. Reynoldie.

Moved by Councillor Nels to accept communication. Carried.

Secretary read letter from the Red Deer Board of Trade, tal advising admission of Lad with Kvang.

Moved by Councillor Heebt to accept communication. Carried.

Moved by Councillor Weathe till the end of the year of the of gravelling the Tees road be changed to Division No. 2. Councillor Weatherill to act as farmer.

Moved by Councillor Weatherill to call tenders hoists and shed at W-W-14 and rapidly shingled Stewart for $30.00, $36.00 in cash and balance in fall. Carried.

The Mayor reported that the Montreal Trust Co. had refused us to refrain from taking title to the SE-24-39 2S-W-4th., with the agreement to pay $900.00 in cash and the proceeds of payments under Agreement for Sale, total taxes up to Dec. 31, 1939, and penalties are retired in full. He further reported that to avoid legal proceedings, he had purchased their equity.

The Council accepted the report and confirmed the Mayor's action.

Secretary read letter from Alix Agricultural Society Requesting a grant of $100.00 for re-collection of arrears and with letter advising admission of Mrs. Harris, Lawrence Beckwith, Harry Bell, Mrs. McDermond and Albert Sutton.

Communication accepted and a request made for more information re Beckwith and Bell.

Mothers' Allowance Dept. reported advising that Mrs. Julia Roberts had been granted an Allowance of $20 per month.

Communication accepted.

Correspondence from Provincial Royal Alex Hospital advising admission of Miss Mary Long. Communication received.

Correspondence from Provincial Director of Assessment, advising that the assessment of the consolidated farm lands had been reduced 10 per cent.

Council Note presented this ruling on the grounds that our assessed value is too high in comparison with adjoining districts and requests them to reconsider our appeal and grant the additional 5 per cent. reduction.

Secretary read minutes of the first meeting of the Bentley Health Unit. Accepted.

Secretary read Financial Statement as at Dec. 31, 1939. Accepted.

The following accounts were ordered paid:

Ian Clark, relief	$ 15 00

The Mayor's report of relief expenditure for December was presented and approved. The Council ordered a letter written to Department asking that the wood a deer from Mr. Todd's premises be returned and believe mistaken will be corrected.

A report from Hostels Inspector Sutherland, re conditions on Kay Lang Outfit, The Canada Lang Outfit, Art Bailey Cafe and Poolroom Shop, stated that Dr. Warren has been requested to see that a re-test (tuberculin) be carried out on the cows owned by Messrs. Lyle and Barker, our milk producers, also the premises to be made sanitary.

A letter from the Workmen's Compensation Board, asking to be informed whenever a permit to build exceeding the value of $500 to be issued by the Village of Alix.

A letter from Secretary of Advisory Committee re Relief Grant from [illegible] $94,000.

It was decided to hold our next meeting on Feb. 5th, the date of regular meeting.

Council then appointed Bylaw Officer on motion of Mr. Whitfield.

The secretary reported having taken a pole. Secretary to write them that unless paid before next meeting, the pole will be taken away.

Mr. Whitfield reported that Mr. Lyle's Bull was impounded by E. L. Hill, A. Vice Pres.

A letter and appreciation from Mrs. Bell of Medicine Hat, re [illegible] Alix, was read.

Mr. Todd reported that Mr. Lyle's Bull was impounded by E. L. Hill, A. Vice Pres.

A letter and appreciation from Mrs. Bell of Medicine Hat, re [illegible] Alix, was read.

CHAPTER X

(Continued)

On the following morning, it was decided that Bear should hunt the barrens across the river for deer and Alan take the country behind the camp. Certain that they had put at least 40 miles between themselves and the hills where they had seen the signal smoke, they felt reasonably safe in separating to hunt. Leaving the spruce and tamarack scrub of the sheltered valley Alan with Bough at heel, where he had been trained to follow at command came out on the shoulder of the hills. Here Alan hitched Rough to a tree by a thong, for the night and scent of caribou would make him too excited to control.

Tiring a deeply wore caribou path Alan traveled Indian. From a depression some rock pilings on a ridge of [illegible] of $14.50 per month. Carried.

Moved by Councillor Nels to recommend that relief advances be made to O. A. Jamieson at the rate of $30.00 per month. Carried.

Secretary read letters from Edmonton General Hospital, advising admission of Nick and and Mrs. Reynoldie.

Moved by Councillor Nels to accept communication. Carried.

Secretary read letter from the Red Deer Board of Trade, tal advising admission of Lad with Kvang.

Moved by Councillor Heebt to accept communication. Carried.

Moved by Councillor Weatherill that the cost of the cost of gravelling the Tees road be changed to Division No. 2. Councillor Weatherill to act as farmer.

Moved by Councillor Weatherill to call tenders hoists and shed at W-W-14 and rapidly shingled Stewart for $30.00, $36.00 in cash and balance in fall. Carried.

The Mayor reported that the Montreal Trust Co. had refused us to refrain from taking title to the SE-24-39 2S-W-4th., with the agreement to pay $900.00 in cash and the proceeds of payments under Agreement for Sale, total taxes up to Dec. 31, 1939, and penalties are retired in full. He further reported that to avoid legal proceedings, he had purchased their equity.

The Council accepted the report and confirmed the Mayor's action.

Secretary read letter from Alix Agricultural Society Requesting a grant of $100.00 for re-collection of arrears and with letter advising admission of Mrs. Harris, Lawrence Beckwith, Harry Bell, Mrs. McDermond and Albert Sutton.

Communication accepted and a request made for more information re Beckwith and Bell.

Mothers' Allowance Dept. reported advising that Mrs. Julia Roberts had been granted an Allowance of $20 per month.

Communication accepted.

Correspondence from Provincial Royal Alex Hospital advising admission of Miss Mary Long. Communication received.

Correspondence from Provincial Director of Assessment, advising that the assessment of the consolidated farm lands had been reduced 10 per cent.

Council Note presented this ruling on the grounds that our assessed value is too high in comparison with adjoining districts and requests them to reconsider our appeal and grant the additional 5 per cent. reduction.

Secretary read minutes of the first meeting of the Bentley Health Unit. Accepted.

Secretary read Financial Statement as at Dec. 31, 1939. Accepted.

The following accounts were ordered paid:

Ian Clark, relief	$ 15 00
Harry Ford, "	15 00
Holy Cross Hospital	9 00
Crown Lumber Co.	3 00
T. A. Swanson	15 00
A. J. Jowsil	15 00

German Family Holds Secret

But Toronto Expert Hopes To Produce Glass For Artificial Eyes

The war is about to give Toronto its strangest industry since it began for glass eyes

All the glass now used in artificial eyes comes from the little town of Lauscha, Germany, where one family has kept the secret of making the highly specialized glass for generations. But not a shipment of glass for artificial eyes has reached Canada since the war began and since the eyes must be replaced every year or so, a considerable amount of glass is used.

Dr. Clifford Taylor of Toronto, the only man in Canada expert at fitting the delicate glass into the proper shape for eyes has virtually decided to hand out the technique of making the glass itself if the supply is likely to be shut off for a matter of years. Since the glass manufactured in Germany is of a special quality which England and France have already tried to duplicate without success it is believed a considerable amount of research will be necessary before Canada will begin to produce its own artificial eyes. Dr Taylor has done much of this work in fitting g ose eyes for the Toronto General Hospital

"Since the war began, the supply of glass has been shut off to all parts of the world," said a member of Messers Leitz and Leeds Optical Co "A small amount may get through Holland to the United States but we have not heard of any. Canada has received none at all."

A former German in New York, he revealed has a four-year supply of glass on hand for artificial eyes. This is believed to be the only large quantity on the continent. Several years' supply has been stored away ever since the World War when there was also difficulty in getting the German glass.

"If there is sufficient demand, glass experts here or in the United States will probably find out how to make it," said the optical and Leeds spokesman. "But it means costly research. We only make in Canada qualified to make such glass would be Dr Taylor."

"Germans haven't gone up yet—around 25 for an imported ready-made eye, or $30 for one made to order on this side of the ocean.

The newest form of polarized light is a sun-glare dark lamp.

Patriotic Songs

Put These Tunes Out And Keep For Future Reference

GOD SAVE THE KING

Oh God our help in ages long
Long live our noble King,
God save the King
Send him victorious
Happy and glorious
Long to reign over us,
God save the King.

O Lord our God arise,
Scatter his enemies,
And make them fall
Confound their politics
Frustrate their knavish tricks
On Thee our hopes we fix,
O save us all

The Second gifts to share
On him be pleased to pour,
Long may he reign
May he defend our laws
And ever give us cause
To sing with heart and voice
God save the King.

Our loved Dominion bless
With grace and happiness
From shore to shore
And let our Empire be
United, loyal free
True to herself and thee
Forever more.

O Canada!
Our Home and Native Land!
True patriot-love in all thy sons command
With glowing hearts we see thee rise
The True North strong and free,
And stand on guard, O Canada,
We stand on guard for thee!

O Canada! glorious and free!
We stand on guard we stand on guard for thee!

O Canada we stand on guard for thee!

O Canada!
Where pines and maples grow
Great prairies spread and lordly rivers flow,
How dear to us thy broad domain,
From East to Western Sea,
Thou land of hope for all who toil!
Thou True North, strong and free!

Canada!
Beneath thy shining skies
May every heart beat true and patrio sentiments rise,
To keep thee standfast thro' the years
From East to Western Sea,
Defender of the Faith appointed
Our True North, strong and free!

Praise Supreme,
Who honrest humble prayer,
Who wilt not turn from those in low despair,
Help us to God, O God in Thee
A lasting rich reward,
As with the flight of the latter day
We ever stand on guard

THE MAPLE LEAF FOREVER

In days of yore from Britain's shore,
Wolfe, the dauntless hero came,
And planted firm Britain's flag
On Canada's fair domain.

Here may it wave our boast, our pride
And joined in love together
The Thistle, Shamrock, Rose en-
twine the Maple Leaf forever!

Chorus—
The Maple Leaf our emblem dear,
The Maple Leaf forever!
God save our King, and Heaven bless
The Maple Leaf forever!

At Queenston Heights and Lundy's Lane
Our brave fathers, side by side,
For freedom, home, and loved ones dear
Firmly stood and safely died
And their last words to posterity
We swear to yield them never!
Our watch-word evermore shall be
The Maple Leaf forever!

On merry England's far famed land
May kind heaven sweetly smile,
God bless old Scotland evermore,
And Ireland's Emerald Isle
Then hand the song, hand and
heart
Till roche and forests quiver,
God save our King, and Heaven bless
The Maple Leaf forever!

Book Written By Napoleon

Find And Only Literary Effort Published In Paris

An autobiographical novel written by Napoleon Bonaparte when he was 20 was published by the magazine Revue Des Deux Mondes. The 200-page script, of only 13 pages, was found among the effects of Napoleon's 2nd engagement with Desiree Clary, who later married Marshal Bernadotte and became the Queen of Sweden. Experts described the style as "promising". Napoleon described his first and only literary effort throughout his life taking the manuscript with him on exile at St. Helena. It was purchased in recent years by the famous Polish autograph collector, Count Dzialynski, and published privately in Warsaw in 1929. Recent publication is the first public one.

Sore throat relieved in 3 minutes. No strong, upsetting drugs

Take no chances with a cold that starts with a sore throat. Rub on Vicks VapoRub at the first sign—the salve way—and you can relieve cold misery fast! It acts on 3 separate layers of irritation and congestion.

Its quickly does double-duty—it's both "inside" and "outside" treatment. Just rub on chest and throat and cover with a warm flannel cloth. Clever, effective! Vicks VapoRub "breathes" out its medicated vapors with every breath you take! Its warmth and stimulation bring relief direct to the sore throat area. Its vapors are inhaled down the bronchial tubes. Its ointment action goes to work on throat surfaces. Many users say it relieves sore throat in 3 minutes.

The Vicks illustrated exercises for many other Spare Moments Ideas are in every jar of Vicks VapoRub. Tell how to correct poor posture, how to relieve nervousness by proper breathing, how to relieve joint ailments, constipation, given daily throughout the entire year.

Send 10c in cover for your copy of "Doctor Exercises to Relieve Nervousness" to Home Service Dept., Vicks Chemical Co., 2305 St. Antoine St., Montreal, Que. Mrs. L. McDermond Ave. E. Winnipeg, Man.

The following booklets are also available:

Quite An Expert

Queen Mary Is Clever At Solving Jig-saw Puzzles

Queen Mary had proved herself an expert in solving jig-saw puzzles. While visiting a naval hospital her Majesty met Able Seaman H. Crowther trying to fit together the pieces of a puzzle. Queen Mary stopped by his bed and looked at the pieces. In less than a minute the puzzle was solved the portion that had defied the seaman for hours.

HOME SERVICE

KEEP FIGURE IN STYLE WITH SMART SLENDERNESS

Give Yourself Posture Test

"Nothing looks smart on me!" while the girl who thinks she looks style.

But her real trouble is her weak back and abdominal muscles. They should keep her figure beautifully, smartly erect and they will with right exercises.

To see if your own abdominal and back muscles are weak, stand against the posture test.

Heels, hips, shoulders and stand sideways before a mirror. Could a straight line be drawn from top of head through shoulder, hip bone, knee and ankle? Or does poker belly curve out, your chest protrude? Are you like as "S"? Then do this exercise

1 Lie on back, put your weight on chest and shoulders, knees bent, feet on stretch. 2. Reach backward, using left arm only. 3. Reach forward to sitting position, pull from knees down and up. Have your right hand, hand high. Do 3 times, repeat with left hand. Do 3 times in all.

This illustrated exercise for many other Spare Moments Ideas is in every jar of Vicks VapoRub. Tell how to correct poor posture, how to relieve nervousness by proper breathing, how to relieve joint ailments, constipation, given daily throughout the entire year.

Send 10c in cover for your copy of "Doctor Exercises to Relieve Nervousness" to Home Service Dept., Vicks Chemical Co., 2305 St. Antoine St., Montreal, Que. Mrs. L. McDermond Ave. E. Winnipeg, Man.

450 B.C. IN ANCIENT EGYPT

The art of Brewing was known and practised for many hundred years before the Christian era. In 450 B.C. we are told that the Egyptians, being without vines, made a wine or beer from corn. Pliny and Herodotus informed us that the Egyptians are thought to have carried their taste for Xythum (meaning a barley drink, because it was necessary for human bodies."

Sanit, in War Financing

Canada's forthcoming war loan can readily be expected to match the pattern of financial policy that will be unanimously recognized as sound, and one that reflects the benefits of experience from the last great war. Borrowing in this instance is a means only bridging the margin between the amount of money obtainable by taxes and the actual amount needed to pay the cost of a government at war in defence of freedom.

The new war loan will be on a domestic basis. Canadians will provide the principal and receive the interest. The debt will be owed to ourselves in Canadian funds, and will, therefore, not give rise to the difficult exchange problems and real burdens to the country which are inherent in external borrowing. In borrowing within our country, the Government hopes to see some of the real savings of the people converted into war loan bonds. The latest available figures show a total of $1,734,983,000 of savings accounts held by depositors in chartered banks, the highest figure in the history of the Canadian banking system. By converting real savings into war loan bonds, the individual can make a vital contribution to Canada's war effort, and at the same time secure for himself a safe and profitable investment.

The loan is open to popular public subscription. Clearly the call is strong, because the most emphatic demand is the moral obligation of every citizen to guard jealously the rights of freedom and shoulder his share of the bonds just as thousands of others are shouldering arms.

In announcing the acceptance by Mr. Dunning of the chairmanship of the National Subscription Committee, Mr. Hanston said, "Canada is indeed fortunate that Mr. Dunning has agreed to undertake this important task. His experience as minister of finance and also in connection with the Victory Loan campaign during the last war make him the ideal man for the job."

CARD OF THANKS

We extend our sincere thanks to the citizens of Alix for their practical assistance and sympathy in the loss of our house and contents by fire on Thursday evening of last week. We appreciate the splendid effort that was made to render assistance.—George and Lucille Whitfield.

—o—

CARD OF THANKS

To all who so kindly helped us at the fire, last Thursday (Jan. 4), our sincere thanks.

Margaret & Bert Wolfenden

"GOOD AS GOLD"

I have for sale a bunch of accounts that run from a dollar to larger amounts.

They've been on my books and are getting quite old.

Been running for years— but good as gold.

Here's one account made by "accumulation"

For a load of cement and a pair of britches

Customer says he can't pay today

But will next year from his crop of hay

If he does not pay when his hay is sold He will some day—as it's good as gold.

Here's another account made in "twenty-five"

For some millwork, tank and one screen door,

He died last year and left no estate;

Think I still can get it but may have to wait

He has some relatives, as I am told,

They may pay the account— but it's good as gold.

I have two accounts made in "twenty-five"

Neither of these customers now alive

One killed in an accident with his team

The other had sickness and move hard luck

Although these men have long been cold

Their accounts are good—yes, good as gold!

Most all my accounts will soon be due;

Have only one that is practically now.

Made in "twenty-seven on January 3rd,

But they'll all be paid as they gave their word

It would be a dark cold day when they paid these bills

So, they all will pay—I know they will.

I'm waiting now for the number to get cold

So they'll come in and pay — they're good as gold

If you want to invest and take a chance

Of losing your shirt—and maybe your pants

Just make me an offer and you might win

'Cause they're darn good accounts for the shape they're in.

—"Buffalo Digest."

Canadians

Montreal—Increase of $12,043,934 in net reserves for the first 11 months of 1939 as compared with the same period has year was reported by the Canadian National Railways. For the 11 months period of the year the operating ratio case was $18,771,1?? and the operating expense was $340,481,1?? leaving a net operating profit of $17,289,805.

Winnipeg—Manitoba's country can be kept open almost all the year round according to a report prepared by Lt. A. D. Baglot, Russian scientist. The Bay and Strait never freeze, only about half to three inches of ice in Churchill harbor would have to be kept open. In its nine years of operation, only 72 overseas cargoes have been carried from Churchill.

Calgary—Fur prices will be stabilized by the Dominion government, W. H. Coulter, of the Dominion Council of Fur Breeders' Associations, said today. The object is to aid in wartime marketing of pelts. By this action fur breeders will be guaranteed the 1938 level of $50 for fox pelts and $11 for mink. Mr. Coulter said a selling agency to be used at the option of the breeders will be organized.

Toronto—Rt Hon. R. B. Bennett, in an address to the Canada and Empire Clubs, urged Canadians to buy British goods and so provide Britain with Canadian exchange for war purchases in Canada. International trade as it was once understood is today a thing of the past, declared the former prime minister. Now it is commodity for commodity. Britain's purchases in Canada and the U.S. must be financed by goods sold to them, he said.

Ottawa—Flow of British coal to Canada in the first two months of the war amounted to 175,041 tons according to figures from the Dominion Bureau of Statistics. For the corresponding two months of 1939 British coal imports were 216,300 tons. Freighters are hard for Canada to bring food and supplies back to England find coal a profitable outbound cargo.

HORTON NEWS

On Friday evening, Jan. 12, Miss Ruth and Martin Eisner entertained many young people at their home. Entertainment took the form of military whist. Prizes were won by Miss Mary Eyestone, Miss Margaret Saunders, Miss Ruth Risner, Miss Bessie Naylor, Miss Bernice Davies, Clifford Anderson, Ernest Lee and Kent Smith Jr.

Several hockey games have been played this week.

On Monday night, Jan. 8, the Pitch Hole and Extermainers, both Mirror teams, played a fast game. The Pitch Hole were victorious by a score of 6 to 4.

Thursday evening Jan. 11 the Pitch Holes played the Flyers. The Flyers won by a score of 3 to 1.

The Alix Juvenile played the Mirror Juveniles on Saturday afternoon, Jan. 13. The final score was 4-3 in favor of Mirror, after overtimes was played.

At a meeting of the Red Cross on Monday, Jan. 8, Mrs. H. Flewwelling was elected Vice-President in the remedy caused by Mrs. J. Stewart's removal to Calgary. An entertainment committee consisting of Mrs. N. Jaques, Mr. J. Saylor and Mr. and Mrs. H. Flewwelling was appointed. Plans for a dance on Friday, Jan. 26th, sponsored by the Red Cross, have been made.

A New Name

"A new name more descriptive of the organization has been adopted by the North-West Grain Dealers Association," said G. W. F. Hodgkinson, president, in a statement issued today. "The new name is North West Line Elevators Association. The former name was adopted in pioneer days of grain growing and trading in Western Canada. Membership in the Association is limited to country elevators operating on the line system in the handling of grain."

Bishop Sherman, of Calgary, will conduct the services in the Anglican Church next Sunday. There should be a full house.

WOMEN'S INSTITUTE

CEMETERY COMMITTEE'S FINANCIAL REPORT

RECEIPTS

Jan 1, 1939—Brought forward	$ 25 70
Members' donations	5 00
W. I. donations	10 00
Village of Alix	50 00
Dominion—Int. on Victory Bonds	2 50
Mrs. McLeod	2 00
Harold G. W. Hale	2 00
Mrs. R. Warren	1 00
Mr. C. Stoddart	1 00
Sale of Mourning Cards	2 65
Sale of Tablet on Cenotaph	20 00
Proceeds of Bridge Party	10 70
Proceeds of Picnic donated by Eddie Wong	8 25
	$141 90

DISBURSEMENTS

Paid on Trees	$ 6 25
Printing Report	2 00
Ont. Int. Cemetery	4 00
Wages of Caretaker, 6 months, 150	90 00
Seeds Purchased	1 00
Flowers	2 00
Tools and Paint	2 00
Purchase of Lot	15 00
Cash on hand, Jan. 1, 1940	19 15
	$141 90

ADDITIONAL DONATIONS

The Sunshine Club donated a gate costing $9.55, and Page's Pharmacy supplied gopher poison.

There is also a fund under the custody of Mrs. J. Cockrell, amounting to $15. This is earmarked for a gate.

Summarizing the activities of this branch since 1926 of the institute, we find that a total expenditure of $701 19 has been made. On our cemetery and of this amount $468.53 has been raised directly by your local W.I. $164.56 being the amount of direct donations, including the village of Alix donations. In addition there is a large investment in volunteer labor amounting to not less than $250.00 or a total investment through your local W.I. of over $1,000.

Over $200.00 has been invested in trees and shrubs. Over $100.00 has been spent for building and equipment.

However, the monetary side is, of course, not of any particular importance apart from a measure of the effort made. What is of importance, we believe is to have transformed a community waste into a shrine of beauty and a resting place for our dear departed, of which we are not ashamed.

To all those who have so generously assisted in this work, we say, "Many Thanks," and we hope with your assistance to carry on.

Population And Perspective

The present trend in the direction of declining populations in many countries of the world, and particularly in the civilized countries has become the subject recently of a note of alarm on the part of a good many authorities.

The alternate among other things, have pointed out that in this trend there is a danger of the more civilized nations being ultimately overwhelmed and subjugated by nationals who are more interested in warfare than in culture, who consider it more important to have on hand a large supply of fighting men than a smaller number of people devoted to arts of peace and commerce.

Whether or not the visions of these prophets are destined to be realized sooner or later is a matter of interesting speculation and, if so, when the debacle of the down-trodden from this cause is likely to be precipitated.

The direful forebodings of these prophets of woe are invariably based on the assumption that numbers mean everything and quality means little or nothing. They do not take into account the possibility that a comparatively small number of well educated highly scientific, freedom-loving people with the confidence that is the inevitable accompaniment of freedom may be worth in physical combat, a numerically greater force which has been subjected to tyrannical rule, which has been given no opportunity for self-expression and which knows not enlightenment.

Nor do these seers of pending disaster take into serious consideration the greater effectiveness of highly developed weapons of defence in the hands of these scattered under the beneficence of a democratic regime compared with the mechanics of offensive warfare wielded by groups who have been regimented under the heels of oppressors and who have been taught blind obedience to the orders of the "all-high".

* * * *

Some Good Things

Whatever may be the outcome of this trend towards depopulation in the more enlightened and cultured nations of the world, with a concurrent rise in population in countries where the populace is more ignorant and less fitted for self-rule, it is interesting to note that there are some good things in store eventually for those democracies with dwindling populations, if Josiah Cox Russell, Assistant Professor of History at the University of California is correct in his assumptions.

Basing his conclusions on historic studies dating back as far as A.D. 350 Professor Russell reaches a decision that if population increases it declines who we may ultimately expect, among other things simplification of government, a tendency among the reduced populations to lose the success and prosperity motifs and to admire simpler virtues.

Whatever may be thought of the value, or otherwise, of a loss of what Professor Russell terms "the success and prosperity motifs", there can be no doubt that a return to some of the simpler virtues and to a reduction of government would be welcomed by very many who, to-day, believe that we are over-governed and that the complexity of present day life is not necessarily conducive to the highest physical and moral health or even the maximum of happiness.

There are those who believe that the simpler life led by our forebears was productive of greater moral fibre and of more happiness than are to be found among the great rank and file of the people of to-day. There are others of course, who espouse the opposite viewpoint but the premise on either side is open to debate.

* * * *

Alan Brookside

It may be a debatable question, too, whether or not Prof. Russell is correct in his opinion that a dwindling population will of necessity mean simpler virtues and the loss of the prosperity motif, simply because it has done so in the past. Conditions have changed so much since mediaeval days, and with changed conditions sometimes have changed, that the spectre of a declining population in this day of development of scientific achievement, may be entirely different to that entrapped by the ancient.

One result of declining population which Professor Russell foresees is one which will be indeed with approval by the great majority of the peoples inhabiting the democratic countries and this is the belief that "a less belligerent and probably more humane world" may be expected.

Before these beneficial objectives are to be achieved, however, there is to be a transitional period, according to the learned professor, which will not be too pleasant, for, he says, "At first the ills produced by a fall of population and consequent depression are apt to bring a very large amount of government interference as a remedy for its troubles."

Whether or not this "large amount of government interference" during the transitional period is going to give very ultimately to the people the abolition of government as a result of revolt because of the cost of so much government or because so much government is going to jeopardize the liberties of the people, Professor Russell does not reveal.

That also, however, is an interesting topic for cogitation and speculation.

A Queer Custom

A raven is kept at Mersenburg castle, near Halle Germany, as a reminder of a grave injustice many years ago, a servant was executed for the theft of a valuable ring he, hanging to the Stanley Tatlo of Treble. The ring certainly had been stolen by a raven. When the bird died another is placed in its stead immediately

---

Tuxedo Fuel Near

When John Coughlin, 67-year-old Vancouver shipbuilder, made reservations to go to Montreal, Trans-Canada Air Lines officials said he was the oldest person ever to make the flight. When Coughlin decided in Vancouver, there was no time to continuously retrievedy and it took him months to reach the coast from the east. The time, he was in a hurry.

English coins first were dated during the reign of Edward VI.

The Sweetheart Bird Plays Among Great Britain's Summered Ships

Saying that the Germans greatly by the 11 survivors is subject to our Fuehrer and Chancellor Adolf Hitler.

It is however sufficient to how that the Kensington made a most gallant fight against overwhelming odds and was, down with her colors flying. The Kensington would not have surrendered to such an enemy, but was forced to do so when her ammunition was exhausted and her guns were rendered useless. Despite an heroic defence, the Kensington was overwhelmed by the enemy's superior numbers and force.

The Kensington's officers and men have been treated with the utmost consideration by the German authorities, and are now prisoners of war in Germany.

Blinkie Blinkers

Used Appointments With Be Made By Cinema

Under special matching regulations 19 Canadian Limons authorities will be appointed by Dr. Goebbels, it was announced to-day by Montague general secretary of the Canadian Limon Association.

Selection is between engineers, who have had experience in the film industry, and who are willing to go to Canada to help in the production of propaganda films. Applicants must be between 25 and 35 years of age.

Sponsored by the Health League of Canada it has the co-operation of a large group of influential women's organizations Dominion-wide in scope, who have agreed to contribute their services and a comprehensive campaign of education is planned.

Dr. Charles Hastings, Medical Officer of Health for Toronto, is president of the League and has had associated with him many prominent men and women in the Dominion.

Organization of the League is under the direction of Dr. Helen MacMurchy, C.B.E., M.A., M.D., LL.D., F.R.S.C., who has been a pioneer worker in child welfare for many years.

SELECTED RECIPES

MARBLE CUP CAKES

2 cups sifted Swans Down Cake flour
2 teaspoons Calumet Baking Powder
½ teaspoon salt
½ cup butter or other shortening
1 cup sugar
2 eggs unbeaten
½ cup milk
1 teaspoon cinnamon
½ teaspoon nutmeg
1 tablespoon molasses
1 tablespoon cocoa

Sift flour once measure, add baking powder and salt, and sift together. Thoroughly mix and sugar gradually and cream together until light and fluffy. Add eggs and beat thoroughly. Then vanilla, and add flour alternately with milk a small amount at a time, beating well after each addition. Add spices. Drop from teaspoon to greased baking sheet 8cm. in moist oven (350 degrees F.) 20 min. or until done. Makes four dozen cookies.

British Merchant Seamen

Writing Of The War Depends Largely On Brave Crews

It is members of British merchant ships more than on any other group or service that the winning or losing of the war depends, a naval officer said in a statement rendered public recently, in appreciation of British seamen.

They are products of the breed, and tradition of resource and initiative of the longest and hardest school of any profession on the earth, said the naval officer of British merchant shippers. From boyhood their life is one of responsibility, dire comfort hardship and danger.

In wartime there is added the knowledge of sudden death from the sea, from gunfire mines and aerial bombs and the naval officer. From them their countrymen may well take courage, and in them their enemies would do well to respect the mettle beneath that admits of no defeat.

GRAPE-NUTS RAISIN COOKIES

2 cups sifted Swans Down Cake flour
½ teaspoon Calumet Baking Powder
½ cup butter or other shortening
1 cup sugar
2 eggs unbeaten
½ cup fruit juice (about
6 tablespoons milk)
1 cup grape-nuts
1 cup raisins, seeded and lightly floured
1 teaspoon vanilla

Sift flour once measure, add baking powder and salt, and sift together. Thoroughly mix and sugar gradually and cream together until light and fluffy. Add egg and beat thoroughly. Then raisins, and add well. Add flour alternately with milk a small amount at a time, beating well after each addition. Add grape-nuts. Drop from teaspoon on greased baking sheet 8cm. in moist oven (350 degrees F.) 20 min. or until done. Makes four dozen cookies.

Mr. Caffeine-Nerves finds he's vulnerable

CHAPTER X Continued

Alan looked long at the sun his last sun. His tormented eyes, now sensitive almost stopped to take in the barrens toward the river and back to the cariben pack he had followed from the fringe of the timber. Then his heart cheerful to leap wildly as his head pounded in his throat There on a rise, silhouetted against the sky stood a black animal with lifted nose scenting the air. Then it disappeared.

Time! Time! He must have time! He forgot the agony of the myriad flies that had spotted his face and hands with blood. He took a wild sing-song in imitation of a cowherder he had once heard at the Lake of the Snows. The Indians chattered in fear away, evidently disturbed.

Then as the hitherings rolled to earth from the timber he cried:

"Tahiyo! The Spirit! He has answered! See, he has ordered the spruce sticks not to burn! My spirit is strong! His is overheard, there, in the sky!"

The Nashagi followed Alan's eyes to where a white-gold bird in the earth, above them. With a desperate heave, Alan freed his hands and stood upright. He shook his head to clear his eyes, got the knife from his pocket and opened it behind his back.

A little longer! If he could delay the starting of the fire again until it was evening—ready to make his fight for life!

While the money lenders still talked with awed voices as they watched the bird above them, Alan continued in the widow of a comic medicine man.

"Tahiyo, my brother, is here. He has heard my call. He comes as a man in the form of a spruce stick smoke, but not burn!"

The four Nashagi stood, mouths open, their eyes upon the supernatural watching the circling raven, when, with a cry, Alan sprang headlong into the fold in the bands.

"Tanghy! Come to Roughy! Get 'em, boy!" and shouted the half-delirious Canadian, slashing the thongs at his wrists and running headlong at the astonished group of savages.

Alan plunged the leader headlong on his gun and dying wildly from the hip at the bounding bundy of the next savage. He reached the rear and drove his short-bladed knife deep into the back of the second man. As he turned, a rifle roared in his face and half-blinded he drew back the knife from his head. Desperate with the thought that his enemies should get another ounce of strength, Alan tore his right arm free from the thongs that were cutting through it and plunged the other's knife hand to the heart and found his enemy dead at the moment of the strength of a madman. He Nashagi fought to free his neck from the thongs that choked him, and struck at him as the windigo like a vise That hunter who fought with one hand against his wounded suddenly drew his heart would not be denied. He dropped his enemy with the grip of a bear, he choked him into insensibility.

Behind Alan, raging like a fury, the hunky escaping the two shots from his muzzle loaders, leaped and shouted at the two retreating Indians. Then he turned, grabbed dog with these empty guns and their knives, dashing to reload. Alan, with a wild howl of triumph, leaped upon the dog, dragged it to the ground and struck with his long tooth at the exposed throat, ripping it open. Then he leaped for the Indians, guns loaded, and fired.

Tanghy's bullet struck the shoulder of the fleeing Indian, who glanced down at her torn wigwords and heavy moccasin stockings. Bending over she smoothed the stockings, then went to her tent, and ran a cross through the name of the owner of the canoe. Most was watching her. She smiled. Then she went to the canoe and began to load. There were about fifty pounds of supplies in the canoe.

AUDITOR'S CERTIFICATE

I have audited the accounts of the Village of Mirror for the year ending December 31, 1939, and have compared the said accounts with their subsidiary and vouchers and certify that in my opinion the foregoing financial statement and supporting documents set up so as to exhibit a true and correct view of the financial affairs of the Village, according to the best of my information, the explanations given to me, and as shown by the records. I report in any qualifications noted in Auditor's Special Report herewith.

The aforesaid information contained herein was obtained from the books and records of the Village, or from information supplied by the Secretary-Treasurer.

Dated at Mirror this 6th day of January, 1940.

(Sgd.) WILLIAMSON, Auditor.

The Week in Edmonton

Edmonton, January 15.—Spectacular successes of the Finnish ski scouts against the Soviet invaders bring forcibly to mind the fact that Canada is ski conscious to an extent hitherto undreamed, that Alberta provides some of the finest skiing localities in North America and that both Dominion and Provincial ski championships will be staged at Banff and Jasper respectively in a few weeks.

For the events, local officials are mak g great preparations. Visitors to either mountain resort will receive their fill of thrills entertainment and fun The Banff meet, following closely the famed winter carnival, is expected to attract large numbers of United States visitors Theatre, dancing, swimming, sing songs are all arranged. In addition are skating, curling, tobogganing and hockey. Four modern ski lodges within easy distance of Banff will contribute to the enjoyment of visitors. The Dominion championship meet opens February 29 ... continues to March 3 Railways are cooperating with a one mile trip

License plates to the number of 1,000 a day were received in the Provincial Secretary's Department up to Wednesday last. deadline for return of plates to qualify for the 20 per cent refund paid to those who do not run cars during the winter The licenses year expires March 31st.

Final session of the present legislature will open February 15, it was announced by Premier Aberhart. An Order in Council has been prepared calling the house together Proclamation will follow in due course. This will be the ninth session, there having been four regular and four special sessions since 1935. Premier Aberhart said the legislative program is expected to be light, that the budget will be ready for introduction soon after opening, that the session may be short Unless a special session should be called in the interim, a general election will precede the next session.

Edmonton will owe $18,000 in social service tax costs this year, the Provincial Government having granted an 88.- 6666/3 reduction in the assessment of city land. At the new rate Edmonton will contribute $78,000 to the social service fund.

Condemned milk was up in 1939, the figures for the first nine months being 98,370 cases against the previous 80,031. Value of this production was $253,032 against the previous $188,798. Wholesale trade to October 31 also showed gains, with 230 firms reporting business worth $91,540,130 against the previous $68,230,371.

—G—

It is understandable that in this war the Finnish soldier does not fire until he sees Red.

WEDDINGS

A wedding was solemnized in the Central United Church, Calgary, on Christmas day, at 8:15, when Rev. Athens read the lines which united Ruth Mercille, only daughter of Mr and Mrs. Evan D. MacNeil, and Mr. Jack Brown, of Calgary, young son of Mr. and Mrs. C. Brown, Blackie.

The bride wore an afternoon dress of princess style of queen blue with accessories to match. Her small hat of corresponding shade was caught in soft folds with streamers resting on shoulders. Her corsage was Talisman roses and lilies of the valley. Her only ornament was a cameo pendant, which was worn by her mother on her wedding day.

Miss Janie Brown, sister of bridegroom, was the bridesmaid

Mr. Douglas MacNeil, brother of the bride was best man.

Following the ceremony, a wedding supper was served to 30 guests at the Masonic hall, which was revered by her bride's mother. Miss Janie Brown sang a solo "Because" before supper.

Mr and Mrs. Brown went to Lethbridge for a short honeymoon. They will take up residence at 121 13th ave. N.W. Calgary.

This wedding announcement will be of interest to residents around Tees and Nobleford. The bride was born north of Tees, and her father was nearly the first to homestead in the Nobleford district.

A Tip to Women

As "Purchasing Agent" for your family you have a big job on your hands. It changes as I pass the issues of the buying for your household.

Throughout the year, however, there comes in from groceries, jewelry, luxury items and dairy products, it is a new job to see that what you consumers are spending your money the greatest value, with quality and happiness in your family.

The best way to get ahead is to plan ahead and right there's where EATON'S comes in

EATON Catalogue is where best-known specialty the Mailorder all the newest merchandise and the finest quality the Catalogue at the lowest prices for prices. With an EATON Catalogue before you, you can plan in advance your purchases for a week, a month or six months.

Follow each progress of it and buying and you'll find how much more it will be in your purse at the end of 1940.

T. EATON C

DOMINION OF CANADA

FIRST WAR LOAN

$200,000,000

The Bank of Canada is authorized by the Minister of Finance to receive subscriptions for a loan to be issued for cash in the following terms:

3¼ Per Cent Bonds

To be Redeemed by Annual Drawings by Lot

as follows:

3%	of the Loan on	February 1, 1942	at 100.00
3%	" "	February 1, 1943	at 100.00
3%	" "	February 1, 1944	at 100.00
3%	" "	February 1, 1945	at 100.00
88%	" "	February 1, 1965	at 100.00

Issue Price: 100% and accrued interest.

The proceeds will be used by the Government to finance expenditures for war purposes.

Payment is to be made in full against delivery of interim certificates on or after February 1, 1940.

Principal and interest will be payable in lawful money of Canada. Interest will be payable without charge semi-annually at any branch in Canada of any chartered bank. The Bonds will be dated February 1, 1940.

Denominations of Bearer Bonds: $50, $100, $500, $1,000

The Minister of Finance may, at his discretion, authorize the Bank of Canada to accept applications to convert Dominion of Canada 2½ Bonds maturing March 1, 1946, into an equal par value of additional bonds of the above issue. The 2½ Bonds accepted for conversion will be valued at 100.17½ and accrued interest to date of delivery.

Cash subscriptions and conversion applications may be made to the Bank of Canada, Ottawa, through any branch in Canada of any chartered bank or through any approved investment dealer or stock broker from whom copies of the official prospectus containing complete details of the issue may be obtained.

The Minister of Finance reserves the right to allot cash subscriptions in full or in part.

Subscription lists will open at 9 a.m., E.S.T., on January 15, 1940, and will remain open thereafter for not longer than two weeks, but may be closed at any time at the discretion of the Minister of Finance, with or without notice.

Ottawa, January 13, 1940

Keep a day to day record of your milk shipments in this handy little vest pocket book. Nothing could be more compact, convenient or easier for quick reference. Ask for a copy at your local branch of The Royal Bank of Canada, or write. It is free and one of the most useful books you can have.

CANADIAN NATIONAL

Sport News

Sanction has been obtained for the Northern Boxing Championships to be held in Alix, on Friday, February 9th. This is the largest undertaking by the Alix Amateur Club, support will be asked in the form of membership dues. Acting in this card are W. J. Mc eon, R. J. Dee; Bert South and Len Sid dons, of Alix. Mr Bellamy, of Wetaskiwin, is in charge of outside clubs.

Preparations are now well under way for the staging of 1940 Provincial Amateur Boxing Championships of the Alberta Branch Amateur Athletic Union of Canada in Calgary, next month. In connection the zenith district eliminations have been arranged to take place in Stedman Hall, Carlston and Calgary. It is announced that the town of Alix has been awarded as the venue for the Northern Alberta eliminations, to be held in the Legion Hall, Alix, Friday February 9th. In addition to the provincial championships, for the first time in several years the Dominion championships will be held in Alberta in the spring, and therefore the up and coming amateur mitt slingers are particularly interested in coming events and their possibilities.

There are twenty one "classes" in the provincial championships including juniors from 70 to 110 lbs. inclusive; and both novice and open from 112 lbs to heavy weight inclusive. The territory allotted in connection with the eliminations at Alix is from Lonsdale to any point north, east or west. Amateur boxers desiring to enter the championships, resident within this district, must enter the eliminations at Alix.

Amateur registration forms and official entry forms may be secured from L. H. Siddons, manager Alix Consolidated School Amateur Athletic Club, Alix; or R. W. Bellamy, Secretary, Alberta Branch Amateur A.A.U. of Canada, Box 131, Wetaskiwin, Alberta.

Boxers participating at eliminations and named by the selection committee as finalist in recognition of performance, will be provided with transportation to the finals and hotel and meals will also be met by the sponsors.

Perhaps some of those Russian generals who face a date with a firing squad for being defeated in Arctic Finland can find some consolation in the fact that it is winter. Dawn does not come along until about ten or eleven o'clock.

Red Cross Notes

The full length film of the Royal Visit which is being shown throughout Canada for the benefit of the Red Cross, will probably be showing in Alix, on Wednesday, March 5. From all reports and advanced publicity, this show - all in technicolor, is tremendously well worth seeing. The mendents and views have been carefully selected, and the pictures will bring back the stirring memories of last summer. In addition, anybody attending can have the satisfaction of knowing they are helping the Red Cross. The hall should be jammed to the walls on that night.

There are suggestions for a Red Cross dance and a band concert coming up shortly. Watch for further particulars. Also the proceeds from the Forresters dance to be held in the Legion Hall, Friday Feb 2nd, are to be given to the Red Cross, and a record turn out is expected. "Poppy Watts" will supply the music.

Many of our citizens have inquired what the Red Cross is doing about relief for Finland. The Canadian Red Cross has already turned over $5000 for this purpose and has provided four fully equipped ambulances. All our donations designated for Finnish, or any other specialized purpose are, of course, earmarked for this purpose.

The work committee are anxiously looking forward to the arrival of wool supplies which should be here some time this month. Many of our knitters are "rarin' to go." Don't forget that two members of the committee are in the U. F. A. Hall every Saturday afternoon to distribute material.

Here are the Canadian figures for the recent War Appeal:

British Columbia	$ 317 000
Alberta	275 000
Saskatchewan	140 000
Manitoba	200 000
Ontario	2 500 000
Quebec	900 000
New Brunswick	60 373
Nova Scotia	120 000
Prince Edward Island	10 000
	$4 500 373

The following is an extract from the report of Mrs. Wallace Campbell, O.B.E. chairman of the National Women's War Work Committee:

"We wish to stress again the fact that great care is being taken that only really necessary articles are being made, and that if it should be the good fortune of our Empire and her Allies to be spared tremendous casualties and the war be over soon, nothing would be wasted but every article could be absorbed into hospitals at home, or by our Allies in short order".

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

ROOM for RENT, heated if desired.—Mrs. A. S. Bassett, Alix.

WOOD FOR SALE—Poles, 11 miles from Alix, $1 per load from piles on the ground.—Roy Wilson. 33-3c

K. Roy M Less, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, February 6th. On Wednesday 6 to Saturday of each week Consult in Calgary office at 202-210 Sheehan Building.

Councillor Jas. Docherty left 1-7 a three weeks holiday at Prail, B. C. and the coast, you to day, Monday, 31st.

The Rebekah play, "Aunt Samantha," will be on tonight in the Legion hall. This calls for a full house.

Mr. W. H. Stamps, of the Mirror Home, Mirror, was a visitor in Alix, on Friday of last week.

Mr. and Mrs. J. Anderson are visiting friends at Edmonton and Stettler.

One of the Tennes oil trucks was hit by a train in Stettler last week.

A carload of good horses were shipped to Montreal, last week, from Alix and Stettler. The horse market has been very slow.

Canadian Order of Forester's are holding their Annual Dance and Card Party, on Friday, Feb. 3rd. Music supplied by Pappy Watts and the Old Timers.

A number of farms have changed hands in the Alix district recently, which will mean a lot of moving before spring work commences.

On Saturday evening of last week, members of the Wheat Cartage entertained members of the C. A. D. P. of Alix, Red Deer and Bowden, in the new Buffalo Hotel in Red Deer. A very enjoyable time was had by all.

Born—To Mr. and Mrs. G. Barret, on January 20, 1940, at the Deborene Nursing Home, a daughter.

Born—To Mr. and Mrs. C. Pierce, at their home west of Lacombe, a son.

C. D. Howe and H. H. Farley, chairman and trustee respectively, of the Alix Consolidated School, No. 13, are attending the Alberta Trustee Convention, being held in the Palliser Hotel, Calgary. Under the new school set up all Consolidated schools are now represented by two delegates instead of one as in the past.

Tuesday night the thermometer registered 32 below zero, the coldest of the season so far.

J. A. Strachan returned on Wednesday from Lethbridge. He takes over The Alix Free Press on the first of February.

The marriage of W. A. Williams and Miss Colleen E. Settave, both of Mirror, took place at Lacombe on Saturday evening January 13th. Rev. A. L. Carr, officiating.

On March 19 20 about 600 horses will be sold in Lacombe. Stories are still coming in. Last year the sale commenced to 1000.

The usual agreement of Unionist Alberta, held a meeting in Lacombe, on Jan. 12th. Owing to cold weather and delayed roads the attendance was poor. The secretary reported that the membership fee had created all over the province, but should be paid in by March 31st. Next meeting will be held in Alix Feb.

MIRROR NEWS

On Saturday afternoon, Jan. 20th, the Mirror Pee Wees played the Alix Pee Wees, in a fast hockey game. The final score was 3-0 in favor of Mirror. The scores were made by Basil Lang, Glenn Naylor and Gerald Hay.

On Monday evening, Jan. 15 the Extermainators opposed the Mirror Purchasers, in the Mirror arena, in an interesting hockey match. The score was 2 1 for the Extermainators. Score were made by John McLeod and Lorne McKinley.

On Thursday, Jan. 18, a hockey game was played between the Post Masters and the Extermainators. The Post Mate was victorious by a score of 6-3. Goals were made by W. Albert, G. Meade, P. Morrel, F. Webster and G. Hay.

On Monday evening Jan. 15 a Social Credit meeting was held in the town hall, at which about 50 people were present. Mr. N. Dewes was noted as chairman. The following spoke, Mr. N. Jay, ex. M.P.; Mr S. McMillan, M.L.A.; Mr. Annsley, M.L.A. They discussed world finance and different phrases of Social Credit.

On Friday afternoon, Jan. 19 Mrs. A. Ray entertained her bridge club at her home. Members were present by Mrs. W. Fray and Mrs. C. Hardie.

The Mirror Red Cross Branch held a very successful dance, on Friday evening, Jan. 19, realising the sum of $30 on the dance and $20 on the raffle.

On Wednesday evening the Mirror Curling Club rink entertained their friends at military whist. Prizes were won by Mrs. A. Simmons, Mrs. C. Cartwright, Mrs. J. McLeod and Mr. W. Davies.

The newest idea for introduction of the traffic lights is to "jail" the motor instead of the drivers. Putting drivers in jail frequently causes hardships for their families.

Sport News

Already entries have come in from Lacombe, Innisfail, Lacombe and, of course, our own boys to compete in the Northern Alberta Curlers, in Alix, on February 20th. It is to be hoped that our local boys be on hand Saturday, January 27th, as soup shots of different boys in the rink will be taken in the school basement. This is to enable us to have cuts made for local hills to be printed after the finals, as other papers are inviting us to have the new champions after the Calgary Finals, February, 10th and 20th.

BARGAIN PRICE

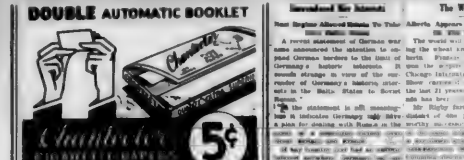
DOUBLE AUTOMATIC BOOKLET



Live And Let Live

Upon the terms of settlement subsequently, will depend the success or otherwise of the war in which Canada, acting with the rest of the British Empire and France are engaged in a mortal combat to rid Germany and the world of Napoleon and all that that dread word entails.

Not only is it essential that Napoleon be uprooted in Germany but each provinces must be made that it cannot in future successfully rear is ugly head again in Germany or in any other country of the world. Without safeguards against the danger are erected when the war is over the conflict will have been in vain.

Hence the importance of the terms of settlement which will be imposed upon the vanquished by the victors and the measures which must be provided, by general agreement among the peace loving countries of the world to make a repetition of the German experiment, either in that unhappy country or elsewhere, dangerous and impossible.

This implies that the terms which the Allies may impose upon the enemy must not be inspired by any vengeful motive. Even though it may assist some members of the alliance, a conquered Germany must be given every opportunity to rehabilitate herself, maintain her self respect in the eyes of the rest of the world and reconstruct herself financially and commercially as an industrial power but on a basis on which she and her people have reduced to them the right to live their own lives. Love and let live" must be the guiding principle of the terms of settlement. Otherwise, there will be no guarantee against the outbreak of another conflagration within a decade or a generation at most. The memory of the war will provide the seed for a future harvest of death.

Fortunately this belief is gaining ground among the democratic peoples and there is every evidence, unless sentimental changes in the meantime that peace such policy is likely to be evolved around the peace council table when the time comes to decide what the outcome of this war shall be. Inter-ference, some of them of international repute are sounding this scheme, though necessarily with differing appreciation and different estimates of the problem.

Peace Desired

The objective of this war is to get rid of the Nazi regime, not only for the sake of the German people themselves but to ensure the protection of the freedom-loving people of the democracies.

This raises the question whether or not the German people must be to saved from the Hitler domination and practices of barbarism which they have assumed. They do, if Norman Rassenlaing, former president of the Danzig Senate, in a stirring appeal to his compatriots in his own country is correct when he declares that their chief duty is getting rid of their present rulers, which appeared in a recent issue of the Saturday Evening Post.

How to accomplish this Rauschning rather than Hitler has the responsibility for this crime: the invasion of Poland). The German people desire to live in peace and in friendship with their neighbors. . . . However that to-morrow the whole world may be arrayed against the rule of the masked fist, someone that this war must lead to utter ruin and destruction of the German people, millions of men and women in the Reich have but one thought: Put an end to it, we've had enough."

Yes Germans in the Reich must do your share. We appeal to you not to stand by idly. Others need soldiers, we appeal to you: Not another shot. Workers in factories we appeal to you: Cease work. We appeal to the masses members of the National Socialist Party: This madness must be ended when you fought for Hitler's policies lead to disaster. A determined mass action is necessary. Victory may appear thousands but they cannot slaughter millions".

Authority Needed

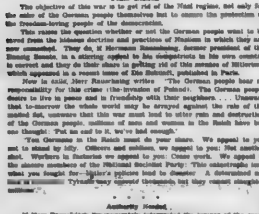
If Herr Rauschning was not seriously interpreted the temper of the great majority of the German people there will be no material difficulty in disposing of the question of self-government for Germany within another generation. Japan take the form of a federation of German states, as suggested by Sir-ald Hirshman writing in the October issue of the Atlantic Monthly and Alter, London, in which he says:

"It is not fantastic to suppose that a new German Empire could be erected on a federal basis with headquarters in Vienna and with the former German states enjoying local autonomy. Everything possible, including the residential seat of the Hapsburgs and of some reduced monarchy, could be done to liquidate the self-esteem and ambitions of the Fourth Reich. Its economic future could be regulated by a customs union with a European Federation in the East."

But no matter what is done in Germany herself it will be impossible for the democracies to set up such a peace council without the assistance of Russia. Any settlement power to see that its sanctions are enforced, to prevent any re-surgence of what has been happening in the past few years, either in Germany or any other country in the world.

The Trans-Siberian railroad is 35,- 000 miles long and is the world's longest.

MICKIE-SAVE



Introduced Her Intended

Near Engine Allowed Steam To Take Him Where He Wanted To Go

A recent statement of German war aims has attracted the attention to engaged Germans murders to the limit of Germany's historic ruthlessness. It sounds strange in view of the murder of Germany's bankers, interests in the Nazis. Thanks to Soviet Russia."

Mr. the statement is all members hope it indicates Germany may have a plan for dealing with Russia in the event of a successful conclusion of the present war, and Europe.

If any business man had an interview with Hitler, Mussolini, Stalin, Chamberlain, Daladier, Hitler, Lebrun and Lithuania Yet that interest is surprising considering completely that German people realize the sacrifices required of them are forced to move out and settle in Germany having most of their property behind the iron curtain.

Estonia and Latvia were conquered in the 13th century by the Knights of the Teutonic Order who established themselves as the ruling class. Although Estonia and Latvia have since changed from time to time from Russia to Poland and finally to Russia, the Teutons always retained their privileges.

Many Germans, the land-owners, the merchants, the bankers, the industrialists, have always occupied leading positions in Lithuania.

The Russian revolution and the subsequent absorption of the Baltic States from Russia ruin destroyed most of the Germans in the Baltic States but only after German forces were defeated on the ground in 1918.

Many Germans in the Baltic States positions, however, escaped the ruin of the Russian revolution. Estonia and Lithuanians retained their wealth and earned on business. Now instead of a Germany which is weak, Eastern Germans interest the Nazi regime surrenders the last remaining crews of it.

A Rousing March

When Sweet-Hearted Men Brought Love And Order To Women

By Pauline Frederick

Sixty-five years ago a little band of scarlet-coated men completed a journey which was to have a profound effect on the then largely unknown western part of the province. If was one of the most marvelous marches in the history of the organized force in the history of the Canadian West. It was the first time that over 20 per cent of red clover had been taken by mounted men. It was also a country that was being opened to the settler and the railroad that was to become through the heart of the world's most productive wheat growing area, with cities and towns springing up like an iris beside and wind-swept pathway.

Three hundred men made that trip in 1874. To-day there are only a few of that original company left. Surviving members of the Royal Canadian Mounted Policemen, who pushed with intrepid daring into a far and unknown land to establish peace in a community at Regal Canadian Mounted Policemen, known to Regina. A tablet commemorating the courage of these men may be erected in the Territorial capital. The tablet at the Mounted Police headquarters will help to recall the courage and devotion to duty of the men who made of them primitive a land of order and peace and a home throughout the world. — Regina Leader-Post.

Royal Tree Has Passion

Embossing a passion flower pro-duction in the United States at more than 100,000 pounds a year A. H. Fiehe, general manager of N. I. du Pont's Nemours's plantics division in Boston, says the fruit is used in jellies to stimulate bone, hare, ivory, nerve-centers stones, wood metal, and scores of other common substances.

Judge Ruler, Trailer Tumble

A trader, though it has no stamp, is a motorcycle made in Portsmouth, it is subject to tumor just as the family auto, according to Judge Ruler, Portsmouth police court judge Ruler pointed out that imprisonment in a jail is one form of punishment.

Paper, As Another, Wins

Paper made in 1874 the ancient Egyptians; the Greeks after Alexander, and later the Romans, by overlaying bale strips of reed about one inch of the papyrus plant of right angles to the other, one and dry and pressed.

Ten cent out of each million live on a dime a day in Canada.

Attitude Affects Beer

Canada Ale Gets Good Play Visitors At 1,200 Fest

Beer has ore doubt and much of it was found, however, by the conscientious when released at high altitudes, experiments made by the Colorado Agricultural of the University of California indicate.

The beer had secretly When a swarm of Caucasian bees were shipped from virtually sea level to the University at Wyoming at Laramie, which is at an altitude of 7,200 feet. The Caucasians, known as the strongest natives in California as an unusually gentle stock.

Within a week after their arrival at Laramie, Professor C. H. Gilbert of Wyoming University reported they had become mild vicious and violent.

Rice is grown more widely and used more extensively than any other foodstuff.

The Canadian lumber exported in 1,178,000 pieces in 1938.

No one marries a woman unless she has a dowry in Cayuga.

The Wheat Crown

Alberta Appears To Have 4 Cornerstone Provinces

The world will have to make room for the Dominion of Canada in the north. Premier Lloyd Hughes, the Chicago International Live Stock Show reasons it again at the year. In the last 21 years of competition Alberta has been 17 times.

Mr. Hughes' former Minister of Agriculture, and other prominent men in the province, are on a mission to Europe to study conditions there and to encourage immigration to the province. It is expected that they will be away for about six months.

Premier Hughes remarks Mr. Drummond, "that our first aim is to get out and see for ourselves the world situation. We have been receiving many reports from Europe, but we want to get first-hand information."

Mr. Drummond is also interested in the possibility of securing more settlers for Alberta farms. He says that the province is not over-stocked at present, and that there should be no difficulty in finding room for many more settlers. "We have a large area of land which is suitable for mixed farming," he said, "and we want to get more people on the land. We have plenty of room for them, and we are willing to do all we can to help them get started."

Mr. Drummond said that he was not anticipating any trouble in finding settlers for Alberta farms, as there was a steady stream of people coming to the province from the United States and from Europe before the war.

Other events have made the Alberta farm more attractive than ever before, he said. The people living in the cities are finding it more and more difficult to make a living, and are looking to the land as a means of livelihood. Then, too, the Province has always retained their privileges.

Many Germans, the land-owners, the merchants, the bankers, the industrialists, have always occupied leading positions in Lithuania.

Canada did well at the Chicago show, and many prizes were brought home by the cattle exhibited.

Premier Mr. Hughes' chances of exhibiting a championship steer next year are considered very good.

Import Is Necessary

Canada's Production Of Rod Has Never Been Large Enough

Because Canada's requires about 6,000 000 pounds of rod per year annually and Canadian production averages slightly over 2,000 000 pounds every year, Canada must import most from other countries.

The shortage is frequently increased by the export of Canadian seed How-well the imported seed stands Canadian conditions on the question of origin, and consequently the 1941 crop of Forage Plants at the Central Experimental Farms at Ottawa lasts all imported seed for hardiness. The seed was sown on May 31 and after that over 20 per cent of red clover had been taken by mounted men. The United States is winter-killed; over 21 per cent, of the seed from Northern Europe and over 50 per cent. from Great Britain, and over 55 per cent. from Southern Europe. Under favorable conditions, Canadian red clover seed is winter-killed less than 15 per cent.

In order to identify red clover seed sold in Canada, seed from Scotch, Canadian, Northern Europe, United States must have 10 per cent. stained seed from the United States one per cent. blue, from Great Britain, one per cent. black, and all other impurities must not exceed two per cent. Canadian-grown seed is not stained and may be identified accordingly.

Improvements in automobiles continue. Ford has a new model which it is up to the driver to furnish it, and use it.

The province of Hunan, China, has a city called U.

Bankers See Canada Well Prepared For War Demands

Bank of Montreal Reports Assets at New High Mark, With High Proportion Liquid

Canada's safer economic position today than in the last war is reflected in the banks' assets and deposits, and commercial position with the banks' assets and deposits, and commercial position with the banks' assets and deposits, and commercial position with

FRIDAY, Jan. 26, 1940

NOTICE

The annual meeting of the U. F. A. has just been concluded and among other resolutions urged was one introduced by President Gardiner for drastic legislation by the Federal Government for the setting up of a board on which the producer and consumer would be represented to ascertain the average cost of producing farm produce in Canada and setting a minimum price for same. It is a fair proposition. Trade Unions set their wages to the cost of living. Large corporations are protected by the tariff; the utilities board in Alberta protects all companies doing business in this province and see to it that their dividends are ample; gas and light companies are under the protective wing of governments, and even governments take good care to protect themselves. But the farmer has been selected as the economic goat and always has been and always will be till he has sense enough to organize a union of his own and be loyal to it.

Mussolini is peeved. He is being rounded off the front page by Hitler and Stalin, who are the villains in the play and the Finns are the heroes. Now Benito announces that he is going to do something about it. He is determined that he is not going to play second fiddle to Adolph and that he has not made up his mind yet. If the Russians strike south in the spring, however, then Benito will again be leader of the orchestra, for he will undoubtedly be the strongest power in the fight for possession of the Dardanelles.

—o—

THE WORLD OF WHAT

By H.G.L. Strange, Director "The Crop Testing Plot

The ten years between 1930 and 1940 which have just ended, will probably be looked upon by the historian of the future as the period when the mind of mankind became possessed of most penalous delusions about abundance.

That we could grow richer and richer by producing less and less. That we could have more automobiles and bathtubs and houses and more of everything else merely by printing more money. That by some magic the hungry people of the world would be better fed if foodstuffs were burned or destroyed or ploughed under.

The period when people thought they could live richer by destroying, or could sell their own goods and products to other nations without having it necessary to import anything in return.

The period when the quack student and thinker was laughed to scorn when he ventured to suggest that if people were deprived of food by those who had it in abundance, then it would end unemployment, not rob and starve.

Happily these ten years are over and observe thinking now is beginning to prevail, as is shown by the statement made by Prime Minister Chamberlain when he told us recently "There may be no lasting peace unless there is full and lasting trade between nations."

Red Cross Notes

Don't forget the Furniture dance on Friday, Feb. 2nd. The proceeds are to go to the Red Cross.

A request has been issued for warm new clothing for Finnish or Polish refugees. It is suggested that such articles as pants, parkas, baby's shirts, quilts, gowns, etc., could be made from cuttings left from making hospital supplies.

If you are anxious to new or knit for the Red Cross be sure to go to the U. F. A. Hall, on Saturday afternoon. The committee will be glad to hear from you.

The next general meeting of the Red Cross will be held in the U. F. A. Hall, on Tuesday, Feb. 6th, at 8 p. m.

—o—

Notice! Farmers! There will be a meeting of all farmers interested in Warble and Bot Control and the prevention of hog cholera in the U.F.A. Hall, Saturday, Jan. 27th, at 2:30 p.m. Mr. A. Newman, fieldman from the Dominion Department of Agriculture, will speak, and there will be a general discussion.

—o—

The Week in Edmonton

A very enjoyable evening was spent on Tuesday of this week when the Lidbed Church Young People's Society of Alix and Benbow were the guests of the Mirror group at the manse room of the Mirror high school. Despite the very low temperature about 45 young people gathered for the games and other entertainments heartily was served by the Mirror Society. Rev. L. Thompson had charge of the arrangements.

Mrs. C. Hawthorne of Edmonton returned home on Tuesday after spending the past two months in the city of her sister and brother-in-law, Mr. and Mrs. G. Smith.

Miss Hazel Hansen of Lacombe visited her parents here for a couple of days during the week.

Mr. Les Johnson was a Calgary visitor the first week.

Edmonton, January 22 — Important among the resolutions which were endorsed by delegates to the U.F.A. convention in Alberta this week was that which provides for automatic suspension of officials who participate in active politics. Thus last year's endorsement to divorce the farmer's movement from politics was strengthened. The order applies to affiliates, too. Continued endorsation of Robert Gardiner was also given by the convention for the presidency for his tenth term, and Henry Wise Wood for his tenth term as the vice office.

Simultaneously, Social Credit delegates convened in Calgary for their fourth annual meeting. Resolutions passing unanimously made there was that the Provincial Government's leg-lation to apply for a bank charter, and of the decision to bring in social-ized credit legislation during the forthcoming session of the legislature. The latter was in line with a resolution brought in by the executive at the convention of women's auxiliaries, held in Edmonton some weeks ago.

Canada loses the average mother, 54 children under five, 42 under one, and 26 infants daily through lack of proper maternal service, U.F. A. delegates were told by Hon. George Hoadley, former Alberta Health Minister who is now associated with the provincial Conciliation in a study of social conditions. "There is nothing of disgrace to our country than this," he declared. "We need them. Even We are under-populated."

CHRISTIAN SCIENCE

"Truth" is the subject of the Lesson-Sermon at all Christian Science Churches on Sunday. The Golden Text is Isaiah 32:17, "And the effect of righteousness is: "He is the Rock, his work is perfect: for all his ways are judgment: a God of truth and without iniquity; just and right is he" (Deuteronomy 32:4). One of the corroborative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life" (p. 497).

330 B.C.

IN ANCIENT GREECE

The Greeks were not long in following the example of the ancient Egyptians in the making of Beer. The Greeks even improved to improve on their knowledge of the art of brewing, as for beer as 330 B.C. the writer Theophrastus tells us that the Greeks employed barley (also as the Egyptians) in their daily life as well as in their festive meetings.

CHRISTIAN SCIENCE

The general merchant, who did a bit of talking in his spare time, was called on by a friend, who said: "I've been putting on weight and this down suit is rather too tight for me. Could you manage to let it out a bit?"

"I've never done such a thing," was the reply, "but I'll see what I can do."

A week later the owner of the suit telephoned to see how his friend was getting on with it.

"Better than I expected," came the reply. "I've let it out to four seats already."

FIRABETS TO PLAY IN EXPOSITION PARK

BOX HESTER, N.Y. —Ray Van Graf han, manager of Rochester Pilgrims' basketball team, said Friday he is "more than confident" he plans to retire with Edmonton Grads "as long as customers are pe rmanent."

Coach Percy Page of the Grads has offered guarantees for the series at Edmonton by which the question of superiority between the teams. The Fil grims deposit Grads' claim of being world champions.

Van Graf han said his team could play in it but will defer the points for Feb 1 to 11 and March 11 to 22.

150 FIRMS LEAVING TO PRINT MORE BILLS

NEW YORK —A group of between 150 and 200 servants of Pinkerton Incorporated in Canada and the U.S.—including several women—called for their homelessness over the weekend to join the Finnish Brown fighting Soviet Russia.

HINDUS RETURNED ARE FINED $10,000

TUPPER CREEK, B.C.—One hundred and fifty Sardaran refugees families—$10 individuals—pocketed a total of $2,500 on each Saturday in the next step was taken toward the passing the century on its own responsibility

HUGE AIRLINER UNDERGOES TESTS

ST. LOUIS — Largest twin-engined airliner built in the United States, a new high-altitude transport plane was taken out of the Curtiss-Wright corporation's Lambert Field Saturday. The plane, about 80 per cent heavier than any commercial transport now in operation, was designed to carry 28 passengers by day, or 20 in berths by night.

BEATING TAX BOOST HAS BIG SALES

LONDON — Britons will dig into their pockets to the tune of an extra £600,000 ($1,680,000) before the end of March to meet the cost of war.

That is the estimated yield of extra money taxation. It is in addition to ordinary peace level taxation.

In the financial year 1958-59, ending next March 31, Britons will turn over to the treasury £600,000,000 more than in 1957-58, the year of the first Cyprus War. Total yield of all taxes in the current year is likely £3,000,000 short of £5,000,000.

SHOPLIFTING CHILD AWARDED $5,000

NEW YORK—A supreme court jury last week awarded Maulrich, Hamptonian, the six-year-old son of the Long Island baby kidnapper and slayer, $25,000 for injuries he received when he was struck by the automobile of Commander Frank Meiner, May 5, 1958.

The jury also awarded $2,500 to the boy's mother, Mrs. Bruno Richard Hauptmann. Mrs. Hauptmann had asked $100,000 in damages charging bodily injury mental anguish and surrounding the boy was rendered epileptic and injured permanently.

KING, PRESIDAN DIES OF CANCER

CALGARY—Mrs. W. Cyprian Pinkham, 69, widow of the first Bishop of Calgary, died Wednesday night, February 5. She had resided here for 53 years. Her death was announced by a full night. Interment was by several weeks ago.

2 TO 5 INCHES POLIO KILLED DURING BAD WEATHER

LONDON—Heat firing squads, electrodes and disasters have taken a toll of between 2 and 5 INCHES Polio victims since the German invasion of Poland last September, the British government has been informed from competent sources.

TO REOPEN INQUIRY IN OIL SITUATION

CALGARY — Re-opening of the inquiry by the McGillivray report committee into the charges all situation was announced by J. J. Frawley, K.C., Edmonton counsel, last week.

Young: "I've asked for money, and I've begged for money, and I've cried for money, too."

Lady: "Have you ever thought of working for it, my man?"

Young: "Yes, lady, I can see, I'm going through the alphabet and I haven't got to W yet."

FREE RADIO TIME IS BASED ON VOTE

OTTAWA—At a conference of representatives of the political parties took the C.B.C. last week an agreement was reached to divide free time over the national radio broadcasts based on the popular vote at the last election.

The way it works out the Liberals will receive a quarter of an hour many of the total free time than the Conservatives. The C.C.F. and Social Credit are to get much less.

The C.B.C. points "nothing" more to any party. They must buy it on "local" stations.

11 CANADIAN AIRMEN TO FLY FOR FINNS

TORONTO—Twelve Canadian airmen, rejected by the Royal Canadian Air Force, Friday signed visa applications to join Finnish air forces. They are left Monday, by way of New York, to join the Finnish air forces. Their expenses will be paid by Finland.

ATTACKED BY WIFE DECLARED INSANE

CALGARY — Wilfred (Wes) West, 39 Calgary accountant, was acquitted, on grounds of insanity, of attempting to murder his wife, Dorothy, 37, by a pair of ornamental shears Friday. The jury was out for 40 minutes. Mr. Justice Howson said accused would be held at Ponoka until the Lieutenant Governor considered the case and disposed of it.

Subject to this decision, West may be committed to the mental hospital at Ponoka, or he may be released from custody shortly.

SOVIET PROTESTS U. S. ICEBALL EXERCISES

WASHINGTON — Constantine A. Oumansky, Russian ambassador to the United States, protested to Secretary Dulles's compliment to State Secretary Herbert Hoover Thursday against reported exercises" on American plane shipments to Russia and against a speech in which high government official branded Soviet troops as "serfs."

HOCKEY NOTES

ALIX AND ELNORA SPLINTERS PLAY 6-6 OVERTIME TIE

Elnora and Alix Juveniles fought to a 6-6 deadlock on Friday night last in Alix. The game was fast and clean with the local boys happily behind in the first two innings. They, however, rallied in the last period to tie the score with three counters. In overtime both teams scored one.

Those scoring for Alix were Smith (4) and Patrick (2)

DELBURNE WINS FROM ALIX JUNIORS, 11-3

After holding a lead for two periods, Alix Juveniles could not stave off a third period rally by the Delburne Juveniles on the ice here Friday, losing 12 to 9 on Saturday afternoon, February 2.

The game was fast and clean until the last one with Delburne

Goal scorers: Alix—Myre H. Patrick (3) and K. Smith (3) with Patrick scoring the assists, then being in on the play in every counter Score for Delburne were: L. Smith (5), B. Armstrong (3), S. Kabbish (3) and Nenzaling (1).

Lineups of Teams:

Delburne — D. McKinnon, A. Green, C. Hesketh, S. Kabbish, L. Smith, B. Ewing, D. Montgomery, R. Dyas.

Alix—D. Dixon, Myre Hodgson, Jack Collins, K. Smith, H. Patrick, L. Elliot, Bob Hollings and B. Graham.

ALIX SENIORS LOSE FROM STETTLER, 8-3

The Alix Senior hockey team took it 6-3 licking from the Stettler Seniors on a return match played in Alix last day night. The Stettler squad played a of excitement for the large crowd of fans. The Stettler boys led all the way with the score at the end of the first period reading 3-0, at the end of the second, 6-0, and with both teams scoring two counters in the final.

Scorers for Stettler were Gilbert, 2 goals and 2 assists; Horne, 1 goal and 1 assist; Jones and Dunn scored a counter each and Eric Johnson helped with a pair.

The Junior Alix forward line gave the best account of themselves with Patrick carving on Cando's assists and Smith on Patrick's.

Lineups of Teams:

Stettler — Sanderson, goal; Hiney, Sim and Gilbert defense; and Dunn, Jones, Johnstone, Bamford, Horne, McTaggart and Wilson on the forward

Robt. Whitfield Is Elected

Nomination Day for Town of Alix Village of Alix was held last Monday from 11 a.m. to 12 o'clock noon, with Mrs. Peace acting as Returning Office. Only one nomination was received, that nominating Mr. Robert Whitfield, the retiring councillor. Thus, the citizens of Alix have shown their confidence in Mr. Whitfield, who is returned by acclamation, to the Village council for his third consecutive term, and no election will not be required.

Village of Alix Annual Meeting

The annual meeting of the Village of Alix was held in the Council Chamber on Monday evening, February 1. Ratepayers evidently are of the opinion that their affairs are being handled in a satisfactory and such being the case, deemed it unnecessary to put in an appearance. The annual statement was discussed briefly, and other matters were disposed of with dispatch.

Following the close of the annual meeting, the regular monthly business of the council was given attention.

Mayor Mackay presided over the chair with councillors Whitfield and Todd present.

A Calgary power bill from Mrs. C. Brown was presented, and after discussion it was agreed decided that the Village could not be held responsible in her bill.

Mrs. Peace was at the meeting as Returning Officer with R. Whitfield's nomination paper signed by seven responsible citizens.

A communication from the Board of Transport Commissioners for Canada re the Canadian National Railway's application to abandon the Endiang-Camrose branch was given the proposal its approved as required.

The Secretary read a letter from the president of Alberta Municipalities stating that Towns and Villages will now be required to pay $25 per year annual license allowed under the recent Dominion-Provincial trade agreement, placing villages on the same basis as cities.

Dr. Warren was present at the meeting to advise that the tuberculosis test of cows producing milk for consumption in Alix was proceeding as required.

The matter of the man who refuses to pay his dog tax will be settled as arranged. All but one dog-owner have paid their fees.

Accounts were passed as follows:

Mrs. Peace, R.O.	$ 5.00
Chas Wedgwood, sal.	70.00
Alix Free Press	15.00
R.W. Peacock	15.00

C.P.R.	5.00

Alix Public Library

Alix Public Library, according to figures provided in this week, show this worthwhile community enterprise has ended the year with a surplus of $56.31 compared with last year when there was a deficit of $2.75.

The U.F.A. are to be commended in providing Alix with a library, and it is to be hoped that every member will be made of this facility in the future.

During the year Miss Mawyer donated 24 books, Mrs. E. Porter, 6, Mrs. Myre, 6 and Mr. Jones, 1. A total of 36 books donated.

Those are also the Mrs. Yarwood for placing great papers without charge, to Mr. Purcell for loaning almost 100 books and Mrs. Mawyer for constant care of the library. Also to the many members who have helped in various ways throughout the year.

Best.

Alix — D. Wilson, goal; B. Peace and Ron Patton, defense; R. Wilson, J. Peace, Gibbins, Smith, Cundell, Patrick on the Alix Team.

Record Entry of Amateur Boxers for Northern Eliminations Tonight

BEY, FIGHT FANS ! — HOW ABOUT IT ?

Alix is fortunate in being the fourth city chosen by the Northern Alberta Boxing Eliminations. All fight fans are requested to turn out and see the fistic fluff on Friday (tonight) and give the youngsters a hand.

Reserved seats cost only 75c, with kids seats costing 50c. It is found necessary to increase the prices on Boxing nights, owing to the fighting of the fans at night tickets will remain unchanged.

MIRROR NEWS

On Wednesday evening, January 28, the Women's Institute held a Cribbage Drive in the W.I. Building. Five prizes were won by Mrs. Wm. McDonald and Bill Hamilton; second prizes by Mrs. Bruce Hemming and J. Powell; consolation prizes by Miss Dora Hobbins and Miss Beula Ellis.

Mr. A. Ray has entered a rink in the Edmonton Bonspiel. The rink consists of A. Ray, skip, L. Goodin, 3rd., J. W. McLeod, 2nd and J. Heasman, lead. Mr. Ray's rink will be entered in Bonspiel events for Edmonton. Others entered in the bonspiel from here are C. Martin, J. Kerr, and C. Dermont.

On Tuesday evening, January 20, Miss Cleta Pearsall and Milton Burt entertained about 20 friends in the W.I. Building on the occasion of their birthdays. Games were played and the usual of games and dancing. Everybody present reports having an enjoyable time.

Harmony Chapter, O.E.S., on Thursday evening, February 1, entertained their husbands at a birthday tables, in honor of their sixth birthday. Prizes were won by Mrs. J. Kerr, Mrs. E. Justham, W. Ray and L. Murray

And Now We Have A Voice From Tees

Mr. and Mrs. Alvin Wallis enjoyed their tables of bridge last Saturday evening in their new residence. Several hands were worked and when the final count was made the low scores, it was found that both top and bottom places had many contenders. Ladies' first were Mrs. Ted Cook and Wallis; ladies' consolation to Georgie Sayer; gents' Robertson and Bill Ray; gents' Rollie of Tees and guests' consolation to Mr Ed Wessling.

The passing of Mr. E. F. Seal at Lethbridge on Thursday, May 29, was heard on Mr. Seal is the third child from Alix district to be taken away under the last six months. Mr. D. Lobanow and Mr. C. Gabbert being the other two. All three boys were well past seventy years of age and their removal are matters of importance will be greatly missed.

Our Grand Slam Bridge Star broadcast Alix last Friday and brought home the bacon! Congratulations to the group from the Scene of the Mighty."

Mr. P. W. Walker's car, while in charge of his hired man was involved in an accident, on the main Edmonton, last Saturday evening. No details are yet available.

A large number of young people from here took in the big free dance staged by the John Deere Plow Co. at Tees on Friday night. Almost eight quite a few were seen filtering in to the Foresters' dance at Alix, where a large crowd had already assembled.

One big mail order house has taken pity on those who like to hog the fire. They have added a fireplace to their catalogues, full of pictures and reading; very interesting to old and young alike.

One of our popular young ladies, Miss Catherine MacMillan, was out of circulation for over a week due to a severe cold. We all blame Mr. Sore-lay Armstrong of Elnora, who visited here recently, and (unlike the forgetful plumber) he brought his cold with him—and left it here. It's funny, but when a bad cold hits a little girl, it's one time to hold onto it. In the above cold has driven such the secrets of the

Les Siddons, promoter and organizer of amateur boxing in the district, announces that up to Wednesday night, 32 entries have been received for the Northern Alberta Boxing Eliminations to be held in the Legion Hall, Alix, on Friday night, February 9 (tonight) The Alix Consolidated School Club will have at least 15 boys entered, of whom eight reside in the district, with the balance from Sunrise, Erskine, etc. They will do battle with the best in Northern Alb ria, and the winners will compete for Provincial honors at a big party on February 20 and 21. Donalda on Finals will also be held in Calgary in the latter part of April, or early in May.

Eleven entries have been received from Edmonton, of whom seven are off Boxed with the Y.M.C.A. as their city, and four members Central Gymnasium, well-known provincial trainer and fight manager will accompany the Edmonton boys to Alix.

Entries so far received, together with their weights and ages, are as follows (in each case the class, "Open," "Senior," and "Junior", is designated by the initial letter.)

Edmonton — L. Holmes (S)130; A. Jenkins (O)60; L. Wadsworth (O)60; O. Stubbs (O)67; L. Wilkes (O)75; G. P. Langridge (O)81; R. McDonald (O)86; G. Rendell (O)91; Ken Wilson (O)135; Pyne (O)135; Mitchell (O)135; Rendell; C. B. McIlroy (O)135; Wm. Parsons (O)135; L. Hilton (O)160; G. Bryan (O)0; L. Brunt (J)70.

Lacombe—M. F. Farrel (O)175; p. G. Friend (O)185; Jones (O)200; Ken (O)0; W. Friend (O)185; D. Farrel (O)167)

Alix — Josh Collins (O)130; A. S. Crossfield (O)132; Jim Wilson (O)132; J. Wilkinson (O)72); W. Cundell (O)172); Bobby Dickson (O)67; P. H. Siddons (O)67

Stettler—H. P. Robinson (O)75).

Camrose—D. McBride, (O)0.

Erskine—C. H. Morrison (O)135). Millet—J. Rendell (O)0.

As may be noticed by the above list, the card will be a large one, and if no injuries are received in training there will be impossible to accommodate the fighters in one night's boxing. Consequently, if local community, the bouts will be continued Saturday night as well.

HAYNES NEWS

The annual meeting of the Hayes United Church was held recently and the officers were considered in a minister very confid e.

The Ladies' Aid have considerably improved the property — both church and manse during 1958 and there is a substantial cash balance at the end of the year

Officers re elected are: Mrs. E. Wills, Mr. T. Bamford, Mr. W. Vercoe is with Mr. J. Davidson, secretary-treasurer.

At the regular service in the Hayes United Church on Sunday, February 8, at 2.30 p.m., Rev. Thompson will be assisted by Dr. Powell, Superintendent of Missions, Calgary, who is well known throughout the province and is an inspiring and forceful speaker. It is to be hoped there will be a good attendance.

The activities of the Red Cross Society are somewhat hampered by the absence of Mrs. Bamford, who is one of the most enthusiastic workers at headquarters.

A shipment, however, is expected this week.

DRAMMEA — WOLFSTEAD

A joint meeting was submitted at the Sterrier Anglican Parsonage on Tuesday, February 3, at 8 p.m., when Nancy, daughter of Mr. and Mrs. C. Wolferton of Alix, became the bride of Mr. Jacques Drammea, also of Alix. Mr. and Mrs. M. V. Early acted as witnesses. Rev. Chapman performed the ceremony.

The newlyweds will reside in Alix where Mr. Drammea is employed as truck driver for W. E. Jennings.

town.

Miss Lillian Coburg left for Midland Wednesday where she will be the guest of Mrs. Wm. Kennie. Miss Coburg will arrive in Brantford where she chosen some just in time to attend the semi-old party to be hosted by the Brantford Chamber of Commerce. Miss Coburg resides with Mrs. Kennie in Brantford.

M.D. Annual Meeting, 17th

The annual meeting of Lacombe M. D. No. 164, will be held in the Municipal Office, Alix, on Saturday, February 17th.

Members present, Councillors Ulme, Heath, Woods, Hill and Bain.

At 10:40 a.m. the above meeting of Lacombe M. D. No. 164 was opened as follows:

The Secretary read minutes of meeting of January 6th — Moved by Councillor Heath that minutes be received | Carried.

Secretary read By-law No. 52, a By-law to amend By-law No. 1, 2, 3, 4 and 5, to block 6, Number of Town, to R. W. Peach, for the sum of $10.00. Moved by Councillor Woods that By-law be read and Seconded by Councillor Heath | Carried.

Secretary read By-law No. 54, a By-law concerning the sale of Lot 23, Block 1, Subdivision of Lot 1, Lacombe, for the sum of $1000. Moved by Councillor Heath that By-law be read 1st and 2nd readings of By-law No. 54 — both Carried.

Secretary received a letter from the Department of Public Health asking for the appointment of Inspectors and applications for prizes under the Maternal Welfare Act, by Mrs. L. B. Bailey.

(continued on page 3)

C.N.R. to Abandon Endiang Subdivision

Canadian National Railways will abandon the Endiang spur running between Alix and Strome, according to a decision pending before it by Board of Transport Commissioners for Canada, the board approved.

The railway company plans to abandon the 9½ miles of track, and one jointly with the C.P.R. that portion of the C.P. Lacombe sub-division which parallels the Endiang spur. The construction will be made at Alix.

The abandonment will result in a saving of over $15,000 a year the company contends. Revenue derived from the Strome spur, which is now served by the spur was lost $4,000 in the three year period from 1955 to 1958. Four or five employees will be released.

NOTICE !

ANNUAL SCHOOL MEETING

Notice is hereby given that the Annual Meeting of the Ratepayers of the School District of The Alix Consolidated School No. 12, Province of Alberta, will be held in the Alix Consolidated School (Miss Sanderson's Room), in Alix, Alberta, on Friday, the 20th day of February, 1959, at the hour of 2 o'clock p.m., Standard Time, for the transaction of such business prescribed by the SCHOOL ACT.

All ratepayers are requested to be present.

Election for Trustees, Alix and Opon Valley.

Dated at Alix, Alberta, this 2nd day of February, 1959.

L. H. SIDDONS,
Secretary-Treasurer

NEWS FROM TEES

Our Readers will note that "Tees Tagles" is a new feature in the Free Press and Mirror-Record this week, and we thank our new correspondent for her kindness in contributing this item. Readers may be sure to watch for each issue of the paper and give Gladys a call with any items of interest you may come across.

An Offspring Of War?

War spells its train of bloodshed and ruin, its loss of life and destruction of property is always devastating in greater or less degree to all parties concerned, but it does sometimes bring certain benefits to the belligerents, if they happen to take advantage of the opportunities it may afford and learn the lessons which it may teach.

The democracies when they are waging a conflict forced upon them by the force of liberty and freedom hope that out of the present conflict will arrive security for the nations. That is their main objective and if this is achieved the war will not have been in vain.

While this is the all important goal it is quite possible that the very indignities of war may cause lasting benefits on one or all of the belligerents in some form or another some of which cannot now be foreseen or even guessed. There are others who's may be visualized and one of these is the possibility that one of the results of the war may well be the establishment of the Hudson Bay route, not only as the shortest ocean route between Europe and the prairie reserves of Western Canada as is already well known, but the safest, the fastest the most practical and the most economical.

The three first points are well acquainted with all the facts and who have made a close study of the route via Churchill and its possibilities, and there are equally prominent men in the Old Country who are not generally known personalities are keeping abreast of the times and are closely watching developments of the air key largely ignored. All that may be changed by the necessities of the war and it is quite within the realm of possibility that the close of war may see it a route within the realm of established as the most favorable one for the transportation of passengers and freight between the Old Country and the prairie provinces. There will be considerable confidence to be kept open during the year round. There will be considerable confidence to this report since it came from a graduate of the University of Manitoba by and a prominent hydrologist of world wide reputation, who has made an extensive study of the Hudson Bay district from his private research station at Churchill.

In his report Dr. Baldwin says

An Important Finding

Some such thought must have been in the back of the mind of Colonel F. J. Jeanes who retired as president of the On-to-Ze-Bay Association at a meeting in Regina in December when in his report of the Association's activities of the past three years he referred briefly to the visit of a British warship to Churchill in 1937 and added: "No doubt the information received on that voyage will prove of value to the British Admiralty now that we are engaged in war and it is confidently expected it will create further interest in our port as a commercial possibility of enemy activity."

Since that confirmation is lost to this prospect in the report of Dr. Alexander D. Baldwin Russian scientist at Churchill, that there will be considerable confidence to be kept open during the year round. There will be considerable confidence to this report since it came from a graduate of the University of Manitoba by and a prominent hydrologist of world wide reputation, who has made an extensive study of the Hudson Bay district from his private research station at Churchill.

In his report Dr Baldwin says

"Hudson Bay and Hudson Strait never freeze in winter. The ice from Fox Channel, considered a some quarters as the chief menace to the entrance of the Hudson Bay route, is not a determining factor in all.

"The local ice conditions at Churchill determines the closing date. The open water during the severest part of winter is only one-half to three miles from Churchill and I can see the possibility of navigation for nearly all year."

To which C. H Sampson of Winnipeg, vice-president of the On-to-the-Bay Association adds the pertinent comment: "Our Association does not consider the operation of the northern route has been a success to date, but this war should bring out its true value."

Work To Be Done

Beyond bringing to the attention of the authorities the facts as they come into its possession from time to time the On-to-the-Bay Association can do very little to promote the development of the Bay route as long as the country is at war since the control of all shipping has passed into the hands of the Admiralty.

For the present reasons and because of the necessity of withholding information which might be of value to the enemy, the public and even the members of the Association is not likely to be kept posted as to the control of one which is being or will be made of this northern sea lane until after peace has been signed.

This does not, however, mean that the Association should go into cold storage for the duration of the war. On the contrary as Col. Jeanes has pointed it his report it should remain active by pressing the British as well as the Canadian authorities "steadily but persistently to use the route to the fullest extent possible."

By keeping the organization intact and active so far it is possible to prepare for a position immediately on the cessation of hostilities to do the Association—to effort to have the control of the facilities of Churchill handed over to a Western management.

Taking Up Work Again

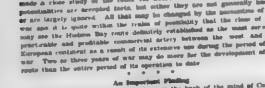
Noted French Surgeon Will Serve In War Hospitals

Dr. Serge Voronoff, French surgeon who startled the world 20 years ago with his monkey-gland "rejuvenation" operations, sailed from New York to the Italian liner Conte di Savoia to direct bone and skin grafting operations on wounded soldiers in France. During the first Great War he worked on the rehabilitation of shell-shock French soldiers through the grafting of bones from monkeys.

When the liner Albeola sank Sept. 5, she took with her a consignment of Grade XII test books for Alberta schools.

You can always tell when you are on the right road. It is uphill and the going is tough.

Bakelite, metal obtained for some from bone Bakelit, who invented the



Annual Contest Announced

Award Will Be Given For Best Children's Book

The Julia Ellsworth Ford Foundation has announced its seventh annual award for outstanding juvenile book, with a $2,000 award offered for the best juvenile book manuscript submitted during the contest, which closes May, 1940.

Books submitted, detailing all conditions of the offer and including entry blanks which are necessary to complete, can be obtained by addressing Helen Hoke executive director of the Julia Ellsworth Ford Foundation, 6 West 48th street New York.

The Ford Foundation award book will be published by Julian Messner Inc after its selection by the judges, judges for the 1940 contest will be announced later.

Floating flower boxes add touches of color to tropical streets. Water plants thrive in half-dropped bags where seeds have lodged.

Before the turkey was introduced into Europe in 1524 the peacock was a popular Yuletide dish.

Japan is urging sweet potato cultivation for the manufacture of alcohol.

Russian Division Trapped

Writer Compares Recent Event With Charge Of The Light Brigade

Machinery high explosive and poison gas have robbed war of much of its glamour but from an ivy bound tube in Finland comes a story worthy of Tennyson's pen. If the Victorian poet were alive he might well call it as the blade of a modernized war slew the his immortal "Charge of the Light Brigade."

A Russian division was trapped on the ice and completely surrounded by Finnish troops who shut it in above with machine guns and artillery. Thompson's pens recounts the fate of 800 British rearservers who in the Crimean war charged into the mouths of Russian guns and suffered a similar fate.

One incident took place on the south of Hanko the other on Rantasalmi northern frontier In one the Russians were the victors in the other the vanities. Trapped and numerically blundered in ordering the British light brigade to charge. The whole Regiment was annihilated by a single gun Killed at Vaksasalmi by machine gun fire.

Describing the plight of the light brigade Tennyson wrote

"Cannon to right of them
Cannon to left of them
Cannon in front of them vol-
leyed and thundered
Stormed at with shot and shell
While horse and hero fell
They that had fought so well
Came through the jaws of death,
Back from the mouth of hell,
All that was left of them
Left of six hundred.

Like the gunners of the Russian division fighting in the Finns had cannon behind them but

Boldly they rode and well—
were of the Russians.

Into the jaws of death,
Into the mouth of hell
Rode the six hundred.

Against the Russian division the Finns had no cannon as front of them volleyed and thundered but machine gun fire. Like

CHAPTER XI

The canoe of the Peterboro left the other and shortly passed the mouth of the Nipigon River. Beside this it reached the blazing dead and charred trunks of the Pine Portage and the Nipigon Bridge. A canoe to Nagagami Harbour was within two miles. Here the Peterboro turned into the southern shore of the lake at the mouth of the River of Pines and ran head long into a high cliff. Up the shore among the rocks a group of two long-haired men with shoulder length hair stood staring at them. The Nashaga faded from sight among the boulders.

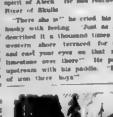
Air They thought they could take with their bare hands?" he said. I wonder why they never took to put a knife in me."

Replacing his gun in its holster McCord stared downward his way up among the boulders that lined the side of the gorge. He strolled some distance from the spot where he had been rushed and evidently he had seen all he cared to see. But from where he lay he was unable to locate any of the Indians that had invited some minutes then continued on up among the boulders keeping along on their course. There was nothing in sight. The long northern twilight was nearing its end. In half hour it would be dark.

A half mile below there men and a girl waited for the arrival of a fisherman. After dark he worked his way cautiously down to them. The story of his narrow escape disquieted them.

The following day the valley of Nagagami Harbour at the west of the Kabeash entirely flat- tened out and in the afternoon reached their goal the mouth of the River of Shells. The western slope of the valley rose at a succession of narrow tiled terraces to merge with the white moss tundra beyond. It was unmistakable. Upon moist with emotion, McCord gazed up the valley of the brook. Here was the picture that Jakob Drummond had anciently etched in the memories of a thousand-mile traverse of forests lakes and roaring rivers was behind him. He had kept his word in the spirit of Alick. He had reached the River of Shells.

"There she is" he cried his voice heavily with feeling. Just as Alick described it a thousand times the western shore terraced for miles, and cool river ran over small limestone rock there. He pointed upstream with his paddle. Shells of iron there both."



"Trees as pea's bend"

"Well, here goes for the River of Shells" shouted Alec, carried away by McCord's excitement as he swung the bow of the Peterboro from the main stream "Heather you'll soon be getting gold nuggets right out of the sand!"

Heather misses bravely back at the storeroom but her eyes were haunted by fear. Although the men had refused to talk, she had guessed what had happened back at the gorge what had driven them up the river through the night. Again the Nashaga had struck at the white men entering their country. All through the summer and fall would keep the menace of sudden death to the gold hunters and later, somewhere on the long trail back over the river to

and more McQueen and his half-breeds would be waiting. She sensed guilt in the bronzed steersman whose gray eyes so reassuringly met hers but in her heart was a sinking fear.

The actions of Nast in the bow drew the attention of those behind him

What d'you see Nast" asked Alec as the boatman squatted at the long grass paddle pointing and waving forming the tongue of the fork

Some'ting ees de color ovair deer replied the Indian. "We have a look

The canoe approached the drifting object caught in an eddy inshore which had held Nast's sharp eyes

"A beaver paddle" White man's law" cry'd Alec

"Ah-hah" McQueen now did paddle commanded Nast lifting the paddle blade from the water "Gar- gar she ees spoil by a bullet" he went on excitedly Look

The Indian pointed paddle back to the bend

The canoe's bow barn" grunted the guard showing the paddle to Alec They've been shot at by white men above here. They've made a stand by the ball from a rumble bonbor"

(To Be Continued)

To Record We Effort

Leonard W. Brockington, K.C., Has Accepted New Duties

Leonard W. Brockington, K.C. Winnipeg has been appointed re- cordor of Canada at Geneva.

Mr. Brockington who will be at- tached to the prime minister's office during the session of the League meeting of the new year is general counsel to the International Labor Association and has been given leave of absence by that firm

Mr. Brockington Brockington re- signed as chairs is of the board of governors of the Canadian broad- casting Corporation after serving a three-year term.

The Canadian Association memorial described Mr Brockington as "a man of wide experience in public affairs who has rendered distinguished service capacity to the war council ive of the cabinet in connection with the effort of Canada's war effort. to advise and assist the gov- ernment in securing records and essential information in these re- spects to the people of the United Kingdom and to assist the prime minister in keeping a record and other essential records of the pro- gress of Canada's war effort."

Under the terms of his appoint- ment Mr Brockington will be attached to the secretariat of the League of Nations in such capacity as the secretary-general may direct from time to time.

The minister's announcement described Mr Brockington as having been "active in the early organization of the mandatory war for military machines formed it the result might be entertainment from Ottawa" it is to be expected that the transcon- ing machine would be shot down at the end of January.

Because of this the international law on the subject has been greatly defined Where it follows wherever it is recognized by all Euro- which it is recognized by all Euro- wick and Maine and Quebec. It is a land boundary a broad swath of be- ing cut through forest and field This cleared strip is from 20 to 60 feet in width. It varies in depth by the two nations each attending to the task in those portions of the line more conveniently reached from its terri- tory.

A Canadian engineer accompanies each United States party as an ob- server and a United States engineer accompanies each Canadian party as an observer. The work is done in accordance with a detailed plan of the line and the boundary commissioners are jointly employed at the end of the season to see that the work has been done in the manner agreed upon.

Before then, on a mile or more, stretched an alluvial flat filled with moose and bears that lumbered down to the gorge where, suddenly widened to the Canadian Nile to the south. Here and beyond the above-extended wooded terraces to the north and south.

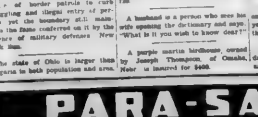
"Here it is Alan" bried McCord excitedly, "just as Alick described it! Timber and gravel beds have been washed down here for cen- turies! We're going to find gold here, boy, gold!"

"There's the spruce to build the boats" cried Alan infected with John's excitement, pointing to the wooded terraces.

"Most of these here can be free- passed without the trouble of a fell- ing or sawing" cried McCord "That's where Alick got most of his nuggets—big as creations"

"Gosh, Dad" I'm excited" laugh- ed Heather. "Think of it, gold in our hands! Why baby got back with it!"

Nagaye's black eyes shone with a hidden fear to be stared through his mop of hair at the distant supporting



of the river where the stream left the gorge and spread out into the shallows. He was apprehending the range of the Spirits who among their number had taken the life of his people for the greedy white men.

The great lake the resident duties of the Nashaga, and Nast's sharp- ness of vision. Nast was a half- breed Indian of the Lake Nipigon Indians who had been employed by the Hudson's Bay Company as a guide and voyageur. He had been with McQueen since the latter had first penetrated the Nashaga country.

Alan went to his dog followed by the girl and took the thing Rough held it in his jaws Heather glanced at it and turned away

It was the bleached and weathered frontal bone of a human skull

CHAPTER XII.

It was already August by John McCord, wound The smaller lakes of the high plateau country were now white the swift streams and big riv- ers were already cool until later but he knew that the water of the River of Skulls would be so cold and carry so much silt that swimming in it would be impossible. And it was dropped at the mouth of the Nagagami River below the last lake or at least would have grounded there. If he had not been rushed by the Nashaga northward McQueen at the head of the long rapids of the gorge John." The giant laughed loudly "That would give him a heap of trouble if they had I didn't figure he was so clear on our heels

"Neither did I. Did you. Nast?" They're only average river men and we."

"You two are the best white-water men I've ever seen and I've seen plenty." interrupted McCord. "I don't see how they came to float." Then the big man shook his head in bleak sympathy at the valley through which the Peterboro had come "Come and take it. McQueen" he roared "If you're still alive come and get us" and he shook his fist at the gorge which ought to have made safe from the danger of the drowned.

Nagaye seemed somewhat relieved, but he said nothing. A huge eating of potatoes black bread of a better quality than civilians have followed the Nagagami Harbour.

Afternoon Meal—Tea" again re- placed coffee, which is unobtainable in Germany.

Evening Meal — Sausage, hard black bread, cheese, very occasionally butter on black bread, with three- quarters of a pint of beer.

Sunday—Special spas-occasional of the abundance and quality of the French army rations. Ed.

Drums Of The Air

Flying Officers Risked Their Lives To Save Their Machine

Flying high over the Atlantic four hours out from Newfoundland Cap- tains Donald Bennett and First Officer Thos Farnsworth rubbed their fingers in new the Imperial Airways flying boat (what an official report reveals.

The drama which was fought out in September, by bored until now in the loose and formal report there is true Aladdin's Eyes made at the end of each trip

Bennett Australian - born com- mander of the Cabot said that he and Farnsworth when 15 per cent of their oil had escaped through a leak - rewired to a tank on the wing and found that it had not come out of the tank but we patched it up with a jointing - composition." he went to the rescue the gushing dust Reported Then Farnsworth rigged up a light inside the wing, and his mate began to inspect the rivets at frequent intervals and make certain that a wax ad eight.

"We could just get through the aperture which was three feet six inches

The Cabot flew on normally and again the pilot reported Peyton, aboard from the Hermit' sollside of the polar regions." Dr Bennett's Hudson- ian Expedition might call large coke operations Utopian. It sounds like a fairy tale. Engineers are reclaiming into valleys by shrinking them with cool dust. Then every- thing being made proof of heat and at the same time increasing the hydrocoke- ing process to every by producing their flow of water

Since the polar regions govern the earth's weather with their pro- duction of gigantic cold air masses Dr Bennett's discovery on the climate could be expected if it were possible to change the light conditions over of such areas." Dr Landsberg de- clared.

Heating Power Of Sun

Sunday 42nd Used On Ice To Drop Boiler Heat

A suggestion that Admiral Richard E Byrd experiment with the heat- generating powers of the sun by scattering coal dust from an Anti- arctic mine over the south pole to- gions was made.

In a report before the American Meteorological Society meeting in conjunction with the American As- sociation for the Advancement of Science, Dr Helmut Landsberg of Pennsylvania State college described the coal dust in the Arctic as the fifteen- hundredth of an inch thick would absorb 90 per cent of the sun's heat. Ice thus absorbs only 10 per cent of the sun's radiation, collecting away the heat 90 per cent.

Blocks of ice covered with coal dust on an average would melt com- pletely within four hours while uncovered blocks shrank only 15 per cent.

An immediate practical applica- tion is already contemplated, Dr Landsberg declared, in experiments on Pennsylvania highways. In addition to coating the road surface with coal dust to prevent skidding the thin coat of dust also creates cool from Pennsylvania mines also is being used. It already proved effec- tive in the test in preventing ice formation during the daytime

"At a time when men are wrang- ling over the question whether it would be possible to transport coal from the Arctic' outside of the polar regions, Dr Bennett's discovery might solve operations Utopian. It sounds like a fairy tale. Engineers are reclaiming into valleys by shrinking them with cool dust. Then every- thing being made proof of heat and at the same time increasing the hydrocoke- ing process to every by producing their flow of water

Since the polar regions govern the earth's weather with their pro- duction of gigantic cold air masses Dr Bennett's discovery on the climate could be expected if it were possible to change the light conditions over of such areas." Dr Landsberg de- clared.

Fight For Freedom

Spirit Of A People Cannot Be Permanently Suppressed

When war comes it is natural to think in terms of guns ammunition, tanks, bombing airplanes, and other industries and other instruments of applied force. But these are not enough. To quote a recent com- mentator:

"War can be won without op- timism. It is just as important to conserve as to destroy. Important as is the ordnal bases, optimism helps us to overcome difficulties by break- ing down resistance. It is what is cultivate this optimism in all our people. It is what we must do if we are to mobil and renew optimism in the souls of the people, and to keep it there. It is what we do by saying that the means are about when the reasons rear back as justification. Art is one of the sharpest spiritual weapons of war."

Any belligerent could profit by taking these principles to heart. In the case of Italy we fear it is much needed completion is ineffective. The spirit of a people cannot be killed or crushed, the burning of books does not destroy the ideas in them, the bombing and burning of pictures does not end the "spiritual weapon" of the arts, the bombs destroy the created inventions. But only most men can do in the end.

Ships, and ships, built and de- stroyed, may be the material but it is the spirit of the people that counts. Those are signs that the "spiritual weapons" are essential to victory. Without the "spiritual weapons," if one remains those carefully, are soon to vanish only by free men, who have gained moral strength by mak- ing their own decisions.

And Ed Dr Joseph Goebbels, Hit- ler's minister of propaganda, knows the power of ideas when he quotes words and powerful, ringing words from the driver's license of the 13-rule enlisted into the Nazi movement book stuffed with newspaper clippings.

Tsul driver of Jonnsiea pre- vious and over the powerful Nazi machine and to keep himself away this census.

In 1937, Berlin created A record quest to a book up to temporary bookkeeping industry of that city.

CHAPTER XI Continued

"Maybe paddle, that a McQueen s agreed Alan He had two he brought with him to Fort George. I guess they came running up the river. That's the possible." And it was dropped at the river below the last lake or at least would have grounded there. If he had not been rushed by the Nashaga northward McQueen at the head of the long rapids of the gorge John." The giant laughed loudly "That would give him a heap of trouble if they had I didn't figure he was so clear on our heels

"Neither did I. Did you. Nast?" They're only average river men and we."

"You two are the best white-water men I've ever seen and I've seen plenty." interrupted McCord. "I don't see how they came to float." Then the big man shook his head in bleak sympathy at the valley through which the Peterboro had come "Come and take it. McQueen" he roared "If you're still alive come and get us" and he shook his fist at the gorge which ought to have made safe from the danger of the drowned.

Nagaye seemed somewhat relieved, but he said nothing. A huge eating of potatoes black bread of a better quality than civilians have followed the Nagagami Harbour.

Afternoon Meal—Tea" again re- placed coffee, which is unobtainable in Germany.

Evening Meal — Sausage, hard black bread, cheese, very occasionally butter on black bread, with three- quarters of a pint of beer.

Sunday—Special spas-occasional of the abundance and quality of the French army rations. Ed.

Drums Of The Air

Flying Officers Risked Their Lives To Save Their Machine

Flying high over the Atlantic four hours out from Newfoundland Cap- tains Donald Bennett and First Officer Thos Farnsworth rubbed their fingers in new the Imperial Airways flying boat (what an official report reveals.

The drama which was fought out in September, by bored until now in the loose and formal report there is true Aladdin's Eyes made at the end of each trip

Bennett Australian - born com- mander of the Cabot said that he and Farnsworth when 15 per cent of their oil had escaped through a leak - rewired to a tank on the wing and found that it had not come out of the tank but we patched it up with a jointing - composition." he went to the rescue the gushing dust Reported Then Farnsworth rigged up a light inside the wing, and his mate began to inspect the rivets at frequent intervals and make certain that a wax ad eight.

"We could just get through the aperture which was three feet six inches

The Cabot flew on normally and again the pilot reported Peyton, aboard from the Hermit' sollside of the polar regions." Dr Bennett's Hudson- ian Expedition might call large coke operations Utopian. It sounds like a fairy tale. Engineers are reclaiming into valleys by shrinking them with cool dust. Then every- thing being made proof of heat and at the same time increasing the hydrocoke- ing process to every by producing their flow of water

Since the polar regions govern the earth's weather with their pro- duction of gigantic cold air masses Dr Bennett's discovery on the climate could be expected if it were possible to change the light conditions over of such areas." Dr Landsberg de- clared.

Food For French Army

Abundance And Quality Cause Sur- prise Among Germans Prisoners

German prisoners captured in France have given evidence as to approximately the daily meals serv- ed in the German army

Breakfast Tea," skimmed milk, sugar bread and jam. The latter be- ing black artificial with carrots and other roots The "tea" is the product of German hedgerows, being of an mixture of the leaves of the blackberry bush, wild strawberry and other substitutes.

Midday Meal—Hot soup, containing little vegetables, a large ration of potatoes black bread of a better quality than civilians have followed the Nagagami Harbour.

Afternoon Meal—Tea" again re- placed coffee, which is unobtainable in Germany.

Evening Meal — Sausage, hard black bread, cheese, very occasionally butter on black bread, with three- quarters of a pint of beer.

Sunday—Special spas-occasional of the abundance and quality of the French army rations. Ed.

Fight For Freedom

Spirit Of A People Cannot Be Permanently Suppressed

When war comes it is natural to think in terms of guns ammunition, tanks, bombing airplanes, and other industries and other instruments of applied force. But these are not enough. To quote a recent com- mentator:

"War can be won without op- timism. It is just as important to conserve as to destroy. Important as is the ordnal bases, optimism helps us to overcome difficulties by break- ing down resistance. It is what is cultivate this optimism in all our people. It is what we must do if we are to mobil and renew optimism in the souls of the people, and to keep it there. It is what we do by saying that the means are about when the reasons rear back as justification. Art is one of the sharpest spiritual weapons of war."

Any belligerent could profit by taking these principles to heart. In the case of Italy we fear it is much needed completion is ineffective. The spirit of a people cannot be killed or crushed, the burning of books does not destroy the ideas in them, the bombing and burning of pictures does not end the "spiritual weapon" of the arts, the bombs destroy the created inventions. But only most men can do in the end.

Ships, and ships, built and de- stroyed, may be the material but it is the spirit of the people that counts. Those are signs that the "spiritual weapons" are essential to victory. Without the "spiritual weapons," if one remains those carefully, are soon to vanish only by free men, who have gained moral strength by mak- ing their own decisions.

And Ed Dr Joseph Goebbels, Hit- ler's minister of propaganda, knows the power of ideas when he quotes words and powerful, ringing words from the driver's license of the 13-rule enlisted into the Nazi movement book stuffed with newspaper clippings.

Tsul driver of Jonnsiea pre- vious and over the powerful Nazi machine and to keep himself away this census.

In 1937, Berlin created A record quest to a book up to temporary bookkeeping industry of that city.

T. EATON Co. Limited

Ward Barrett was a Calgary visitor over the week end.

R. W. Peacock completed the new rating of T. Wilford's store on Friday

Major Forbes was a visitor at the home of C. H. Pinnell this week.

Ed. V. Chambers spent from Saturday to Wednesday in Edmonton.

Casting has been dark for the past week.

Mr and Mrs. Ed Bundy and Rube Archer of Pine Lake spent the week-end with Mr and Mrs. A. G. Dann.

Miss Blaney of Alix, accompanied Charlie Hardie and F. Flewwelling to Edmonton Sunday to take in the hockeyed.

Miss Betty Tillard of Lousana, who recently returned from France, spent last week visiting her sister, Miss Evelyn Tillard, teacher of Stony Seafood.

J. F. M. Purdy has been appointed commissioner for the polling division of Hitching for the coming Federal Election.

Rev. Herbert of Lacombe will take the services in the Alix Anglican Church, on Sunday, February 14th, at 3 p.m. A cordial invitation is extended to all.

The Alix U.F.W.A. held their regular meeting in the U.F.A. hall on Saturday, February 6th. Arrangements were made for the next circle to be held on February 17. All children under school age are invited. It was also decided to hold a bake sale and tea to provide for library purchases and the hall furnishings

Some readers of The Free Press are under the impression that a charge is made for sincerely notices of births, marriages and deaths. In this paper such is not the case and we are always pleased to receive accounts for publication.

An auto accident occurred at the hotel crossing on Alix main street Friday last, when the cars driven by Gene Ivers and H. Clarke collided. Mr. Ivers was driving north to the highway and Mr. Clarke was coming west, both driving slowly. Neither of the drivers were injured, but Mr. Ivers's car was damaged to some extent, receiving a rolled fender, smashed headlamp and a bent axle.

On Thursday of last week, the members of the Gay 40 to 60 Bridge Club met at the home of Mrs. Edwards, and a most enjoyable afternoon was spent at cards. Prizes were won by Mrs. Edgar, first, and Mrs. Sheldon, consolation. It was decided at this meeting instead of having our usual supper to donate the five dollars to the Red Cross as a Gay 40 to 60 donation. The next meeting will be held at the home of Mrs. Peers, on Thursday afternoon, February 18th at 2 o'clock. Mrs. Sheldon to be hostess.

The next regular meeting of the Junior U.F.A. on Saturday, February 20th, is to take the form of a beautiful demonstration. We have been promised demonstrations of wooden flowers under flowers, bridles and other harness work, and many novelties — so if juniors members! — if you have any special work you'd like to show, or exhibit, or know of anyone who does, bring it, and them along to the meeting. All this is leading up to a handicraft display and sale which is to be put on later in the spring.

The following clipping will be of interest to all in the district who remember Maloney's grocery in Alix and his river boat scenery.

"J. J. Maloney, former Ile Khe Khe grocer in Saskatchewan and Alberta lumber and publisher, is wanted by R.C.M.P. on a charge of false pretences in Delburne, Sept. R. A. Mercer, C.I.B. head, announced Saturday.

According to the latest issue of the R.C.M.P. Gazette, police in Calgary hold a warrant for the arrest of Maloney.

Considerable interest is being shown in the campaign to collect rats, gophers and hot poop in this district. Many of our farmers took advantage of the supplies last year and it is to be hoped that everyone in the district will do so this Spring. R. A. Parkin, secretary-treasurer of the local U.F.A. has just received supplies which can be had on Saturday afternoon at the U.F.A. hall.

Mr. A. Newman, Dominion Field Man, addressed a meeting in Mirror on Monday at which an agricultural association was formed for the purpose of handling supplies—and he hopes to spout at a similar meeting in Alix sometime at the end of February. Watch for further particulars. It will be recalled that there was a splendid turnout for the purpose here months ago, but, as we said before, Mr. Newman was unable to get here until most of the ground had left.

DEFEAT FALL FOR INVESTIGATION

By a vote of 38 to 36, provincial legislature Saturday instituted a full fee for investigation of new pulp charges of "trade secrecy and political influence" to the Conservatives of agriculture, trade and industry and attorney-general in making loans and/or guarantee to companies and co-operators, and to the collect a of such loans." Charges were made in the legislature by E. L. Gray, Liberal leader. Premier Arsenault's charges was made by Hon. D. B. Hanna.

ALBERTA IS TOOK HOME LOAN PLAN

Alberta is third among Canadian provinces in the total borrowings under the home improvement plan, according to a report last week by Hon. J.L. Ralston, minister of finance at Ottawa.

Total of 7,257 loans in Alberta have a value of $1,989,412. Ontario leads with $3,000,000 loaned and Que bec is second with $2,500,000.

BEECH TECHNICIANS ORDERED TO LEAVE TURKEY

ISTANBUL — Authoritative sources said Friday night last that the Turkish government had terminated all the German technicians and occupation of the German military mission. They were due to discovery of a far-flung German espionage plot on the Near East.

REPORT BABY BOY SOLD FOR 25 CENTS

PRESTONBURG, Ky. — Sale of to months-old baby boy for 25 cents has been disclosed by Dr Marvin Kantrell, head of the Floyd county department of health. The six-months-old baby was "bought" by the wife of a coal miner at Garrett, coal mining community. The baby is to be adopted by his foster parents.

ORDER SEARCH FOR PLANES IN CANADA

OTTAWA—The British government has offered a reward for military airplanes, valued at about $40,000.00 with Canadian Associated Aircraft, it was announced here Saturday by the British high commissioner's office. The unofficial announcement reports that additional orders would be given the air-company organization formed to manufacture planes for Britain.

OFFER TO TROOPS BRING DUTY-FREE

LONDON — The British government has decided to suspend customs duties on packages sent from Canada to soldiers in France, after demands from and British colonies, the war office announced today. Packages sent to Allied forces temporarily in Canada also will be duty-free.

DENMARK IS FREE, IT SAYS BLOCKADE

COPENHAGEN — Free that Denmark might be completely cut off from the world "by blockade" in years was expressed by shipping circles over the week-end. The action is directly following from an acute food shortage Denmarks ships were unable in her packed Danish vessels.

BIG PLOT TO PASS "MONEY" CANADA MONEY IS BALKANS

TORONTO—Police claimed last Friday to have discovered a plot to distribute $30,000 worth of Canadian counterfeit money among banks in the Balkans. Under arrest here at Mike Senesenko in Toronto and Nancy Hill, alias Nancy Shumiha, of Montreal. Police say the operation of police is counterfeit money with a "new value" of nearly $30,000.

Police claimed the pair were instrumental in manufacturing the counterfeit money discovered in some time ago in banks in the Balkans, returning to Canada with real money. When apprehended, they had partially completed banking and passport arrangements for a trip to Bulgaria.

ARMY THE LESSON IN ITS DRIVE —

The Canadian Legion War Service Drive to raise funds for the relief of fully important task of providing educational, personal, entertainments, recreation and other services for the men in our fighting forces commenced on Monday.

Support this deserving cause with your donation, big or little, when a member of the local of the British Legion calls on you.

BLACK ARMBANDS TO HONOR GOVERNOR

OTTAWA—All officers in the defense forces of Canada will wear black and ear—will wear a special black armband in memory of Lord Tweedsmuir, governor-general and commander-in-chief, during the prescribed seven-day period of official mourning, which began Sunday evening.

PLAN IS GOOD ONE —IF IT WORKS

MADRID—Alberto Editor two Fibh Associa- on-cor, whose proposal to make a peacetime substitute an of war has the Spanish government's support, was given an audience Saturday with General Franco. It was understood the American proposes to treat motor electrically to make a compulsory feature.

SQUAW IN SOUTH ASKS FOR DIVORCE

LETHBRIDGE — First action divorce suit ever tried in Alberta—possibly in all Canada — began in supreme court here Monday

Lily Big Snow Horse, wants a divorce from Big Snow Horse, and — taking it to the whole man's court. The couple were married in January 1908, in a ceremony reported based on tribal rites.

ROYAL COMMISSION COST WAS $500.00

OTTAWA—The auditor-generals report for 1938-39 issued at the week end showed that expenses of the royal commission on dom-ion-provincial relations amounted to $500.00. The commission's report is expected to be tabled at the next session of parliament

CATHOLICS URGE RETURN TO ANCIENT "GUILD" SYSTEM

WASHINGTON — Sixteen prelates of the Catholic Church in United States called last week for re-establishment of a "guild" system "which would bind upon employer and employee according to their respective occupations, thus crossing moral unity."

FORECASTS BONUS ON CANADIAN WHEAT

MELVILLE, Sask.— Canadian farmers who delivered wheat to the Canadian wheat board, under present conditions should receive from five to eight cents a bushel for their wheat on participation certificates, with absence of better prices yet providing Hon. J G Gardiner, federal minister of agriculture, told a Melville audience of nearly 300 last week.

Sale of wheat now held by the board at a price between 82 and 85 cents should make a final payment possible providing storage charges and other costs can be avoided.

Mr Gardiner charged that cricisms levelled against the government's use of the wheat board by Hon. H. J. Manion, leader of the Conservative party, ill become a man who as a member of the Bennett government, had doubled expenditures for seed and defense, but not appropriated one cent for necessary development and had abandoned the Trans-Canada air service entirely.

JAPANESE ARMY GIRD ATTACKED IN DIET

TOKIO—First outright criticism of the army since the outbreak of the war appeared in the Japanese diet Tuesday, when a member of the house budget committee charged that the army was secrecy surrounding the military expenses account and demanding a detailed explanation.

War Minister Shunroku Hata immediately refused to make explanations, but he assured at one point that Hata ordered the stenographic recording of the proceedings to be halted.

BIG FIRE IN HERAT, AFGHANISTAN

The city of Herat, Afghanistan, has been burned to the ground 28 times if he has history.

Germany shipped over 10,000 tons of soap to other countries last year.

Eight Lacombe Oddfellows commemorated District Deputy Bro. Bowes whom he paid an official visit to Alix Lodge, No. 34, on Thursday evening, Feb. 1, to preside at the installation ceremonies of the Alix Lodge.

Officers installed for the ensuing year are as follows:

Noble Grand—C. Watson.
Vice Grand—V. Lyle.
Rec. Secretary—T. Wilson.
Treasurer—S. Todd.
Rep. Encampment—W. Hodge.

Canada's Gov.-General Dies

Canada's governor-general, Lord Tweedsmuir, died Sunday night, ending a five-day illness which all Canada watched tensely and whose sudden or sensation plunged Canadians into sorrow.

Death occurred at 5:53 p.m. (local time), following the blocking of an artery in his brain and a fall on concrete which occurred at Ottawa on Tuesday, when he fainted while dressing at Government House, Ottawa, on Tuesday. Three cranial operations were performed, the last one Saturday afternoon at the neurological institute at Montreal, where he was taken on [illegible]

On Monday the country went into mourning for a period of seven days and on Wednesday a state funeral was held at Ottawa. The body lay in state from Tuesday noon in the senate chamber in which some 7000 persons viewed the remains. Meanwhile the sessions of Canada's parliament [illegible] will be in Great Britain probably by the parliament's senior Scotland.

Alix and District joined Monday in strong tributes to the memory of Lord Tweedsmuir, as flags over all public and office buildings flew at half-mast.

TEES TOPICS

Not many years ago the district enjoyed one of the most active bands in the U.F.A. They were the main force behind the Community Hall, they worked for and built the old Farmers' Elevator which was taken over by the Wheat Pool, and through their good offices many years ago a station there was built. Many other things we handled here. During the lean years several of the U.F.A. boys were the backbone and cut off many conveniences from the services of a station agent. Of late years, the district had lost interest in their own organization to a great extent—the spark of life was not barely burning, when Mr Russ of Wetaskiwin, an official organizer from the head quarters, landed here and on the fire Although there was not such a large crowd, most of them attending signed up and paid their dues. The following were elected for the ensuing year: Mr. Tees, Hon. Pres.; Mr. Sim; Vice-President, F Bunch; Secretary-Treasurer; R E. Moore; Board of Directors, Geo. Gay Members; Geo. Hewie; A. Colley and A. M. Sim Auditors. Reasons, knowledge and good youths endeavored to distract the speaker during his interesting review of the U.F.A. history carried out by the Central Headquarters, and on the honest good of the organization.

A membership contest will be held February 15th, at 2 p.m. to drum up plenty of members in what kind of necessary work, such as controlling the weeds and last files and other pests. Plans are also being laid for the possibility of establishing a co-operative store here.

A young man went flying through the air with the greatest of ease, Monday afternoon, when the front wheel of his bicycle struck a rock which was not fitted with a brake, suddenly stopped and let the rear wheel and rider keep going.

Dave Daly left for a short holiday last Saturday.

The Robertson Bridge Club were entertained Friday night last Saturday night. The home of our eligible young bachelor, Mr. George Lee, was chosen for the scene of the gathering and lunch was served by Mr. and Mrs Colley. Mrs. Lee presided over the coffee pot and spares in case the players' hearts attended. The final tally showed Mrs. Clement Farrow and Jessie Thompson having boggling from and Mrs. F. Bunch and Earl Bunch second and third respectively.

Mrs. J. J Bunch stepped off for the week end and visited her sister, Mrs. Gobey, Mrs. Bunch and son Terry, have returned home to Medicine Hat after spending part of the winter in Vancouver.

Mrs. Frank Heath slipped, on the ice and broke her forearm but much credit on her way to a consort in the local clinic, after which she returned to local treatment. Her present condition is satisfactory.

We Know Him Too ...

Tonight the heart of Canada is full,
And all her various voices stellar one note ...
A solemn mourning for her honoured dead.
A people sorrowing for a well loved friend.

From city chamber comes the mighty swell
Of organ requiem and charming dirges,
While on the Northland's eastern mappers meet,
Traders, and workers, Indians and whites ...
"We knew him too," they say, "He came to us,
Chatted among us, joked and sent our fish,
He knew what we were doing, heard our plans."
In small towns of the western plains today
Friends meet in groups, and neighbors pause to talk
Of him they knew "Remember when he came?
He praised our main street, and he shook our hands ...
We knew him too," they say, and heads are bowed,
For many'ry's sake, for him who was their friend.
And those who have not seen think of a voice
They've known, a sympathetic word, a kindly aid ...
And those who have not heard think of a book,
A lucid history perhaps, but for the most
Records of risk, adventure and romance,
Bringing new heart to brighten drab grey lives ...

In days to come, when yesterday's toe is spent
We of this land will treasure all these things,
And in the troubled days that lie before
Hands will be laid the tighter for his sake.
His fate has been the same—and for why
We shall remember him in grateful thanks
That once he lived among us, as one friend.

—Barbara Villy Cannon.

MIRROR NEWS

On Tuesday evening, February 8th, the W.A. held a Military Whist in the Odd-fellows Hall, at which the sum of $25 was realized. After cards, a short musical program was held. Prizes at cards were won by Mrs. Sills, Miss I. Cairns, Mr. S. Bastow, Mr. W. Dowell, Miss B. Tweedie, Mrs. A. Pannell, M. C. Dennis and Mr. J. Devereaux.

Mrs. L. Murray entertained at bridge, on Saturday afternoon, February 7 Prizes were won by Mrs. D. Aitken, Mrs. W. Fray and Mrs. B. Wood.

On Sunday, February 11, Rev. W. E. Herbert of Lacombe, held a Communion Service in the Anglican Church.

Mr. J. Cairns, Mr. E. Knell, Mr. F. Saunders and Paul Knell left Sunday morning, February 11, for Banff where they will partake in the bonspiel.

Mr. A. MacDonald, resident of Mirror for many years, is in the Lacombe hospital suffering from a stroke.

On Wednesday evening, February 7, the Glee Seniors played the Mirror Seniors on Mirror ice in a very exciting hockey game. Fred Mercer, a member of the Mirror team fell on the ice and broke his hand badly. He was attended by Dr. W. Warren of Alix. The score of the game was 3-2 in overtime.

Mr. Ed. Knell is visiting at her home at Mirror from Scotland where she has been in training as a nurse for the past six years.

HOCKEY NOTES

ALIX JUNIORS DEFEAT CLIVE PUCKSTERS

Alix Juveniles took the Clive team to task to the tune of 7-1 on Monday night to the tune of 6-2. The game was very rough—only one penalty given—to a Clive player.

Good rushes were Northcott and Bunch, Fred Reynolds (2), Smith, and Elder for Alix.

ALIX HOCKEY JUVENILES LOSE TO ELNORA

On Tuesday night, the boys journeyed to Elnora, where they met a fast aggregation of hockey, especially to they were always beaten, with the eight players, causing some of the boys, to play 45 minutes of hockey.

The game was often with only one penalty—handed out to Bayley of Elnora.

At the end of the first period, the score was Elnora 4, Alix 2; second period 1 count Elnora 5, Alix 2. Although it up in the third at 6 all, but due to lack of relief, the boys were all in, and Elnora ended up with the score reading 8-6.

Scorers for Elnora were: Riley 3, Bulford 2, Mooney 1, Goddard 1, Cranford 1. For Alix: D. Hunt 1 and 1 on

TO RATEPAYERS OF LAMESTON S.D.

The annual meeting of the Lameston School District No. 3 will be held there tomorrow (Saturday, February 19th) will be held in the Syndicate Hall — on the Saturday office as stated in our last week's issue.

HAYNES NEWS

Mr. and Mrs. A McDermand, accompanied by the Misses Anne and Mabel McDermand, spent several days in Edmonton last week.

Mr. and Mrs. J. A. Keeton were visitors in Red Deer last week.

Mr. and Mrs. W. Gould of Jarvis were recent visitors at the home of [illegible]

The dance held in the Haynes Community Hall last Thursday and appreciated by the Penny Wurm orchestra was largely attended—over 200 being present.

As auction sale of the farm implements, etc., of Mrs. T. Bullford will be held on the farm on Friday, March 5th, 1940, under rent of Alix A. Sims, Auctioneer.

George Tattlers

Mr. and Mrs. M. Brisbee and family visited at the home of Mr. and Mrs. V. Fitch on Sunday.

Mr. Geo. Anderson removed old engine [illegible] in the Lilac Bend district on Sunday.

Mr. and Mrs. P. Dunsmuir spent Sunday afternoon at the home of Mr. and Mrs. A. Carr...

Mr. and Mrs. G. Humphrey returned to Sunday on Monday.

Mr. and Mrs. Ray Lund were [illegible] visitors this past week.

A very successful Social, Court Whist Drive was held in the Lilac Bend Tuesday evening, February 6, with Mr. Charlie Webb in the chair. Officers for Geo. Group were elected for the ensuing year as follows: Pyper, Geo. C. Larson; Vice-President, V. Mohl; Secretary-Treasurer, Mrs. B. Allison.

Representatives of the Mirror and Lake Bend Groups were present and amalgamation of the three groups was considered. A very delicious lunch was served by the ladies of the group.

Mr. and Mrs. L. B. Clarke came out here at the home of Mr. and Mrs. G. Johnson, on Wednesday evening.

Mr. and Mrs. A. Bugbee and Clifford were visitors to Lacombe on Tuesday.

Alix Boxers Clean Up

Boxers of Alix Consolidated School Club displayed their superiority over their classmates in the Mirror Athletic Association Boxing Exhibitions held in Alix last Friday night. Many of the fighters show considerable promise, and the results of the night's boxing will give the Alix Club a heavy representation when contenders from all districts gather in Calgary next month to take it for the Provincial championships.

The Leagher Hall was filled to capacity and fans were treated to over four hours of fighting.

A summary of the fights follows:

First Bout—Les Elliot, Alix (130); vs L. Hibbens, Innisfail (130). This was an exhibition bout to determine whether the boys were good enough to represent the Boys' Club at the Provincial finals, owing as there were no other contenders in this class. Les Elliot won.

Second—(Junior 70 lbs., 2 rounds)—Leslie Bowes, Innisfail, Alberta 70-lb champ bout year was the decision from H. McBride of Bashaw.

Third—(Junior, 90 lbs., 3 rounds)—Walter Bunch, Innisfail, won the decision over Gregory Bowes of Innisfail.

Fourth—(Novice 147 lbs. 4 rounds)—Frank Bibbons, Alix, went from J. E. Berry, Edmonton. These boys really fought it.

Fifth—(Novice, 125 lb., 4 rounds) — Wilson Cundal, Alix, won the bout by a technical knock-out, when referee of Don Robinson Scottie, threw in the towel to the second round, after the Scottie boy had received a bad deal of punishment.

Sixth—Open 147 lbs., 5 rounds — Ray Siddons, Alix, retained his Northern Alberta title when he beyond G. Bowes of Edmonton in the 5th round.

Seventh—(Not 160 lb., 4 rounds) — H. McDonald of Edmonton gained a technical knockout over T. Todd of Wetaskiwin in his third round.

Eighth—(Open 125 lbs., 4 rounds) — W Power of Innisfail received a decision over C. Radcliffe of Edmonton.

Ninth—(Open 125 lbs., 3 rounds) — G. Frizzell, Lacombe, beat your's Norman Robertson, retained his title by giving E. F Longridge, Edmonton, the boys in the second.

Tenth—(Not. 135 lbs., 4 rounds) — Andy Crawford, Alix, beat to C. Mcdonald of Edmonton in the third round a knockout blow while the referee was separating a clinch, and forfeited the bout.

Eleventh—(Open 175 lb., 5 rounds)—Bill Hodgson, Edmonton, retained his way to a technical knockout over L. Wilson of Edmonton in the third round.

Twelfth—(Junior 85 lbs., 3 rounds)—Don Jamerson, last year's 60 lb. champ lost the decision to Walter Bunch of Innisfail after having been declared the winner. The reversal of decision came when it was found that Jamerson was wearing a ring in the bout.

Thirteenth—(Open 147 lb. 4 rnds.)—F. Siddons of Alix won the decision over Dave Longridge of Edmonton.

Fourteenth—W Frizzell (Cliff) and Ted McGregor (Cliff) in an exhibition bout were going on sometime when word was heard for Frizzell.

Fifteenth—(Not 175 lb., 4 rounds)—F. Farrell of Lacombe easily defeats over W. Cundall of Alix.

Sixteen—Edmonton conducted the 160-lb. Northern championship in the fourth bout between Andy Colleen of Alix, who received a bye when no other contender entered in the 160 class.

Dave Lee of Innisfail acted as referee in all the bouts, assisted by Tom Gravely, Goldie, Ted Holme, Innisfail, and W J McLean of Red Deer. Mcdonald and Siddons acted as judges. The boxing contests started off W. J McLean and Dave Bunch. Dr. Warren checked all boxers before they entered the ring.

The success of the evening depended largely upon the efforts of the above named men, and Les Siddons, promoter of the club wishes to thank all of them for their fine support and assistance. Special thanks are due the club is due to large amounts to the contest training given by "Pop" Wadge.

ANOTHER DISTRICT OBTAINS PRIZE

This week we welcome with thanks another subscriber to the Mirror from the district of Gregoire Lake. Any other subscriber who would care to send in news from their district we would like to hear from them.

A PRODUCT OF THE MACDONALD TOBACCO COMPANY

The Common Cold

The common cold is the proper name for that universal affliction of the sniffles and the sneezes of the watering eyes, the sneezes and the headaches for it appears to be common to mankind. Few there are that escape it at least once in every year and the great majority of humanity have victims two or three or more times in every twelve months.

The common cold has been appropriately labelled "Public Malady No. 1" by a research contributor to this subject. The title is indeed appropriate although Dr. Kingsbury Scott on this continent thinks we are 20 cases of the common cold in debt of every other disease, when one remembers the immense lost in time of industry in loss of time annually and when one hammers together the fact that practically nothing can be done to prevent the little or nothing to cure it.

There are, of course plenty of pet remedies for the common cold on hand. Nearly every person thinks he knows how to cure his cold, but most even medical science knows better. Doctors may prescribe remedies but they are well aware that the cold will run its course and that nothing they can do will prevent it.

There are good reasons for this, why doctors advise the victim of a cold to take to bed with, and lightly, drink plentifully keep the bowels open and call in the doctor if he feels the need of medication. "The doctor knows the treatment—rest", according to Lion M Miller in Hygeia, "but because he thinks they will cure your cold, or because a cold is dangerous in itself, but because bacteria of great potential harm are always in the nose mouths and throats and when the common cold virus gets a foothold, the inflammation makes it easier for pneumonia and other infections to follow. The doctor also wants you in bed because there may be loss of a menace to others. Children should be kept in bed because colds affect them more severely than adults and because a number of more certain diseases, measles, whooping cough, scarlet fever diphtheria often begin with symptoms that closely resemble those of a cold.

• • •

About the only thing the average layman knows about the common cold is that it is highly contagious—that is, that it can be passed from one person to another and with great rapidity.

Aware of this fact, some conscientious mothers seek to protect their children by preventing them associating with children with colds, even at the risk of nothing themselves unpopular with the neighbors and earning for themselves a reputation for being "snooty". This practice of isolating one's person against the common cold was a doctrine popular with public health officers 15 or 20 years ago when even less of the precautions now regarded as necessary were known than now.

Experiments by Dr. Wilson G. Smillie, Professor of Public Health at Cornell University Medical College, according to the writer in Hygeia as recently quoted, "have shown another important fact: when most of us are born deep in paper napkins and telling our friends to keep away, for there is no longer a threat to others. It begins to be a threat in the first stage, some hours before even the sufferer himself suspected a cold to be on the way. By the time it is recognized, friends and families may already have been exposed."

It is this information which accounts for the great prevalence of "Public Malady No. 1" and makes preventive measures of very little value. Even vaccines which have been developed in the hope that they might give immunity have proved disappointing when tested on large scale in hospitals and universities. The absence of specific and proven preventives and the inability to cure the disease does not, however, remove the task of preventionist which may be taken to prevent the more serious diseases which may follow in the train of a cold because of the lowered resistance of the patient. It is a well known fact that the neglected common cold is the precursor of pneumonia, one of the most dangerous and too often fatal diseases.

• • •

Home Remedies

It is conceded by medical authorities that persons who maintain themselves in good physical condition and take the necessary precaution of sleep are less likely to catch a cold than those who neglect these essentials to good health. Good physical condition entails a reasonable amount of exercise and a well balanced diet in addition to sufficient slumber.

And in this matter of diet it is surprising the large number of Canadians who neglect to eat sufficient fruit and vegetables, natural products of the country grown in such abundance that they are sometimes allowed to rot on the ground, and thereby ensure a sufficient intake of vitamins A, which antagonizes the body against eye, ear, lung, sinus, gland and urinary infections.

There seems to be little reason for undernourishment in Canada where all the necessary foods for the proper nutrition of an adult are so cheaply and readily obtainable, according to the list drafted by League of Nations experts. They are, in quantities for one week, per person: 2½ to 7 quarts of milk, 4 lbs. of potatoes, 3 lbs. of other vegetables, 1 lb. of fresh fruit, ½ lb. of dried fruit, 3 lbs. of bread, 3 lbs. of cereals, 3 to 7 eggs, ½ lb. of cheese, ½ lb. of legumes 1½ lbs. of meats or fish, ½ to 1 lb. of fats, ½ to 1 lb. of sugar.

• • •

These Books Were Wise

Ducks left hunters at Lac Cruzon, New Mexico, holding the sack. The season closed at 4 p.m. on a recent Friday, and a few minutes later the first flight of mallards from the north dropped into the Rio Grande.

Natives of Wisconsin are called "Badgers" because of the early land miners of that state, who lived in underground burrows, like badgers.

Caution is when you are afraid and cowardice is when the other fellow is afraid.

THE SPASMS OF Whooping Cough ARE RELIEVED BY BUCKLEY'S

Aids For Defence

Thirteen Thousand Anti-Aircraft Shells In One Morning Enemy Plane

It would sound almost like Jules Verne or H. G. Wells to say that British factories are [illegible] machines which create, manufacture, in thirteen hours an airplane will be in the time an anti aircraft shell can be in the air.

But that's what is being done in Britain today.

It's only half the story however. These machines make money, because building a shilling fabrication. The time and in Britain's feeling of necessity against whatever threats or more are read the Germans now.

Hitch are made in a big factory whose production [illegible] was to spur out radios television sets and phonographs by the hundreds. While the supply [illegible] wanted this factory and now how a plant can be turned over from peace work to war purposes.

The production on the plane for anti aquarium is called in based on mathematics and trigonometry. A telescope could be the plane but by the time a shell reached that point the plane would be somewhere else. By a system of telescopes wheels and gears the position is calculated [illegible] operation—and sent to receivers at the gun station.

Through the telescope an observer follows the plane in a horizontal position. He turns a wheel to keep up with the plane and that is transmitted made in terms of speed. Another observer gets the height.

The irony about these predictors is that certain of the machinery used in them was imported almost from Germany. Now, however British firms are busy making similar equipment.

Remembering huge dialgrams mounted on a motor car chassis, the inventors make it possible for a well-trained crew to put up the secret of an airplane motor seven miles away. The locator is limited scientifically to a searchlight which moves in sympathy so that when the plane is picked up it remains in sight a fraction of the beam.

The factory makes four shell fuses, primers, components, and wooden airplanes for training purposes. In British Columbia the spruce. Great accuracy of manufacture is necessary because in case a fuse is defective it is impossible to obtain another from stock and cramp special high-powered explosive.

Workmen who made television sets before the war manufacture the receivers for the navy. They are so powerful that a British ship anywhere in the world can hear home programs. The sets receive a special night-time broadcast in order to make sure their mechanism will withstand the roughest sea or the rocking that follows gunfire.

Quantities Are Limited

Small Lots Of Food May Be Sent To England

Canadians may send food as a small quantities to relatives or friends in the British Isles, as gifts without having the British food controller take it over officials of the town and consignees in Canada.

If food is sent in large quantities it will [illegible] the control through whose license it was sent. Some merchandise may not be sent at all.

Canadians may send no postal matter of a like amount of sugar to the United States. Parcels of three and of Newfoundland [illegible] operation as usual.

Privilege For Soldiers

Men Serving In War Zones Receive Free Postage

Canadian soldiers who are serving in a theatre of actual war may be able to send their parcels free of postage. Postmaster-General Power announced yesterday.

The privilege is also being extended to members of British Dominions Overseas and Allied forces serving in a theatre of actual warfare to officers and men serving in the Royal Navy and Royal Marines. Allied warships afloat.

Soldiers not in a theatre of actual warfare and who have full military facilities at their disposal do not come within this arrangement for the present at least.

SELECTED RECIPES

TURKEY HASH

1 cup brown turkey gravy
2 cups mixed cooked turkey
1 cup chopped cold cooked potatoes

Mix well. Spread in a hot well greased frying pan. When browned fold over like an omelet. Serve with cranberry sauce.

COCONUT CAND

2 cups light brown sugar
½ cup Blue Bird Golden Corn Syrup
½ cup water
½ cup shredded coconut
½ cup walnuts, chopped
½ cup dates, chopped

Combine sugar, syrup and water until they form a very firm ball when tried in cold water. Add last two ingredients and pour into buttered pans. When partly cool, while still warm. Stir occasionally while boiling to prevent burning.

Decision Is Final

Lord Tweedsmuir Will Leave Canada At End Of Term

Lord Tweedsmuir has definitely decided to leave Canada at the end of his term as Governor-General this year, it was said by Prime Minister W. L. Mackenzie King. Lord Tweedsmuir in private life the author John Buchan—has been governor-general since 1935. His term expires next summer Mr Mackenzie King announced. Lord Tweedsmuir's health is such that he feels unable to accept any extension of his term as governor-general.

Young men seem to have a lot of modern ideas but most of them are instilled in the single idea of doing the least work for the most pay.

Train For Championships

Miss Vida Holder In Practising With Coach At Jasper

To commence training for the Empire ski championships late in February, Gertrude Wypenik pretty blonde title holder, left Vancouver recently for Jasper. She was accompanied by Art Cates, a fellow member of the Tyee ski runners team that last year produced two Dominion champions. They joined their coach Peter Vajda, of the western Canadian Swiss ski school, at Mildgate lake in the prairie on the scenic mountain slopes where the ohidd and the tremendous run is nearby Mount Tom.

Later the team will return to Jasper and complete their training on the new Whistler mountain downhill course built strictly to F.I.S. specifications with a three and a half mile run dropping 4,500 feet from the 8,000 foot summit!

There Is A Difference

Number Of Cattle Determines Whether Man Is Rancher Or Farmer

Mr. Justice W. C. Ives defined the difference between a rancher and a farmer in Alberta supreme court chambers.

"What is your occupation." His Lordship, who rode the plains in the Pincher Creek district before he adopted the legal profession, asked an applicant for British subscription.

"A rancher," the applicant replied. "How many head of cattle?"

"Forty."

"Then you're a farmer," Mr Justice Ives ruled decisively.

The Humble Cabbage

Is Purse And Cuticle Saver Strong Vegetable Juice

There is beauty in the humble cabbage for those who take the trouble to look for it, although many people seem to treat the cabbage as something of a joke. As a matter of fact, in general form and outline it is very much like a rose have you ever noticed that? No, of course not, and you probably think I am talking through my hat, but next time you get a chance, have a good look at a half-grown red cabbage, and see if you don't agree that it closely resembles a giant red rose, with a beautiful bloom on its petals too.—The Listener (London).

In India, during 1936, 1,603 tigers were killed by men, while 1,653 were slain by tigers.

Even with the amazing new gadgets that help to make driving automatic, it is necessary to turn when the road does.

The Word Tramples

In One In English Language Most Commonly Misused

Of all the words in the English language the one misused most frequently is "disinterested." Many persons take it to be nearly as generally in this word uses it to mean "uninterested." Actually it has a very definite and well defined meaning all its own.

The word disinterested does not mean that the person referred to is indifferent to the outcome of the matter in question. It means that the person is not influenced by personal motives in the matter. A disinterested person is one who has no personal interest in the matter, and who is therefore able to act impartially.

A Peculiar Lake

Lake Lockye, where the Pilots and Hamsons have been fighting in the largest lake in Europe, states the Toronto Star. It has an area of 7,000 square miles, or almost as great as that of Lake Ontario. One of its peculiarities is a difference of seven feet in the yearly range of water level. This changes seventy times a minute into it.

A Scotsman has invented a bag pipe which plays when you put it into a light socket. On the other hand, it doesn't if you don't.

The Star Dusts in the constellation Pegasus is the north point star of Mars.

Will Speed Up Treatment

Colored Tags Indicate Seriousness Of Air Raid Casualties

Under the direction of the Ministry of Health London hospitals have undergone drastic changes in preparation for air raid casualties since the first bombing began.

Casualties with luggage tags the seriousness of which will indicate the treatment necessary.

Red tags mean an emergency operation. A green tag with a red circle in the centre calls for an operation of minor importance. A pink tag with a diagonal blue line mentions that the case is to be despatched directly to a ward, a yellow tag with a diagonal cross in red books the patient for an X-ray examination and a blue tag calls for resuscitation by blood transfusion or other means. Where a patient requires both resuscitation and an emergency operation, two tags are used, a blue one and a red one.

Duty instructions are given that the tags shall be tied to some part of the patient's body. To attach them to the stretcher or the patient's clothing would be to risk separation of tag and patient.

Focus Of Tornado

A weather man, the Chronicle stories of hail and windstorms has one picture showing a hand pine pole driven into a two-inch poplar tree by a tornado in Illinois.

JOHN A. STRACHAN, Editor and Publisher

CLAIM RUSSIAN PLANES ARE CRASH KITE

A British air ministry commentator claims that almost 2,000 of Russia's heavy bombing and reconnaissance airplanes and than 1000 of her fighting planes were capable of only "relatively low" performance.

Basing its statement from information gathered from an aide in Finland, the ministry said: "It is not likely that the Soviet air force can for long resist even then initial challenge."

It added that the Finnish campaign has confirmed the opinion of experts before the war started that the efficiency of the Russian air force was inferior to that of other European forces.

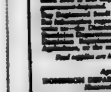
In a conversation the other day with the manager of the hotel, he told me that it is the habit of many of the visitors to the city to leave their hats in the hotel when they go out. Quite a number of hats are left behind in this way. Quite a number of hats are left behind in this way. Quite a number of hats are left behind in this way.



SAVE for a Farm of YOUR OWN
Most successful farmers of our time worked for someone else. They first learned their trade. Today hundreds of them thank savings—and cash in the bank when the right "buy" presented itself. Prepare now to take advantage of your opportunities when they come along. Open a savings account at The Royal Bank of Canada and start saving today.
THE ROYAL BANK OF CANADA
Alix Branch, - W. D. Clarke, Manager

The World of Wheat

By R. G. L. STRANGE
Director, "The Crop Testing Plan"

It is typical of all wars that peace gradually rose [illegible] all the things the farmers and all of us have to buy. The Canadian and Allied governments today are doing their utmost to prevent any spectacular increase in prices, but some increases unquestionably will take place.

The best defence of the farmers against rising prices for a thing they have to buy, is increased income. Income will be had by those who put years to buy by little, and to sell at peak. Possible, which means simply that he should be thrifty and should in addition, endeavour to provide for himself and for his family as much as can into each produce of these things he needs at home, products such as eggs, butter, cheese, milk, cream, meat and vegetables, because when the farming family produces and sells commerce, a man at home is helping to win the war. In addition, he is helping to win the war. In addition, he is helping to win the war.

In farmers during this war, therefore should make a special effort to produce all of their needs at least the simple necessities of life, all of which spring from the land. Many people will be doing not only a good thing" for themselves, but in addition a service to humanity—a particular duty to their country.

Edmund E. Seal

Edmund E. Seal, 76-year-old resident of the Tees district, passed away at the Lacombe and district Community Hospital on Thursday afternoon, following a lengthy illness. Funeral services were held in Calmer Saturday afternoon, with Rev. Sandy Johnson officiating, but the rites. Interment took place at Calgary.

The deceased was born in Wisconsin and settled in Tees in 1911, as one of the pioneers. For the past two years he has farmed in the Tees district. Mr. Seal was married in 1903 to Mrs. Cornelia Ann Hall, who came to this district from Iowa in 1906.

He leaves to mourn his loss: his wife, and two daughters Mrs. (Dr.) Leask of Edmonton and Mrs. J. E. Mason of Smoky. There are six grandchildren and two great-grandchildren.—Lacombe Globe

WHAT THEY ARE SAYING...

Beverley Baxter, in his London Letter to Maclean's Magazine, quotes Col Wilfrid Wilson as saying "Rowan was a colossus not only with feet, but with a head of clay" "Rowan could not wage war outside its frontiers against any resolute and well-equipped army."

Says Beverley Baxter, "Rowan remains what she has always been —the supreme incongruous."

WNU SERVICE

CHAPTER XII—Continued

With the dogs running the sheds the canoe made good time upstream. They camped near the forks of the land in the morning went back on the Saskatchewan. The white men had never climbed and timed with the old packs—of how but although they traveled all day they saw no deer. Patches of dried berries, blueberries, and moose berries were growing in ripen and the excited dogs soon found where several moose had been stirredly tested them. From small ridges of deep bush and dwarf spruce Lapeland-lodgepole rose before they appeared with their nerby Cree dogs. Thirteen canoes for hood them deep into the interest from the river. The into the tundra traveled the river with the dogs on towpaths for they hoped to see and shoot a bear. Some days on the overpowerful picturesque, an occasional lonely hunt of a curious fox, met the canoes of Indian travelers.

Up up the river pushed the canoe for three days, while Nagaya kept abreast of them on the high shore, watching for game. At the third camp, when again the women and barrens for deer had been fruitless, Ahig began to have misgivings about the pain and the girl he had left at the camp below the gorge. Suppose the Nashap had followed the Peace River down the Kokwak from the rapids. Both days would not leave the canoe had accepted the River of Skulls and perhaps had already reached to enter it. But a feeling of impending calamity depressed him. If they would see deer in three days, much, they could not prosper thereon as well as in the autumn. Would surely reach the river sometime in August. Salmon would keep them and the dogs, but they would be unable for sustenance and ahma for trading.

On the next day they made a last hunt into the barrens. At a fold in the tundra where brush appears, deer bush and berry bush had made a stand against the barrens, which at last for Nagaya suddenly ceased, and pointed. Three crossed poles marked

For instant milk from dried milk, delicious for cooking, use Borden's MINARD'S

That night in their camp down the river Nagaya talked of the life of his people—the northern Nashaps who tended, at Fort Liard. From the highland, had been very hard. Where they met the caribou migration in the summer and could dry quantities of meat, there were no berries in the withering winds that swept the interior in the season of the long snows. But often the deer changed their route in the late summer and the hunters watched in vain at the old trails at lake and river crossings. Then there was wailing in the igloo before the long winter's end for unless they had made a huge supply of salmon they were sure to starve. Many of the old men died where the deer were. They were like the wind now here and there. When they found the migration, the deer were like the leaves of the forest and the Nashapi were happy.

The spring before Nagaya said, they had been in a starved condition. That was why they rescinded the Kokwak to spend the Nelson on the dead line. The nights have on sort had hunted in a tree of the Kokwak and little camp on the Kokmash. And Death, in the Nashaps legends, always comes from the northeast. It came then, also.

Alak asked how what he thought they had had better day of the deer and not seen appear on the River of Skulls.

The Nashapi shook his head. "They may be moving now far in the east and will not come back to the river into the west. But if they cross the Big River as many as the stars, in the autumn, the country of the big elk will Gitchi Manitou will have given them to us. We will kill them. They must come to you. If they do not come, you will frozen to death."

Alak glanced at the disconsolate face of his dead father and smiled at the thought.

We're not going to starve. We have no use for the deer. We're going to try enough salmon to use through deer or no deer."

But you will have to hunt for it—bring snowshoes with, or shine for the dogs," answered Nagaya, who objected the disinterested boy. The spirits of the dead saw making bad luck. Maybe the boy was going to gorge Lesh.' It is written in the Big Book."

With shaking finger Nagaya pointed to the streamers of the Northern Lights in the sky. Alak had recommended a poor translation and that the Nashaps was has seen great—and the God of explosion and the national life of Great Britain. Mr. Chisholm is certain to be elected Right Hon Simon Tassdemaur of Sydal Palace by Exposition by acclamation of his long-continued support of geographical discovery and the Rt. Hon. Sir John Franklin, explorer of Great Britain and then as Lord Tweedsmuir, Governor-General of Canada

Nathaniel Middleton born leader of several Arctic expeditions and Lord Tweedsmuir encouraged exploration in every way and that expansion visiting Britain always have easy access to the highest figure in the land. Outlining the Governor General's career he said Lord Tweedsmuir is certainly a mercurial, but credible when you recite his accomplishments

Several million dollars worth of munitions are to be made in Australia for the British government.

Honored By Explorers' Club

Lord Tweedsmuir Has Been Elected Member of Many Expeditions

The Explorers' Club, which numbers among its members men interested in the cause of geographical exploration and travel, announced as a kindred spirit the Governor-General of Canada, Lord Tweedsmuir.

Upon him was bestowed the club's membership medal, which is given for position which only those before have been awarded. The accompanying medal, which is the A.G.C. standing for "Arctic Club" and "Explorers' Club."

"This is a right fine medal," said the A.G.C. speaking of the medal. "Where that?"

"Upon a world famous explorer," replied the secretary.

"I'll have to get me one of those," said the A.G.C.

Had It Figured Out

Elephants Outwitted Keepers Over Electrified Wire Fence

Elephants in the South African game reserve have outwitted the keepers by defeating the electrified fence put up to prevent them from straying.

It was said that although the wires were charged the supports were not. So the elephants simply ripped the poles and walked over the wires on the ground. Later when the poles were electrified, the elephants found that only 10 miles of the 30-mile boundary fence was live, and they kept to the end of the electrified portion and stepped out.

It will take them until May to electrify the entire park boundary.

Has Its Own Language

Royal Air Force Is Fearsome Combination of Strong Arm Words

With the R.A.F. a Force. The R.A.F. a Force has its own slang, vulgar English and even its own form of swearing. In addition to the more general words and phrases in use throughout the service, there are many which are peculiar to the R.A.F.

If you hear one pilot tell another that he "pranged up a fine bus" you'd better get a "shag on your back" before you "go for a burton." He has made a fine mess of things, you'd better "shag off" before you get "torn off by the commanding officer."

Good flying indeed good work of any kind is termed a "wizard show." This is the word to use when it

BRITISH WARSHIP RESCUES IMPRISONED SEAMEN

LONDON—Rescue of 300 to 400 British merchant seamen from the German prison ship Altmark by British ships continued Saturday. In a hand-to-hand fight in a narrow Norwegian fjord, four Germans were killed and five severely wounded, while the British forces suffered one casualty, it was reported. "The Altmark was escorted out of Norwegian territorial waters," the Admiralty said. "Two of her crew died ashore and the rest were rescued."

At the same time the Altmark battle was in progress, the admiralty said, the German warship Graf Spee pursued seven unreformed vessels. The British crew controlled her when the British destroyer sighted the ship.

The freed British prisoners were headed later Saturday for H.M.S. Cossack at Leith, Scotland, on the south side of the Firth of Forth.

Search had been made for the Altmark since the battle of Montevideo when she left the mouth of the river but battleship Admiral Graf Spee. The imprisoned seamen were from the merchant ships sunk by the Graf Spee

FIRE DESTROYS DRUMMELLER HOTEL; ONE DEAD

DRUMHELLER—One man lost his life and another man was rescued by Fire Chief Wilfred Watson in a sensational fashion when fire destroyed the Alexander hotel here Friday. The fire damaged the adjoining Sam cafe. Loss was estimated between $20,000 and $25,000. Lives were also threatened in the fire.

Charles "Dad" Faulkner, 70, Drumheller pioneer, died from about 20 pounds of suffocation in his room. He was resident manager of the hotel.

BAKERY IS LEFT TO 19 WORKERS

WINNIPEG — Thirteen employees will become joint owners of a bakery here under the will of the late owner, Mrs. Alexander, who died during the week-end.

Profits from the firm will be divided among the 13 men for 20 years or while they are there, and the widow will be paid the proceeds of insurance policies on employees, the terms on the will state.

BUSHMAN BAND AVIATION OIL TO RANG

BUCHAREST — Prospects by British and French oil companies of extensive Wallachian oil fields in the Ruman government drew hearing the shipment of oil-drilling to Germany.

CLAIMS NORWAY IS AGAINST NAZIS

TORONTO—Carl J. Pratt, Norwegian vice-consul, said here Monday that Norway is "not neutral" and that she supported "disagreeable surprise" for the Altmark incident.

"It is beautiful," he said, "that seven individual Norwegian officials helped the British navy to report that the Altmark was unarmed and carried no passengers."

GETS OLD LETTER FROM DEAD MAN

CALGARY — "It was like hearing from the dead," declared Mrs. Frank Dunbar, who on Monday found a letter from her husband 17 years old, written by a friend, W. R. Davies, killed in action 11 days after writing the letter.

It was dated March 7, 1915, written on board ship in the Dardanelles.

DRAFT NEW TRAFFIC LAW FOR ALBERTA

A new Motor Vehicle and Highway Traffic Act for Alberta is now receiving consideration. The proposed new laws, considered to be the most complete of the present legislation, with any necessary changes to bring it into line with laws in other parts of the country.

In view of the moves being made in some cities to arbitrarily establish speed limits for motor vehicles, it is likely that the new act will contain provisions that would take care of a uniform speed law for the province.

Government officials are planning to give the new legislation close study, in order that it will meet all requirements in this province, now facing the problem of providing for handling the increased number of motor cars on the main highways.

Officials of the Alberta Motor Association intend to keep a watchful eye on the new legislation when it is drafted and to make whatever representations appear to be necessary in the interests of motorists.

For some time it has been realized that certain changes in the laws are necessary in the interests of safe driving and these will be incorporated in the proper time for consideration of the house.

PROVINCIAL ELECTION ON MARCH 21

Alberta's gen eral election will be held Thursday, March 21, as forecast, when more than 300,000 voters will be called upon to elect the ninth legislature since the province was formed in 1905.

This date was officially announced by Premier Aberhart, just after the ninth session of the eighth legislature was prorogued at 8:15 p.m. Friday by Hon. J. C. Bowen, lieutenant-governor of Alberta.

So far as is known, this was the first time in the history of the legislature that the order of dissolution and election date had been announced from the floor of the assembly.

Nomination day for the election will be Monday, March 11, the same day that has been fixed for nominations for the dominion election. Provincial candidates will be required to provide a cash deposit of $200, just one-half of what is required from dominion candidates.

LOUISIANA GUESTS EARL LONG FORCES

NEW ORLEANS — The Huey P. Long political dynasty, here at 12 years of dictatorial violence, died potentially by ballot Tuesday when state officials of bitterest election campaigns in Louisiana's history

Voters in the Democratic run-off primary election for the governor nomination swept into office Governor Earl K. Long, brother of the "Kingfish" and 7 major leader of the political machine that dominated the state for 10 years, and refuses candidate to the office in Lieutenant the Governorship nomination, a instrument to election.

GETS FIVE YEARS FOR SHOOTING

VEGREVILLE — Found guilty of manslaughter in the death of Mike Lachowski, shot following a quarrel in November, John Rakusanday, Stettler, a district farmer was sentenced to five years in penitentiary by Mr Justice Ives in supreme court Tuesday

HONG KONG — Mutiny and defeat have disrupted a Japanese-sponsored army of Chinese within a week of its first move against the Chinese national forces, the Chinese central news says a war reported Tuesday.

HOCKEY NOTES

MIRROR WINS FROM ALIX, 5-3

Mirror senior puckstars defeated Alix seniors on their own ice here Thursday night to the tune of 5 to 3. Mirror led 1-0 at the end of the first period and the score was 3 to 2 at the end of the game.

Mirror Lineup—Goal, Calvus; Defence, Estell, Devereaux; Forwards, Elmer; Fauverelle, Mead, Vreeland, Chesere, Davis, Smathers and Edwards.

Alix Lineup—Goal, D. Wilson; Defence, R. Peters, Thorpe and Price; Forwards, R. Wilson, R. Peters, Oldcorn, Smith, Cundall and Patrick.

ALIX WINS FROM JOFFRE, 6-3

Joffre seniors lost to Alix Saturday when they were soundly trounced by more than one goal per period. The score was a 1-1 tie at the end of the first, 4 to 2 in the second and 6 to 3 at the end of the game.

Joffre Lineup—Goal, E. Smith; Defence, T. Lambert and M. C. Miller; Forwards, S. Sawyer, E. Mitchell, S. J. Sawyer and B. Fraser, W. Fraser, D. Wells.

Alix Lineup was the same as above with the exception of C. Walker playing in place of E. Smith who was sick.

MIRROR WINS SISTER GAME, 6-3

Mirror seniors won from Alix seniors in a close game at Mirror Tuesday night when they went into overtime before it is 3. The game provided plenty of excitement with the Mirror boys twice all through the game, Sawyer at the end of the second and Mead in the overtime. Alix scorers were Smith from Wilson, Patrick from Walker and Peters from Patrick and Price. Mirror scorers were Webster, Mead, Smathers with Webster and Smathers lodging the net for the win. Snow falling made visibility poor in the open rink.

Mirror Lineup—Goal, Calvus; Defence, J. Devereaux, G. Thomas, J. McLeod and G. McLeod; Forwards, Mead Chesere, Estell, Smathers, Webster and Davis.

Alix Lineup—Goal, D. Wilson; Defence, J. Peters, Price, Smith, Walker and Wilson; Forwards, Dean, Cundall and Oldcorn.

Alix Boxers Cleaned Up

Alix boxers, proud champs of Mercheris Alberta, met their Waterloo when they came up against the crafty leather slingers from the south at the annual smoker held in Calgary Monday and Tuesday. Although many good boxers were staged, none of the local boxers we able to come out on top.

However, Webb Pennell of Lacombe, winner of the 125-lb open championship last year was again awarded the Lacombe Trophy with the outstanding boxer in the two-night program, bringing the prosser award to Northern Alberta, a prize that has been in fathers sweep most of the titles.

A summary of the bouts of interest to our readers follows:

Monday Night

Junior 70 lbs—W. Weisbach, Medicine Hat, defeated L. Bench, Innisfail. Junior 110 lbs—J. Weisbach, Medicine Hat, defeated J. Eller, Alix.

118 lbs novice—S. Fenery, Lethbridge defeated J. Collins, Alix (third round KO.)

125 lbs open—G. Frizzell, Lacombe, defeated C. Hudson, Lethbridge.

126 lb novice — A. Hardin, Calgary, defeated W. Powers, Innisfail (third round KO.)

135 lbs novice—J. Harding, Calgary, defeated J. Crawford, Alix, (second round KO.)

135 lbs open — Webb Pelzell, Lacombe, defeated A. Hayden, Lethbridge.

147 lbs novice—Red McDonald, Edmonton, defeated R. Meadows, Calgary.

160 lbs open—A. Jackson, Edmonton, defeated H. Nelson, Calgary.

175 lbs open—J. Panora, Lethbridge, defeated J. Wilkinson, Alix (second round bypes.)

Tuesday Night

118 lbs novice—Webb Pelzell, Lacombe, knocked out A. Last, Medicine Hat.

147 lbs novice—L. Leavitt, Cardston, won decision over P. Siddons, Alix.

147 lbs open—Red McDonald, Edmonton, defeated Reg. Siddons, Alix, (purpose.)

The following, handed in on an opinions the protest in the Reg Siddons, 147 lbs open bout:

"In the 147 lbs open, D. Smith, and even post a glove on Reg up to the second round, but in my opinion, he was using him in the green, for which injury he was disqualified. Although the referee has no say, the referee is the sole judge in this game. One thing at least, I am sure of that is that Reg Siddons' trade verdicts which could have been given the other way. Reg Siddons and Referee the 147 Lacombe Open Finals in place of the the disputed winner, D. Curtis. Curtis admitted he would not meet our boy in the Canadian finals and the boxing commission readily complied with. Siddons and H. Thompson of Black Diamond to appeal to Alberta in the Provincial finals, the results would in some cases tend to make the boys quit boxing, but not Reg. He is out to win and his gameness and keenness are in first year competition and we envy a little bewildered in strange surroundings."

Two go at British qualifying semifinal to go under the rooms of the Alberta provincial; the success efficient to difficult operations and the Lacombe shown by Mr. Winston Churchill in referring to—London Daily Mail.

CURLING

For all the interest that is being taken in the rapid and excited game this season, it might be said that curling is still a big man's game, to a certain degree.

Despite this, however, Alix can still put up a rush to compete with the best of them, as was demonstrated last week when the Alix rinks, skipped by Andy Dixon, Art Linnell, Bill Fleshner and Alex Bissett, entered the Stettler 'spiel and copped their Grand Challenge event. The boneyard, here allow ice rots, was put on display for a time last week by Bill's Grocery display window — where all could come, see, and be told all about it.

Interest in bonsai and stone was aroused considerably by the visit here Thursday night of Jack Lowes and Sandy Cain, who gave a short exhibition of the game.

Business of the past year was dealt with at length, with the report of retiring the school to have been equally encouraged. The financial report showed all bills paid to date and a balance of $4,333.42.

An advancement was called when ratepayers of Alix Unit No. 1008 and Open Valley Unit No. 1402 wrote into separate contracts to consolidate trustees from their respective units. Only one was nominated in each case, and the nominees, Mrs. W. H. Price for Alix Unit and C. D. Rowse for Open Valley, were declared elected by acclamation.

On the resignation of the ground-meeting, inspector's and teachers' reports were read and found satisfactory.

Mrs. Keane brought up her annual grievance and was unanimously considered out of order by the meeting.

Some discussion regarding hauling took place, one ratepayer voicing objection to the sport, repeatedly in regards to is being carried on by the school. L. H. Sid on explained that all activity took place after school hours, and it was the general opinion of the meeting that the physical training being given the youngsters is fine. A vote of thanks was given the Assessor Alix-ter Committee, namely, C. P. Dennis, McMahon, Bert Smith and Les Sidebottom, and a request made that the building be extended to 28 feet long. It was pointed out that there was no cost to the ratepayers for equipment.

Mrs. Drushka Is Honored at Shower

Mrs. Joe Drushka, nee Nancy Wolfstone, a bride of this month, was the recipient of a community shower held Saturday afternoon in the U.F.A. Hall. The committee in charge were Alix Semaline Club, who hugely attended, three being present, around 70 friends of the younger members.

For the occasion the hall was tastefully decorated in pink and white. Substitutes ETA ET ASH R2S07 S31 table, covered with imitation roses beds with streamers riding to the ceiling, bore the numerous gifts.

Address to the bride was made by Mrs. Jennings. Many was assisted in unwrapping by Mrs. Jennings and Mrs. Sidebottom, the latter assisting in the donors for their kindness.

Games were enjoyed and a tasty lunch served. Prizes provided a great deal of amusement to the lucky ones, while the former through the medium of the tea-cups.

Mr.

George Tattlers

In honor of Lucille Lund whose birth day was on the 12th, Katherine Lund entertained a number of young people at her home on Thursday evening.

Herb and Roy Lund and V. E. Rose returned to Edmonton on Tuesday.

Mr. and Mrs. Jim Pilcher were dinner guests of Mr. and Mrs. G. Hansen on Sunday.

Mrs. G. M. Nein and Mrs. C. Lawrence motored to Edmonton on Monday, credit Group to the Lacombe Convention on Tuesday while G. M. Nein and C. Larson were delegates to Edmonton on Tuesday.

Quite a successful Social Credit dance was held at the home of Mr. and Mrs. L. R. Clarke on Friday evening. Prizes were to Mary Sawyer and Mrs. L. Davi bow while Mabel Sharpe and Beatrice Sawyer looked after lunch.

Miss Lois Jobson spent Friday evening at the home of Mr. and Mrs. L. Rash.

The Ladies' Club met at the home of Mrs. A. Kerr in Bonhomme on Thursday afternoon. After the business of the meeting it took the form of V'alentine party with games and tittivating of valentines. A few of the members' birthdays were celebrated for the occasion, and a delightful lunch served by the hostess.

Presiding refreshments for the party is a recognized procedure for enrollees in any election—at any rate that is the opinion of Bill Summerville of Clive, who visited these columns prior to the start of the recent municipal meeting. Summerville, who displayed his knowledge were so good at party—and his didn't look down. Refreshments of the meeting appeared to be on hand were

Ratepayers' Meetings Elect Trustees, Councillors, By Acclamation

The reviving councillors of Lamerton, Ella Unit No. 1 and Bonhomme Unit No. 1, and G. H. Reid of Hudson's, were returned to their posts on divisional council when no further nominations were forthcoming at the annual meeting held in the Legion Hall, Alix, last Saturday afternoon.

Although attendance at the meeting was not as large as it could have been a fair turnout of ratepayers were on hand to hear the reports of their councilors Reeve A. G. Ibbs and auditor, and together with fellow councillors, completed the many quests as to the satisfaction of all.

Ind. Convention Selects Chosen

Alix was strongly represented at the Eighth Constituency Liberal Association convention at Lacombe which on Tuesday chose H. E. Rowse, farmer of the Bentley district, to contest the riding as an Independent candidate in the forthcoming provincial election.

He defeated by a substantial majority, J. R. Mackie, of Alix, only other standing for the nomination. C. P. Dennis, Edmonton, and G.W. Hoerdt, farmer of Blackfalds, were also nominated by the meeting but withdrew from the race.

When the matter of financing the election campaign was brought up by the chairman Mr. Dennis, the Lacombe delegates $200, Bentley $200, Red Wind $50. Other points represented also gave generous subscriptions.

Mr. Clement, the provincial president of the Blindman Valley Co-operative Association, assured the meeting that, if elected, Mr. Rowse will be a name, his name the administration.

MIRROR NEWS

On Monday, February 12, Mrs. Elizabeth Bennett who had resided in this district for 20 years, passed away at her home. Mrs. Bennett was born in Cleveland, Ontario, and was 77 years old. Funeral service was held on Wednesday, February 14th, from her home with Rev. Mr. Anderson officiating. Interment took place in the Mirror cemetery.

Four deceased leaves to mourn her loss, one daughter, Mrs. E. McLeod of Mirror, Alberta, three sons, Fred and Lorne of Mirror; and several grandchildren.

On Friday evening, February 16th, the W. I. held a crib drive. Prizes were won by Mrs. H. Thomas, Mr. Kerr, Mr. J. Mead, Mr. A. G. Cheerbent.

On Thursday evening, February 15, Mr. and Mrs. W. Frey owners and five tables of brides. First prizes, were won by Mrs. F. Smathers, Mrs. Jack Ray. Consolations were won by Mrs. A. MacMillan and Mrs. Ed. Mead.

On Friday evening, February 16th, Misses Ruth and Bessie Naylor entertained about 30 of Miss Ella's class at their home. Various games were played. Prizes were won by Miss Ella Hamilton, Frank Webster, Miss June Webster and J. Devereaux.

On Saturday afternoon, February 10, Mrs. F. Smathers entertained her bridge club. Mrs. Reid Mary Ray, G. Thomas and Mrs. F. Baugh.

The L. Combs and J. Kerr rinks won prizes in the Mirror bonspiel.

On Sunday, February 18, Mr. and Mrs. J. Naylor motored to Innisfail where they spent the day.

Charles Ingram, for many years a resident of the district, has accepted for military service, and is now stationed at Currie Barracks, Calgary. Before leaving he purchased from Harding receives for the First Division. His many friends wish him very good going.

L. Worke Is Burned Out

A disastrous fire occurred at every district Sunday morning when the home and granary of Leo Worke, near Alix, were razed. Loss included five head of work horses, seven cows and young stock, two brood sows, all harness and stable equipment, as well as around 1800 bushels of wheat and 1 over 500 bushels of oats grains.

Origin of the fire is believed to have been a stove pipeed in the barn in exposed of harnessed brood mare.

The sympathy of the entire community is extended to Leo at this time of his heavy loss.

The Annual Ratepayers' Meeting of Alix Consolidated School District, No. 12, was held at the school, Alix, on February afternoon last. Thirty-two ratepayers were present. C. D. Rowse acted to chairman and L. H. Siddons, as secretary.

Red Cross Supplies Have Arrived

Fresh supplies have arrived for headquarters, and were received on Saturday by the U.F.A. Hall.

Included in the load consist, jam sent by members of the Stettler branch hall of the Alix Red Cross on Friday evening, March 15th. This will be reinforcement of a high order and there will be a dance afterwards. Watch for further particulars.

The question is sometimes asked, in view of the overwhelming humidity of our particular soldiers—are men—Stettler branch of the Alix Red Cross Society is interested into the Red Cross Depot:

Sending warehouses may halt the correspondence when hospital beds are empty, but hospitals are filled to the brim quickly when hospital bed is at last. In 1914 some people were afraid that the Red Cross would be unable to supplies, but after the battle of Ypres they were only afraid that there would be no more wounded. The same question creates the need for some protection.

This is a house taken from the Bonspeille paper of February 16, 1940.

"In the years 1914-17 I was in Prussia, working chiefly in connection with the C.A.M.C. To tell of the blessing of that seemingly never-ending stream of Red Cross gifts, the many magnificent dressings and bandages which meant so much, would be. We received and rewarded on the way to Shipley lying on Red Cross sweaters, showing the little cotton bags containing their allowed souvenirs and small belongings, dressed and bandaged by the Red Cross wearing its pyjamas, shirts, sweaters and often with a handkerchief and a pair of cigarettes distributed in the pockets. And of course wearing the socks, all provided so freely by the Red Cross.

Every little while in other years returns came on which were their allowances charged for supplies. I never came across or heard of such a thing in connection with the supplies brought to Alix by such charges.

It is one who must have personally the backing and strength of the Canadian Red Cross services in their different forms to realize what these few words.

Margaret Barbour, R.R.C.

The Path To Health

A reduction of 25 per cent in deaths from all diseases and accidents combined in the period of the last ten years in the [illegible] in which the people of Canada have a right to be proud were the statistics indicating marked progress in the fields of both preventive and curative medical treatment and this of course includes the sphere of surgery.

The achievement is more particularly notable since the progress along the path to better health and greater longevity has coincided with one of the worst years in Canada's economic history 1929 to 1933 inclusive. It means that during a period when people have been forced to spend on [illegible] necessity they have been devoting themselves to the task of [illegible] their health and longer life and have been giving hearty support in public health authorities as well as to the medical profession in their efforts towards these worthy objectives with considerable success. Surely these statistics and these results are deserving of commendation and the people of this country generally should be congratulated.

Some statistics of mortality from various diseases during the past decade among the 1,750,000 policy holders of the ordinary department of one of the large life insurance companies which may fairly be taken to representative of the people of the Dominion as a whole show tremendous declines in the death incidence of many diseases when formerly took a very heavy toll of the population and show that during the past two years 1936 and 1935 the mortality rate has [illegible] compared with 1930 now low mortality rates for tuberculosis pneumonia, scarlet fever [illegible] Tuberculosis is of course [illegible]

Marked Progress

Public enemy No. 1 in the death rate column as recently as 31 years ago tuberculosis, as a cause of death in Canada has dropped to third place. The death rate from this disease among the company's policyholders last year was seven per cent lower than in 1935 and 45 per cent lower than in 1930 an indication that this decline is encouraging to the campaigners being made upon it by the co-operative efforts of the public, the medical profession research workers and public health authorities

Even more marked progress has been shown during the past ten years in the fight against some of the other dangerous diseases. Mortality from pneumonia, one of the most deadly diseases a few years ago, has declined in a single year by 10 per cent and in the last ten years by 35 per cent. The mortality from cancer, the second highest cause of death in Canada, has declined 70 per cent. In the decade, while a decline of 15 per cent in a single year and 40 per cent in ten years marks the progress of the battle against the four principal communicable diseases among children measles, scarlet fever whooping cough and diphtheria.

With respect to diphtheria says the insurance company, "It is interesting to note that ten years ago it caused about as many deaths among the insured in Canada as did the three other communicable diseases combined. To-day deaths from whooping cough despite a reduction of 40 per cent outnumber those from diphtheria.

Deaths from diarrhoea and enteritis have declined 11 per cent in one year and 70 per cent in ten years from previous standards but not all of which may be attributed to a declining birth rate 25 per cent in the decade and fatal accidents 30 per cent in the last ten years. No decline however is shown in the number of deaths from automobile accidents in the ten year period, otherwise the reduction in accidental deaths would have been substantially increased.

How To Know

While these facts and figures will be disputed with considerable satisfaction, the real against preventive disease and death is by no means won but they do show that real progress is being made in Canada and also to the future represented in the increasing death rate from cancer which was 35 per cent higher in 1935 than ten years ago. It is to be hoped however that the present campaign which is now being conducted to make the people thoroughly conversant with the symptoms of this great killer and of the fact that the disease can be cured if caught and treated in the earlier stages will bear fruit during the decade [illegible] so that no one should [illegible] Thousands in Canada who have been lost in the grave victims of cancer and hundreds who to-day are doomed to an early death from the same cause would be alive and healthy but they and the knowledge that would have sent them to their physicians in time.

Cancer is not the only disease on which concerted efforts must be put if the death rate for the next ten years is to show a corresponding or even greater decline than the past decade. During the past ten years the mortality rate from diabetes heart diseases, diseases of the coronary arteries and chronic nephritis have all shown appreciable rises.

While as stated the diseases which are becoming a greater menace to the people of Canada, are comparatively few in number, they offer a task hard for more research, more education and more co-operation between the public health authorities and the insurance companies themselves, who, it might not be amiss to remark, are rendering a valuable service in the efforts they are making to promote health, reduce mortality rates and make available to the public health information which will help the people to help themselves to better health and hence greater happiness.

A Rabbit Drive

Novel Method Adopted For Assisting The Red Cross Fund

Smithfield, Ontario residents have a novel way of raising funds for the Red Cross, reports Mary Gardner of Manor. This is a "rabbit drive" several [illegible] held on the Ashburnham [illegible] 11 miles south of Manor.

These rabbit drives usually are held on a Saturday afternoon and each one covers approximately six miles. In the centre of this area a rabbit corral or trap is built of chicken-wire supports with one side open and two wings converging like the sides of a funnel.

At a specified time usually around 1 p.m. men women and girls meet for the drive. They advance on the rabbits from three sides and as not to fear long lines. On a signal they start walking or running toward the trap, through fields and clearings, driving the rabbits before them. Dogs are kept in place by two mounted men who [illegible] from getting ahead of marchers.

Eventually the four lines meet in the centre and the frightened rabbits are herded into the trap. When the hunters dispose of specially selected crew disposition the rabbits as quickly and painlessly as possible. The carcasses are disposed of to butchers or fur farms. The pelts eventually find their way to manufacturers of felt hats while the meat is fed to foxes.

From five to seven units is received for each rabbit and the proceeds of each hunt is forwarded to the local Red Cross Society.

In addition to the [illegible] the Red [illegible] the commissioner of the rodents [illegible] chase have become community pest.

The World of Wheat

By R. G. L. STRANGE

The late Lord Tweedsmuir "seemed to be in many ways an embodiment of Plato's idealistic "Philosopher-king." Lord Tweedsmuir was not a King, but he was the representative of a King. He did not rule, but he exerted a strong influence for good upon those who did rule. He was a philosopher, an historian, a deep thinker and a learned man. His mind was profound, his thoughts were noble, and his experience of three thoughts both in speech and in writing was logical, clear, simple and concise. He illuminated, exemplified and brought to his any subject he pondered on. Canada has lost a great man, a sincere humanitarian.

Lord Tweedsmuir's sympathetic nature, and his keen interest in the welfare of Western farmers, can revealed when he suggested, as a result of his observation of life on the prairies, that lonely farmers' families should receive books to read. Out of his keen experience with Western and Border Lord Tweedsmuir made certain definite and most practical suggestions to various organizations, and these organizations finally resolved for the formation of "The Lady Tweedsmuir Libraries," and the "Grain Trade Literature Fund." These organizations, working together, have made libraries of books available to farming families at hundreds of points over the province.

Okanagan fruit growers have a crop of 30,000 boxes of apples. Unlike the wheat surplus, the surplus apples cannot be carried over into the next harvest season. Nature will dispose of them, if consumers do not. leaving next year's prices to be determined by the summer's crop.

General Ironsides, commander-in-chief of the British army, once served in the Russian army, later fighting the Bolsheviki.

THE RIVER OF SKULLS

by George Marsh

© PRESS PUBLISHING COMPANY 1935 BEAVER

CHAPTER XII Continued

The following morning while the men were preparing the canoe paddles and bags ready for disembarkment the dogs in pursuit of small game scurried about the shore. The latter they stopped to boil the kettle. Alan took his rifle and went back into the tundra to scrape the country with his glasses. He fully realized the necessity of reaching the door if they were to have equipment for making the journey over the snow.

As he stood on the treeless high ground overlooking the river below him, he turned his eyes down-stream something moving on the ground near the river brought the glasses to his eyes.

What's going on down there" he cried. "That's Bonny on the back bar—there aren't the pups why they're asleep! They've got him cornered three of 'em! He can't whip three wolves! Boughy! Boughy! I've lost my dog! They'll get you! They'll get you!

Thirty miles up the river, beyond reach of his help, was the dog he loved extraordinarily by the white standards of the modern Desperate, Alan ran as he had never travelled before through the spruce.

"Boughy! Boughy! Fight 'em!" he gasped as he brushed through the thick growth down to the river shore where, hundreds of yards distant, the gray and black-and-white dog stood, with his back against an enormous boulder while three white wolves cautiously ranged in and away, seeking an they lunged but fearing to close with the black fury on them. The dog was Bonny, Alan knew, but he was too long to be shouldered of his feet, years I he showed the wolves more fight. But he is going to be a stiff dog until these heal. He'll have to be on the sledge and watch Alan speed ourselves for his dog to eat."

Presently the canoe appeared, for the boys had heard Alan's shot. Standing on the gravel bar they gazed in amazement.

"Two wolf" By gar, dat dog can cause lusty ere a fight, for sure!" gasped Red.

"The Hushes who trade at Fort Chase," added Nanpoe in his native tongue "say their dogs will kill wolf, but did not believe it. The Hushaw dogs have four of them. These dogs are from the north coast, also. They have the big hearts to fight."

"Ya, Nanpoe said — to love," added Alan, his hand resting on Bonny's shaggy head.

The Nanpoe looked puzzled. Then he nodded. "These dogs love you because you are kind to them." he said. "You never strike them with a club. You play with them much. The Nanhaga basic his dogs. He does and love them as you do."

Over an aluminum plate heaped with bear steak, the meat brought Michael listened to the story of the father of the canoe hand and the fights with the bear and wolves while Heather's eyes seldom left Alan's face, he was fine as he talked. There was a new angry over Mentzel when Alan told of the fight with the bear, his skin bag spreading a bunch on the ground to be completed the skin of the bag open it Alan started the assessment at the bags of nails system. Periods 1 to the most part the nine of the 1 and peas but a few as rings the big from a 6 to 1 ½ ball. In no way to that" demanded Mentzel but nine eyes did 1 to 6 grade. Where d you stop pose I got these bag cans. Alan?

Where did you find them, John?

Up in the gorge in some cabin. I thought the hunters stuff cached there so we might head in the others and he held there. So I pumped the grand out of the bags into which he put the big to the city I got those bag cans

Pretty much as that pot which John" nodded the dazed Alan.

Oh about five thousand dollar Glad you came boy" It's just a matter of how much weight we can take back to the coast. We're rich Alan! We're rich! Next year we'll have a couple of dogs and go back to Detroit Lena Price has time and again

The point is worth thinking over Many people like owning or have lived it But the nerves when married can take a great deal of punishment and you don't realize that something which attracts them may be very uncomfortable when you're alone.

Older people irritate physical matches up in more ways and more sensitive to things that they very generally do not realize. Just as a matter of washing and shaving. For some of them it is a job to get anything done at all (Copyright, 1935, by Stanley Publishing Co.)

And nothing which has a biting and scouring effect is good for them whether the victim is conscious of the effect or not. Coarse shaving lotion or lotion and abstracts calm thought and judgment and promotes an irritable disposition. Use Mum, the smooth, soothing deodorant cream.

Mum will not mean in argue that during actually is responsible for any existing war but its prevalence certainly has promoted amiability Favorite Telegram.

Historic Kensington Palace

May Soon Be Occupied By Duke And Duchess Of Kent

It is reported that the Duke and Duchess of Kent will shortly move into Kensington Palace which is being redecorated, with modern lighting, heating and bathrooms installed. It is because the duke's great-uncle Duke Dandeers of Argyll, frequently expressed the wish that he might be residence there after his death He is the principal bondholder under the will It was in Kensington Palace that Queen, Victoria was born. The Palace has also been occupied by a Duke of Kent some three days. One of the historic parts of the palace is the "Cupboard" doors which the young princess Victoria, came in her night dress to open when the Duke of Kent and Queen. It has been known as the "Cupboard" ever since. It was here that the state rooms to which it gave access. A large number of the Princess Louise's wedding presents are housed in the palace and will remain there.

Good Conservation Agents

Bravery Move Proved Invaluable to Canada's Business Men

Two examples of bravery which were released in Cape Breton Highlands national Park, Canada, a little more than a year ago are now known to be outstanding of the two bodies shown and a half apart. The beaver have built dams and already the water level of one of the lakes has risen by approximately two feet. As conservation agents, beavers have proved invaluable to other national parks where their work of creating ponds and lakes provides valuable feed moisture and shelter for countless forms of wild life.—Canadian Homework.

Position Note For Him

Aiding The Allies

Jewish Chemists In Palestine Working On New Discoveries

Jewish chemists in Palestine assisted by colleagues from Germany, are working on new discoveries bound to help the Allies in the war

They are following the example of Dr. Chaim Weizmann, famous Zionist leader who helped the Allied cause in the last war by discovering a cheap method of smelting acetone.

One of these chemists, a man who was born in Russia but is said to have served in the chemists department of the German War Office, has been experimenting with oranges, about 10,000,000 boxes of which, representing two-thirds of the Palestine crop, may not be exported this year because of shipping difficulties.

It was known before oranges and grapefruit could be made into marmalade and cellulose, but this chemist is now reported to have discovered a cheap method by which they can be transformed into a powerful chemical. He is working for the war to the Allies, it is understood.

Recently there also were reports that Dr. Weizmann had perfected a method of producing synthetic rubber.

Professor Albert Einstein, the famous physicist, who is now living in Palestine, is reported to be working on a new theory of relativity.

It is by such means as these that the leaders of the Jewish community consider that their people can make the best contributions to the Allied cause in the preservation of the war.

To conserve available supplies of metal, mechanically minded German Jews are inventing substitutes. Especially exciting farming colonies and settlements, to repair all sorts of discarded household utensils and machines, from old stoves to rusty bicycles, or discarded motor pumping engines.

Tourist Trade

Report Traffic In Canada Should Be Much Bigger This Year

Tourist traffic in Canada next season should be much heavier because the war has shut off Europe as a playground and because favorable exchange rates are to be obtained in the United States, according to supporters Londonists of national parks.

Representatives of Canada's 19 national parks from Nova Scotia to British Columbia, will meet in Ottawa on March 6, discussing parks problems. Chief of these is the question of P. M. Williamson controller of parks under the mines and resources department.

National parks are growing more popular every year. Last year 1,000,000 visitors came to them, and the increasing need for accommodation has led to the erection of lodges of distinctive Canadian character, the increasing need for accommodation has led to the erection of lodges of distinctive Canadian character, the increasing need for accommodation has led to the erection of lodges of distinctive Canadian character, bungalow camps and boarding houses operated under private enterprise.

People are to be encouraged during next July 1 of the new highway linking Banff, Alta., and Jasper park were described. The scenic road along the mountain tops, passing by the largest undeveloped area of the Arctic, will bring the two Alberta towns only 186 miles apart instead of the present route of 511 miles.

SELECTED RECIPES

OATMEAL MACAROONS

½ tablespoon butter
½ cup Bee Hive Golden or White Corn Syrup
1 tablespoonful white sugar
1 egg
½ cup oatmeal
1 teaspoon salt
½ teaspoon lemon extract
1 teaspoonful almond extract

Mix butter, sugar and syrup. Add salt, egg and flavoring. Then add oatmeal and mix well. Drop from teaspoon onto greased baking sheet. Bake in moderate oven (350 degrees F. for about 12 to 15 minutes.

PINEAPPLE BANANA DESSERT

1 package Raspberry Jell-O
1 cup hot water
1 cup canned pineapple juice
2 bananas

Dissolve Jell-O in hot water. Add pineapple juice. Chill until slightly thickened. Fold in bananas. Turn into individual moulds. Chill until firm. Unmould and serve with whipped cream. Serves 6.

Brave Tea Lake

Railway Refreshed Price Of Tinned Draught Horses Fell To £30 In 1879

L. E. Fisher, insurance man of Regar, Sask., sent Canon Brangwell, Rector of Walsall, Staffs., a letter from Wayne Isle, an unusual incident from Fort Wrigley to Hamilton and asked for a refund

"Sirge I did not hold it too long to get my money back he said.

Brangwell said he didn't. He sent the ticket, dated Feb. 19, 1879, to St. Louis for redemption.

Helps Red Cross

An anonymous British donor has contributed the Canadian Red Cross with use of a building free of charge in the heart of London, it was announced by Red Cross headquarters.

French authorities point out that the Soviet cannot possibly deliver the 1,000,000 tons of grain promised to the British. It looks as if Mitler paid too much for the Russian treaty.

CHAPTER XIII

To their surprise, when they went to the grill-note in the morning, in addition to the small amount of food there were big silver-edged ten treat and, in places, holes marked the spots where large fish had torn their way through the brass meshes.

"The work of bears," shouted Alan to McCord

While John and Alan, assisted by Heather worked a gravel bar with shovel and sluice-box, the two Indians opened out the canoe in the rapids downstream, using the triple-pronged fishing spear found in the cache. Before the cache was built, Alan had put the extra guns on the sharp stones and river gravel. Without hooked pulley, the fish were impossible to land. Alan in Sammie to the high pinions which he had found in the cache.

Daily as Alan listened to the gaunty Indians, the former wrongs of the Hushaw people at the hands of the coach him Nanpoe's tales of death and starvation when the caribou left the land. He hunted his waking hours. They might keep up the months they had left before the ice broke. They could never reach the headwaters. And Heather would be lost and freeze with them. The thought was like despair.

By the last week of March the chocolate bags had grown heavy with flake gold, dust and nuggets, but the river showed no signs of thawing. Alan felt himself in hardpan to share the immediate responsibility for the two they were chilled from the moment their shells and soldiers' boots buried by the grave of scanties of food and gravel washed down in the spring freshets. The flour of Shells was the sustenance

Then and third rows of cabbage had filled the lash socket, but the men were in rags while Heather shrunken of the pinions. Alan had lashed whipcords her into skin breeches and moose-skin leggings.

It was two weeks before the hunger Rough could move around much, but under the care and nursing of him and Heather, his wounds closed and he was soon limping down to the river to watch the men at work. Then, one crisp tonight as Alan stood with his dog on the gravel shore watching a flash of snowy grouse rouse the rose flushed sky the great fastness of Nanpoe, who was near him somewhere, seemed set in our waters. He left Alan and Nels to finish the water up-stream opposite his flagon repeatedly as if seeking something from the surface. Presently he returned to the run and thrust his fingers before Alan's surprised eyes They held long white hairs!

The men raised the excited Indians. The deer are crossing above here The migration is coming We must start under the stars when the moon is up Allimeh Allimeh! The deer the deer! They come come at last!

Alan started on a break-neg run for the camp to break the news to McCord and Heather while Alan shared the rendezvous at the bar as Nanpoe's fingers

Here's the best bar Nanpoe he exclaimed excitedly "I've never seen it before in the river we may have The shedding time rush and, swimming the river the deer are in the water. But how do you know it's the big migration?

Alan pointed to wrecks the Indians think eyes cropped It is always this way he said. Many reasons, enough for him on the Yukon and Mackenzie. Your geese sells Jell-O Ice Cream Powder before the brown Arctic flowers, vanilla, maple and lemon. Order several packages now.

JELL-O ICE CREAM POWDER

the white moon hills studded with boulders. Alan headed the bloodhounds to a hollow where they found a number of deer which had been killed by wolves

Hardwood for Repairs

We carry in stock at all times a complete line of Oak, suitable for wagon and implement repairs.

Get your Reaches, Axles, Eveners, Singletrees, etc., from US. We can fix you up with almost everything in this line.

Where an inexpensive job is desired, better try our Birch—it is tough and strong and will give good service.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

BIRTHS

Born—To Mr. and Mrs. Lee Stanham of Sedley, at her mother's home south of Alix, on Thursday, February 20th, a daughter.

Mr. and Mrs. Wallington were Edmonton visitors last week.

Owing to unforseen circumstances, the Canadian Legion bridge party advertised to take place here has been postponed and will be held next Friday March 7. Full particulars see other announcement.

Len Johnson, accompanied by L. W. Murray of Sterling attended the Mc Neil Creamery, Texas banquet at Red Deer on Monday.

Mr. and Mrs. Jeffcoat, Jessamyn and Mrs. Art Sell motored to Calgary on Monday.

Quite a number of Alix dancers attended the dance in Bowden last week.

"Bob" Pollock is laid up with a severe cold.

George Bissett left Monday morning, for Calgary where he joined up with the air force and left this week for the east to train. Mrs. Bissett, accompanied by his parents, Mr and Mrs. Alex Bissett motored to Calgary Tuesday to see him off.

Mrs. F. Bissett of Red Deer, visited at the home of Mrs. S. C. Anderson and renewed many old acquaintances over the week end.

Capt. and Mrs. Eaton motored to Calgary Monday returning Wednesday.

Those supplying cars for the transportation of Alix boxers to Calgary on Monday included H. E. Mawyer, Roy Johnson and J. Bennell.

The weather is remaining mild with the temperature for the past week remaining above the zero line. Slight snows have fallen, totalling since our last issue, about one inch.

K. Roy McLaren, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, March 5th. On Wednesday to Saturday of each week, consult at Calgary office, 209-210 Burns Building.

With the league playoffs now in progress, Bill Fleuffner is somewhat pleased that he is the only referee of the hot ice—but even through the errors without having to have had to resort to the services of fisticuffs—for self-defence, or to uphold his decisions.

On Thursday afternoon last, the Gay 40 to 40 Bridge Club met at the home of Mrs. Peers. Mrs. Shiell being the hostess for the day. A most enjoyable time was spent playing bridge. Prizes were won by: Mrs. Shiller, first; Mrs. Peers, consolation. Next session will be held at the home of Mrs. Peers on February 20th, at 2 p.m., Mrs. Peers being hostess.

FOR SALE—One and a quarter sections of land, ideal for mix or grain farming, only two miles from market. Located in Pleasant Valley. For particulars, apply to T. A. Brereton, Olds Alberta.

FOR SALE — Pure Bred Barred Rock roosters—$1.50 each. Mrs. T. Semple, Alix.

HOUSE FOR SALE — Four rooms and pantry. For particulars, see owner —Ed V. Chambers.

News of the Week . . .

JUDGES, PROSECUTORS, WON'T HAVE VOTE

Judges of the supreme and district courts, along with Indians, persons in jails undergoing sentence, and patients in mental hospitals, will not vote in the forthcoming provincial or dominion general elections.

Judges are barred from voting in order to separate the judiciary from politics and election campaigns.

Not voting at the provincial election will be approximately 3,000 Alberta troops, now stationed in eastern Canada, or overseas.

Provision has been made, however, to receive the votes of these men in the dominion election.

CANADIANS VOLUNTEER IN FORD ARMY

LONDON—About 300 British volunteers, including several Canadians, were busy at the international brigade organized to help Finland against Russia, were dismissed Wednesday to be at already on their way to the borders at two friend.

KING SCHEDULE TO INVITE VISITORS

Issuing of 15,000 new tourist booklets will be the first activity, public, of the material having commenced, D. K. C. Campbell, director of publicity for the provincial government, said Tuesday.

The tourist booklets will be widely distributed to travel bureaus, motor clubs, chambers of commerce and branches of trade, transportation firms and other agencies in the United States and Canada.

BRISH REPUBLICAN ARMY BOMBERS STILL

LONDON—Twelve persons were injured, two seriously, in two violent explosions last week in London's west end. Police say buried the bombings to the outlawed Irish Republican army. They believe the bombs were intended to remove the "terror campaign" which preceded the execution of three I.R.A. men for murder at Birmingham on February 7.

EMPORER PREMIUM ON U.S. MONEY

OTTAWA—Because of complaints reaching the foreign exchange control board from persons refused the premium on United States money when they tendered it in payment at places of business or amusement, confirmation of the R.C.M.P. has been enlisted to see that tourist rulings are carried out, it was learned Saturday.

Banks will always pay the premium on U.S. funds. To see that places of business follow suit, police will take immediate action (stress of disorder). For this breach of the regulations a fine up to $2,000 or one year in prison or both, may be imposed by a court.

TWO AUTO CRASHES AT WETASKIWIN

WETASKIWIN — Fire supposed to have started from an overheated stove in the tenery, gutted the interior of the Anglican church here Friday afternoon last.

HOW TO THE MAIN' THING !

LONDON—Now its the Nazi's turn to fear a blitzkrieg—a "lightning war."

The "war of nerves" thrives and shatters with unbelievable speed. Germany tried to scare the Allies into keen carried night from Berlin. No longer does Britain or France dread what Hitler may attempt at sea or in the air.

But the heads of the German army, navy and air force are deeply worried by reports the British navy is in the Arctic off the Norwegian, Russian and Finnish coasts preparing for a big Allied army is in the near East, ready for any eventuality.

So Jittery, indeed, are the Nazis lest the British blockade be extended to their supplies of Swedish iron ore ship and through neutral territorial waters that their press and radio has intensified its warnings to Scandinavia not to depart from its "neutrality."

BELL-RATING PARSONS KEEP BUSINESS CHANGE

EDMONTON — Parsons Brown of Lethbridge spoke for seven eighth have been formally restored a favorable business climate during the session, He thought it was a bill for a blotter, to be sure of it.

Days passed and Premier Brown began looking for his cheque. Several inquiries from the public brought forth the information. It did not come. Finally he realized that was what he had got.

ARMIES OF TWO DOMINION DEBATE RESOLUTION

LONDON — The nation of Lord Tweedsmuir, late governor-general of Canada, arrived at a decision Monday in one of the most vexatious which had occurred the first September of the European war. The Peace Union

They will be taken to Elsfield church, Oxfordshire, the home of the Buchans since the first Great War, to remain there until a date for interment is arranged.

PROVINCE UPSETS IN SCHOOL CONTROL

LETHBRIDGE—That the provincial government has full authority over education so far as the large school units are concerned was the substance of a statement of Mr. Justice Howson as he moved here Monday

THAT BLAINE SHEET UP PAPER

You and my Canadian soldiers are "safe?

Well, they are — if you mean the kind of laughless newspaper thrives intensive physical training and the determination to cut down the human blight existing in the province.

But if you mean that these young men are hard-boiled and back in sentiment, you are wrong—dead wrong.

No matter how stern a life they are compelled to lead, they are bound in sound and spare with the lowest ones at home. They will have pity or personal freedom they had, and hope to have again, in civilian life, and are fighting to maintain the democracy—and to at In the hearts of all of them is a steady longing for what they have left behind

That explains why the piles of Y.M. C.A. stationery dwindle so fast whenever distributed. Every one is trained or on active service, why you can enter a Y.M.C.A., no matter at any time and be sure to see men, pens or pencils as hand, lent over writing paper containing the full letter.

If you watch them closely, you will observe a dreamy, far-away look in their eyes. For the moment they are linked with home.

And, as usual, the Y.M.C.A. provides the link. —Y.M.C.A. War News

WAR IS WRITTEN IN CANADIAN HISTORY

LONDON—With popularity begins to develop Wednesday for "We've Got to Lovely War to Win," a song written specially for No. 110 Army Co-operation Squadron of the Royal Canadian Air Force, which arrived in England Sunday

The song was composed by Flying Officer William G. Middlebrow of Ottawa and Orangeville, in association with Pilot Officer Harry A. Hornell at Halifax.

Here are the words:

Pumpey, Darius and Cyrus
Were all defeated once by one;
Genghis Khan and Alexander
Really lost the war, you know;
There's a medieval tyrant
Living in the world today;
He will never win the war, as they did
Now that we are on the way.

Up, boys, into the blue sky.
Up, boys, that's where the foe is!
Up, boys!
We've got a war to win.
We'll make history tremble.
While our allies assemble
On the streets of Hitler's old Berlin.
We're the army of the forces,
Instrumental reasoners,
Without us action can't begin,
And when we've finished with Herr Hitler,
His government will collapse.
In every home there'll be a jubilation,
weekin.'
We've got a lovely war to win.

Pith has action been called a "brute" found lack of enthusiasm on the family's I.Q. If you serve it tedious of tea. Rather it is an indication of the Mrs. Gypsy Smith's prodigious of the housewife who realizes the value of fish in the diet. Your family may not smell fish in the house, but they will smell fish in their breath. Because of their nourishment but they do tend it make their teeth strong bodies and acquire better health.

Children's dietary digestive systems require tonics, vitamins, nourishment and such as fish. Their rapid growth, calls for generous proportions and milk, cods and vitamins. All of these requirements are fulfilled by including

A letter has been handed to us for publication, but as the terms of same is not constructive to good community feeling, it has been relegated to the waste-basket. For the author's information, it may as well be stated now, as later, that the columns of this paper cannot be used for the expression of personal spleen and for the expression of such views and opinions.

Local Socreds Hear Aberhart

District residents turned out in large number to hear Premier Wm. Aberhart address a mass meeting in Lacombe Monday night.

During the meeting, which was held in a wind-up to the strings of the ad-vinary board, the premier expressed his confidence that the Social Credit party would be returned to power Although unable to see Hon. H. E. Tanner, minister of lands and mines, Norman Jacques, Mrs. Aberhart, Mrs. Jacques and Mrs. Wetaskiwin federal riding, and D. R MacMillan, social credit candidate in the Lacombe-Red Deer Provincial Constituency.

Premier Aberhart told the reduced interest rates on debentures would stand so far as the present government is concerned.

Heckling was not permitted by the crowd, as one man present discovered when he attempted to question the premier on why the $25 per dividend had not been paid. Two husky supporters moved to the heckler's side and silence—or else.

The premier said during his address that payment of dividends had been blocked by the influence of the financiers, but that they would continue until the money is back in home their own credit. He stated the government's intention is to extend the transportation facilities as fast as they have left behind

That explains why the piles of Y.M C.A. stationery dwindle so fast whenever distributed. Every one is trained or on active service, why you can enter a Y.M.C.A., no matter at any time and be sure to see men, pens or pencils as hand, lent over writing paper containing the full letter.

Alix Voters Increase 25 Percent; 5 Years

A news bulletin from Ottawa indicates that the electoral lists compiled for Canada voters over the 1935 total will be added by per cent. The Alberta total in the 1935 elections was 276,340 names, and this year, figures now pouring in to the government's bureau, will be reasonable to expect the number of Alberta voters will exceed 600,000.

The increase in the voters' list of Alix poll is almost 25 per cent, there, but under 100 names on the list per com-pil'd, compared to 257 in 1935. Figures on other polls in the district are not available to us at the present time but it is estimated that there will be a proportionate increase. An increase of 25 per cent in five years speaks well for the growth of Alix, and the district as a whole, and despite the fact that over 100 of the names on the 1935 lists do not appear on the current list.

CHEMICAL SCIENCE

Chemistry was the first of the sciences to be applied to practical agriculture, Lidge, Ph.D., declared that scientific agriculture by explaining the food requirements of plants. Lamont and Gilbert through field experiments explained the action of manures and fertilizers and showed that there was no since these days, chemistry has progressed until the most valuable commercial fertilizers which are now employed in enormous quantities and which contribute vastly to increased production.

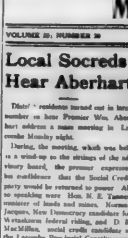
"During the past twenty years, knowledge of soil chemistry has increased until now it is becoming possible to prescribe accurately the fertilizer for a given area and the proper type of fertilizer to use upon it. Researches into the nature and interrelation of the mineral constituents of the soil and on the requirements of plants have paved the way for the discovery of methods of obtaining the relations between soils and plant growth. The study of the soil as a whole has revealed a new field of research known as "Pedology," a fruitful development of the new viewpoint on soil research. Soil-less plant growth

Physical training for children and adults is well in its stride. Girls under 21 commence at 7.30 p.m. and those at 8.30 p.m. Tuesdays and Thursdays in the Alix School basement. Boys classes will commence on the same days nights, and after this month if the same interest is taken, Friday night class will be added. Parents are invited to come down and watch their children doing their exercises. Parents will be welcome each on Friday this week between 7.30 to 9 o'clock.

SAY CONVOYS LOSE ONLY THREE OUT OF 100

PARIS—French convoys have lost only three ships out of 100 in the last months in the first five months of the war, naval minister Campinchi said here.

A. C. Bury, Liberal Candidate, Addresses Alix Public Meeting



A. CLARK BURY

Mr Bury was born and educated in England. His early years were spent on his parents' farm in Lancashire Whole still a boy he came to Canada, spent several months on a farm in Manitoba and later took up a homestead joined the N W M P. He had charge of a detachment at Olds, and also at Claresholm. Later he was sent with a party to the Peace River country. After two years he returned from the north, and was sent to Quebec as bodyguard to the late King George V then Prince of Wales, at the expiration of his five years he took his discharge to enter the study of law.

In 1912 he opened up real estate offices in Cornwallon and Hanna. At Hanna he had the sole of the township, sold at Coronation he was appointed Notary Public and Magistrate, being elected as the youngest magistrate in Canada as he was then but 28 years of age. In 1913 he moved to Edmonton where he completed his course in law, graduating from the University of Alberta in 1917.

During the Great War Mr. Bury settled as an agriculturist at Bow Park Experiment camp. When the camp was closed he opened up a law practice in Olds where he has since practiced his profession.

He has always taken a keen interest in community life, having acted as president of the Board of Trade and Curling club, and was responsible for the organization of Boy Scouts in Olds, whose charter is number one for Alberta.

Mr Bury, who is 57 years of age, has had a colorful career, and has travelled extensively practically every phase of life in western Canada, particularly in Alix.

George Tattlers

Mr. and Mrs. L. B. Clarke and family, Annie Stevenson, were recent guests of Mr. and Mrs. G. Humphrey on Sunday.

Miss Ruby Rusk spent the week end visiting friends in the Manfred district.

A Red Cross whist drive was held at the home of Mr. and Mrs. M. Bowlby Friday evening. First prizes to Mrs. L. Rusk and Percy Rusk. Booby prizes to Irene Flick and John Rusk.

Messrs. Walter Bucknow and Forrest DeVore visited at the home of Mr and Mrs. S. Oldring in the Mannefield district Forrest is Mrs. Oldring's brother.

Miss Jean Ferguson of Lacombe is visiting at the home of Mr. and Mrs. Dick Wiggins.

Mr and Mrs. G. Kain, Rhoda and George Junior, spent Monday evening at the home of Mr and Mrs. Ed. Beaton.

Mr. and Mrs. L. B. Clarke and Betty Ann visited friends in Alix on Sunday.

Correction — Last week in this column it was said that the Social Credit dance was held at the home of Mr and Mrs. L. B. Clark. The home of Mrs. Bowe read as follows:

"Quite a successful Social Credit dance was held Friday in the school.

A Red Cross Whist Drive was held at the home of Mr. and Mrs. L. B. Clark on Friday evening . . .

A Clark Bury, Liberal candidate for Red Deer federal riding addressed a meeting held in the Cobbletown Hall, Alix, on Tuesday evening. With him on the platform were his Campbellford of Red Deer and E. Poe of Strathcona.

John Lobban, acting as chairman, introduced Mr. Campbellford, who dealt with the record of the Liberal party, past and present, and its aims for the future. He also spoke on various points of legislation passed by the federal government, including such acts as the Prairie Farm Rehabilitation Act the Farm Creditors's Assistance Act, and others which are proving of much benefit to western farmers.

Mr Poe explained many features in connection with Canada's war effort, show how through preparation, spurred the necessity, Canada's military and naval forces were ready to assist. His action without the confusion experienced during the Great War. Throughout the whole program, he said, there was no evidence of patronage.

Mr. Bury, in his address, recommended the steady forward progress of the Liberal party in preference to a flighty program in monetary matters. This, he said, is necessary if Canada is to maintain her position as an exporting country, a position so necessary to Western farmers.

The Liberal program, he said, included an whole which embraced the various 'ds under which the farmer now labors. Included are, more equitable land measures, and a lowering in the protective tariffs in favor of Eastern manufacturers. However, he said, a moves has to be gradually worked out which will be fair both to themist and west. He disapproved of the "ad hoc" policy of conveniently formulating different policies for different sections in Canada, and claimed that such a program is the surest method of dividing the dominion.

Miss Lois Andrews' Is Given Shower

Miss Lois Andrews (Mrs. G. I. Marlow) was guest of honor at a miscellaneous shower held at the home of Mrs. H. Tuesday Thursday evening. Some twenty ladies, all old friends of the fu ture were present. Many beautiful gifts were presented to Mrs. Marlow for which she suitably expressed her thanks. A delightful lunch was served by Mrs. Warren, Mrs. Cora Brown, Mrs. Bert Smith and Mrs. Todd, and a very enjoyable hour was spent over the tea-cups.

Correction—In the mention mde hitherto recently printed for Alec Sim, for the A. Lauder sale, an error appears in the location of the farm. It should read "N.E.¼ of 30-39-3, half mile north of Stanton School."

HAYNES NEWS

The has been persistent in this district lately both in respect of the children have had chicken-pox.

Albert Brake has recently undergone an operation for appendicitis at the Red Deer hospital.

Hop-o'-days has been visiting for a few days in Lacombe.

The annual meeting of the Ladies' Aid was held on Wednesday last in the United Church when the following officers were appointed for 1940: President—Mrs. A. Norquay. Vice-Pres.—Mrs. Hayes. Secretary—Mrs. T. Ralston. Treasurer—Mrs. K. McLeod.

Mrs. J. Brake has returned from Calgary where she spent the past two weeks visiting relatives.

"LORD HAW-HAW" IS NOT A BRITISHER

LONDON—"Lord Haw-Haw," who broadcasts from Berlin, is not a Britisher, says the air waves to the United Kingdom, is not a disgruntled Englishman but lone other fellow—all Germans, according to an American broadcasting official just arrived from Berlin.

The American, who must remain nameless since he hopes to return to Germany, said he had met at least two "Haw-Haws" and learned on the best authority that there were more. Both were at least born native Germans.

A Big Choice of Candidates

With both federal and provincial elections suddenly called for this month and with all seats being contested by politicians of every hue, the doubly-barrelled campaign gives promise of a variety of action more than all parties have finally chosen their representatives.

Candidates who within the short space of the next three weeks will present their programmes before the electors of this district, are as follows:

Red Deer Federal Constituency

Liberal—A. C. Bury, Olds.
Conservative — Sir Arthur Sommerset, Pine Lake.
C.C.F.—K. D. Morrison, Eagle Hill.
Social Credit, (New Democracy) — H McCullough, Elnora.

Wetaskiwin Federal Constituency

Liberal — Walter S. Campbell, Edmonton.
Conservative—C. H. Russell, Wetaskiwin.
C.C.F.—Robert Haslden, Clive.
Social Credit, (New Democracy) — Norman Jacques, Wetaskiwin.

Lacombe Provincial Constituency

Independent—R. E. Chown, Bentley.
Social Credit—D. Bruce MacMillan, Trochu.
C.C.F.—C. Swindlen, Black Falls.

MIRROR NEWS

On Thursday evening, February 22, the Mirror Seniors played the Erskine Seniors in a fast hockey game. The score was 8-3 for Mirror.

On Friday evening, February 23, the Mirror Juniors held a very successful dance and raffle of two sides of pork. About $40 was realized. The dance was well attended. Winners of the pork were J. Purcell and Martin Elsner.

Mr. and Mrs. Isaac Holder of Blackfalds, Sask., who have been quite sick-ness in Vancouver, B.C., are visiting at the home of their daughter, Mrs. F. Clark.

On Monday, February 26, at the Mirror Consolidated School election, the former members of the school board, F Smathers and M. Devereux were re-elected over S. Bellamy and A. MacMillan, with a majority of 71 and 64 votes respectively

The Work Committee of the Red Cross met at the home of Mrs. W. Walker on Monday afternoon, February 26, to distribute the sewing which they have received from Calgary

The Mirror local banquet is in full swing now with 22 rinks entered. The skips are: L. Camble, A. D. MacMillan, F. McLeod, R. Cairns, H. Pinsenthing, J. Cairns, E. Knott, R. Weatherup, J. Hamilton, C. Kerr, D. McLeod, G. Elmer, R. Simpson, H. Clarke, C.O. Cook, C. Cook, H. Mathias, D. Chartrand, S. Crush, R. Crush, J. McLeod, A. Ray and Rev. L. Thompson.

On Tuesday afternoon, February 20, Mrs. E. Eyeman and Mrs. J. Bennett entertained three tables of bridge at their home. Refreshments were served by Mrs. A. Ray. Mrs. Eyeman's table was won by Mrs. J. Henderson.

Mrs L. Ray and Mrs. W. Fray entertained the members of the Missionary Chapter, O.E.S. at tea, at the home of Mrs. Fray on the following afternoon.

Mrs. Percy Thompson and Mr. J. Berson of Edmonton are visitors at the home of Mrs. A. Ray.

Miss Mary McAlpine of Rocky Mountain House is visiting Miss Thelma Chisholm.

Les Johnson, Alix Mossy-Harris agent invites all his farmer friends to attend the Dinner Day to be held on Tuesday, March 5th . A big program of moving pictures will be shown (see advertisement on page 4 of this issue for details), and as an added feature, a draw for a sulky, and baby chick incubator will win the following:

First prize: $50.00 credit note on any new Massey-Harris tractor.

Second prize: $25.00 credit note on any new Massey-Harris tractor.

Third prize: $15.00 credit note on any new Massey-Harris one way disc with transport.

Fourth prize: $10.00 credit note on any new Massey-Harris seeder.

Fifth prize: $10.00 credit note on a

The World of Wheat
By H. G. L. STRAMER

During every war that has been fought in the past some indication of money has taken place. The inflation has resulted in rising prices. In peace years the prices of commodities and of wholesale commodities have risen faster than retail prices.

Apparently the same thing is happening in this war, for the prices of wheat since September 1 has risen by 20 per cent wherever during the same period the prices of the things I farmers have to buy have only risen on the average by 5 per cent. If these advances keep up it is something like the same proportion, the purchasing power of a bushel of wheat and of other farm products will be back to that which they enjoyed in 1913-1914, and our farmers then would be moderately well off.

At the present moment, however, the purchasing power of a bushel of wheat is still only 67 per cent of what it was in 1913-14, so that a further advance of the prices received for the products of field, all in comparison with the prices of the things they have to buy for living and cultivating, would be ordinary and still would only be fair and equitable.

Following letters have tended to raise prices: Canadian wheat and flour exports from August 1 to date exceed exports from any other country — Entrance only to Europe is from Atlantic ports — Argentine wheat crop estimate reduced to 110 million bushels — Favorable crop scares in Korea, Manchukuo and in northern China — Winter wheat prospects are unfavorable in Southern Spain.

Following factors have tended to lower price — Argentine corn crop is under very beneficial rains — Reports from North African ordinary acreage to wheat has been increased — Record wheat crop of 31,264,000 bushels in Sweden — Number of bonds available for export from New Zealand will far exceed that of any other season.

Russia reports untold harvests to which Red propaganda is being subjected by the Press. The Soviet exports are being halted.

United Presbytery Annual Meeting

Church officials of the district were present at the annual meeting of the Three Hills United Church presbytery held in Calhoun last week.

Rev. J. K. Brown, Trochu, was elected chairman of the presbytery, Rev. D. Whyte Smith, Delburne was elected secretary, and Rev. L. A. Thompson, Munson treasurer.

Members present two resolutions concerning Rev. A. S. Tuttle, M.A., D.D., LL.D., of Edmonton, a member of the general council to be held next fall in Winnipeg, and Rev. F. F. Mccall, B.A., B.D., of Edmonton, for the presidency of the conference to be held in Edmonton in May. The presbytery also resolved to submit the names of Rev. D. Whyte Smith and T. J. Smyth as commissioners to general council.

During the meetings reminiscences reports were submitted from the various charges and changes pointed up that it is proved year had been enjoyed within the presbytery.

Those ministers announced their intention of making changes of pastorates in other presbyteries. The three are: Rev. W. H. McDonnald, Carbon, Rev. T. J. Stainton, Bashaw, and Rev. D. Heslop, Acme. Mr. Stainton is chairman and Rev. G. J. Reiber, Bashaw was in charge of the session's business.

Others attending were Rev. Thomas Powell, D.D., Calgary, eight ministerial delegates, 11 ministerial and two associate lay delegates.

HOCKEY NOTES

ALIX SENIORS WIN FROM JOFFRE, 6-3

The senior rural-schoners journeyed to Joffre Friday evening to take on the Joffre team to the closeness to the game. The Alix team scored first blood and ended the first period leading 2-0. Early in the second, the Joffre team tied the score but lost their advantage as Alix scored two more tallys before the end of the period. Alix added a speed twice in the third period. The number was very cold and very few fans were out to see the game.

Alix Lineup—Goal, E. Smith; Defence, T. Lambert and M. Cleland; forwards, B. Sawyer, K. Mitchell, S. Atkins, B. Fraser, W. Fraser and L. Orth.

Alix Lineup—Goal, D. Wilton; Defence, C. Wagner, Geo. Thompson; forwards, R. Wilson, H. Patrick, Reg Siddons, Wally Dixon and Jack Collins.

Due to the cold snap, scoring in hockey has slowed down. Among others the scoring-leads gone for Monday night between Mirror and Alix was postponed.

Glass shoes are making their appearance in Berlin. Cinderellas wishing to apply, will please bring along their pedicure cards.

Disembarking on or at a port somewhere in France. Note the nine aircraft and all ready for instant action.

WEDDINGS

FLEWWELLING—CLACK

A quiet wedding was solemnized in St. Lutendre Anglican church at seven o'clock, Friday, January 21, when Marjorie Clack, daughter of Mrs. Nat son Hodgson of Hamiota, Manitoba, became the bride of Mr. Ross Flewwelling, son of Mr. J. F. Flewwelling and Mirror. Rev. Herbert of Lanadian officiated.

The groom's father, and brother Russel, acted as ushers.

The newlyweds will make their home in Mirror.

MORTON—ANDREWS

A quiet, but pretty wedding was solemnized in Alix, on Sunday, February 6, at 4 o'clock at the home of the bride, when B. Lois, only daughter of Mrs. S. C. Andrews and the late S. C. Andrews, was united in marriage to Dr. George I. Morton, only son of Mr. and Mrs. A. Morton of Bengough, Sask. L. A. Thompson officiated at the ceremony.

The bride was given in marriage by her brother, Lieutenant C. S. Andrews of the Calgary Highlanders. She was attended as maid of honor, and as bridesmaid Miss Dorothy Andrews, sister of the bride. Miss Jacqueline Brown of Edmonton, the bridesmaid, wore a crushed raspberry model in crepe, a corsage of tea roses and black accessories.

Miss Josephine Brown of Edmonton, the bridesmaid, wore a crushed raspberry model in crepe, a corsage of tea roses and black accessories.

Mr. Fraser Pope of Calgary was best man.

Following the ceremony an informal reception was held for about 20 guests.

To receive, Mrs. Andrews chose a Persian crepe with black accessories and pink roses. Mrs. Brown wore a mustard crepe in two shades of rose, black accessories, and pink roses on corsage.

The bridal couple travel to Calgary, where they will spend a few days, before going on Ottawa, where Dr. Morton will be stationed with the medical corps.

The bride went for travelling a tailored black crepe, with tiny white and black accessories, black and rust two-tone coat with fox collar.

Dr. Morton graduated in the faculty of medicine from the University of Alberta in 1936, and Mrs. Morton grads read from the Royal Alexandra hospital the same year.

Have You Heard These Before ?

Secretary—Mr. Jones called up to say she couldn't meet you downtown this morning."

Mr. Jones—"Well, that's a wet old alibi."

o o o

"I always have the last word in discussions with my wife."

"How do you manage it?"

"I say, 'Quite right, my dear.'"

o o o

Little Alice had been washing her mother's clothes. After painstaking and soapy job, she exclaimed: "Mummie, my fingers are wilted!"

o o o

A negro person held forth as follows:

"Brudders and sistahs, I want to warn you 'gainst de heinous crime ob gamblin' chickens, an' fuddermo' I want to warn you 'gainst de heinous crime ob crushin' automobuses."

At this point an old negro rose up, scooped his fingers, and sat down again.

"Whurfo', brudder, dem yo' rise up yo' fingers?" inquires you I spoke ob automobus crushin' fo'."

"Yo' jes' somfuds out, person, whar I does fo'" an brudder," was the reply.

CANADIANA

TORONTO — The Canadian Chamber of Commerce should relieve the reminiscences of its members according to McLeod, author of that organization and head of Canada Packers. The key to our economic difficulties, he said, lies in the improvement of agricultural welfare. Mr. McLeod also advocated the lending of credits of capital by labor. "Capital and labor are partners," he said.

REGINA — Prices of farm products must be increased quickly by governments to provide farmers with a just deal, declared Premier Mackenzie Bowman in a recent campaign address. To this end he suggested a plan to restore the purchasing power legislation of 1935, but he warned that "no internal Canadian policy can have complete and desirable effect upon the prosperity of the wheat farmer."

ST THOMAS—Hon. James G. Gardiner, Provincial Minister of Agriculture is not in favor of the national government's proposal to "socialize" farming. Mr. Gardiner declared. "I am not in favor of democratic principles for which Canadians stand, declared Mr. Gardiner. Furthermore, he said, the Dominion's experiment with state governments "have been hopeless and attended by scandals." Besides which, Mr. Gardiner declared he was not sure how Hon. R. J. Manion proposed to work.

NORTH BATTLEFORD — "Unless the primary producer can obtain a decent standard of living for himself and his family, then his country or ours is beaten," Hon W. D. Herridge told a New Democracy rally here last week.

Conditions of insecurity in Canada are "sheer defiance of fundamental laws and common sense," Mr. Herridge. In years times or use the Canada for security is the same, he declared. These are sentiments producers hastened by mere distribution.

OTTAWA — The war has brought an immediate effect upon retail credit and has brought increased business to the department stores of Canada, it was reported to the Credit Men's convention which closed here recently. Representatives of various credit organization the night debts of enlisted men should be proved. for the duration and urged the Dominion government to make some provision for enlisted men to assign a portion of their pay to the retail credit organizations of their pay.

REGINA — Another note of Canadian unity was struck recently at the Saskatchewan legislature when a resolution calling for an interim payment of $6 cents a bushel on wheat, delivered to the Wheat Board was adopted. If not less effort, this would amount to a capped price of ninety cents for wheat sold through the Board. The Legislature also voted unanimously in favor of a wheat bonus to be paid from a levy on grain trade and elevator companies.

EDMONTON—Unpaid applicants for work as registered in Alberta by the employment service in March totalled 6,933 according to latest report. This shows a decrease of 1,125 over the same period of last year British Columbia's registered unemployed is given as 36,000, having increased by 2,150 since the 1930 period. Saskatchewan and Manitoba show increases of 626 and 944 respectively.

A solicitor decided to save over part of his practice to his son.

Shortly afterwards the young man, beaming with pleasure, entered the office and said: "Father, I've decided that johnson case on which we've been working for the last year."

"Insist it!" was the indignant reply "Insist it!" Why, my dear boy, I gave you that case as an example."

TASTE IN WATER

The control of the taste and odour in water, one of the most recently developed phases of municipal water treatment is described in the current issue of "The Chemistry of Canada," a magazine of industrial chemistry. To eliminate unpleasant tastes and odours caused by industrial and domestic wastes and a variety of additional hazardous matters, engineers the chemical industry says the magazine has developed a number of activated carbon products. Some of these is so fine that if 10 pounds of it were added to 1,000,000 gallons of water, each drop of water will contain 4,000 particles. Millions of these tiny black grains act as sponge—absorbing the poisons of the organisms killed by chlorination or other treatments, and carrying them out as they settle to the bott on. A ten pounds of the compound is sufficient to treat several million gallons of water.

AUCTION SALE

Having received instructions from the owner, I will sell by public auction on the M E of 30-39-22, one half section, 1320 Bu. Yearling Belgian colt.

6 HEAD GRAIN FED CATTLE — 5 year old Cow Durham; 4-year-old Durham; 3-year-old Heifer due to freshen in April; 3-year-old Jersey Cow, milking (in calf); 2 two-year-old Heifers; 2 two-year-old Steers.

HINTS FOR FARMERS ...

USEFUL INFORMATION SUPPLIED BY DOMINION AND PROVINCIAL FARM SERVICES

THE CHOICE OF FORAGE CROP SEED FOR SPRING

In th important, that in farms no produce, thought be given to the seed ing progress so that plans will be well in hand by seeding time. This is particularly true with regard to the forage crops. Many farmers will govern the varieties and species chosen but consideration should be kept in mind and that is "quality." The best forage crop seeds available should be used in order that the risk of poor stands and consequently poor crops may be reduced to the minimum. The following rules should be kept in mind when buying forage crop seed requirements, states R. M McVicar, Division of Forage Plants, Central Experimental Farm, Ottawa.

1. Choose the species which your own experience or the experience of your neighbors has indicated are the best for your district and purpose. If you have found alsike best for hay and pasture, buy alsike — not seed of some other species because it is a few cents cheaper

2. Acquaint yourself with the established varieties of the species you grow. For example there may be a variety of alfalfa much better adapted for your locality than the variety you have been using. Information on new and old varieties of forage crops is readily obtainable.

3. Buy registered seed or if it is not available ask for certified seed. In this way you will be protected as to the purity of the variety.

4. Do not buy seed that is not number one grade. It is contaminated, purity and freedom from weed seeds. Number one grade seed is obtained by false assurance.

5. When available, buy approved Canadian grown seed in preference to imported seed.

PREPARE FOR SPRING HATCHING

Once the post onward years, at least one fundamental change has been place in other might be turned "farm poultry keeping." Previously, flock renewals formerly were made by methods of natural inoculation and rearing, much of which resulted in losses from chicks, disinfected and freed from vermin before, any birds are set.

Between hatches, clean out nests and disinfect carefully

They feeds are preferable, and grain and shell should be in clean pans readily available. Birds should have ready access to fresh supply of water, clean, fresh water Keep premises clean at all times and if weather is warm, the room should be well ventilated.

FEED AND CARE OF THE DRY COW

All too frequently proper care during the dry period of the dairy cow is neglected by dairy farmers, states V. Smith, Animal Husbandry Division, Central Experimental Farm, Ottawa. This is but practice because the interval provides an opportunity for the dairy cow to rebuild her depleted stores for the succeeding lactation period. During the height of lactation high producing cows give off in their milk, by elimination, their reserves, more nutrients than they can assimilate from the feed they are able to consume. Hence, there is a large reserve supply of fat and mineral nutrients in the body when freshening, they can maintain a higher level of production during lactation.

As the period between lactations may be considered a recovery period, it is necessary that a reasonable length of time be allowed to restore the proper economical milk production; and a normal healthy calf Experimental farms and practical experience have shown that a period of six weeks is the most economical length of time for the cow to remain dry. Longer "dry periods" only will result in a higher yield for the succeeding lactation but at a higher cost.

Dry cows on good pasture may need very little supplemental feed. During the dry period on poor pasture supplementary roughages or a grain ration composed of two parts each of oat or bran and one part each of flax seed may be fed. Silage may be fed; bran, ground oats, ground barley, plus one part of alfalfa meal To the dry cow feed 4 to 7 pounds daily In addition feeding if the cow is in good flesh and condition no grain may be fed. 2 pounds daily of the above grain mixture. If the cow is in poor flesh, however, a be sure to maintain a sheek condition. A pound of meal a day during the dry period is worth as much 2 to 3 pounds of meal fed after the cow has freshened. Good quality hay and pasture hay aids in building up the depleted mineral reserve

The "drying off" process will vary with the cow A poor-producing cow presents no problem as she dries off in a couple of days. Heavy cows, in the case of persistent milkers, the feed should be gradually reduced over the period between milkings necessary until the flow is reduced to the point where milking may be discontinued altogether except for a final stripping

HINTS FOR SWINE PRODUCERS

The farrowing season is rapidly approaching and in order to promote the health of the young pigs and save as many as possible, the following precautions are suggested

1. Clean Brood Sow

1 House the brood sow in dry quarters for farrowing.

2 Scrub the grain ration, some alfalfa hay or green cut hundles are recommended.

3 A mineral mixture composed of 100 lbs. each of ground limestone, stone 3 lbs. and iron sulphate 1 lb should be available to the sow at all times.

4. To prevent bulrrowsness and swab sore on young pigs, the sow should be washed with soap and water.

5 Provide farrowing pens with clean sods or rotted manure, pigs, the sow should be washed with soap and water.

6 To prevent bulrrowsness and swab sore on young pigs, the sow should be washed with soap and water.

7 A good ration for weaning pigs consists of ground oats 200 lbs. bran 100 lbs. and fed in the form of one tablespoon per sow per day is suggested.

8 At farrowing time, place the sow into a pen by herself and not with the rest of the herd.

Minutes of Lamerton M.D. Annual Ratepayers' Meeting

IS IT WORTH WHILE?

Is it worth while that we jostle a brother,
Because his load on the rough road of life?
Is it worth while that we jeer at each other
In the blackness of heart—that we vex to the knife?
God pity us all as we jostle each other.
God pardon us all for the triumphs we win
When a fellow goes under, goes lower broken brother,
Pierced to the heart. Words are knife or thou soul,
And mightier far for woe or for soul.
Look at the man standing under your roof
Look at the hands all at peace on the pitch;
Man and man only makes war on his brother,
And deems it his heart on his peril his wife.
Shamed is pithe brutes that go down on the earth
Is it worth while that we bustle to bustle
Some poor fellow traveller down into the dust?
God pity us all! Time soon will us All soon together, the leaves in a heap
All of us humbled down into the dust.
—Joaquin Miller

Changes Inevitable

The experience of past years shows that changes are the order, and that this year will be no exception. The directors may make changes that are not in the 1934-35 year. Before we are slightly out of the account though we are into the second week. The trustees will see where have trouble and power is that they should have, that others will not come that the old ways will return. But humanity is constantly pressing onward and change is inevitable. In the same way the farmers are bound to be vast improvements. People are not going to be content with a poorer standard of living control new good times. There will be no insurance on a failure distribution of the good things of life. It is bound to come. Bank failures are bound to be eliminated. The problem lies in the distribution of the wealth. Production is easy in comparison to the ability it causes fully among all people, the issues for humanity.

THE WHEAT SITUATION

A record of demand from overseas countries for Canadian wheat has been shown during the past ten days. The market has shown a stronger tone than previously to the inter approvals of the five years season and a decrease in the estimated production of the 1938 Argentine crop. The government's figures now give production at 158 million bushels.

The Canadian visible supply total 212,262,000 bushels on the 16th of February. This is 102 million bushels larger than the visible supply on the same date a year ago. There are only five months left in the crop year, and the above shows that Canada will have the largest year-end carryover in her history, possibly 200 million bushels.

Conditions have improved in the United States hard wheat region. A fairly substantial supply of moisture in the form of snow during the winter has benefited the crop, but kind spring weather with an absolutely of moisture will be needed to produce a fair yield.

The Alberta countryside is covered with snow. Most of the southwestern portion of the province has been free of snow all winter. Western Canada will be watching weather conditions with interest to date. Moisture reserves are below average, but a wet spring will offset this condition.

MARK plant early this year as harvest a bumper crop of potatoes. Plant good seed for an excellent crop. Plant certified seed for an excellent crop. Plant certified seed for the best crop. Certified seed is grown under the most favorable conditions and is carefully inspected by Dominion and Provincial Government inspectors.
Canadian Certified Seed Potatoes are good seed potatoes. By planting them, many of the losses due to seed disease will be prevented. Canadian Certified Seed Potatoes are grown in the best potato growing districts of Canada. Their parentage is known and their quality is guaranteed. Plant Canadian Certified Seed potatoes and you will grow Canada No. 1. Canadian Certified Seed Potatoes are available in all standard varieties. Be sure to order the variety most suitable for your district. Write for prices and further information to the Seed Branch, Dept. of Agriculture, Ottawa, Ont.
Certified seed potatoes are distributed by
INSPECTOR FOR
DISTRICT NO. 1
Application forms should be sent to the Inspector for the district in which the seed is grown.
Application forms should be sent to the Inspector for the district in which the seed is grown.
Certificate tags will be attached to bags of seed potatoes which have been inspected and found to be true to variety and free from serious disease.
Look for these tags when buying seed potatoes.

Robt. Haskins, C.C.F. Candidate for Wetaskiwin, Lauded As An Actor

He Found That Advertising Pays ...

George W Sheets is a merchant at Portsmouth, Ohio. He went into the furniture business there in 1933, five blocks from the best shopping district and by the depression year of 1941 had $25,000 on his books with no prospect of getting cash from accounts or earning interest. What to do? Mr Sheets decided to concentrate on everything else and put as much money as possible into an aggressive advertising campaign in his local newspaper.

Advertising Facts, published by the American Newspaper Publisher's Association, tells the rest of the story.

"The depression years cause hammering down the price, but the Sheets Furniture Company stuck to its advertising plans, putting more than 95 per cent of its total advertising budget into newspapers. Mr. Sheets signed a contract with the local newspaper and each year his lineage total exceeded those of any downtown store. A steel strike and the flood of 1937 added to his troubles later on, but he kept right on advertising. In 1938 he used 5,000 inches of newspaper space. By 1939 his annual total was well over 7,000 inches.

"Today the Sheets Furniture Company owns a three-story building and has added the building next door. The company carries a stock of about $14,000 worth of merchandise and paid for Mr Sheets has also paid for his home and bought three other houses as investments. He boasts $125,000 as good accounts receivable. He has built up an excellent credit rating.

"What's the answer? Well, Mr. Sheets has it. 'If I ever quit advertising I will turn the key on the door of the front door and get out of the business.'"

Most successful retailers feel the same way. They have found they can depend on newspaper advertising to bring customers into their stores willing and able to buy. Which is how you get right down to it is the best kind of evidence that national advertisers who sell through retail stores can use newspaper space effectively to increase their own sales and profits.

INDICTED ON FRUIT MARKET COMBINE CHARGE

Eight companies and four individuals were told by Magistrate McWilliams in Kelowna last week that they must face a supreme court jury on charges of taking part in an illegal combine in the marketing of B.C. fruit.

The magistrate dismissed conspiracy charges against nine companies and five individuals after ruling insufficient a large batch of letters and documents.

Bail of $5,000 each was set in the combine charge for four individuals: R. B. Staples, Kelowna; A. C. Lander, Robert Hoskins, farmer of the Clive district was lauded Monday by a disappointed British theatre critic as being a "better actor than Maurice Colbourne."

It was Mr Colbourne who recently toured Canada and Manhattan with Bernard Shaw's play "Geneva before writing in the New York Times a bitter attack on "dirty" and "ill-equipped" Canadian theatres and on what he did find the low level of acting in Canadian Little Theatre shows.

H. B. Latchwood, British critic who was spokesman at last year's Canadian drama festival, wrote Monday in London's Daily Mirror that he had read Mr Colbourne's article "with amazement."

Mr Latchwood wrote that not all the acting he saw in Canada was great but some performances were "of the highest quality." The pleading, for instance, of Robert Haskins from Clive, Alberta, in Tchekov's "The Bear" was so far from being "arrogant" that it showed powers quite beyond those revealed by Mr Colbourne himself in any of the parts I have seen him essay upon the London stage," he wrote.

Mr Haskins, subsidized the best actor in the dominion, and his work is in demonstration at present on political platforms.

He is C.C.F. candidate in the federal riding of Wetaskiwin

ADLETS

LOST—Red bow, sack out of belt car, last clipped on rack, weight between 200 and 300 lbs.—Apply J. Gillespie, Hargrave. Itp

FOR SALE—One and a quarter section of land, about 300 acres under fencing, only two miles from market, situated in Pleasant Valley. For particulars, apply to T A Brereton, Clive, Alberta.

HOUSE FOR SALE — Four rooms and pantry. For particulars, see owner — Ed V Lewis.

Kelowna; W P Riley, Winnipeg, and Alexander McLaren, Winnipeg.

Evidence introduced at the hearing disclosed Dominion Fruit Company, Winnipeg, an affiliate of Western Growers, formed, Winnipeg, owned a half-interest in Lander Packing Company, Kelowna, hold-mit for Sales Service, limited, and four other packing firms. The crown alleged the jobber-shipper affiliation operated to the detriment of the public, particularly B.C. fruit growers.

In the conspiracy charge, the crown attempted to show the B.C. firms involved in the alleged combine and Associated Growers of British Columbia paid secret rebates or quantity discounts to Dominion Fruit company, an organization established by wholesale produce distributors throughout the province.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Red Cross Notes

A good shipment of wool has arrived much to the satisfaction of the many knitters in the district. There is wool for socks, mitrens, gloves and pullovers so everybody can now get busy.

Don't forget the Royal Vic: film to be shown here for the Red Cross on Wednesday, March 6th. This is a full length picture and will be supported by more answered shorts—and very well worth seeing. So more and bring in millions. There are to be two shows we believe

The next general meeting of the Society will be held in the U.F.A. Hall at 8 p.m. Tuesday, March 5th. Be sure and attend.

A number of plays are being lined up for the dramatic festival to be held March 28 and 29, and costs are busy learning lines and whipping them into shape. There is still room for more entries however, and we are hoping to hear from some of the town groups. This is a splendid way your group can get a-field to begin the Red Cross, and at the same time both enjoy some good fun and learn something. The members and directors of each cast have no salary, a pass for both evenings. If you are hesitating for a play producer the committee can lend you a hand — and there is still plenty of time.

WINTER DRESSING OF DAIRY CATTLE

Limiyman suggested in all-year-round, pens, pe-sanitation requires that most of these cows receive during the lush and winter months, this means that most of the cows have to be put here during the first lush area winter. Often this is a somewhat brooding season some difficulties are often experienced at getting the cows ready to come in season as getting them settled, since Alex Lamman, in charge of Animal Husbandry, Central Experimental Farm, Ottawa.

The love assurance against breeding troubles is a liberal and balanced ration of well-cured alfalfa or clover hay. Not only do these legume hays form the basis of economical feeding, but they supply the health-protecting minerals and vitamins, provisions some of which are difficult and expensive to obtain. Good silage, if the cows were fed this also, provides some part of the vitamins, as does roots, particularly yellow carrots and yellow corn provides. Normally, the condition of the cows is very important in determining good breeding efficiency. The good milking cows frequently go down in flesh soon after freshening, particularly if not well fed, and at the time they should come in season are in poor breeding condition. Increasing the hay if it is good hay, and feeding a little more and richer concentrate mixture, will usually overcome any silage might help in reducing the milk flow and helping the cow to put on flesh.

Secondly, the cows are more comfortable at a nearly uniform stable temperature of not less than 40° Fahrenheit with no drafts and yet good ventilation is important.

Thirdly, cows are not as easily noticed to be in season during winter, especially since there are only some turned out daily and not even that in severe weather. The strength of the heat period is the most important in which, and only when it is at its height does a cow show signs of being in season. This may occur in the evenings or at night and hence, goes unnoticed. In nursery cows the udder bonders tend their cows with a young bull in the stable.

Fourthly, there is the problem of temporary sterility. Inflammation of the reproductive organs is often the cause of this. Secretions from a cow should be clean, colourless, sticky fluid when normally in season. When inflammation occurs the secretions are of a pungent odour and are often yellow. A cow should not be bred until they have become normal either through their or by treatment. Breeding cows with the normal discharges are likely to spread the disease. Certain types in unruly, nervous animals be overcome by a correction consisting the ovaries or injecting into pockets.

For economic winter milk production good feeding and good care are essential to keep the most of the herd fresh long in fall and winter.

CONDITION OF WHEAT SEED IN RELATION TO DISEASE

The use of sound disease-free seed is an important step in attempting to grow a uniform high-yielding crop of wheat, states F. M. Simmonds, Dominion Laboratory of Plant Pathology, University of Saskatchewan. It is understood, of course, that the seed should be true to variety, clean and of strong germination. The importance of knowing the percentage germination should be emphasized. A germ test will show the vitality of the seed and frequently gives an seed, indications of disease. The germination percentage is how indicating weakness or disease, one should carefully examine the seed in an endeavor to determine the cause. Sometimes this is very noticeable as in the case of shrivelling, frost injury, heat damage, mechanical injuries, fungus discolouration and so forth. Heavy discolorations of heat or severed must can also be determined by a germination test made out at the Dominion Laboratory of Plant Pathology at Saskatoon. Sometimes the germination test is satisfactory although in any way are more likely to be attacked by root rot. Seed borne fungi are common in some soils and are also carried on seed. If injured seed must be used, great care should be taken in the selection of a seed treatment. It might also be advisable to increase the seeding rate. Tests have shown that the recently developed organic mercury dust compounds are not used for smut control, give some protection to seed or diseased seeds. The use of dendrid seed treatment, is not available under ordinary conditions.

Occasionally samples of smutty grain show many discolored kernels. This is usually a dubious indication of a fungus disease. The discoloured is commonly caused by a control fungus which may attack and kill the young plant during its early development or invade the crown and retard growth through the season. Consequently, samples showing a large amount of discoloration or smudge must be looked upon with suspicion. Seed showing only a trace, or a slight amount, may be used, but it would be advisable to treat such lots with a dust as mentioned above. When there is doubt as to the importance or nature of the disease a seed samples, they should be sent to a plant pathologist for examination. Information on plant disease problems may be obtained from the nearest Dominion Plant Pathology Laboratory, at Edmonton.

At Massachusetts maidens reported fair bugglers station. Maybe the neighbors were watching about it.

T Semple went to Dalhorne last week to attend the semi-annual Presbytery Conference of the United Church.

Mrs. Robert Whitfield Jr returned Monday from Calgary where she spent the week with her husband who is training in the Air Force.

Burt Hollings and Burt Jr returned Friday from Edmonton where they spent several days attending the wildcat school. Besides learning a good many new tricks of the trade, Burt reports learning a handsome real case in a game conducted during the week.

News of the Week . . .

FINLAND A "BAD RISK" FROM CANADA.

OTTAWA—Finland has sent a note to the London government drawing attention to the "reprehensible methods" adopted by the Russian army and sub-pressing hope the Finns "will exert just to enjoy the sympathy and all possible assistance of the Canadian governments."

GRAY SUIT AGAINST PREMIER WILL LIKELY BE DROPPED

Suit of E. L. Gray, provincial Liberal leader, asking $15,000 damages from Premier Aberhart and Hon. E.C. Manning, provincial secretary, probably will not be pressed, it was learned last week.

COAL SHIPS HALTED ON WAY TO ITALY

LONDON—Five Italian ships were taken to the contraband control base at Dan, commanded England. Two sailing in the dispute between Britain and Italy over Italian imports of German coal.

PREMIER ABERHART TO RUN IN CALGARY

CALGARY—Premier Aberhart, and Hon. Colin Cameron will run as Social Credit candidates in the provincial riding of Calgary in the March 21 Alberta election, the Social Credit advisory board announced last Friday.

COMPARES MITCH HEPBURN TO HUEY LONG

NEW YORK—Louis de Rochemont, producer of the March of Time, told Monday night Premier Hepburn of Ontario is "dictatorial rather under importance to humanity" if he thinks the March of Time filmed "Canada at War" in order "to refute his charges that Canadians are hog-ing in these war efforts."

In announcing in Toronto Monday the launching of the film in Canada-just after the Canadian general election, March 28, Premier Hepburn declared: "It is time that pure-blind propaganda for the MacKenzie King government."

"Apparently March of Time's (the Canada at War," can be shown everywhere throughout the world except in Canada, Max Gerneway and the Province of Ontario," Mr. de Rochemont said, and compared Mr. Hepburn with Huey Long.

DECLARE TWO ALTA. ACTS UNCONSTITUTIONAL

LONDON—The acts passed by the legislature of Alberta in 1937 reducing interest rates on provincial securities have declared unconstitutional Tuesday by the judicial committee of the privy council. Upholding the judgments of the Canadian courts, Their Lordships declared two appeals brought by the Alberta government

PREMIER TAKES CHARGE OF TOWN

AURORA, Ill.—Hundreds of men — charged with the crime of banditry-hood—jammed the jailhouse last Thursday.

They were cast there by girls' who took charge of this city of 32,820 in a coup de etat that is keeping with the traditional Leap Year day custom, the young women assumed control of the city hall, fire and police departments, business houses and the banks— and all men nursing more than 12 hours

Mayor Anny Kaul, brunette dancing teacher, decreed:

—"Get them all in jail."

Copperative collared hapless males on streets, in offices and factories. The prisoners were wheeled off to paddy wagons, carried to jail for several hours and hailed before Mayor Wabeck, police court judge magistrate. Fines were imposed promptly — stockings, candy, flowers, lingerie.

The eligible Dr. Joseph Waldron needed a prescription of prime attention for baldness with sudden shortsightedness. Suddenly he hopped to the hospital, to be fully exposed and shivered: "I really needs it."

The tortured judge sobs him back to the dungeon.

While the men nest two hours, 500 debutantes prepare the election to the county treasurer. To take out all the money they can, they "raise" it.

The fine hunts took the one prominent shown in circle. They sold dozen of cookies pies, pounds of fresh and smoked eel to a bawling house (that the men numbers contributed the cheer).

The subsequent-to-the outbreak through a $7,000 payroll, hunts lodged $10,000 each for Clark Gable and Robert Taylor and 25 cents to Shirley Temple to hold out for Harry Warner, hold owner of Aurora.

Permanent rule ended at a night banquet. The flowery and hilarious affair at to the women's court were dismissed.

BELIEVES RUSSIA WILL BOMB CANADA

BUFFALO—Bombing by Russia of Canadian cities to force mobilization in the United States was predicted last week by F Snyder, Kingston M Y writer and traveler.

Snyder told the Buffalo Rotary club "The Russians would bomb us to make they believe that revolt and communism will spread in this country under mobilization of armies."

Mr and Mrs. Lee Olson of Red Deer were visitors at the home of Mrs Peers on Sunday.

Many Hear About Technocracy

Fast are stubborn things — that's fillin an audience of 70 people though when Norman Collier, authorized speaker on Technocracy, on Saturday evening in the U.F.A. Hall.

The speaker used his five well prepared charts to illustrate the aspect of technology on our social structure. He made it very plain clear that to get more we must work less, thus bringing the operation of current and technology, values are disappearing, through an overabundance of supplying, causing the inevitable crash of the present price system.

That this crash is imminent is proved by the tendency in the machine power of money, or the interest rate to be rapidly approaching zero, and paralleling this fact is the much more important fact for the average wage earner that the cost of an hour's productive work which in plain terms is science applied to the social order has made an enormous survey of the order of things on this continent, who have analyzed the methods of production and distribution and find that we have more natural resources, more developed horse power and more plant and machinery than exist anywhere else on earth.

That all that stands between the people of this continent and the highest standard of living ever known, is the antiquated price system and he insinuates a scarcity in order to under stand if Technocracy would be established by revolution, the speaker was emphatic in denouncing any such medium.

In the organization meeting that followed, a large number of new members were enrolled and a study group organized to meet weekly.

HOCKEY NOTES

CLIVE WINS FROM ALIX, 7-4

Clive packeers won a fast, close game from the Alix seniors, at Clive last Thursday, where the locals finished on the short end of 7-4 score.

The Alix team had the ice, also in of the first period, but lost their advantage in the second when the Clive boys showed some fast tallys in the second, while the locals bagged the net in the third period. The visitors gave Clive two more goals and Alix, one.

Lineups

Clive: Goal, Les Northcott; Defense, Elmo Northcott and Bruce Hansell; Wagner, Forwards, Johnny Morton, Dennis Walker, Dan Matthews; Manager Lloyd Northcott; coach, Bobby Hale.

Alix—Goal, Dave Wilson; Defense, George Thorpe and Ray Peers; Forwards, Harold Patrick, Ken Smith, Art Mann; Rover, Tom Cambel, Jack Peers and Jack Collier.

Referee—C. Johnson.

ALIX AND CLIVE TIE RETURN GAME, 3-3

The return game in Alix Saturday night was the dirtiest game played this season, with sticks and hot words flying from start to finish.

The final score was a 3-3 overtime tie, Bobby Walper scoring for Clive in the first period, with Alix getting their counters in the third—scored by Patrick on a pass from Smith, 9:11 on.

Ray Wilson relieved the game at the start, but redistributed the puck in and thought he hit brother, Gordon, who was on exit the middle of the third, when Bill Pedersen dropped in to substitute order. Ray Peers and Bobby Walper carried the business a bit too far and went given the boot for the balance of the game.

Lineups were the same as in the Clive game with Bobby Walper added in Clive's forward lines and Johnny Morton playing back. Bobby Gibson played for Alix in place of Jack Collier and George Thorpe and Jack Peers exchanged positions.

Big Box Card Easter Week

Boys . . . will be again to the forefront in Easter Week as the Alix Canadian Legion Athletic Club is announcing its best card so far—and it will be in Easter Week as it's club is staging its best card so far—this time at Seattle. The four main events are definitely set as follows:

Main Event

Wade Fretwell, Lacombe vs. Reg. Middaugh of Alix (147 open class.)

Semi-Windup

Harry Fretwell of Lacombe vs. John Wilkinson of Alix. (175 open class)

Gordon Fretwell of Lacombe vs. Andy Cleveland of Alix. (125 open class)

Jimmy Fretwell of Lacombe vs. Jack Cleveland of Alix. (145 heavy class)

Other boosts so far selected to appear at last whose members are yet to be announced are Johnny Lee, Elmer Lee, Bobbins, Frank Saldokas, Martin Lessard, Jake Lessard, Jimmy Lessard, Lyall Sandberg, Ken Claude — Ted Smith, Owen Jennings, Don Brodbent, Mart Peers, Tom Ray, Lauris Hollings, Harold Patrick. Full list of those taking part will be named next week in addition to some of the big boys has not been obtained. Forty members are however slated for Friday. Should satisfactory arrangements not be obtained this card will be held either in Red Deer or Lacombe. The next card will be held on March

Four boys in the main events are sanctioned to compete in the Canadian and Alberta championships this year, make weight for pre—Webb Fretwell, lightweight; Reg. Middaugh, welterweight, John Wilkinson, middleweight and Hutch Fretwell, light-heavy is a member of the team to get any boy in the province to meet this fighting machine in the person of Webb Fretwell, who is expected to be on his way to the coast to meet the Alix boys. Both boys are confident and a real battle will be assured.

In conjunction with the Al's Casual Dandies Athletic club, the Legion Athletic club's physical training classes are being carried out under the supervision of Mrs. Hopkins, ably assisted by Mrs. J. McMahon and Hazle Todd on the girls' side and J. McMahon; Bert Smith and Pop Walper on the boys' side. Children's hours are 7.30 to 8.30 p.m. every Tuesday, Friday and Saturday, and adults from 8.30 to 9.30 on the same nights. Parents are invited to come and see their children, who besides enjoying themselves, get a lot of exercise and coordination at least three nights in the week. Don't forget equipment to keep interest up, and attendance regular. Is needed, and that $1.00 membership will do the trick.

MIRROR NEWS

Mrs. G. Thomas entertained her bridge club at her home on Friday afternoon March 1. Honors were won by Mrs. A. Orr, Mrs. B. Wendt.

Recent cold weather has made it necessary to postpone the hospital for the time being.

On Wednesday, February 24, Mrs. L. Ray entertained the Bridge Club at her home. First prize was won by Mrs. H. Pierson and consolation was won by Mrs. E. Cousins.

On Friday evening, March 1, a party was held in the I.O.O.F. Hall, by the young people, in honor of Mr. and Mrs. Flying Dutchman. Prizes were given to Mr. Ray Thomas presented the newlyweds with a kitchen clock from those assembled.

On Tuesday evening, February 27, Mrs. R. Armstrong and Mrs. C. Cousins entertained several tables of bridge at Mrs. Cousins's home. First prize was won by Mrs. G. Thomas and consolation by Mrs. H. Shepherd. Consolation was won by Mrs. L. Ray.

On Thursday evening, February 25, Mr. Walter S. Campbell, liberal candidate for the federal riding of Wetaskiwin, addressed a gathering of about 60 people in the Town Hall. Mr. R. Mantle acted as chairman. Mr Campbell spoke on the Liberal program under the following headings: 1. National Debt; 2. Wheat Board; 3. Tariffs; 4. Where Does Your Money Go?

J. R. Mackie Is Alix' Mayor For Twentieth Consecutive Year

TEES TOPICS

Pie eaters of the surrounding district attended the Social Credit convention and pie social a week ago in the local church. The concert was well reported, but the pie eaters were conspicuous. At least some of them were missing for over a week after the party. A very unique form of Social Credit was tried out when everyone entering the hall was given a token, the number was determined later, and the holder of the corresponding number received a dividend of one pie.

Everyone will be pleased to know that Mrs. Frank Baugh's mother, who has been seriously sick is getting along nicely. Mrs. Baugh left for Calgary to return home, and soon too soon. Frank used to be a good cook himself but he has evidently lost the knack—resulting in loss of weight.

Mr and Mrs. "Bill" Audley returned last Saturday from a very pleasant Pacific coast vacation. While away they experienced their first rain (we hear so much about it) when the hard rain enjoy holiday.

Mr and Mrs. Ed Wootting entertained the Naturalia Bridge club one Saturday night. Seven tables started, but the number was reduced to five after the usual six moves. Mrs. Cunningham was the successful lucky contestants on top of the lamp and Miss Alby and Mr. Knob had the booby prizes. Then the inevitable "eats" when sound bridge he without a hands?

A bunch of young bucks from up the line attended the Wednesday Mon-ay at see "Come With the Wind", and returned Tuesday morning with the same.

Friends walked in and surprised Mr and Mrs. Walk Sun last Monday night in the occasion of their twenty-second wedding anniversary. After the excitement subsided an evening of progressive games was enjoyed by all present.

Cyril Ironside, the U.F.F Provincial Candidate, appears to be the first out to make a real campaign tour. His contact trade strengthened Saturday afternoon at 2.30 p.m. in the new one room school house at Dawson Mon-ay speak at Gadsby Lake and Tuesday night at the Nellie Lake school. Mr. Hankins (Federal candidate) will try and crash the Social Credit stall, when they meet in the Nebraska school. This will be an opportunity to hear another side of the political question. Let us all be interested on; I for at the pie social, we also know who the pie belongs to. Although the past five years, last most of us don't take time to realize the significance.

Legion Clears $16 At Bridge Party

Eleven tables were in progress at the Legion Bridge Party last Friday, and the affair attended report an enjoyable evening.

Prize winners were— Ladies': 1st, Mrs. Gordon Wilson and Mrs. Gordon Wilson and Mrs. Gordon Wilson; 2nd, Mrs. Art Smith and Art Smith; Auction: Gents, Mrs. Bert Smith and Ronald Parish; Consolations, Mrs. R. Whitfield Jr. and Mrs. Bert Smith.

About $16 was cleared, and this amount, together with further benefit dances from the local branch will be forwarded to the Legion headquarters to-wards the Memorial Fund.

Following a luncy, yet snowfall at the first of the week which has covered the ground to a depth of about 3 inches and freeze-up last week, sufficient moisture and many persons have suffered pained falls.

(—)

A social-dance was enjoyed last Saturday about 25½ miles south of town, when a car driven by John Bell of Edmonton collided with a truck loaded with coal driven by Art Lismark, as it was coming. The feeder and pilot shield of the car were considerably damaged but the occupants escaped with only a few scratches. The damage to the truck was slight. Slippery conditions of the roads made driving precarious.

Clayton Walker left on Monday for Vancouver after having spent two months visiting with his parents, Mr. and Mrs. C. Walker.

The Alix Village Council, holding its first meeting appointed J. R. Mackie to the office of Mayor for the 20th consecutive year.

Robert Whitfield, reelected to the council by acclamation, was duly sworn in.

Other appointments for 1932 were as follows:

Assessor—R. L. Sanderson ($35.00 per month)

Auditor—Messrs. Fenwick, Hamilton and Lee—Mrs. R. Peers ($2.50 per month)

Auditor—R. W. Fenwick ($10.00)

M.D.O.—Chas. Woodger ($20.00)

Police — Chas. Woodger ($20.00 per month).

Secretary Treasurer—Mr. Wenzel ($175.00).

The following bills were ordered to be paid:

Calgary Power $94.00

Chas. Woodger 20.00

R. E. Todd (used to relief report) 23.35

Methodist Allowance 7.50

Wong and Co. (Blazer, Brown and Lunch relief) 22.00

Land Titles Office 1.00

A bill from Page's Pharmacy was tabled until the next meeting until the council determines whether goods purchased by Mrs. Brown were ordered by Mr. Warren.

The assessment re. the Pas family was ordered filed.

Caveats on property two years in tax arrears will be filed before the end of March, and the secretary was instructed to first write owners concerned regarding the council's intentions.

The Secretary was instructed to write J. Pidherney re assessment. April 1, his house rent will be increased to $5.00 per month.

A letter from the Municipal Inspector Brunch, Edmonton, disclosed responsibility of the department of Municipal Affairs re Alix Cemetery. Mill-age-assessor. The secretary was instructed to write for further information re property, in order to protect the Village.

A communication from the provincial veterinarian advised that a fully qualified, registered veterinarian cannot be employed to administer the tuberculin test of cows supplying the Village with milk.

A letter from D. A. Buchanan, of Lethbridge, Provincial Chairman of the Soldiers Army National War Aid and Home Service Campaign, requesting the council to form a committee to aid in the conduct of the campaign, in which Alberta is asked to raise a quota of $75,000.00. After thorough discussion, the secretary was instructed to write Mr. Buchanan, saying that although the council was in sympathy with the matter, it was not deemed advisable to embark on a campaign at the present time, and it was felt the committee would be unable to accomplish anything if postponed for a few months.

Councillor Todd was instructed to attend to the matter of filling a position on the east in front of Bruce Slagle's residence.

HAYNES NEWS

Born—In Red Deer on February 14, to Mr. and Mrs. M. Lawson, a daughter.

On Friday evening, March 11th, a play entitled "Worn and Rolled," will be brought to Haynes by Miss E. McKinnon and players of the Cumberland district. A dance will follow the play. As half of the proceeds are for the Haynes branch of the W.M.S. the ladies hope there will be a large attendance. Ladies of the community are asked to bring lunch. Come and support the Red Cross.

Mrs. J. Davidson has been on the sick list recently.

(—)

A special Easter service will be held in the United Church on March 27, at 2.30 p.m. with Rev. L. Thompson officiating.

Mr. and Mrs. Jack Paull are visiting at the home of the former's parents.

Mr. Albert Brain returned home from the Red Deer hospital last week.

Hunted Breakfast bacon cost week for Chicago, to take a course in chiropractic.

Cars Collide; Mirror Road

A serious auto accident occurred Sunday on the Mirror road about one mile east of Alix when the car driven by Arthur Smith of Alix collided head-on with the car driven by Mr. Hayley, Mirror butcher The cars met on a steep rise in the road, and the collision occurred as they both hit the top.

Accompanying Mr Hayley was Mrs. S. G. Watt, who was on her way to Alix to conduct Anglican services. Both Mirror men were severely shaken up, and Rev Watt was also hurt about the head, though this did not prevent him from conducting his service as scheduled. Accompanying Mr. Smith were Mrs. Pidherney and two children, Mrs. Ted Ross and Mrs. Thomas Smith. All received bruises or minor head injuries about the face. Pidherney required medical attention for injuries sustained when the car overturned on the one door occasion.

The Hayley car is a wreck, but the car of Smith's car, looks remodeled.

Joe Disease Writes From Aldershot

The following article, taken from the Lindsay Post, will be of interest to friends in Alix of Joe Disease, who enlisted all last fall in the Lindsay, Ont. army and now overseas with the first Canadian Division:

The recent letters to his wife here, Connor Joe Disease tells some interesting tales. He is billeted at Aldershot and says that all branches of the fighting forces are treated there like royalty. The barracks are warm even for nearly thirty cubes, and one can get hot cubic every day. His pay-rate is a shilling a day and one recently they permit a reply for eleven shillings, one month or about $40 per week per month.

He mentioned seeing Prudie Hall, who is a nurse in the army and a good friend on her own. Apparently Prudie's duties are not confined to a limbless without hands; with the rank to get a week C. B. (confined to barracks).

Joe said a pal learned to make a tidy bit of money by selling a cat scanned to see No. 10 Downing Street, Buckingham Palace and have a ride on one of the "tube trains."

The boy's main source of amusement seems to be going to the movies shows to the district, and their members. Tobacco, Joe says, is a tuppenny price — about 16½ per pound! Canadian cigarettes, of course, are regarded locked for from abroad.

Joe letter gave quite an interesting account of a military funeral held for one of the Lindsay Tank, R.C., who accidentally killed with a tanker mate. Joe's regiment attended and the funeral cort marched through the town were six parade for 264 bands in the funeral march. Buckingham Palace, the Imperial and Regiment Band played at the funeral. Perhaps the best thing in the funeral, Joe thinks, Duchess Gloucester.

Joe was very much impressed with the King and Queen. He says the size of the ship he was on and the number of ships in the convoy. Apparently he was on a ship with a number of Canadian troops, as he mentions several looking the boat over! (This might seem incredible to most of us—but it is sure the truth isn't so notable). Another thing Joe mentioned was the quantity and quality of food on board ship—both were excellent. Cigarettes were also supplied free. Cigarettes are the best gift the boys did not have to pay any government tax."

On Thursday of last week, the sons and the Gay 40 to 60 Bridge Club was at the home of Mrs. Peers with a jolly afternoon of progressive bridge. First prize was won by Mrs. Lismark. So and the consolation by Mrs. Ray Peers. The next meeting will be held at the home of Mrs. Edgar on March 10th at 2 p.m. Mrs. Edgar will be the hostess.

JOHN A. STRACHAN,
Editor and Publisher

Alix citizens are deeply saddened to learn of the death of Mr. J. R. Mackie, who on Monday was appointed by his fellow constituents to represent them in the provincial legislature.

ALIX MAYOR FOR 19 YEARS

Mr. Mackie was elected Mayor of the Village of Alix for the first time in 1930, and has served continuously since then, with the exception of one year. For twenty years (and was unfortunate) he served as councillor for several years before (as mentioned by past of respect) Mr. Mackie has given unstintingly of his time and energy to the welfare of his home town. Then the village officers have been to especially benefit by his advice and able financial position at the present time; and the modern pump house and tower, the waterside of Alix, owe much to Mr. Mackie. Over the years he has established a reputation for getting things done without fuss and ostentation—and the village shows it.

If ever Mr. Mackie doubts that his efforts have been fully appreciated, a fact that should dispel all such thoughts is the realization that Alix would not have been content to elect a mayor to him, year after year, on highest civic honor, but he not been the right man for the job.

The Department of Agriculture is again recommending that horse racetrack will be well attended to take all possible precautions against encephalomyelitis, and have obtained an adequate supply of "shots" required.

The outbreak of the disease last year was light, not at all comparable with the epidemic of 1938, which might lead to a notion of false security, but this it is believed, was due to vigorous measures to eliminate mosquitoes and other factors not fully explained. There is a possibility that the disease will be more virulent this Spring, if steps are not taken to guard against it.

Through the efforts of the department, the vaccine is available at a reasonable rate, and rather than stand the chance of losing valuable animals, horse-owners should avail themselves of the facilities provided for vaccination. It is only "horse sense."—and cheap insurance.

WHAT OTHERS SAY —

Who are the twenty leading citizens of Edmonton? I'll start the list with three names—Hon. Wm. Aberhart as premier of the province, Mayor J. Fry W. Fry as chief conciliator and Mr. John Downe as president of the Board of Trade. Three qualify by virtue of their offices. You can fill in the remainder for yourself. I'm glad my name won't be among them for there will be the man who will be held responsible should the Nazis win the war. They would be send against a wall and shot should any citizen make a hostile move against the German military.

We're so far away from events in Europe, we must translate happenings there into local events to grasp a sense of their reality. I'm only applying to Edmonton the procedure adopted by the Nazi leaders in Poland — helped by a neutral country of happenings in Lodz, Poland's second largest city.—J. S. Cooper, in the Edmonton Spotlight.

Every man is entitled to keep a tongued dog. It may be nothing to be proud of, but it's his if he wants to hold on to it.

CANADIANA

REGINA — Ten cases of Saskatchewan potato dusts will be shipped during the coming year, it was announced on Thursday by Premier Douglas' attorney-general, Hon. Clarence Fines, in the non-confidence Legislature. The cost will be borne by Saskatchewan, he said, as the local costs. Mr. Patterson explained that practically all potatoes experienced recent temperature fluctuations for the coming year indicates growers purchase of $4,500,000.

WINNIPEG — Prime Minister King planned a complete program during the two previous appearances in the city, Mayor Garbutt announced. "The former as I sat at a table with the premier and his staff, he said: "I only stay one at you a you would your the responsibility which is mine?" Mr. King asked his assistants to remember some one had to represent Canada at the international conferences where the vote is over. "I think," he said, "the power of his purpose and world as to what and how assistance power and good will secure by the many of Canada."

KAMAKEA FALLS, Ont. — Illness or discouraging settlement was given as her being by Conservative Leader G. J. Smith for his resignation as his constituency. I am resigned, he said, lowest treatment of men who were living underpaid and then receiving them in the building of storerooms and from on preparation. He assured Energy was taken of all the people. An audience discharged the government to raise an army of 20,000 without conscription.

YORKTON — Predictions that Canadian farmers would be given an income payment of from $1 to $2 cents a bushel shortly arose the re-election of the Liberal administration was made by Hon. J. G. Gardiner, federal minister of agriculture. He defended the 70-cent wheat pay and pledged the people of the constituency to continue their loyalty to Canada.

VANCOUVER — Alberta is rapidly assuming to prosperity was the opinion set from J. L. Dowers, Lieutenant-Governor of Alberta on his arrival for a holiday here. "The fear that we were shut to double our quota in the Red Cross campaign down to what extent Albertans have recovered their spending power. The sum of $450,000 raised is an actually the largest donation per capita, of any province in Canada."

OTTAWA — Average cash wages of $205 per year for male farm help is paid last year are the highest since 1918, it was revealed by the Dominion Bureau of Statistics last week. Value of board furnished to the helper is put at $170 per year. The 1948 average of wages and board was $350.

Felix Scrash, who has been up and coming actor his fifteen, is again holding through a full Monday evening at the crooning between Page's Pharmacy and Verpoorr's Grocery. It was in fact thought that his big top was broken, but though this bits since been found not to be the case, his heavies are serious enough to keep him in bed for a time. Mr Verpoorr suffered a nasty fall, when he slipped off the counter to flee some 102 BU Said on the ex-Second Tuesday morning. There are few are of very smooth entrance and steps to the street making them treacherous even in ordinary wet weather. It would be a good idea, to have them fixed before somebody breaks a neck.

The manitoba, as we go to press, is exceedingly cold, and snow fast drop-pouring. Travel over country roads is difficult as the snow melts still leaving them bare and muddy.

The World of Wheat
By H. G. L. STRANGE

The recurring debate that the net farm of the people of any one nations could be enhanced by that country ceasing to supply its to some more, by curtailing foreign imports, is quite fallacious.

The southern mover gripped the minds of the ancients.

The most evidence about the high importance in which international trade was held by the ancients, is established in a recent biography—written by the eminent historian Mme. Lucie Desbonnedemer, the great Charlemont King, who lived some 2,000 years before Lucie Desbonnedemer are are told, tooled among, ugly to bite, about a great thing into Babylon as 5-pounds of India, Persia and Arabia, than a of gold, precious stones, tan, sandalwood, spices and cochineal dyewhich the ladies of Babylon so loved all to be exchanged for wheat, ox, oxen, pottery, millions, lives, horses, purple cloths, the products of Chaldea.

"Those exchanges", said the great Desbonnedemer, "would make Babylon a city of merchants, and on the other hand would make the merchants to enrich the people of Chaldean. For encouraging this foreign trade King Nebuchadnezzar established in Babylon a great market at which the people of the world could be calling and, and where the consumers and producers of the world could meet.

Fellowship features have tended to raise price — Australia, recently sold 4,000 tons of wheat to Hindustan, and then goes off the gold standard—Bronson hall estimates that Western section of Europe have lost 20 per cent of these wheat acreage from the severe winter—Australia's surplus and 60 mil-

---

The pessimist was sufferer from insomnia.

"Every home to my body aches, he complained.

"You ought to be glad you are not a beering," said the optimist

---

"What's the difference between learning to play golf and learning to drive a car?"

"When you're learning to play golf you don't hit anything.

He: "Do you think this would be a propitious time to ask your father for your hand?"

She "I think it would—I've just asked him for a new automobile."

"How can you afford to take so many girls to such expensive restaurants?"

"Easy! Just before we go in I ask each girl if she hasn't been putting on weight."

When a man wants his hands to feel he reaches around and yanks it out of his pocket. When a girl wants her, she rises, bakes herself as if putting it on the floor

---

"You couldn't ride around in it nicely once like that if you paid your honest debts."

"That's me. I'm glad you look at it the way I do."

Heroine (frantically): "Is there no mercy?"

Voice from the Audience: "Sure; I paid two bits to see this show."

HINTS FOR FARMERS ...

USEFUL INFORMATION SUPPLIED BY DOMINION AND PROVINCIAL FARM SERVICES

HERBICIDE TASTE

A heifer is being issued by the Field Crops Branch warning farmers of the danger of Sodium Talet. This compound is formed by when chlorylose, the strong, penetrating odour from sweet clover. Wheat affected in this way retains the odour even after it is milled and baked into bread.

Melilot Talet contaminates a very serious factor in wheat production because British millers have already complained about it in some shipments. Wheat treated with sweet clover is "rejected" and those producers of infested wheat suffered a loss of 11 cents per bushel last year.

Melilot Talet can be prevented by keeping wheat fields absolutely free of sweet clover. Wheat should never be used as a nurse crop for sweet clover and every effort should be made to obtain volunteer plants of sweet clover harvested from the wheat crop.

In the event that a crop of wheat contains sweet clover plants, the grain should not be cut and threshed until the sweet clover is perfectly dry and unless no condition should it be threshed when sweet clover plants are wet. Grain containing sweet clover should be cleaned immediately after threshing and should not be mixed with other grain.

Further information on Melilot Talet may be obtained by writing direct to the Field Crops Branch at Edmonton.

WOOD ASHES AS A SOURCE OF POTASH

Since the amounts of potash that Lethbridge, producing four purposes is very small, it is desirable to conserve and use to the best advantage such local potash-bearing materials as we at ashes, states H. B. Hammond, Division of Chemistry, Science Service, Dominion Department of Agriculture.

The pure soda ash wood ashes contains as much as 11 per cent of potash, but in practice the high figure is never attained, owing to [illegible] [illegible] [illegible]

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

The W I met on Tuesday at the home of Mrs Butchart. During the afternoon Mrs. Andrews gave a reading on Canadianisms. Plans are being made to carry on the sewing work in the spring.

The Sunset Branch of the Alix Junior Red Cross are holding a sale of work, and tea, in the U.F.O. Hall on Saturday, March 20. Proceeds will go to the Red Cross hospital.

Les Johnson has moved his business office and Massey Harris agency from the Lyle building on Railway avenue to the Woodgate hardware& shop. The move took place on March 1st.

The first of March came in like a lamb, the weather clerk possibly has say decided that with a double barrel of election going on things were not any enough without his horning in. He will start to unwind the end of the month when there will be less competition and confusion.

Mrs. George Smith returned from Edmonton last week, and it is reported she has undergone an operation recently to return from the hospital this week end. The operation for "archaic sycosis" was highly successful.

Curling and skating are over for the time being with the ice deeply covered with water - slows further cold weather is forthcoming, this will at least provide a solution to the wrong question of holding a spell

A financial statement of the Forresters Dance held February 2 in aid of the Red Cross shows that the Society will benefit to the extent of $4.60, the net proceeds of the dance

Mrs. T Semple spent last week end in Calgary and is now visiting her daughter Mrs Boyd Chatfield in Innisfail

The April meeting of the U.F.W.A will take the form of a handicraft demonstration. Local experts (or otherwise) will be asked to demonstrate the following lines of handicraft, rug-making, quilting, knitting, needle-point, etc. The public is cordially invited to attend. The demonstration will be held on Saturday, April 6, and tea will be served

The travellers in the railway carriage were discussing railway matters. "I remember," said one, "that the single fare for the double journey is a very good investment."

"It certainly is," added another, because you get a return for your money."

"Gone with the Wind," was the attraction which drew Mr and Mrs Johnny Hemsell, Mrs Art Bole, Mrs Ted Bolin, Mrs O Wennels, Mrs I Anderson and Miss P Pape to Edmonton to attend the early morning showing last Friday

FOR SALE — High grade Yearling Heifer from McDermid Stock Farm. Apply P M Pape, financial secretary 4 the Red Cross

The Legion Hall was packed to the doors Tuesday afternoon, when for merry attended the free show sponsored by Les Johnson, Alix Massey-Harris agent

In all there were no different pictures shown, including Bozo the Clown, which gave a large variety of good shows

Prizes were given to lucky ticket holders as follows:

1st—Ralph Templer, $30.00 cre'n. note on new tractor

2nd Cecil Walker $15.00 credit note on new thresher

3rd A W Papworth — $15.00 credit note on One Way Disc

4th Ed Bolin — $10 cre'n note on Plow

5th Walter Lynch $5.00 credit note on Mower

BUTTERFLY EVILS IN CUTWORM PESTS

Many people think of cutworms as one particular species of insect. Actually they are the caterpillar stage of a number of different species of moths which have more or less similar feeding habits. Some species pass the winter as nearly full-grown caterpillars. These become active very early in the spring, feed for a short time and then change to the pupa state and later develop as moths in the Spring months. Others pass the winter as very small caterpillars, become active when feeding plants are appearing in the ground in the spring, feed on such plants over a considerable period and cause severe losses before they reach their full growth. Still others hatch from eggs in the spring and at such late seeding or transplanted plants

These features need to be kept in mind in connection with measures for the protection of plants from damage by cutworms. Measures intended for the protection of plants should be begun early and be continued until the crop of June is removed against losses. Special cultural methods have been devised to combat certain species. As it is desirable to disseminate information at the earliest opportunity, preferably before flowering, to the best methods to use in the protection of plants growers may write to the Division of Entomology, Science Service, Canada Department of Agriculture, Ottawa for the Insecticides Entomological Laboratory in the province concerned.

ENEMIES OF BEES

Mice, skunks, and wax moths often cause damage to bees and bee hives, in the winter time, mice will enter the hives, destroy the combs, and build some alongside the winter clusters. The disturbance to the bees generally results in loss to the colonies. Skunks are troublesome in many parts of the country, and in the winter time do much damage by destroying the tar paper in which the hives are packed. At other times skunks scratch in front of a hive to disturb the bees. When the bees rush out, they become entangled in the skunk's fur and are eaten. Three kinds of moths, the Mediterranean flour moth, the lesser wax moth and the greater wax moths also cause damage to honey combs. The means of preventing damage by these pests is described in the Dominion Department of Agriculture circular "Care of Bees and Equipment" by C. H. Thomson, Bee Division, Dominion Experimental Farms Service. The circular may be obtained free on application to the Publicity and Extension Division, Dominion Dept. of Agriculture at Ottawa.

MAN'S LIVING CONDITIONS IMPROVED BY BOTANY

"Man's food, drink, and clothing which enable him to live on this material earth, and form the basis of his material welfare, come directly, or indirectly from plants. The sciences which are grouped under the name of Botany are improving man's living conditions in a thousand ways. They classify the world's plant life, selecting therefrom the forms which are useful for man's needs, improving the useful sorts, re-making the old ones to better uses, and eliminating the harmful kinds. They search the four corners of the earth for beneficial species to provide new and improved crops, spices, drugs, fibre plants, cereals and forage plants, fruits and vegetables, medicinal plants and ornamental trees, shrubs and flowering plants without number; they explain and gradually eliminate many of the most destructive diseases of man and his domestic animals, and open for us a knowledge of the teeming microlife in the soil and air active in preparing plant food and in aiding nutrition. In all such scientific achievements, the knowledge acquired with each discovery brings a promise of still better things."—Dr. J. H. Berkins, Director, Science Service, Dominion Department of Agriculture, in his presidential address to the Royal Society of Canada on "Scientific Research, the Key to Progress in Agriculture."

SHOULD PREPARE NOW FOR POST WAR ERA

That Canada's after-war problems will be as great if not greater than her war problems, and that the time to take stock and make plans for a peace era is now, was the statement made by Col. J. K. Cornwall, well known pre-war economist, who believes that this Canada's northland has the solution of Canada's future

"After listening to the speeches of Prime Minister Neville Chamberlain and other leaders it becomes increasingly clear that the end of the British Empire must pay when the battle for freedom has been won and the staggering burden of debt and the enormous army or navy will have to be found for paying that debt," said Col. Cornwall.

"The northern part of Canada is the only part of our country that we can properly call virgin soil, where opportunities are so be found that will positively be given its special attention as refuge to our future. It is in no empire of vast potential wealth that can be developed to an extent that will enable Canada to take care of our ever increasing public liability.

"The north country is by far the best section of Canada to place new people. It has high clear land, it is an ideal climate, rich in mineral wealth and water power and a rich soil field. The Peace River country will be in a short time, when we get our road system adapted to feeding the north. One rich agricultural land is the natural clay belt which lies more or less undeveloped, highly mineralized extent of mineral rock in the known world. This mineral country will always have to be fed from the south. This is also true to a lesser extent, of Northern B.C., the Yukon and Alaska, they also will have to be fed from the south.

"We have oil and water power in the north. We have the largest deposit of limestone used in North America on the east slope of the rockies, and one of the outstanding water power sites in the world on the North Saskatchewan at Hudson's Hope. It is all there waiting for development.

"Our vast natural resources have been made easy of access, potentially all served by railroads, a trunk line roads to start and serve, not a county, but an empire, which it is, potentially, one of the richest empires found undeveloped by nature in the whole British Commonwealth of Nations. Development, colonization. It seems to me it is an opportune time to undertake six systematic development, so that when the world struggle is over—whatever that may be—Canada will be prepared to take care, not only of our own people, but also the pick of the Old World.

"Almost every industry and unit owners in Canada is familiar with what happened after the last war, when men returned home to find their jobs gone and no place left for them. This must not happen again. In fact, as many of honest conditions, we cannot afford to let it happen. It is our duty to shape that we do not intend to let it happen —tell the world we don't, and be prepared to prove by taking action, which to encourage not only our fighting forces but the world at large.

"Canada has an opportunity to attract to help, so far as she can, to bring home order to what is now chaos. That is where we have to make our business to be prepared, to look, to know after our own

"It is not a question of much money. It is effort backed up by faith that's required—that's all I ever used. I have been forty-two years at it and have a record of achievement that I can show to a reasonably creditable one. I not told as how, or what I am over the past years. I hope to continue for some good worthy time to come

"The present economic lords dream is where the invasion of forward-looking Canadians will have to step in and

Street its development, so that we can at all set to try and take an interest, and not an academic bee a proud of me, and help to bring about developments that are necessary for after the war, our people, and Canada's future."

Landlord (to prospective tenant) — You know we keep a very quiet and orderly here. Do you have any children?"

"A piano, radio, or phonograph?"

"No."

"Do you play any musical instrument? Do you have a dog, cat or bird?"

"No. But my Lumbala pan constantly feeds at noon."

News of the Week . . .

THEY WILL ARREST NO MORE CHRISTIAN CHILDREN, SAYS RED

LONDON — Britain patched up no malignant quarrel with Italy over detentions of Italian coal ships during a week-end of diplomatic suspense in the European capitals Britain traded 13 Italian coal carriers with three Germans of German coal for removed trade impediments with Rome. In return Italy agreed to import no more fuel than coal by sea.

U. S. RELEASES CHRISTIANSEN FLYERS

WASHINGTON—United States officials decided on Tuesday to release two Canadian army aviators who made a forced landing on a mid-July plane Saturday at Akron-ish bay in New York state.

Both the aviators and the plane will be permitted to leave the U.S. and return to Canada.

At the state department it was said an investigation had disclosed that the plane was forced to land on U.S. territory through mistake and as a result of distress, and that it was not on any hostile mission or engaged in any hostile activity.

LIE FINDS HERSELF THE SOLE TENANT

OTTAWA — Royal Canadian Air Force recruiting service expect, to obtain within the next six months all the 2,169 applicants whose names are on file at headquarters here.

90% OF POPULATION TO WORLD AGE BY 1940

Approximately 55 per cent of the estimated world population of 2,125,530,000 are to be underfed or under-clothed.

Chinese engaged in hostilities are the British empire, French empire, Germany, the U.S.S.R., Finland, Poland, China and the Japanese empire—a total population of 1,352,940,000.

NEW YORK — Britains new 35,000 ton fleet Queen Elizabeth, completing one of the most luxury voyages in maritime history, after running the U-boat gauntlet, dropped anchor last Thurs day in the mouth of New York harbor with no visible guns on deck but protected by a mysterious new anti-aircraft shield.

Observers were at a loss to understand how the ship operated, when it surrounded the ship high above the water—with an apparent drop-not into the water for a sweep effect.

Naval experts explained the new protective device against magnetic mines as follows:

The shield, although high above the water, were designed to exert an electrical force which would nullify the attraction of the steel hull to the mines, so that they would not explode.

What Our Neighbors Are Doing

LACOMBE — Plans for providing smallwrought children in grades 1 to 6 of Lacombe district with a glass of milk a day was discussed by the Lions Club last week. It is expected to get the plan in effect Monday and sessions until the end of April ...With only two weeks to go before the fifteenth annual Lacombe Farmers' Horse Sale swings into action, over 200 horses entered for sale. Many additions to horses will provide facilities for stabling 1000 horses ... There is a possibility that the Lacombe Post Office will be moved from its present site to the old Union Bank Building—Lacombe Globe.

RED DEER — The Public School Board, Monday, passed the first reading of a by-law to authorize the borrowing of $40,000 by debenture for the building of a new school unit ... 200 head of horses is the number expected to be listed before the Red Deer Horse Sale commences on March 16 — Red Deer Advocate.

• • • •

BASHAW — Bashaw International venture into provincial playdowns was scrapped short other they lost to Trochu, 7-4 on home ice and 6-2 on the return game at Trochu ... Opening of the new Whitney theatre has been postponed until Thursday. — Bashaw Star.

FINLAND—RUSSIA SIGN PEACE TREATY

MOSCOW— Soviet Russia Wednesday announced signing of a peace treaty which ceases at the speak of 30, months of invasion, Finland's defence bastions on Baltic and Arctic seas and makes part of the vital territory of the U.S.S.R., the whole Karelian isthmus where uncounted Russian and Finnish dead lie beneath the trampled snows. Hostilities ended at 11.00 a.m. (4.00 a.m. Finnish) and the Finnish government was allowed three days to ratify the treaty. Finland obtains peace, a yearly rental of about $1,000,000 in return for a 30-year lease on her Hanko "clubshare" at the mouth of the Gulf of Finland and evacuation of the Petsamo Arctic district by Soviet troops. Peace settlement rubs them of the Mannerheim defensive.

COPENHAGEN — Foreign military observers estimated the Finnish-Russian war cost at least 300,000 casualties, half of them dead. Losses were estimated as follows: Russia—Approximately 240,000 dead and 250,000 wounded. Finland—30,000 dead and 35,000 wounded.

PRINCES OF INDIA RELEASES LOYALTY

NEW DELHI— Indian Princes in Princes at its opening session Monday unanimously passed a resolution of loyalty to the crown and the suprem pr ment as "their heroic struggle to uphold the cause of justice and maintain the sanctity of treaties and covenants."

ALIMONY TO STOP IF HUSBAND DIES

CALGARY—Ruling on the first action of its kind given to go to trial in a Canadian court, Mr Justice Howson decided that a wife who divorces wife is not entitled to alimony after the death of her former husband.

MIRROR NEWS

Rev. S. G. West, Mrs. West and family left on Tuesday for the real denes in the Anglican rectory.

Due on recent weather conditions the roads are treacherous and traffic has greatly diminished.

On March 8, Mr J. Clarke entertained several ladies at bridge on the occasion of Mrs. A. Hay's birthday Mrs. Hay was presented with a blanket cup and saucer. Honors at cards were won by Mrs. A. Hay and Mrs W. Walker

On Monday evening, Mr. R. E. Chowen, Conservative candidate for the Lacombe Riding, spoke here. About 25 were present. Mr. H. Chapman acted as chairman.

On Friday afternoon, March 8, a tea was held at the home of J. F. Flewwelling in honor of Mr. and Mrs Ross Flewwelling who were recently married. The couple were presented with a case of 1407 Rogers Bros. silverware.

TEES TOPICS

Remodelling of the butcher shop has been completed and we now have at hand a top-loading cooler system for the old refrigerator. Lyrl Calabrese, the manager ignores that many grunts and groans and he will be next summer as he will have no ice to lift.

Politicism in the last Alberta government are always throwing up the good work of the C.C.F. in this province. They are so good that one young lady thinks that they have had to lay off from work to regain his health, but then vibration of his truck on the above-mentioned good roads.

'Chuck' Parsons stood at the door with a shoehorn and Mrs. Parsons placed forty-two enthusiastic bridge players last Saturday evening. Everything went fine until after supper, then no one could move and it was necessary to crank the arrival of some of the boys from the rising party put on by Harry Clough. After digging around in the snow one of the boys found the car and with a team hail one or two of us are giving the rest a chance to get into their clothes for the chill night. Mrs. Gordon Weatherill and Allen Wallis had the ladder for everybody to go by, and Miss Wilkinson Ferguson and Bill Weatherill were found on the top rung as the final table was played.

Times must be allright, at least 9 out of ever ours are in problem that that is a sign of the times. Until next issue's will soon, bye, to make it a week.

VOLUME 38, NUMBER 8 ALIX, ALBERTA, FRIDAY, MARCH 15, 1940 SUBSCRIPTION, $2.00 YEARLY

C.C.F. Meeting At Nebraska

(By our own Correspondent)

C.C.F. speakers addressed a crowded school house Tuesday night on the Nebraska district. Wm. Nau acted as chairman. In introducing the speakers and the subject he did not mince words, but struck at the root.

The first speaker, an import from Tees, did not touch the platform, but parrys and the fallacies of the Aberhart administration. He tried to score both provincial and federal fields briefly, touching on co-operative procedure and liberty's decentralization, on government control of munitions vs private manufacture, the inability of the Liberal party to cope with unemployment during the past five years and facts about New Zealand, a British dominion that has sensibly tackled a human problem.

Cyril Knowles followed with a good second talk on the C.C.F. Provincial platform. He brought out many points to prove that the C.C.F. know before they go into power what pertains to the people, that a party is able to achieve and what is impossible, under our finance "B.N.A."

Robert Hankins, C.C.F. federal candidate then took the floor and covered the federal field briefly on many points, and with emphasis on those of the present. His main object of interest was the C.C.F. plan to socialize public property for public needs. This would take the profits out of private hands and from those who produce the goods for public, returning it to the rightful owners, the people, who would manage it through their government, which would insure a higher standard of living throughout Canada. He declared that there would be no need of governments crucifixing to "patriotic" munition makers to prosperity, as the C.C.F.

HOW TO MAKE YOUR BALLOT

Before our next issue appears, electors of the province will have decided upon and elected those government for the next several hour or five years, and unolling over the possibilities of the various federal candidates. It will perhaps be timely now, to point out the difference in marking ballots in the provincial and federal elections:

In the provincial election on March 26, the provincial representatives form of balloting will be used and twelve of mark there ballot with an figures 1 2 3 4, more or less according to the number of candidates there. Therefore, providing there is the same number of candidates they seek to leave. The future I marked after a cross's dates's name gives the candidate a first choice vote, the figure 2 a second choice vote and so on. However, if the voter has "plumping" tendencies, there is no law against giving one candidate a first choice vote and letting it go at that.

In the federal election the good old fashioned method of voting is used—the figure "X" is marked after the name of the candidate which the voter prefers, and that is all. Any further marks upon the ballot will spoil it.

Every time a provincial election rolls around, the need for re-educating the voters in the proportional representation system of balloting arises. The system is not fully understood by the press majority, ourselves included. Any number of explanations are published but we have yet to see one that is wholly satisfactory and clear. There is no doubt that the system is a good one, inasmuch as a ballot which favors political candidates is not born even if the voter's first choice is put out of the counting. In this case, his second choice vote counts, and so on until the ballot is exhausted. The system provides a true picture of the voter's opinion of all candidates.

There are still those, however, who are of the opinion that a candidate who is definitely not desirable should be removed altogether.

The following clipping, which was handed us by a reader may be of some help to our readers:

"We wish to voice the plea that every reader of this paper will be a conscientious in the cause of getting voters to use their second choice votes. The man who takes the trouble to mark or drive over had roads to the poll, and then fails to use his second choice, may find himself in the position that he'd have been better off to have remained home. Suppose there are three candidates in the field, "A" who gets 1500 Number 1 votes, "B" with 1000 Number 1 votes, and "C" with 2501 Number 1 votes. Now our friends has plugged through the snow or mud five miles to vote Number 1 for "C". He still his duty to that extent. But "C" having the lowest number of votes is dropped and his Number 2 votes are counted and distributed in the remaining candidates in accordance with the wishes of the voters. But where are the returning officer comes to our friend's ballot he finds that he has "plumped" for "C", and therefore his ballot is exhausted and has no bearing on the result of the election. In that case our friend would just have well have stayed home. Now surely when a voter has gone to the polls to vote number 1 for our candidate he can take the trouble to say (by the way he marks his ballot): "My first choice is "C", but if he is eliminated because he has the lowest number of first choice votes, and I then have to choose between "A" and "B". I will vote for "A".

The Farmers Will "Pay the Shot"

The ABERHART GOVERNMENT IS COLLECTING AND SPENDING TWENTY-FIVE MILLIONS a year — the most EXTRAVAGANT ADMINISTRATION this Province ever had.

THE CUT IN BOND INTEREST LITTLE BENEFITS ANY CITIZEN because the Government is spending just that much more. It has shown no intention to retrenchment.

AS AGRICULTURE is the main source of new wealth, it must bear more of the tax burden. Farmers can be taxed in so many ways that often they do not realize they are paying more taxes.

But every farmer knows that the Aberhart Government passed a law TAXING ALL FARM PRODUCTION 2 PER CENT!

The Courts threw out this law, BUT IT MAY WELL BE INTRODUCED IN A NEW AND MORE EFFECTIVE FORM!

You can not rely on PROMISES or DENIALS from the Aberhart Government after 4½ years — you know that. "They took $5000 each for seven days' work."

HINTS FOR FARMERS ...

USEFUL INFORMATION SUPPLIED BY DOMINION AND PROVINCIAL FARM SERVICES

WARBLE FLY MENACE— HOW TO CONTROL IT

Warble flies attack beef and dairy cattle in every part of Canada where hot work is entered. The damage they do is not immediately realized but it takes millions of dollars annually out of the farmers' pockets through the spoiling of hides by the holes made by the grubs, through injury to cattle from fright and worry when the flies are hovering around, and through consequent reduction in milk production and wastage of beef. In cattle which warble fly damage has been considerably reduced in some districts by systematic control measures, including timely application of dairies washes to the backs of the animals.

On sunny days in spring and summer, warble flies buy their eggs, at the rate of 1,000 to 1,500 each, on the hair and lower parts of the cattle. The heat of the flies is sufficient to cause passive among the animals so that they run wildly above the fields. The small grubs hatch in a few days from the eggs thrown to seven days, penetrate the skin and migrate through the tissues of the animal, in some cases congregating in numbers in the region of the gullet and spinal canal. There during the summer until late winter when they commence a second migration and come to rest under the skin on the back which they perforate to make a breathing hole. At about two months they squeeze their way through these holes and drop to the ground in the form of hard, black, seed-like object about three-quarters of an inch long from which a new generation of flies emerge in from one to two months to pass at once and repeat the same life process. The total period of an egg to egg requires about a year, and at least some months are passed as a grub in the bodies of the cattle.

When the grubs are under the skin of the backs of the animals is the time when the farmers to act. This period may be from January to June if the grubs are destroyed before they leave the animals, as warble flies will emerge for dead grubs prove a no cure. Some of the treatments of a standardized dairies wash have been found satisfactory for this purpose. The first application should be made in early spring when the grub swelling first becomes evident. This would be about the third week in March in the Prairie Provinces. The second and third applications should be made at 30-day intervals after the first and the last application not later than the middle of June. Where there is a large number of animals to be treated, it is usually found convenient to divide the herd into two lots, treating one lot at the first application and the other lot at the second application. Where there is a small number of animals to be treated, they may be handled conveniently by tying them in a stall and applying the wash with a sponge or cloth. Where there is a large number of animals to be treated, a spray pump is necessary. Full directions for the use of the wash in the case may be obtained from the Dominion Department of Agriculture, Ottawa, or from the provincial departments of agriculture or agricultural colleges, or the nearest Dominion Experimental Farm.

SAVE YOUNG PLANTS FROM CUTWORM ATTACK

Plants grown in a greenhouse, hot bed or cold frame, or even outdoors, tender, sweet, very attractive food for cutworms when moved to a garden or to the open ground. Cutworms are the carefully prepared soil with plenty of vegetable matter. Other plants exhibit might afford food for many cutworms. Moreover, they are very often planted out in the early part of the season when cutworms are most active. Cutworms are usually present in fields in ten boundaries at transplanting time. Every transplanted plant should be protected during the first night or two succeeding nights.

Paper collars have been found successful in saving the plants set out in the garden. If the material for making the collars is not available, a measure of protection may be given by carefully forcing about the stem some common wrapping paper in such a way that it extends an inch below the ground level and two inches above or a can with both ends removed will form a good barrier for the protection of a transplanted plant.

Further information may be obtained from the Dominion Entomological Division, Dominion Department of Agriculture.

MOTHER SIPTON'S PROPHECY

Because of the uncanny manner in which the prophecies of Mother Shipton have been coming to pass during recent years, considerable attention has been attracted to this eccentric creature of four centuries ago. Even those who have in the past scoffed at the wierd predictions of this quaint "witch" are now stirred by curiosity to wonder what will come next in this direction.

Mother Shipton, we are told, was born in Yorkshire, England, in July 1488, and died about 1558. In books of information she is described as a half mythical English prophetess, who later married Tony Shipton, a builder, according to tradition, she was the child of Agatha Shipton and the devil.

The following extracts from her amazing predictions were taken from a scrap book made more than 40 years ago and owned by a Rochester woman:

A house of glass shall come to pass In merry England, that day. War will follow with the work In the land of the bloody York, And State and State in fierce strife, Shall struggle for each other's life. Carriages without horses shall go And accidents fill the world with woe. And the centre of a bishop's see, In London, Princes Will end. Around the world thought shall fly In the twinkle of an eye. Through the hills shall be made A road Andther horse nor ass heedeth! Under the water men shall walk, Iron in the water shall float As easily as a wooden boat. In a land that's now unknown, Gold shall be found and shown Which shall cause many numbers do And England shall subdue a Jew. Three times three shall lovely Prussia Be led to dance a bloody dance Before the people shall be free; Three times three shall the sea run Back rushing from a different Enemy, And when the last great fight is over England and Prussia shall be as one. And now I must to distant regions Of which shall be known to men. In time shall be buried thee.

Women shall get a stronger note cream To dress him more and brandies wear And can off their beautiful locks of hair.

Ships shall fly and mountains level And ride asterisk with bronzen brave As another do on brownstreets now. Then love shall die and marriage cease.

And babies and confidence be deceased That crown shall bundle can and thrones Men will be much the same as heap. In eyebrows learning will shine And Build your homes of rotten stinks Then shall infidelity wave be planned.

And fire and sword sweep over the land.

And there who live the century then! Be fear and trembling this will do. Fly to the mountains and the glens, For hogs and forests and wild dens, For vengeance will rage and onions will roar.

And Gabriel sound on sea and shore And no be to seats his wondrous horn Of worlds will die and new be born In the air men shall be seen, In white, in black and also green, Now strange, but yet they shall be true

The world upside down shall be, And last of trembling this will do. Fly to the mountains and the rocks of a tree

Where sorrows look alive and mountains rose,

When shops like fishes swim before the doors,

When men, metamorphosed, shall scorn the skies,

Then half the world deep drenched in blood shall die.

At that time the prophecy was uttered, Pelorous Bill was two miles from London; now it is nearly in the heart of the city, but a short distance from Regent's Square.

I'M COMING HOME AT 10 M.P.H.

Moncton Springs, Colo.—Urging the use of a "hymn" speedometer, Rev L. Ross Hall suggests the following words for driving:

"I've Just a Stranger Here, Heaven is My Home"—35 miles per hour.

"Nearer, My God, to Thee" — 40 miles per hour.

"I'm Nearing the Port and Will Soon Be Home"—55 miles per hour.

"When the Roll is Called Up Yonder, I'll be There"—60 miles per hour.

"Lead, I'm Coming Home"—75 miles per hour.

Wallie was asked to pasteurize this sentence:

He was bent on seeing his old child, bared sweetheart."

Chewing his pen, Willie thought for a long time and then wrote: "He was fond of Betty, he wrote, "The sight of the old girl doubled him up."

The Yankee is available at Drug Stores, or may be obtained from Veterinarians, and some Municipal Districts may handle it.

As if a qualified Veterinarian is not available, the Vaccine should be administered by some other person trained by a Veterinarian. Persons other than Veterinarians are cautioned to use the vaccine as directed.

Vaccine is effective only when administered prior to the outbreak of the disease.

Vaccinate Early!

The Department of Agriculture recommends vaccination as an insurance against loss.

In the Ancient ROMAN EMPIRE

In 146 B.C. beer was popular with the Assyrians, who called it "Sikaru". Later it was used by the Germans and the natives of West Central Africa and Gaul) imported the brewers and made it popular throughout the countries of Asia. The Romans were also learners of beer. Barley was known to them, says Pliny, who says it is the ground from which they distilled whatever wore the drinks of Cerere's children.

Have You Heard These Before ?

Frederick was visiting his dear
Matilda, and was trying hard to win
his manners. As he was leaving her
family at a rather small hour of morn-
ing dear Maud, his aunt remarked:
"Isn't you like the ocean, Freddie dear?"
"Oh yes?" he exclaimed eagerly.
"It's very good soup—what there is
of it."

And then, realizing an consummation
when he had used, Freddie rushed on:
"And there's plenty of it, too—such as
it is."

Guest "This room looks to me like

Reap Bigger, Better crops by USE REGISTERED SEED

GOOD seed is the first requirement for bigger, better yields. That is why it pays to use Registered Seed. Registered Seed is pure as to variety and assures a crop of strong yield, higher quality and better grade. Registered Seed is free of noxious weeds, government-inspected, and guaranteed-duplicate. It requires no cleaning.
It pays to use Registered Seed!
For information regarding sources of supply of registered varieties write to—the District Superintendent, Crop Production Service of the Dominion Department of Agriculture for your district, the nearest Dominion Experimental Farm, the Provincial Department of Agriculture, or the nearest Agricultural College.
Seed supplies are very scarce in Canada this year. Plant your seed with the best.

HINTS FOR FARMERS ...

USEFUL INFORMATION SUPPLIED BY DOMINION AND PROVINCIAL FARM SERVICES

WARBLE FLY MENACE—HOW TO CONTROL IT

Warble flies attack beef and dairy cattle in every part of Canada where live stock is reared. The damage they do is not generally realized but it takes millions of dollars annually out of the farmers' pockets through the spoiling of hides by the holes made by the grubs, through injury to cattle from fright and worry when the flies are buzzing around, and through consequent reduction in milk production and wastage of beef. In recent years warble fly damage has been considerably reduced in some districts by systematic control measures, including timely application of dusts washes to the backs of the animals.

On sunny days in spring and summer, warble flies lay their eggs, attaching them to the hairs on the legs and lower parts of the cattle. The heat of the flies is sufficient to cause panic among the animals so that they run wildly about the fields. The small grubs hatch from the eggs in from three to seven days, penetrate the skin and migrate through the tissues of the animal, in some cases congregating in numbers in the region of the gullet. They remain there during the summer until late winter when they commence a second migration and come to rest under the skin on the back which they perforate to make a breathing hole. In about two months they squeeze their way through these holes and drop to the ground in the shape of hard black, seed-like objects—but three-quarters of an inch long, from which a new generation of flies emerge in from one to two months. I must sit once and repeat the egg laying process. The total period from egg to fly requires about a year, and in most cases months are passed as a grub in the bodies of the cattle.

When the grubs are under the skin of the backs of the animals is the time for the farmers to act. This period may be from January to June. If the grubs are destroyed before they leave the animal no warble flies will emerge for dead grubs provide no cure. Four or five treatments at a standardized dip wash have proved effective for this purpose. The first application should be made in early spring when the grub swelling first becomes conspicuous. This would be about the third week in March in the Prairie Provinces. The second and third applications should be made at 28-day intervals after the first, and the fourth application 28 days after the third. Provided every cattle owner in the area uses the wash at the proper manner, the warble fly menace will be largely reduced or eliminated as the latter. The treatments, however, should be repeated each year to maintain satisfactory control.

Dusts which form the active ingredient of the control mixture contain no insecticide, known as rotenone, and is derived from the roots of certain species of tropical plants. Originally it was used by the Polynesians to poison the tips of their arrows and also to stun fish.

The occupation of farming is classified by insurance companies as hazardous. Yet crops and livestock, and therefore the profits from production, are exposed to hazard or risk to an even greater extent than is the farmer's personal safety, states the Agricultural Supplies Board for Canada in a circular addressed to Canadian farmers. The uncertainty of the elements and the many natural enemies of production such as insect pests, parasites and plant and animal diseases, are ever present hazards.

Most of these unfavorable conditions may be eliminated or at least greatly reduced where the farmer is well equipped with knowledge as to how best to meet them. This is particularly true where changes are contemplated in crop and animal production but even every day farm practice may be greatly improved through the application of the latest and most complete information available. Chemical and mechanical efficiencies are just as dangerous as hail tracks.

Agricultural scientists, experimentalists, and research men have for years been working to supply the farmer with the latest and most useful information possible on all phases of agricultural practice. Such information is insurance against many productive risks, and may be secured free or at most for the asking by the farmer from Provincial Departments of Agriculture, Agricultural Colleges, or the nearest Experimental Farm or Station.

SAVE YOUNG PLANTS FROM CUTWORM ATTACK

Plants grown in a greenhouse, hotbed or cold frame, are usually succulent, tender, very attractive food for cutworms when moved to garden or field. They are usually planted in carefully prepared soil which is free from weeds or other plants which might afford food for hungry cutworms. Moreover, they are very often planted out in the garden or field on warm moist afternoons or evenings, ideal conditions for the movement of cutworms over the soil. Very often there is a loss during the first night after transplanting.

Most transplanted plants regenerate nearly as many of them as ten cents each and if ten plants are destroyed by cutworms there has been a cash loss of from thirty cents to one dollar, and an equal expenditure in replacing such plants. One hungry cutworm may destroy three plants in a night and it would be an unusual garden which did not have more than one cutworm within its boundaries at transplanting time. Every transplanted plant should be protected during the first night and ten succeeding nights.

Poison bran bait may be used, spreading it about the plants set out in the garden. If the material for making up the bait is not available, a measure of protection may be given by wending loosely about the stem some common wrapping paper in such a way that it extends an inch below the ground level and two inches above or a can with both ends removed will form a good barrier for the protection of a transplanted plant.

Further information may be obtained from the Dominion Entomological Division, Dominion Department of Agriculture.

MOTHER SHIPTON'S PROPHECY

Because of the uncanny manner in which the prophecies of Mother Shipton have been coming to pass during recent years, considerable attention has been attracted to this strange creature of four centuries ago. Even those who have in the past scoffed at the wierd predictions of this ancient "witch" are now stirred by curiosity to wonder what will occur next in this direction.

Mother Shipton, we are told, was born in Yorkshire, England, in July 1488, and died about 1520. In books of information she is described as a half mythicial English prophetess, who later married Tony Shipton, a builder. According to tradition, she was the child of Agatha Shipton and the devil.

The following extracts from her amazing prophecies were taken from a scrap book made more than 40 years ago and owned by a Rochester woman:

A house of glass shall come to pass
In merry England, but alas!
War will follow with the work
In the land of the bloody Turk.
And State and State in fierce strife,
Shall struggle for each other's life.
Carriages without horses shall go
And accidents fill the world with woe.
And the centre of a bishop's see,
In London, Primrose Hill shall be.
Around the world thought shall fly
In the twinkle of an eye.
Through the hills and o'er the vale
And neither horse nor man be hurtin'!
Under the water man shall walk,
Iron in the water shall float
As easily as a wooden boat.
In a boat that's now unbroken,
Gold shall be found and shown
Fire and water shall wonders do
And England shall obtain a foe.
Three times three shall lovely France
Be led to dance a bloody dance
Before the people shall be free;
Three tyrant rulers shall die ere
Rest spring from a different Quarter,
And ofttimes the best great fight is over
Rendered and Prance shall be no more.
And now a word in church rhyme
Of what shall to be before the
Is time included Israel does

The Farmers Will "Pay the Shot"
The ABERHART GOVERNMENT IS COLLECTING AND SPENDING TWENTY-FIVE MILLIONS a year — the most EXTRAVAGANT ADMINISTRATION this Province ever had.
THE CUT IN BOND INTEREST LITTLE BENEFITS ANY CITIZEN because the Government is spending just that much more. It has shown no inclination to retrenchment.
AS AGRICULTURE is the main source of new wealth, it must bear more of the tax burden. Farmers can be taxed in so many ways that others may do not realize they are paying more taxes.
But every farmer knows that the Aberhart Government passed a law TAXING ALL FARM PRODUCTION 1 PER CENT!
The Courts threw out this law, BUT IT MAY WELL BE REINTRODUCED IN A NEW AND MORE EFFECTIVE FORM!!
You can not rely on PROMISES or DENIALS from the Aberhart Government after 4½ years — you know that. They took $4500 each for seven days' work.
BE SURE AND PROTECT YOURSELF AND FAMILY

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

J. W. Simons returned home on Monday from Edmonton.

For Sale—Brown Range, in good shape. Apply Pollock's Hardware.

Bill Harris of the Calgary Hudson's, an employee in the creamery here till, was renewing acquaintances in Alix on Tuesday en route to his home in Innisfail on a week's leave.

Mr. V. Ji will officially usher in the first day of Spring. Whether the weather man will co-operate is still to be determined, but it is hoped that balmy breezes will be the order the day, for on that date, Alberta goes to the polls.

Miss Edith Chapleigh attended the Rebekah Assembly in Calgary from Monday to Wednesday of this week as representative of the Alix Chapter. Also attending the Assembly were Mrs. (Dr.) Warren, Mrs. S. C. Andrews, Miss Ann Howe and Mrs. Robt. Whitehall Jr.

Mrs. Edward Purdy, Mrs. Sherry and Robin returned on Wednesday from a visit of several days in Calgary.

Andy Allen is preparing his ship for early spring sailing—and there is a rumor around the streets that the craft may be used for rub-chasing in Alix lake. In any case it is now in "Reef Pollocks" armament works being outfitted with "armour plate."

Jack Brethours has "posh marked" the corners and heading into the Post Office—which ought to be the means of preventing many a fall.

BOXING NOTES

The boxing bouts, Easter week, are still undecided as to place. The Canadian Legion at last report is willing to stage same and push it to the limit. This would cut into the club's receipts however, and expenses would be heavy for boxers. Receipts are needed by the club to need Alix and Lacombe boxers to the Canadian Finals. To let other organizations take the credit and money when Alix has to furnish all boxers, etc., is not approved by this commentator. Failing to get the Lacombe Pavilion reasonable, the bouts will be held at Alix. The club has 8 preliminary bouts arranged out of local and Mirror boys. It is evident that we will have to import raw boys from Edmonton to fill in an all-star card.

Interest and attendance in the school tournament is interesting.

BE READY FOR SPRING—

Have your Radiator leaf brightened up. Your automobile by having them dry-cleaned and pressed.

A PUBLIC MEETING

Hon. R. Tolman
To
A. A. Stonhouse
Conservative Candidate for the Red Deer Federal
RAT., MARCH 19TH
AT 8.30 P.M.
U.F.A. HALL, ALIX
A Candid Instruction Extended To All !

O.S.A. Experimental Union

The Olds School of Agriculture Experimental Union again has available for distribution to its members some excellent seeds and plants of field and garden crops. These are listed below. Each member may make five selections.

Anyone interested may become a member of the Experimental Union by paying an annual membership fee of $1.00. Members of the O.S.A. Alumni Association may make selections without fee.

1. Potatoes (25 eyes of each) — Vicks.
2. Potatoes (25 eyes of each) — Bovee
3. Potatoes (25 eyes of each) — Karkabelle (late)
4. Red Wing Flax—2 pounds.
5. Brown Swiss (Fullerton)—1 pound.
6. Thursday (Swedish)—1 pound.
7. Creeping Red Fescue—Half-lb.
8. Olli Barley—4 lbs.
9. Alberta Brown Rouen—Half-lb.
10. Jerusalem Artichoke Tubers—2 pounds.
11. Vegetable Seeds—5 kinds.
12. Garden Pansy—3 kinds.
13. Carnation Seedlings—3 kinds.
14. Rockery Perennials—5 kinds.
15. Siberian Iris—3 kinds.
16. Bearded Iris—3 kinds.
17. Perennial Flower Roots—6 kinds.
18. Day Lilies—3 kinds.
19. Everlasting Flower Seeds — 3 kinds.
20. Plum Seeds—20.
21. Butternut Seeds—4.
22. One Butternut Seedling.
23. One Oak Seedling.
24. 3 Pine seedlings.
25. 3 Apple Seedlings.
26. One annual Plum.
27. One annual Apple.

One supply of some of this material is quite limited so some substitutions may be necessary. We have limited amounts of seed of a number of the leading varieties of wheat, oats, barley and peas but nothing strikingly new. Members who are interested are asked to write.

Orders will not be accepted after April 6th.

Membership fee of $1.00 which includes shipping charges must accompany selections. When not shipped, 60c.

Report forms must be filled in and returned to the O.S.A. at the end of the growing season.

GIVE YOUR CAR A BREAK!

You visit your dentist at regular intervals as a preventative measure.

Your car needs to be checked at regular intervals so that you may enjoy increased mileage performance and comfort.

PREVENTION SERVICE

Put your car in an economy. Let us demonstrate it.

An increase of 2 miles per gallon saves you approximately $10 to 10,000 miles.

News of the Week ...

IS ARE MURDED IN TRAIN CRASH

MEDICINE HAT— Eleven persons were injured, four seriously, when 3 Canadian Pacific passenger trains from Calgary crashed head-on into a coal car here at 12.15 a.m. Friday.

The engine tender, mail, baggage and express cars of the passenger train were derailed. Several hundred feet of track was torn up, and the road bed assembled a trickly-plowed field. The mail car and all its contents were burned. The accident occurred at Dunkirk, 20 miles west of Medicine Hat.

WORLD'S RADIUM WEIGHS TWO POUNDS

WASHINGTON— All the radium produced in the world to date would not be only about two pounds if assembled and the present rate of mak. In Canadian units would be . lalsung and his tallings was told last week to the annual convention.

FOUR VOTERS FORM 1SEALLESTY POLL

MERRITT, B.C. — Arrangements were completed Monday night by the ballots in nearby Hope to be the smallest polling district in Canada. Results in 39 months at Kamloops.

March 26, a deputy returns an oldest and a poll clerk will drive to Hope, where here is to be a reception at the Canadian Pacific railway to receive the voters and their votes.

TORIES STAGED 'LEAFLET RAIDS'

TORONTO— Two airplanes hired by the National Government party of Canada staged a leaflet raid on the Liberal rallies held Friday. Five pounds of anti-Liberal literature were dropped on the meeting. The planes, piloted by Lieut. Col. Leonard London, Ont., and Flight-Lieut. Lindsay, Toronto, were staged to coincide with a 9 hour period.

New Municipal Council Has Lengthy Session, Organizes For Year ...

Council met in the secretary's office on the first regular council meeting of Lonsdale M 1 Nov 20th, on Wednesday, March 31, 1926.

The secretary called the meeting to order at 10.00 a.m., and read the report of Returning Officer, Returning Officer, advising that W Woodward and C. H Rice had been re-elected by acclamation to Division 2 and 3. Oaths of office were taken by the re-elected councillors.

Members present were councillors Dunberry, Hicks, Hecht, Reynolds, Weather and Rose.

Moved by Councillor Hecht to fix dates of regular meetings of Council at the first Saturday of each month to be held at the Municipal office in Alta at 10:00 a.m.

As surveyor was granted to Mr. J. H. Sanderson, Dominion Agriculturist, to forage crop land. Moved by councillor Reynolds that we refuse the application. Carried.

Poundkeeper's duties was declared elected Reeve, and councillor Hecht as Deputy Reeve.

Ralph Greene was re-engaged as cemetery-treasurer for the year at a salary of $1,200.00, and as assessor at a fee of 1% for every assessment roll collected. Patterson and Johnstone were appointed auditors at an annual fee of $240.00 plus expenses of verification matters.

Moved by Councillor Hein that we appoint the following Fire Committee: Chas. C Weather, Chief; Dr. L. D. Hudson, Alta; Dr. A. J. J Daly, Edgeton; Jno. A. J. Splatt, Clive; Chas. A. Wm. Gillies, Teen; and Dr. A. J. F. Sharpe, Bentley.

Moved by Councillor Reynolds the we appoint the following Pound-keepers; Dist. 1, Pasture; Alta; Dist. 2, Thos. Temple, and J. M. Smith, Alta; Dist. 3, Wm. Chaston, Haynes; Dist 4, F. VanHouse, Clive; Dist. 5, T. Woodcock, Alta; and Dist 6, John Smith.

Moved by Hicks that we appoint Mr. W. V Schnarr as weed inspector, to act on written complaint from ratepayers, at a fee of 20c per hour and 10c per mile for every necessary visits travelled in the discharge of his duties.

Tax Rate, 31 Mills.

By-law No. 35 was passed, constituting the following rates of taxation at 31 mills on the dollar, on assessed values as at 1925, viz:

Taxing the rate of taxation at 12 mills on the dollar on assessed values as at 12 mills was lost.

Sub-tax rates were fixed as follows: November 15th Tax Sale Dist 5-11, at 9 mills; Pasture S.D. 11 mills; and remove S.D. 11 mills.

By-law No. 36 was enacted, imposing upon every resident of the district of Alta a poll tax of $2.00, same to be duly employed and has not been assessed on the roll, an annual tax of $2.00 for corporate purposes.

Secretary Bank Credit

Moved by Councillor Hein that we apply to the Alta Bank of Canada for a line of credit of $20,000.00 and authorize them all municipal taxes as collected.

Moved by Councillor Hecht that we apply to the Alta Bank of Canada for a line of credit of $15,000.00 and authorize them all rural school taxes as collected.

Moved by Councillor Hecht that the Reeve and Secretary-Treasurer be empowered to sign all cheques, drafts, contracts, etc., on behalf of the municipality and that the secretary-treasurer be empowered to assume all cheques, drafts, etc.

Councillors' Pass and Allowances

Moved by Councillor Hecht that we pay the sum due for every duly authorized meeting and Board of Arbitration at the rate of $5.00 per day for each member.

Moved by Councillor Dunberry that we pay ten cents for every mile travelled by councillor and Board of Arbitration.

Moved by Councillor Dunberry that we pay ten cents for every necessary mile travelled and $5.00 per day for each councillor if not attending meetings.

Moved by Councillor Hecht that our Councillor be appointed a committee to himself in his division, to attend to any matter in connection with the management of roads and bridges and the duties conferred upon the Councillors by the Act, and to furnish memorandums a by-law or order into a form to as course of $20.00.

Moved by Councillor Dunberry that we pay ten cents for every necessary mile and $5.00 for each day spent which the member is necessarily engaged in attending to matters affecting the Municipality, when engaged in supervision.

Moved by Councillor Rose that per cent the Reeve be $5.00 per day for ordinary necessary spent on the division, and that the Reeve be $5.00 per day for special meetings of Council.

Moved by Councillor Dunberry that we fix wages for labor as follows: Single Team $5. 25c per hour; Pneumatic 40c per hour; Man and two horses, 40c per hour; and man and 4 horses, 60c per hour.

Moved by Councillor Weatherbee & employ Wm. Gillies as a grader man and foreman at 60c per hour.

Lands Leased and Sold

First and second readings were given By-law 33, a by-law concerning the sale of SW 10-36-23 to Charles Brathfor a consideration of $1000.00 NOR cash and balance in five equal annual instalments with interest at 6 percent.

It was moved that each councillor be empowered to expand for public works, his division as well as current allowance.

By-law No. 16 was passed concerning the sale of lots 7 and 16, block 3, Model of Town, for $30.00, to A. J Trahan.

Moved by councillor Reynolds a lease the NE 14-41-18 to A. C. Worren for five years at a rental of one-third of crop delivered at elevator or delivered at railroad at the option of the lessee.

First and second readings were given By-law No. 38, a by-law authorizing the sale of section 7-35-23 to Robert Hamilton for $1,000.00 NOR, payable as cash and balance in installments of $200.00 each year with interest at 6 per cent.

Relief and Allowances

The secretary read an application for relief by Jack Brown, stating that he had been in residence since Clive from May 1923, to December 1925. Moved by councillor Hecht that we reject application on the grounds that he had not been a resident of Clive, in our district, during the time mentioned.

Moved by Councillor Reynolds that we pay F Dunleavy $12.00 for breaking three in one 31-28-23 and one of 5-41-20.

Moved by Councillor Hein that we make a grant of $50.00 to the Canadian National Institute for the Blind.

An application for relief from Samuel Brophy, from the City of Edmonton. Moved by Councillor Weatherbee that he be advised that he must re-

Responsibility Needed

Of all the disasters caused by fire none excites greater compassion or arouses greater sorrow and horror serve than a conflagration in a school with children present, whether it be in a large institution of learning in a city or a little red schoolhouse at the crossroads.

The inch of experience of young students and their helplessness when faced with an emergency, coupled with their tendency to stampede en-masse, the nature of the buildings which serve them as occupied school, combine fire and from time to time the country is horrified by stories of such disasters appearing in the newspapers.

Perhaps the most spectacular and of the same type the most gruesome of these school holocausts occur as the burned contrast, but there is plenty of evidence that such disasters are not too frequent in the little country schoolhouses, to the small town schools even though they do not make the front page.

The evidence that the fire menace lurks in the small rural or village school can be found in a brochure entitled "Fire Protection Assessment with Inspectors in Boston Massachusetts, covering, and only partially covering the school fire record in Canada and the United States for the period January 1 1908 to September 1, 1929

Every truman and every parent with loved children attending school who has an opportunity to study the statistics and examine the pictures in this little publication would immediately insist upon better precautions being taken in their local schools to reduce the risk to which children are too often subjected because of lack of knowledge lack of interest or indifference on the part of those who should assume responsibility

Rural South Trops

It is true that since the earlier days some precautions have been adopted, some of the risks removed and some safeguards instituted, but the fact that then occur an school property at the rate of six or seven a day in the United States and nearly one a day in Canada indicates plenty of room for improvement. The total school loss by fire in the two countries combined is estimated to over $6,000,000 a year.

The hazards to which children and people are subjected sometimes on the small country schoolhouse is aptly illustrated in the report of a fire which broke out during a Christmas entertainment in a school in Missouri in 1926. It there were but

"Nearly every condition favorable to fire and loss of life was present," says the report. "The building was a frame timberless lighted candles were placed on a very inflammable and improperly mounted tree. Burning pine boxes lighted on tables were the only illumination; the building was crowded beyond its capacity, one doorway was blocked up by a coal bin the other opened inward and was difficult to get, and windows were effectively barred; there was not even a fire pail, and the fire was undoubtedly spread when attached to its emergency by wraps and have hanging on the wood from the building had be stated by and see the fire burn unhindered, there being no semblance of a water supply or fire apparatus in the vicinity."

A grim reminder of what probably happened while pandemonium reigned in the burning is contained in the statement that "The teacher had at some previous time instructed her pupils that in case of fire they should try and get out of the building by crowding along the floor toward the door by way of the children tried to follow this advice, they were certainly killed."

Importance Of Exits

Of the known causes of these 1,000 school fires electrical causes head the list with a total of 97 flooding and matches come next with 74 and, surprising to relate, incendiarism follows closely with 72. The other four major causes are defective or overheated heating equipment, 69, open or unsecure ignition, 66, ignition of flammable liquid or gases 66, and defective or overheated flue or chimney, 64. These are responsible for 75 per cent. of the school fires for which the cause is known.

Strong emphasis is placed by a committee of the National Fire Protection Association on the importance of sufficient exits for all schools no matter how small. "Exits should be so arranged that from any part of the building there will be at least two means of escape, so located that in case fire or smoke therefrom interferes with the use of one another exit will be readily available" says the committee "The exit details themselves are important. Stairs must be properly designed, constructed and serving with the exit travel, handrails, lighting, etc. must conform with accepted standards."

While public responsibility for protecting children in school from fire hazards has been generally recognized, the record shows that this responsibility has been met only to a limited extent

Using Old Invention
Prospecting For Oil In New Guise
By Means of Seismograph
A new method of prospecting for oil, based on an English invention of a decade ago, has been revealed. Part of earth, dug from within a few feet of the surface, gives direct signs of oil fields that may be buried 10,000 feet below. It will yield not more than a pint-load of gas, but is likely to contain 20,000 times more gas than rotting vegetation from from the richest oil that may be buried below.
LOOK OUT FOR YOUR LIVER
Keep in the cause of your troubles. Dash it up right away with Fruit-a-tives. Fruit gained.

On Equal Footing

Great Britain No Longer Behind Germany In Scientific Research

The Album are on an equal footing with the Germany regarding scientific development and research is the view held by Sir Robert Robinson, president of the British Association for the Advancement of Science. Speaking at the annual meeting of the association at Birmingham, he said that the same army of scientific research could easily be directed to war effort he said

The inherently complete existing at the beginning of the last war as a result of the more advanced research organization in Germany does not now prevail. Surprises like the magnetic mine are no longer surrounded by mystery and vague apprehension. Also the British equipment of research and training is probably better-founded, in not growing in number.

Apart from research activities done in the national research laboratories at Ottawa, industrial research laboratories all over the Dominion were carrying on done collaboration with the universities.

The national research council at present had many new problems under study said Dean Mackenzie who now heads the council (retired Major-General) A. G. L. McNaughton commander of Canada's first overseas division, has been named his successor.

The latest in that common saying with the farmer when he is about to leave if the husband rushes home to have the thermometer ready to explain he knew in a cold committee's home

No definite rule has been laid down as the amount of units of women waiting many simultaneous It But the suggestion has been made that the commanding officer the suggestion to and more granted wherever possible on compassionate grounds

No Gaiety Attended

A persons does not go with the Methodists Service Medal to those that receive it for service with the Canadian forces in the national defence headquarters at Ottawa and But as the British army where the Meritorious Service Medal is awarded after 21 years meritorious service the recipient receives a gratuity of £10 per year

Not Much To Spare

The [illegible] have been hoarding the [illegible] which [illegible] huge quantities of oil and gasoline But Mr. [illegible] in the Red Deer and twenty-five have operating on the streets of Moscow have just been changed from the gasoline to the coal gas type, on account of a shortage of petroleum products.

A Good Haul Then

The largest man-made hole in the world is a copper mine at Bingham Canyon, Utah, which is nearly a mile across in area. More than 250,000,000 cubic yards of material have been taken from the mine.

DON'T YOU WONDER, TOO?

We sometimes wonder how it is that some gets up in the morning after sleeping as an advertised mattress, on an advertised bed and pulls off advertised pyjamas, takes a bath in an advertised tub, washes with advertised soap, shaves with advertised safety razor, irons an advertised suit, puts on advertised underwear and socks and a pair of pants with advertised garters, a shirt with advertised collar, puts on an advertised hat, buttons an advertised vest, ties a tie to adorn an advertised neck and with advertised shoes, puts an advertised handkerchief in advertised pocket, walks to breakfast on advertised coral, drinks a cup of advertised coffee, puts on an advertised hat, buttons an advertised coat, ties rubbers to the shoes as an advertised coat with advertised laces, uses an advertised umbrella and puts on advertised paper as an advertised desk, dictates his letters to an advertised device and has them transcribed on an advertised typewriter, reads advertised books, at lunch advertised shoes, deposits his money in advertised banks and then refuses to advertise on the grounds that advertising doesn't pay

READING TIME

An advertising expert is quoted as saying that a recent research has shown that a certain well-known metropolitan newspaper is read, on an average, for 20 minutes, while the average country newspaper has a reading life of three hours or six times it is kept around the house for a week and everyone in the family takes a turn in going through it.—Hanover Post.

A GERMAN'S VIEW OF ENGLAND

A few years after the close of the last war, Dr Wilhelm Dibelius, a German professor, wrote a book which he was pleased to name "England." It wasn't a book that was particularly favorable to England, but a dod stack o' facts. Here is what Dr Dibelius had to say about the role of England as European affairs:

"Britain is the solitary great power which has never injured the vital interest of another European power by its expansion. England is the right country in the world that, looking over its continents with commissions—has at the same time something to give to others; the single country where an aristocracy does not represent a threat or challenge to the rest of the world. Britain is the solitary great power with a national program which exists through and through, at the same time promises to the world as a whole something which the world passionate by democ—order, progress and eternal peace."

THE CAST AND A CHANCE

Do you carry grudges? Cast them aside. Your burden in life is heavy enough without them. Do you hoard of your grudges as a sign that you are a true man? Don't do it. Though you may have created your grudges, and though you may have lived them they are of no practical use to you. Grudges spoil enough life, but it won't agree you only shorten.

Hoard of us are like the worst sort of slaves. In order to maintenance hostility we have to live in a constant state of [illegible]. It is not worth while to waste our energies and vitality our minds in hate and resentment. It is right to love evil, but merely pity evil men.

If you have been wronged, forget it. Why keep the memory of it? Wash it never enough at the same

[illegible] long revenge or let's get even" with his triumph. You even make his assets down. You hypnotize your self within his spell

It doesn't pay.

Many business men are plagued by the least fortunate of us, and many non-customers befall the happiest of us. Some of us are well afford to spend the hours of retrospect and prospect in other than the happiest moments, and the briefest years of old age even and the briefest hours past that chance and less serious.

The World of Wheat

By E. C. E. STRANGE
Director "The Crop Testing Plan

One commonly hears the expression "It's too hard for us to be able to know over the prairies this whole [illegible] and the world's food supply. [illegible]

Let's have a look by our respective departments and see what we can find out. Winter wheat—no doubt about it. Winter wheat sowed in October and sowed winter and early summer, will blooming. The crop which [illegible] sown this summer, April and May will, however start in under a definite handicap, simply because the rains which fell last August, September and October were, on the average, over the three prairie provinces, only 60 per cent of normal.

This handicap can be overcome if better than normal rains occur during the coming growing season, but it must be said that the odds are somewhat against this happening.

Following factors have tended to [illegible] year:—Unemployment in Hungary reported unfavorable for winter seedings — France authorities imports under certain conditions of both [illegible] and hard wheat — Field [illegible] as standard in Spain owing to [illegible] and too much moisture — Prospects for the Japan-Shuan winter crops have deteriorated greatly.

Following factors have tended to [illegible] year:—Finland and Russia [illegible] a Peace Pact — France has a reserve supply of 71,000,000 bushels of wheat — Condition of the winter crop in India is reported good—English farmers are being persuaded to grow as much wheat as possible.

As from-up to 1933, a serious scarcity of moisture reserves went to be found in stubble lands over the chief producing areas of the Canadian Prairies, arising from extremely light precipitation during the previous fall months. Our summer-fallow lands which [illegible] about one that of the [illegible] [illegible] crops [illegible] [illegible] [illegible]

The Aftermath Of War

If history repeats itself our mentality brings unpleasant aftermaths to the human race. The term of romance, depression, unemployment, and war peace settlements between the combatants and bickerings over indemnities and war debts. Russia, uncomfortable manifestations may be expected as aftermaths of the war in which Canada and the Allies are presently engaged, unless some thought is given to these problems in plenty of time to devise and shape policies to prevent them.

Considerable attention is already being given to the question of peace settlement terms by various authorities on both sides of the Atlantic and the subject will for this problem being settled in such a manner that the terms will not be the seeds of a future war and will provide a reasonable measure of security against aggression, with the smaller democratic nations as a target. Numerous suggestions have been made with this objective in view, some of them impracticable no doubt, no matter how drastic they may be. But the value of these suggestions being made at this present time lies in the fact that they are preventative of much trouble and misunderstanding. It seems sad it is to be hoped will not be of constructive thought by the time the war is over and peace terms have to be concretely considered. By that time wants may be well digested and there will be no entity to make hasty and ill considered decisions.

There is another matter however which will have to be found at the same time as every soon after, and that is the question of war debts. The debts incurred in the first great war resulted, as everyone will remember, in a great deal of bickering, ill feeling and mutual recriminations between some of the debtor and creditor nations. It is to be hoped that after this war is over reasonable settlement and compromise can be effected, on that soldier displays can be subsequently avoided.

What interest the United States will have as creditor of the Allies after the close of the present war is problematical, as a result of the fact that the Americans at present are selling munitions and war supplies to Great Britain and France strictly on a cash and carry basis. Also at the end of the war being a lengthy one, it is possible that the United States may modify its terms and extend credit, rather than lose a great deal of lucrative business.

* * * *

Of Interest To Canada

The question, however, is one of considerable importance to the people of this country, since undoubtedly this country will extend considerable credit to both Great Britain and France, especially if Britain is protected. That this country is willing to consider transacting business on this basis when, and if, it becomes necessary is practically certain, for, as Wellington Jeffers, financial editor of the Toronto Globe and Mail says "Hon. Canadian statesmen consider the British and French to be 'good pay' and nothing more even after a close study of the resources of the United States with money lent there.

"In fact", continues Mr Jeffers referring to the war debt repurchases after the war of 1914-18, "it is best for Canadians to study the whole question without fooling that a continuation of these Allied expenditures for some years after the war is clear up different circumstances could have arranged the matter that the European countries would not have had to be bombarded by being placed in a position where it was impossible to pay the amounts set forth in the bond by sending goods over the herd, and the United States would have benefitted materially in prestige and wealth, and really by settlements on the basis of reality."

According to Wilson Lloyd, an American writer, in his book "The European War Debts and Their Settlement", when the Harding debts which the United States were funded in 1922-25, Great Britain still owed the U.S.A. a balance of $10 4 billions after having already paid $9½ 4 millions.

* * * *

Boon U.S. As Debtor

On the other hand M. Chevalier, writing in La Francaise Realiste in 1929 shows a credit balance for the Allies of $42½ millions, if the United States had been willing to recognize as a bill, the amount of money that country had saved by remaining out of the conflict for 19 months. This same estimator that with an army of 4,084,000 in the field the cost to the United States of 400 days of warfare it rounded by 4 billions, would have been $6.5 billions and with interest it would have amounted to $11.9 billions in 1929.

After referring to defaulted debts of the United States to both France and Britain incurred in earlier days, Mr Jeffers appropriately comments: "France is people material here for a country of 40,000,000 people ethic and the shopping for all time of the bickering and contentions that go with disputed almost money," and suggests that since cross credits were established and well honored between Britain and Canada in the last war, there is no reason why they should not do so in this war.

* * * *

Hands To Co-operate

General Wladyslaw Sikorski, premier of the Polish government in exile in London, announced the Poles and the Red Army in Russia have joined hands to drive the Germans from Russia. He said, and a most welcome announcement it will be to the world, that the Polish army would co-operate with the Russians in the war against Germany.

* * * *

Sounds Like Good Idea

Mrs. Jessie Gardiner, city woman of the Fabian Society, has suggested a scheme for the establishment of a municipal bank. Mrs. Gardiner says women should be given the right to vote on the question. She suggested the council issue bonds to the amount of $1,000,000 and that the bank be established with the money. Mrs. Gardiner says the bank would be a great convenience to the people and would help to relieve the unemployment situation.

* * * *

Bond Slice Request

At Kaine an order has been issued threatening arrest and punishment for any Pole who "makes trouble knowingly or otherwise" by any sign of contempt," towards a German or refusal to raise his hat to any German in uniform.

The annual January influenza epidemic in Japan causes an average of 10 deaths a day in Tokyo alone.

Replacement of phonograph cut off by the explosion of electric bulbs have been demonstrated.

Hamilton Police Work

Efficiency Of The Royal Canadian Mounted Police At High Standard

Efficiency of the Royal Canadian Mounted Police is at a high standard according to the report of Commissioner S T. Wood for the year ended March 31 last which was made public recently.

The force at no time IN ITS HISTORY has been better prepared to deal with its great variety of duties than it at to-day said the report which has nearly been as ready and able.

The state of affairs is striking, liable in several cases, but the basis of which at the excellent training which was instituted by my predecessor (Sir James MacBrien) several years ago and which has been standardized and improved upon since. The outstanding difference to the force since mechanization.

In one more promising during the past few years to create a training school or police academy at Regina which has already undertaken the work of a national training centre. The officers in charge have kept an open mind and have been ever on the alert to embody in the syllabus any item which has proven its worth.

Cases dealt with by the force during the year showed an increase of 1,372 compared with the previous year. The total was 60,745.

Offences against provincial statutes showed the largest increase and numbered 29,250. Criminal offences were also more numerous at 15,945. Offences against federal statutes showed a slight decrease and the code were slightly fewer at 15,945. The cases under criminal code and provincial statutes were largely confined to the provinces of Alberta, Saskatchewan and Manitoba, Ontario and Prince Edward Island in which the force does personal police duty. Quebec, the other province in which the force operates, is under provincial police.

As many complaints turned out to be unfounded the actual business transacted cases was much more than the previous year.

The number of arrests over the period since the outbreak of war but it mentions certain reasons for the decrease, particularly in view of the danger of war. The force considers the protection of vital points for the prevention of sabotage and the protection of public utilities and vulnerable points.

Inventions Being Perfected

Many Will Be Further Makers In Few Years Time

There are many new inventions that are nearly perfected, in 10 years time, very likely they will be making fortunes for those who market them.

Now ways have been found to extract gasoline from coal, even from peat. There are already several hundred motor under-builders in California.

Oil can be produced from coal at a cost not light by coating it with thousandth part of an inch.

Non-metallic bearings lubricated with water instead of oil, can now be made from plastics.

Last year a new fibre, called 'Nylon' was produced. It is stronger than coir, air and water, and is said to be as strong as steel. Efficiency 15%.

Money-Making Scheme

Tells Its Aims, Had Clever Idea For Getting Money

By using near milk on their perfumes, Bernin, the Swiss perfumer of Africa are prospering. According to a government report issued in Switzerland. The capital the mineus now take their milk to government separating stations. After the cream is removed and powdered the sour milk is reformed into powder. The money thus received is reported to be making the Bernin quite a prosperous tribe."

Called Tea Party

A coroner's jurorate called at a Manse farm house of an early morning recently. "We were wondering," spoke up the lady, "if we could get a glass of fresh milk?"

"Now that's too bad," sympathized the housewife, "but you see we give quite a ways from the city and the milkman hasn't got here yet."

Although Japan leads the world in producing synthetic fibres commercially none of these fibres were invented there, says "Industrial and Engineering Chemistry".

PATENTS

AN OFFER TO EVERY INVENTOR. Send for our free booklet, WHAT AND HOW TO INVENT, which explains fully our Patent System. Prompt, efficient service. Reasonable fees. Easy terms. Write us first. THE RADIATOR PRODUCTS CO., Registered Patent Attorneys, Montreal.

Selected For Experience

Women Pilots Being Important Work Are All Veteran Fliers

No women first women ferry pilots of a new wartime organization, known as the Air Transport Auxiliary daily expected to begin ferrying new Lockheed Hudson bombers from factories to Royal Air Force depots somewhere in the United Kingdom.

Headed by 39-year-old Pauline Gower, daughter of Sir Robert Gower Conservative House of Commons member for Sevenoaks, Kent, the exclusive squadron includes women specially selected for their experience in flying. None of them has had less than 600 hours flying and most have had 1 000 hours.

Duty of the corps is 12-year-old Jean Hughes the hostess by 32 at the age of 17 before she had left school and has for some time been a flying instructor at Romford, Essex.

Miss Gower holds rank as First Officer. The remaining eight members rank as Second Officers. All receive salaries and flight pay. They will have additional duties of flying delivery aircraft between and in France.

It is expected that the number recruited will be increased soon and there are already 25 other volunteers awaiting call up.

Not all of the Latin names of flowers are difficult to learn. We sometimes have a reason for the name being somewhat classic. Take a few clues and Old Man Wiser will teach the rest. Lupin is a wolf, for instance, and Canis a dog.

The world's smallest known flowering plant is watermeal, about one thirty-second of an inch in diameter.

Records show that the farther from home motorists are, the faster they travel.

More Speed In Air

Nine Of Plane Wings Cut By Inventions Of Engineer

The mechanical contribution of a 19-year search for a means of reducing the lift of airplane wings and therefore, speed was announced here by Professor Fred H. A Stalker head of the department of aeronautical engineering of the University of Michigan.

In a paper prepared for the annual meeting of the Institute of Aeronautical Sciences at Columbia University Prof. Stalker described a system which permits a reduction in an airplane's wing area by two-thirds.

As a result he said the speed of a plane having a lap rating of 400 miles an hour could be hoisted to approximately 500 miles an hour without a reduction in wing area, the Stalker invention would reduce the landing speed of airplanes almost by half.

His device, he told the institute, permits high rates of climb and low speed of descent without the usual danger of low lateral control, two of which, with consulting stalls and spins, have accounted for as much as 50 per cent of airplane accidents.

THE RIVER OF SKULLS

© Press Publishing Co (N.Y. Sunday)

GEORGE MARSH

CHAPTER XIV Continued

"Heather Bloomer, girl scorched McCord, "you're tired and worried. You don't mean what you say."

We're going back all safe and sound, Mimsy and we have a fortune with us. McQueen it never mattter this month if we've alive 'em but not dead. We're on board the Queen again. The Nashapi has cave of hair."

"The Nashaps may have more at us, too," she objected, thinking back the tales her comrades had recounted.

"No, Heather," said Alan. "The Nashaps don't wander in the Kalmagh valley, Nappie told me. They're probably in the Ishimwe line, miles and miles away. Don't worry about it, my love."

"Then where is poor Nappie?" he said. "You my McQueen is dead and the Indians are not seen at all yet you're going to look for poor Beth McQueen and the Indians Heather of you believe what you say! You're only trying to keep our fears from me!"

"I'm not, Heather, the river answered Heather's question. When Alan and Noel went down to the shore to the body they kept broken in the ice for water, they saw something adrift in the swift, unfrozen channel.

"What's that, floating out there beyond the ice in the channel, Noel?" asked Alan. "Couldn't be a deer, could it?"

The investigants gazed at the submerged Eskimo reaching out from a near Mimsy Noel's sweet features changed color and his face went grave. "We talk' canoe ends now," he said. "Deer float high."

At they ran the canoe out over the shore ice and into the open channel Alan knew that the dread in Noel's heart was the same dread that confronted him as they poled the canoe up to the submerged shape bobbing 'd the ice edge. They hovered over the battered body. Seeing the deer, and looked into the pinked staring eyes of Nappie.

"They got him, Noel! They got him!" groaned Alan. "Look at that lump in his hand and there's another in the back, too! He was shot from the rear! No human leader did that! That was made by a Rose and that Rose belongs to McQueen!"

"How dey come up dis riviere?" demanded Noel, dazed with the grim evidence of the treachery of the Queen remembers above them on the River of Skulls.

"They must have crawled from the Kalmagh and struck the angry-man." Alan interpreted the broken body of the Indian boy who had been their friend. "Poor Nappie! He's with his people now. No more time of starvation for him. He's free from evil blood. Noel Hurry back to the Queen!"

Heather Bloomer Don't suppose I don't know what Heather's gone through that I'm not thinking of her and we've been busy. We've got our gold and we're going back with it."

Without a reply Alan gave stretched and sun-moved Noel taken the first swing. "I'll not it through—"

For the weeks while the ice thickened on the rivers those at the camp never missed their vigilance The extra supplies were hidden safe-ended from the gold, deep in the canoe and the new sled that Noel drove covered the trail to the caches. A fast sled for the Queen having been temporary support were also hidden in the camp. If McQueen should settle in some favorable spot he would find little to steal or destroy but the Nashapi must not get it. Noel cut with the dogs and the long sled handled readily to harden the trail for the long trail back.

"Nothing is going to happen to us, Heather! Nothing!"

They travelled for up the river over the frozen trail and the bush was impossible, to search for signs in the snow or signs of their enemies They found none.

November came and the cold grew more intense. The days shortened deeper crept where the wind mourned and river ice thickened. Then, suddenly, McCord and Alan became convinced that Nappie had not his body was not in the river. They had ambushed the McQueen party and escaped.

Then was still a cache of dried carious meat that Noel and Nappie had put up the river and, one day Alan and Noel doubled to take the meat. They were gone a week while they made a wide swing into the barrens toward the Nashapi to need for tracks in the snow. Because of the heavy load and the fact that the sun burned to travel fast, staying out but one night, Heather and her father were to remain at the camp.

The afternoon before the sun-rise Heather had her clothes washed to scrub with the team drawing fire wood. It was two o'clock but the sun was well gathering in the valley Before Heather's double last, the sun burned to travel fast, staying out but one night, Heather and her father were to remain at the camp.

Alan looked at the girl's courageous eyes, tear from brooding over Nappie's tragic fate. He read her glance and, as he argued, her face shone irrepressibly

"Above all things, John," Alan said, still holding her gaze, "Heather and I must be found. Above all things I'd throw the gold into the river now to save her, all the more and anxiety I'm telling you this now I'd throw the gold at McQueen to have Heather safe. But I'm not going the buried her face at her hands, closer on knees, as her father remembered.

"You don't mean to say you you, Alan Bloomer, that you're losing heart when we've got a fortune in our hands Don't suppose I don't know what Heather's going through that I'm not thinking of her and we've been busy. We've got our gold and we're going back with it."

Without a reply Alan gave stretched and sun-moved Noel taken the first swing. "I'll not it through—"

Refugees In Canada

Much Has Been Accomplished By Committee In A Short Period

Going about its work quietly and effectively the Canadian National Committee on Refugees has accomplished much in a short period. The board of friendship has been extended generously to three unhappy victims of persecution and to families utterly destroyed by war. The refugees are carefully chosen from amongst Germans Austrians Poles and Czechoslovakians All have proven their detestation of the dictator system and the chief religions are equally represented.

Many of these people seeking homes in a country of just and liberal laws will prove a real asset to the Dominion The majority are well educated possess considerable culture in a number of cases were leaders as businessmen in the arts in science and scholarship in their own countries Others have brought with them considerable capital to establish themselves or invest in Canadian enterprises.

The most serious problem confronting the committee is the proper placing of young children Many of these is 15 years of age They are the "lost children" of a land they cannot understand and in England they have received most generous consideration and have been housed in homes or properly cared for. The Dominion committee would like to settle as many of these boys as possible on the farms in the Dominion. The committee appointed Dr Redlich to work in connection with all social aid and welfare agencies in the country and he has now a professionally trained page to settle in adopted homes at least 100 children. Financial grants are made by the government, private individuals have contributed generously to the movement and much money is needed for the children's maintenance as and for other branches of the work.

This whole project seems to be deserving of hearty support. These children coming of good stock, properly placed on farms in Canada should prove a real asset to the country Ottawa Journal.

Claim Is Amazing

German Writer Says Superiority Of Nazis Warrants Host Living

Dr Robert Ley, Labor Front leader writing in the Volkischer Beobachter, official newspaper of the Nazi party, declared the superiority of the German people warranted their better living conditions.

"The German people living under Fascism have returned to the way of life under which they alone can flourish," he declared. "Germans are living under the jurisdiction of laws made for them by the Germans. They need no longer accept where the wind comes from or what it brings. They are independent under which he lashed out at the "Jewish-democratic-capitalistic-Bolshevist" system.

"I can't realize it," McQueen gasped, "I can't realize it." McQueen gasped from the Nashapi and Indians lying on other Nashapi to the gulf and ambushed the McQueen party and escaped.

There was still a cache of dried carious meat that Noel and Nappie had put up the river and, one day Alan and Noel doubled to take the meat. They were gone a week while they made a wide swing into the barrens toward the Nashapi to need for tracks in the snow. Because of the heavy load and the fact that the sun burned to travel fast, staying out but one night, Heather and her father were to remain at the camp.

The afternoon before the sun-rise Heather had her clothes washed to scrub with the team drawing fire wood. It was two o'clock but the sun was well gathering in the valley Before Heather's double last, the sun burned to travel fast, staying out but one night, Heather and her father were to remain at the camp.

Alan looked at the girl's courageous eyes, tear from brooding over Nappie's tragic fate. She read her glance and, as he argued, her face shone irrepressibly

"Above all things, John," Alan said, still holding her gaze, "Heather and I must be found. Red Cross Archaeologist

Lake Shelton L. Smith Died An Exemplary Christian Life

Marina I. Smith, whose death is reported from Ottawa, was an archaeologist of international reputation and an enthusiastic Red Cross worker. Her untimely death will be lost a very wide field experience on this continent and has written many monographs on his field.

Mr. Smith was a good friend of British Columbia. Many a summer he spent in this province investigating the archaeology of Vancouver Island and the mainland coast. Recently the Provincial Museum in Victoria has been living under the jurisdiction of Mrs. Smith for the last few years. She has added peoples of the new museum regards him living space, has collected many valuable specimens of high value.

"Germans" Dr Ley said, "can not be expected to live under the same conditions as Poles and Jews."

"Poles and especially Jews fare well under the conditions of life which exist in Warsaw They remain quite healthy But the National Socialist (Nazi) German would die if he were forced to live under such conditions."

Boy Scouts

Will Bring Into Wartime Action To Assist In Homes Of Enlisted Men

Canada's 140,000 Boy Scouts will soon be called upon to perform a "good turn" service for the homes of all enlisted men in the Dominion.

This was the gist of an announcement by Dominion Headquarters of the Boy Scouts Association, authorizing efforts of a special Wartime Services Committee to co-ordinate the war work of Canadian Scouts.

A special armband has been designed for all Scouts taking active part in the scheme, bearing a coat commanding of the Scout emblem on a Maple Leaf with the words, "Boy Scouts National Service".

The Scouts will be asked to begin at once to get in touch with every Wartime family in their community, and ascertain how each can be assisted. A variety of help is planned, such as shoveling snow, bringing in fuel, disposing of ashes, and in rural areas Scouts may help by taking care of live stock, looking after gardens

Some persons regard the king salmon as the most dangerous of all wild creatures now inhabiting the earth. It lives in the Indo-Malayan area, and is much used by other salmon.

Thirty-two members joined in the big donut campaign originally, said Mrs. Ralph Hall, president of the ladies, and 24 new members joined during the campaign.

In The Public Interest

Old Gold Motor License Plates Should Be Destroyed

The new motor license plates are being issued. What is being done with the old 1939 ones?

A discarded motor license plate is almost as useful as a used safety razor blade though it may seem to many to play a farce in the woodshed wall. But between now and the end of the year a pair of them may be useful to someone who has no right to them.

Readers have found in the past that car thieves hold up cars, burglars break out of other cars and have been taking full advantage of the laxity of manners in leaving their old plates lying about. They rather take so many sets as they can buy books of old and worn plates and have printed up and used again. Owen Sound Sun-Times.

Mrs. Stronquest of Chesbull visited friends at Alix from Saturday to Tuesday

---

Thos. Scott returned Monday from Victoria, B.C., where he has spent the past year or so.

Sidney Dumbleton left for Calgary recently where he has joined the Canadian Active Service Force

---

W. F. Vaughan, who skipped on the post office stamps a couple of months ago, returned to town last week in Sweetbay for dedicated workshop, but is now much improved.

K. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Thursday morning, April 2nd. Or Wednesday to Saturday of each month, consult at Calgary office, 208-209 Sun Insurance Building.

THE CONTROL OF SEED BORNE DISEASES OF VEGETABLES

Many serious vegetable diseases such as pod spots of beans and peas, black rot and wilt of crucifers, blight of celery, lettered blight, our new seedling rots of corn, leaf mould of tomatoes and many ornamental plants are seed-borne. By planting seed free from the parasites which cause these diseases the grower can often prevent serious losses. However, the vegetable grower is not in a position to know the original source of the seed he is planting and has no guarantee of its freedom from disease. Under such conditions the advisability of seed treatment as a precautionary measure is obvious.

There are many chemicals which are effective in killing seed-borne parasites, but the resistance of seeds to the adverse effects of different substances varies to such an extent that no single treatment can be recommended for all. Solutions of mercuric chloride and formaldehyde were among the first treatments to be used extensively and are still frequently recommended. There are distinct disadvantages in using these liquid treatments, not the least important of which is the necessity of planting the seed after soaking or drying it before it can be stored. Within the past few years, organic mercury, copper and zinc compounds in the form of powders have largely replaced the older liquid treatments, due to the fact that they can be used dry. In addition to having good fungicidal properties, they can be applied more simply, do not interfere with seed storage and, when used in proper amounts, are not injurious to the seed or to the germinating plant.

As in the case with liquids, dust fungicides differ in their effects on different seeds, some being definitely beneficial, while others cause reductions in germination. The two most commonly used for treating vegetable seed at the present time are copper oxide and ceresan (hydroxymercurichlorobenzene). Both these compounds are usually applied dry in quantities just sufficient to cover the seed thoroughly, one level teaspoonful per lb. for small seeds (beet, cabbage, etc.) and one-eighth teaspoonful for large varieties such as peas, beans, melons, etc. When treating, place the seed and fungicide in a closed container (a paper bag, the can or large drum, depending on the quantity being treated) and turn it end over end a sufficient number of times to cover the seed uniformly with fungicide.

Most varieties of vegetable seeds can be treated with either copper oxide or ceresan, but certain ones show definite preferences. All cruciferous seeds as cabbage, cauliflower, etc., are benefited by copper oxide, while good results are obtained with ceresan. With spinach and tomato, however, the opposite is true, copper oxide being prohibitive.

Dust treatments have a tendency to increase the friction between the seeds, with the result that they do not flow readily. This is not significant when planting by hand, but if a seed is to be used in a planting machine it may be necessary to add a lubricant. Talc is often used for this purpose.

Mrs. John Ita to and daughter returned home from Calgary on Thursday. The little girl has been quite ill. We are pleased to report that she is now much improved in health.

Anne Pihlaja, of the Highway Service Station, and Cleo Bourne motored to Stettler last Friday

---

Spring-time and Spring-cleaning-time are fast approaching, and now is the time to make-preparations for the renovation of your home. Let us handle your well-papering needs. A satisfactory job at a reasonable cost is guaranteed—A. S. Bissett.

Mrs. Lee Olson of Red Deer spent the week-end as the guest of Mrs. R. Peters.

Miss Sylvia Tillard is spending the Easter holidays at Lousana.

Robert Dumbleton left for Calgary recently where he has joined the Canadian Active Service Force

---

W F Vaughan, who skipped on the post office stamps a couple of months ago, returned to town last week in Sweetbay for dedicated workshop, but is now much improved.

K. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Thursday morning, April 2nd. Or Wednesday to Saturday of each month, consult at Calgary office, 208-209 Sun Insurance Building.

THE CONTROL OF SEED BORNE DISEASES OF VEGETABLES

Many serious vegetable diseases such as pod spots of beans and peas, black rot and wilt of crucifers, blight of celery, lettered blight, our new seedling rots of corn, leaf mould of tomatoes and many ornamental plants are seed-borne. By planting seed free from the parasites which cause these diseases the grower can often prevent serious losses. However, the vegetable grower is not in a position to know the original source of the seed he is planting and has no guarantee of its freedom from disease. Under such conditions the advisability of seed treatment as a precautionary measure is obvious.

There are many chemicals which are effective in killing seed-borne parasites, but the resistance of seeds to the adverse effects of different substances varies to such an extent that no single treatment can be recommended for all. Solutions of mercuric chloride and formaldehyde were among the first treatments to be used extensively and are still frequently recommended. There are distinct disadvantages in using these liquid treatments, not the least important of which is the necessity of planting the seed after soaking or drying it before it can be stored. Within the past few years, organic mercury, copper and zinc compounds in the form of powders have largely replaced the older liquid treatments, due to the fact that they can be used dry. In addition to having good fungicidal properties, they can be applied more simply, do not interfere with seed storage and, when used in proper amounts, are not injurious to the seed or to the germinating plant.

As in the case with liquids, dust fungicides differ in their effects on different seeds, some being definitely beneficial, while others cause reductions in germination. The two most commonly used for treating vegetable seed at the present time are copper oxide and ceresan (hydroxymercurichlorobenzene). Both these compounds are usually applied dry in quantities just sufficient to cover the seed thoroughly, one level teaspoonful per lb. for small seeds (beet, cabbage, etc.) and one-eighth teaspoonful for large varieties such as peas, beans, melons, etc. When treating, place the seed and fungicide in a closed container (a paper bag, the can or large drum, depending on the quantity being treated) and turn it end over end a sufficient number of times to cover the seed uniformly with fungicide.

Most varieties of vegetable seeds can be treated with either copper oxide or ceresan, but certain ones show definite preferences. All cruciferous seeds as cabbage, cauliflower, etc., are benefited by copper oxide, while good results are obtained with ceresan. With spinach and tomato, however, the opposite is true, copper oxide being prohibitive.

Dust treatments have a tendency to increase the friction between the seeds, with the result that they do not flow readily. This is not significant when planting by hand, but if a seed is to be used in a planting machine it may be necessary to add a lubricant. Talc is often used for this purpose.

CIVE YOUR CAR A BREAK!

You wish your dentist or regular physician in a preventative service.

Your car needs to be checked at regular intervals so that you may enjoy increased mileage performance and comfort.

PREVENTION SERVICE

For your car is an economy. Let us demonstrate.

An increase of 2 miles per gallon saves you approximately $10 in 5000 miles.

LACOMBE SALE AVERAGE PRICE IS $126

LACOMBE — The three-day Lacombe district sale concluded on Thursday with a total of 815 horses sold for a gross sum of $30,205, an average of $37.08 per head.

HOPE TO SALVAGE PLANE

SANTA ANITA, Calif. — In spite the young woman plunged 1,000 feet to her death in an open field from a plane last week. A note found in the automobile at the airport warned it had $5 for a plane ride and "it takes courage to die this way, but it is easier than living in the position I have had."

HUEY LONG'S PAPER QUITS PUBLISHING

HAMMOND, La.—Another link that held together Huey P. Long's political and dynasty has faded from the 3 surname scene — the American Progressweekly newspaper. The newspaper established by the "Kingfish," which he was governor and used by Bill Hall to help win the United States senate and proclaim his program to "share the wealth," remained alive at his death in 1935 the state administration's principal organ of publicity.

ABDICATION SPEECH SECRET DECISION

HELSINKI — Field Marshall Baron Carl Gustav Mannerheim, leader of the Finnish armies at the recent war with Russia, was decorated last Friday with the highest military honour of the nation — the newly-founded Liberty Cross. He is the first ever to receive this decoration.

OBJECTS TO SUDDEN END OF BRITISH HOLIDAY IN INDIA

LAHORE, India— An Independent Indian resigned to the British empire's party "must lend to civil war and the shaking of primitive tribes." A Jat Sikh, leader of the Moslem league, told 3,000 persons at the opening of the league's annual session here Friday.

Jinnah said the only solution of the Indian problem was the division of India into "autonomous national states." He suggested the creation of Mohandas K. Ghandi, Congress party leader, to confer with him in one effort to reach a settlement of Hindu-Moslem differences.

Sudden termination of the British regime in India without proper safeguards for both Hindus and Moslems "would lead to chaos", Jinnah warned

SHIP'S 180 BALLOT INTO 10 PIECES

This proportional representation voting confuses a lot of people, including an early voter at the Edmonton polls. Scrapping out of a curtained booth, proud of his duty well done, he handed his ballot to the astounded poll clerks in 10 pieces!

What could the lines under the names be but to help in tearing, he thought. Apparently longer tearing cut each name one by one, casually chasing officials who neglected to perforate the lines for his convenience.

After the poll officials got over the shock, they gave him a new ballot and let him start all over again, asking him please not to tear up the ballot even if that was the way he felt about the whole business.

FAITHFUL AFTER DEATH

From my own home town—a small city in southern Ohio—less than a decade ago, came the story of somebody "Greyfriars' Bobby"—a red show belonging to a noted lawyer

For more than five years, "Chubby," as he was called, lived hospitably in his kind master. Then, one cold winter, the lawyer died, after a brief illness, of pneumonia.

Chubby wandered disconsolately about the house for several days, refusing food and water. Finally, his mistress took the show with her to the cemetery where the lawyer is laid his husband's grave with fresh flowers.

And, strangely enough, Chubby seemed to understand! He returned home with his mistress; ate and drank, and resumed his normal life. But every day afterward, as long as he lived, the faithful show made two trips daily to the cemetery, winter and summer, lying at length for an hour or so on his master's grave. And then, seemingly contented, he returned soberly back to the house, a distance of several squares.

Only the story of a faithful dog, but the fidelity would put to the blush many human beings.—Irene Alford Bates, The Times-Herald, Washington, D.C.

"QUINTS" REVEALED TO BE JUST TIME SWEATS!

MINNIE Fin back to be home, Mrs Edouard Calluhan, 22-year-old bride of eight months, was told today that she would be the child normal in ever

Her father that she would become the mother of quintuplets in two days sensation that was dollar Thursday night but when the baby examination was over the seven girl birth to only one

STEPS ON DYNAMITE BOX — LIGHTS MATCH, AND—POOF!

LOGELEE — Corporal Harry Carter, 36 veteran treasurer of forces in Pacific line, one of the lawyer that now war correspondent in the United States stood astride a box of dynamite last week exploded it and died three hours later. "I was on a train," he said on the operating table, but declined to say just the declaration.

NEW ZEALAND PREMIER DEAD

WELLINGTON, N. Z.—Rt Hon Michael Joseph Savage, premier of New Zealand since 1935, died Friday at his residence 68 years old.

NEW PRIMATE ABBOT AIR FORCE GROWING

LONDON — Observers are caught in Canada and elsewhere for the next Polish army and for here when it's Britain's air force. The official first contingent of 1,000 volunteers, of thirty C.F. first echoers, 100 were "plump-ing" Canada, with 201 second choices going to Bowen and 149 to Macdonald. The soldier's vote added eleven votes to the choice of Bowen and two to Macdonald.

Official figures for the country gave Macmillan 3317 first choice votes to Bowen's 2561 and Reynolds 2421. Macmillan got 1,000 more second choices in the constituency, most of which were marked with an X.

TEES TOPICS

Mr. E. J. Giles of Bonnyville, Alta., and Mrs. Giles and Bert Rosen of Lacombe, arrived here with cattle and settlers' effects on Monday. Mr. Giles purchased the Carter farm two miles west of town and both Mr. Rosen's are moving onto the Carter farm at once. Mr. Giles has also bought a threshing outfit.

Mr. and Mrs. Ed. Lawrence left on Thursday for Edmonton where they will spend the winter

Eggs In Denmark

New Danish regulations governing the sale, export and export of eggs, promulgated by the Danish Egg-ing and Auto-ciation- Feb. 1, 1934 in Denmark, the world's largest egg exporter until the war broke out, with Great Britain and Germany the best and normal customers, are comprehensively, should be of considerable interest to producers in Western Canada, in view of Danish efforts to maintain her supremacy in the market under great handicaps imposed by our embargo.

Denmark was the first country to put the stamp of nationality on each egg, and the procurement of that country began that the new regulations with producers is still better quality and thus continue to consolidate the good name of Danish eggs abroad.

The most important new regulation is that all who buy or receive eggs of pressed or lower quality for sale or distribution must in future pay the producers of under a lower price than that paid for first quality eggs, and the dealer must carry the lower price back to the producer. This under-price is determined by making a deduction from the price of first quality eggs, and will be fixed by the Minister of Agriculture and Fisheries on the recommendation of an Egg Board appointed by him and consisting of a representative of the Government Control Service for Butter and Eggs, etc., and delegates from exporting, producing and trading centres.

Any person buying eggs from producers or from others than producers for the purpose of re-selling them the latter category of persons, dealers, mean- nately the Government Control Service on a special form, provided certain conditions are complied with, he will then be authorized by the Ministry and only persons so authorized may engage in such trade. No producer may supply eggs for sale, and no authorized trader may receive eggs, unless on delivery such consignment bears and Packers on the identity of the producer can be established with certainty

* * *

Three Marking Methods

Three ways of marking are open.

(a) Every egg when received from the producer must be distinctly marked with a number allotted to the producer by the buyer or

(b) The eggs of every producer must be delivered to and packed by the buyer in a box marked with the name and address of the producer, or a number allotted to the producer by the buyer and no other eggs may be packed in the same box, or

(c) On delivery, the eggs from each producer must be securely separated in the boxes from the eggs of other producers, and each box must be packed by a special delivery document.

Each producer is held responsible that every egg he sells is of first quality unless he has marked it "second class", if he sells eggs for further distribution, however, he will generally not be held liable if he approves of the grading of the eggs made by the buyer.

No eggs may be received from a producer between the hours of 6 p.m. on Wednesday and 12 p.m. on Thursdays. The purpose of this regulation is to prevent speculation by the producer in a possible rise in the quotation, which is fixed every Thursday at noon.

Eggs despatched by the parking stations must be placed in suitable boxes, and these boxes must be kept from and clean and be provided with lids. The packing material must be dry, clean, unscented and in good condition. Bones must be protected from rain and sun, and eggs must not be conveyed in vehicles together with goods which are odorous or in any way liable to transmit any smell or undesirable taste to them.

No fundamental changes have been made in the regulations regarding the export of eggs and the packing of eggs for export. As hitherto "Fresh Danish Eggs" for export must all be stamped with a mark approved by an oval encasing the word Danish". Under previous regulations Danish eggs of second quality could not be exported, and there is no shortening of this rule in the new regulations. The new order includes provisions as to the dimensions and quality of the boxes used for packing egg boxes, and the use of second-hand material is prohibited.

* * *

War Indigestion

"Fresh Danish Eggs", "Danish Cooped Eggs" and "Danish Cold-Stored Eggs" may be imported only in flats containing 720 eggs in two layers, or in boxes of 360 eggs. In the latter event the eggs must be placed on moulded trays of a pattern sanctioned by the Government Control Service, or in related cartons. The Danish government, however, admits that the exporters of war may make it necessary to give temporary dispensations from these rules."

Formerly there were no special regulations governing the sale of eggs in the Danish home market, but this has now been altered by the Eggs Act. In the wholesale and retail trades all eggs sold must be first class unless otherwise stated, and each egg is marked accordingly in the prescribed manner. Furthermore eggs must be sold by weight unless they are displayed for sale in distinctly named grades.

An Unusual Order

Pennsylvania Firm Making Rubber Heels For Finnish War Heroes

The Grove City Brass and Bronze Company, Grove City, Pa., announced it is making castings in addition to order for 4,000 rubber heels for horses in the Finnish army. Company officials said the heels, best of all those that ever made, are to protect the animals from a corrosive gas that collects in battlegrounds. The gas attacks the hooves, crippling the horses. The heels are 16 inches high, tinted with rosettes.

Japan's Gold Reserve

Record Secrecy Shroud It Most Be Huge Sum Running Astronomical

A survey of Japan's financial and economic situation after the strain of 22 months of war in China and even the Japanese will have serious difficulties in purchasing vitally needed industrial and war supplies abroad.

Japan's domestic economic and financial troubles are increasing daily like a giant trade is declining and the reserves of the gold reserve is approaching with meagre portents for the future.

Imposition of an embargo on the various materials purchased in the United States such as cotton, scrap iron and oil, copper and wood pulp would accelerate the critical weakness reported abroad for Japan Japanese government, which failed August 1938 were more than $200,000,000

Japan has just paid for its American purchases by shipping gold bars valued at $170,000,000 since the outbreak of the Japanese-China war. Japan was not, in view of Japan's known gold reserves overwhelmed at cannot already be to where it will dig up sufficient gold in the immediate future to pay for vitally needed supplies.

Japan's financial manoeuvres and the secrecy imposed on gold production and shipments since July 1937 indicate the estimates of the gold reserves a guessing game with many Japanese government providing wide margins for error

Taking Nursing Course

Princess Elizabeth To Add This To Her Other Studies

Princess Elizabeth's education was the subject of many family conferences during the Christmas holidays says the London Daily Herald which states that the Prince-ess her self is eager to take up nursing work. She has already begun to learn what she was about the same age during the last year Queen Mary a fire believe in official training for women called their "apprentices and it has now been decided that a course in hospital duties will be added to the curriculum of the Princesses for the near future. Both Princesses have already had lessons in first aid duties for the troops, and behind the scenes they have contributed generously to the collections of clothing and other things sent to the various depots. All their early activity in help in making of comforts was confined to knitting, but Princess Margaret especially has been assisting more needlework creations and has been helping in the sewing machine was among the presents she received at Christmas She spends some time each day learning to use it.

Hard Bath Ways

Unscrubbable Difficult With Following English And Dud Record

Leonard Lyon, in the New York Post tells this story: Prime Minister the Hungarian playwright took a newspaperman friend to the Savoy-Plaza to find a suitable room for him. Minister who is learning to speak English, was taught to say the only in charge of reservations. He learned his lesson well. English and said I can speak French as well as that, but we'll talk in French and attempted to converse in unutterable first-grade French. The moment pleased Minister interrupted: "I speak English as well as that. So we talk in English."

Just In Reverse

With warranty a sound the luxurious car pulled up before the seaside hotel and an old, grey haired man alighted.

"My doctor advises me to stay where the sunsh- wunn blows continuously," he remarked to the manager. "Does it blow here."

"It does sir," returned the other. "You are very fortunate to have stopped at exactly the right place. The south winds always blows here."

The old man stuck a monstered-temper in the air.

"Always?" he repeated. "Are you sure? It appears to be coming from the north just now."

"You're right, sir It's on its way back."

Trained Airmen

Lake Land Townsmouth Said Great Possibilities In Any Air Effort

Canada - tremendous wartime air effort will place her in the very forefront of aeronautical development after the war and will supply her with a tremendous great possibilities of peace.

This might have said Sqdn. Ldr. A. A. Cuthbertson, D.S.O., Dominion Air Training Controller, recently on a visit to his native Montreal.

Canada, he continued, is an ideal country for training air men. She would be able to get more flying hours per week than in any other country, enough that's a big factor. Also, Canada's Agricultural has been a big asset to the war.

The machine conditions at present, Cuthbertson said, are ideal for the latter months the war have the greatest number of machines in the air. Then, as the war ends, the machines will be scrapped and the pilots released to civil life. Then get Registered and certified pilots for civil aviation. Canada's high grade inspected must were not available for the present time and high standards set by the International pilots are adopted by the Canadian Air Force Armies appears on the market.

The Customer Is Always Right!

Success Of Registered And Certified Seeds Said In Customer Packets

For years the customers of grocery drug and men stores have advertised for seeds that would grow vegetables that looked like the pictures on the packet.

Then some bright seed merchant decided that if customers would grow vegetables that would look like the pictures on the packets, he should be able to sell more seeds. He decided to see to get certain seeds that would grow more nearly enough like the pictures to satisfy the customers. He succeeded and Agriculture has been doing much the same.

The merchant's customers, of course, were pleased with the results and the latter needs the new have the pictures on the packets. Then the seed merchant decided to put a seal on each packet certifying that the seeds in the packet were registered and certified seeds. He found that the customers were pleased with the seals and began to advertise them.

Today, for the first time in history Registered and Certified seeds were offered for sale. Robert Simpson Limited, Toronto, Ont., is the large organization. This year after the sale of the seeds of the year it is announced adopted an official packet and to call the packets as packets can be used for the seeds that are purchased for planting. The seeds are all grown in Canada and are packed on the farm purchased in the presence of a Government official who fills in the certificate himself and signs it. The certificate is then placed in the packet. Simpson's advertisement in this issue of The Free Press appears on page

Would Be Rich Prize

Bet Nazis Knew Attack On Sweden Might Be Disastrous

Sweden would be a rich prize. She is the world's greatest exporter of iron ore. Besides having mines in the Arctic Circle, in addition to two million tons of high-grade ore, much of it available through strip-mining.

Germany gets more than half of her iron-ore imports from Sweden. Of that source were cut off German arms factories would shivver up.

Therein lies not only a danger to Sweden but a safeguard. For if Germany were to throw a blitzkrieg at Sweden and the blitzkrieg didn't take the lifeline of the Reich's ironmasters would be smashed. Besides a substantial army and would certainly get prompt help from England for the asking Hitler, knowing all that, would presumably commit his astrologer twice before entering on the Swedish adventure.

Leather Glove

Industry Contributes Cows From Farms Of Canada

In the manufacture of 562,898 dozen pairs of gloves, the Canadian leather glove and mitten industry of Canada in 1938, for which the latest details have just been published, used 3,875,627 square feet of sheepskin, 3,038,886 of cheepskin, 1,125,220 of horskide, 4,127,617 of muskrats, 679,863 of goatskin, 391,751 of capskin, 80,410 of deerskin, 77,614 of kangaroo, and 56,403 of other kinds of skins. In addition 10,272 worth of split overseas kinds of leather; and 2,260,850 of other supplies were included in the manufacture. The total cost of materials used amounted to $2,931,620.

* * *

The amount of shingles cashed in Canada in home consumption of Canada during 1938 aggregated 831,617,000 $31,521 compared with 726,986,000, 732 in 1935, a gain of 9,091,000,000.

A QUESTION OF "CHEAP ADMINISTRATION"

The Dufferin Times could not have given the matter a great deal of thought before comparing costs of administration in the adjoining municipal district of Bisley and Lanerton, and the comments which appeared in the last issue of the Times, under the heading, "Cheap Administration," demonstrate that it has done so.

Lanerton has not quite a dozen times as much land under cultivation as Bisley, but its population is large enough to constitute a fairly respectable municipality.

The Times says, in part: "In checking over our exchanges papers from the Lanerton-Bisley Board, in the Alix Free Press regarding tax M.D. of Lanerton and feel they are of interest when compared with those in the local council," sole exception. Also reports the secretary's salary $2,000 per annum assessor (secretary) mileage only—30c mile, another $349.00. The same amount in Dufferin are secretary's salary $1,500 (assistant $600), assessor (secretary) $600, mileage, assessment on percentage basis, auditor $80.00.

It would appear that local newspapers are getting their dollars at the expense of the ratepayers.

Lanerton has not only a larger population than Bisley, but it is also much wealthier. The average number of persons per family was 3.3 of the number, 3.3 were over 18 years of age and 1.8 were under 18 years of age. The average expenditure was $761. Twenty per cent of the families spent more than $1,000 in the Municipal District. The average living expenditure was $681 per family. In Quebec the average was $703, Ontario families had the highest expenditure of averages, $39, as Manitoba the expenditure was $726 while in Saskatchewan, it was $562, Alberta families had the second highest expenditure of averages, with $538 on the average. The breakdown of the budget shows that food costs were $646, food and light $51, shelter $51, clothing $138, furnishings and household operation $102, medical $102, health and personal care averaged $58, recreation $54, transportation $58, life insurance $40, automobile insurance, by workers $97, gift and contributions $40, miscellaneous $107. Of the persons, food accounted for 38.4 per cent and clothing 16.6 per cent.

In the new country was always unable to secure data on farmers' operating expenses. The average yield of farms in given as $384. Farm expenses were lowest in Quebec and highest in Alberta, the figures being as follows: Maritime Provinces $577, Quebec $337, Ontario $1,1 Manitoba $1,000, Saskatchewan $1,043, and Alberta $1,238. These figures do not include taxes or interest charges.

The farms averaged 401 acres in size, ranging from 130 acres in Quebec to 609 acres in Saskatchewan. It will be observed that operating expenses averaged higher in Alberta than in other provinces. This is, in part, explained by the fact that drought did not affect crops as much in Alberta and Manitoba as 1937 as it did in Saskatchewan. Increased income would necessarily affect expenditures on Saskatchewan farms.—Alberta Pool Bulletin.

THE FUTURE OF CANADA

There are some Canadians who are regarding the prospective spending of from $300 millions to a billion dollars a year on war as a panacea for Canada. They forget nothing but prosperity can follow such spending.

There are strong reasons to believe that, far from approaching bankruptcy, the Canadian country has come out with her productive powers greatly increased. Also the unemployment now being spent here by the British and French governments will enrich the Dominion. It is unfortunate that the spending nations will be drained of a great deal of their wealth, but Canada is sure to benefit tremendously.

Furthermore, once the war is ended, there will be a boom in the world for the goods for Canadian farm products, metals, lumber and wood products, etc., will continue to increase in demand. European and Asiatic nations will require rehabilitation. — Brandon Bulletin.

SAD STORY FOR EASTER

And now for a sad note for Easter. It seems there's enough white stuff in heaven now's drag from use the name of the heroine in the tragedy She had gone to town next day but Monday to make sure of getting the pick of the new Easter hats. She parted with $23.95 to become the proud owner of a beautiful confection that looked like a flower garden on top. On the way home her—must a courtesy call at the funeral of a neighbor. During the program chock of floral head gear before entering the church. she handed it to a lady friend with the request, "Will you take charge of this for me?" "Certainly madam," he said with a funereal bow.

Next glimpse the good lady had of her new hat was when the organist produced the stole. Her new Easter bonnet reposed on top of the coffin.

The last chapter was when she met it was through the glass window of the hearse as it drove off with the corpse. In the sweet lady receive the recognition to redeem the bonnet by night. We deserves a couple of dollars for the lodger. —"Passing Show", in the Edmonton Bulletin.

BIBLE DEBU

The "bear" of the Bible have no sting in them. It has been remarked by somebody who, hooked up a lot of them, as follows:

"He kindly established in safe residence."

"He sober, and would make prayer."

"He contrast with such things as you have."

"He strong in the Lord."

"He overturned."

"He put robe in your own counsels."

"He not hospitable to mountain strangers."

"He followers of God, as dear children."

"He does delight unto death, and will give them a crown of life."

The World Of Wheat

In 1929 the Wheat Testing Plot farm in Alberta, Saskatchewan and Manitoba in co-operation with the Dominion Experimental Farms, a large number of small plots of different varieties wheat. Each plot was sown with exactly the same amount of earth fully measured seed so the accurate yield were found by determining the averages of the plot yields as bushels to the acre in Alberta, where there are 27 test farms, were as follows: Garnet 18, Red Bobs, 34, Marquis, 29, Thatcher 40, Reward 46; and Hard Red 37.

In 5 hutchenson where there was 27 test beds had red rust entirely the plots were: Thatcher 42, Reward 35, Regent 26, Apex 48; Hard Red apex 25.

In Manitoba, where much black stem rust and much had rust occurred, the yields were: Reward 41, Regent 41, Apex 28, Thatcher 37, Marquis 38.

The Dominion Experimental Farm officials state that the yield and quality tests are too small a basis to support the results that have been consistently obtained in their own Ex perimental Farms — Regent Best.

In interesting test was these plots in Alberta in some other, of the Dominion how much the usual growth of weeds robs the farmer of yield per acre.

The results of this will be shown at the Edmonton Spring Stock Show.

HONOR THE NEW C.N.P.

O Motherhood, O Motherhood,
We have heard the call to arms.
We have risen, as our Fathers arose,
To face the coming storm.

The fourth our fathers carried,
We fifth it shoulder high.
That it may flutter in the breeze,
We shall not let it die.

There's a phantom army with us,
We can feel their presences near,
Softly we hear their drumming,
Also it well, be of good cheer.

O, Motherhood, O, Motherhood,
Let us not die in vain.
As our fathers did, whose they hoed the call,
In the last decade.

Let us crush the Hunnish Monster,
Till it sees beneath the sod
Where our battle cries will ever have to howl.
The path their fathers trod.

—W. Sagleyn

CHAPTER XIV (Continued)

Two days later when the early November dusk began to fall, the upper forest of the territories beyond the Missaway Falls was a living trap, pulsing the steel hood of frozen mist angled down off the tundra, and followed the ice-hard trail through the scrub to the camp. The absence of two dogs had aroused long to Alan, accompanied by the memory of Heather's kisses and her curling arms.

As they approached the tents from the rear the dogs broke into a trot and Alan called Hello there!

There was no response. No flicker of light from the supper fire in front of the men's tent stabbed the murk of the curving spruce.

They must have been hunting back on the barren and are late in reaching camp, suggested Alan.

As the team entered the tents, Neel's black-eyes knotted. His supplementary eyes wandered back and forth striving to pierce the gloom. Suddenly the dogs became interested, sniffing the air and whining.

"By gar, something happen here!" whispered the Indian. Her look you stranger!"

Tortured by fear of what ghastly discovery the dusk-filled camp concealed Alan approached the tents.

Again he called John! Heather! Are you there?

The sound of starkness breathing and a muffled moan answered from the farther corner.

"God! Did you hear that? Something's happened, Heather! Heather!" he cried. Where are you?"

They reached the camp and stood staring at the gloom.

"Heather!" cried the agonized Cameron, stepping to her tent in fear her personal heart-gripping sorrow upon the grave lengths of the floor. He rushed outside to join Neel kneeling beside the body of John McCord in the camp's head.

"John! John!" What have they done to you?" cried the shocked Cameron throwing off the skin robe that covered the still shape breathing heavily in the bough floor. "Light a candle, Neel, quick!" he ordered as he searched with trembling fingers for wounds. while his tortured heart was calling "Heather! What have they done to you?"

Neel took the candle while Cameron pushed McCord's head. Across the giant's nape of yellow hair ran the blood-caked scar of a bullet wound. A large reddened lump had entered his left

"Shot in the back with a rifle! That's McQueen. Neel, not the Plantkap! They would have looked for camp tahtes the tents! McQueen's got Heather Neel! They've got Heather! Alan shouted.

"Dey got her," sighed the Indian. "Dat no get back from dere!"

He started on his knees to die when they left," said Alan. "How long ago did they leave?"

"Not might be her cloud, but not look his die morning in me."

LOOK OUT FOR YOUR LIVER

It may be the cause of your trouble. Dull, it up the right way, with Fruit-a-tives. Feel grand.

Fruit-a-tives is the largest organ in your body and constructed to your health. It assumes that take to digest food, gets rid of waste, stimulates the liver and purifies the blood in your blood. When your liver gets out of order your whole system suffers. You become constipated, bilious, and suffer from headaches, indigestion, and pimples and boils. Fruit-a-tives acts directly on the liver and restores it to healthy action. Regular use of Fruit-a-tives will make you feel fine. Get a box today. At all dealers or send direct to Fruit-a-tives Limited, Ottawa.

FRUIT-A-TIVES

They started and stemmed the tornado as McCord's head and back and arms and bun set. Heather's tent knew they started a scream that rang above their heads and died away. But they knew that John McCord would never again see his daughter. While the life ebbed slowly from the man who had loved so long only to feed a grave on the shore of the River of Skulls they made their pause for parting.

Shortly there was a moan and Neel went out and found the trail of a toboggan sled leading in the river with the prints of moccasins on them were not the bone-gaun prints of the Hudsonal but the longer soles of the Cree who swam on the Bear Coast.

There was no doubt. At last McQueen had struck!

Instantly the wound sapped the courageous strength and vitality of the man who by unconscious To wood down he opened his eyes and seemed to recognize Alan who bent bends his him

Heather John! Was she hurt? Alan asked

The dying man's lips framed the word "No."

It was McQueen John—

After a period of grief and breathing came the gasped words "He Queen got Heather!

Then a grimness of pain knotted the bearded white face Shortly Mc-Cord again opened his eyes and managed to speak. Alan bent close so as he hear the lump head of his friend

Shot me but I got him. Alan heard faintly Heather she knew you Alan! Poor Heather!"

"I love Heather John! Do you hear me? I love her!"

For an instant McCord's strength returned. Again in his eyes flashed the blaze of the wonderful courage that shapes closed on Alan

"Hurt them? Not them!" he gasped hoarsely "They've got my girl my girl!" Hunt them gold Heather Jessup!

"We'll hunt them John! We'll get her! I promise you we'll get her!"

The white head fell back and the bold-browed seer when, numb with shock Alan felt his friend's heart cease to beat and, like a man in a dream, prepared to take McQueen s trail

When it grew light he found evidence of the newly broken trail in the spruce and the empty sled near the tents for some reason McCord had brought the right bags of gold from the sacked sled and the dog harness had found them at the camp But to the dead comrade the cause was secondary There the boys took the team and loaded the sled McQueen had got all Alan held dear in his hand but found the food that would keep the great Ungava strong on day after day they followed his sled-trail up the Kobuash. The goal that Mc-Queen carried a heavy load and the weight on his dogs and Alan smiled grimly—smiled as he remembered that 100 pounds of gold would only the sooner bring Heather back to him. Nothing else mattered. The gold lying untouched in the tents—nothing up the white scars of McQueen's trail

In the arch they found the dogs having dismally beside the body of a half-breed. Buyette that still the unburied McCord's automatic Everywhere the snow was trampled down where the men had camped the giant had fought for Heather and his gold. Then, back in the spruce, the dogs found a Montagnais s trail through the body with a .45.

"Dat one man we see on de Talking Rivvare! John Heather's dog on house."

"Shot in the back and weak as he must have been." said Alan, proudly. "He fought it out to the last! They must have left him for dead."

"Now we've got three, maybe four men ahead of us with Heather Neel. They won't dare to fly the plane until the gold. They'd bend it up for themselves."

Before they covered the body of John McCord with a cairn of stones deep enough to chest the wolverines, attending beside the dead man's head, Alan's hand found a piece of paper.

"Your head, Neel!"

Neel touched across the body of their friend and took Alan's hand.

With their left heads they bent the backs of their horses against their foreheads in communion of the sternest souls of the Montagnais as followed by Neel, Alan solemnly vowed.

We, Alan Cameron and Neel Lebasp blood brothers swear that we will follow McQueen until we meet him face to face and make him pay. Sleep well John McCord and Mc-pay! Your friends will not forget

They placed the body of John McCord beside that of Nagaya and covered it with the stones. The ground was frozen too hard to admit of digging. They promised by bringing that Heather had been forced to leave behind together with her tent, they added to the cairn of frozen meat and fish and then piled dried trees on the top. Neel started the impatient Ungavas on their two-day race up the frozen Kobuash. As they reached the river we Alan stopped and faced the bare tree that rose above them. Upon his outstretched hand in flame, wet, he called

Good-by John! We'll get her Neel and Neel and I'll get her Good-by partner!"

It was one up-hill mile to the cache at the tabulators and tempted as Alan was to turn starvation and follow McQueen night and day with a light sled until he overtook him, it would have been almost suicide in a gamblers country For Heather's sake as well as their own, Alan knew that he must have food for men and dogs to reach the high timber. Probably the pursuit had thrown well fed would wear down the flowing team ahead with its light load. For it was evident that McQueen's trail that together with the gold he was taking with him, would tend to rest h the head of the river where he probably had a cache

They got forty or fifty miles to start on. Neel, shod Alan, hit hard on the river ice. Then they threw weight into their collars and the long toboggan crashed off over the ice and into the Land Beyond.

They've been lashing they dogs to get a big lead and shake us off."

Ah hah! answered the Light sipped Indian But some day day we shall have to down fishers. He pointed at the shaggy huskies and the black loads piled on the backs of the hurrying men

If it be a long race if they did have the ate changed to meet pursuit Fort Gregory groaned Cameron, hopelessly by the thought of the long agony of being torn from her father of her daughter

"Dat you got more food you must carry of dey starve Indian. Dey have to kill and eat dogs when run dem off dere fast. Dat one day we starve with dem. Dey can more starve one day An we on our sled grow more light from food we eat. Dey get more run all day Dat Keagh wool eat up the snow You see Dey land dere dog now in de we save run

I know our four dogs are better than theirs," agreed the hopeful Alan, "but I can't bear to think of her with McQue- I'd like to take a week's rest and travel night and day until we reached her"

"Dat we starve before we no do

Premier Finland Says People Grateful For Canada's Help

Premier Kallio has assured the freedom and democracy and peace has again settled on the little republic. The Premier will be a member with thanks and gratitude the part which Canada among the nations of the world played in her deliverance. He promised A K Graham, special for Finland at the annual meeting of the Victorian Order of Nurses, New York, which at the R H McGregor school in Toronto.

"Finland has never asked, let those demanded any power in world affairs," said Mr. Graham. She never had any desire to modest or money but only to live in freedom as her own and her soul has been settled by her people since the beginning of modern evidence that has never attempted to step out of her boundaries and has asked only to retain that, which from time immemorial, has been her own.

"Finland has of course done a great deal herself but she is receiving assistance from other countries from those nations who also love democracy and freedom."

A big family is too expensive since modern education requires children by a book. It takes a different book for each kid.

Trying Something New

English Courts Substitute Week-End In Jail For Fine

Sometimes the courts are accused of conforming too much to traditions But they are now trying something new in connection with prison sentences. Men charged with minor offences are sent to a week-end prison where the offenders may work out their "time" from Saturday to Monday

Often the argument is used that when a man is sent to prison his family is really the sufferer. Usually the man loses his job and is unemployed on his release If he is merely fined, the fine generally comes out of the housekeeping allowance and not out of the man's own pocket.

The punishment of working during the week-ends spare time would fall on the man himself and not on his family It is pointed out that while the system would add to the cost of prison maintenance, such extra expense would be compensated by the fact that public assistance is nothing after the man's family has been reduced.

Well, we thought we would just mention the pit—Port Erie Times-Review.

CHAPTER XIV—Continued

"But think of her watching the back trail day after day, wondering why we don't come!"

"She knows we will. Every day, Alan, she knew we came for wild meat and gold. She knew the strong heart," consoled Neel as the two led the team down the valley between the forests. "She knows, Alan, she knows."

It was a long trail to the cache at the head of the river but, as the willing Ungavas took the heavy load over the river ice Alan's mad desire to lighten the sled by abandoning all but an attempt to overtake at once the girl he loved still fought with his better judgement. The ravage of that situation tormented him through the hours, spurring him on to. Somewhere up the Kobuash, where the men he followed were hauling their sleds—hitting her farther and farther away while she called to him—called his name. She could hear him.

At the forks McQueen's trail, swung up the Kobuash, as they anticipated it would, and they followed. He was making for the East Coast, but with Alan radiated like McQueen, if he got away, would carry to the coast with his stolen gold to wait for the ice to break up and the first boat. Somewhere on the trail, later on, Heather would be left behind by the young lady to the fates and the wolverines.

As they stopped to give the dogs a "breather," Alan dropped to his knees beside the bleak land-trail. Taking the husky's paws in his two sentioned hands over the dog's front, he bared it a clout from his pouting jaws and biting tongue, Alan studied the man-made's brown paws.

They've got her, too—got Heather, they're a long, long way ahead of us, but we're going to wear them down—going to run them off their feet before the end. We're going to get Heather, Neel. Heather who loved you."

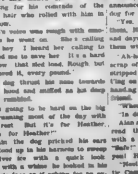
At the name, the husky pricked his ears and looked around, as if searching for his comrade of the long trail and whined with pain in the snow.

Alan's voice was rough with emotion, as he went on. She's calling to us now Neel, she knows we are coming to her. She knows we will never quit. Rough but we'll need it, every pound.

The dog thrust his nose towards Alan's hand and snuffed as his dogs licked his face.

"It's going to be hard on the big dog, running most of the day with the sled, but it's for Heather, Rough for Heather!"

Again the dog pricked his ears and stood up in his harness to sweep with the river as a white bonded in his master's face as if asking for an explanation



"We're going to get Heather, Rough."

In town Alan patted and talked to the dog, fondling his head.

"You three pups," he said, "are going to break your backs to help old Rough! We're going faster and faster and some day I'm going to ask you to do the impossible. You'll get—every last pound," to bring Heather back to us."

The great huskies bunched against the thin leggings of his mate, rubbing his head, as he talked to them while he rubbed their ears.

In the morning, starting in the freezing November air, under the stars, they pushed on in the dark-ness to make camp in the dusk of a wind-break of spruce. When fat, the tired dogs had their deep-holes in the snow and, curling up, came to sleep. Alan fondled their thick, double coats.

At the gorge of the Hookage unbroken white. It was still light, they hastened McQueen's first camp, in the thick scrub of the river bottom before the night.

"By gar, he drive them dog all day and all night," said Neel, examining the snow about the camp ground.

"They must have jumped our camp before daylight, then hurried on to go on with the sled all night. They must be that much ahead of us now," groaned Alan.

Sleep hole of sore dog here," announced Neel "They beat dem dogs.

"Yes, but we're two days behind them, Neel! It's going to be days and days before we begin to gain on them and then it will be a fight to the finish.

"Ah-hah' Wat dis?" Neel held a scrap of inner bark which had been stripped from a dead birch and bore the following cut. He was an economic and co-worker of the great animated Hebert, who also was credited a miracle the Germany in the world war, and helped prolong the same by taking nitrogen out of the air Hober discovered from the liquid ammonia and fled in ignominy Dr Bergius caught step slowly and is an eager champion of national secrets, although he did subdoing the plan to produce a pure Aryan, the Jewish atom. He is always elegantly groomed, quite British in appearance, and his savage photographed with his hat on. That is because his balancing right hand he can make most out of rowboat and neighbor, but he hasn't yet developed a hair-raiser.

SOLICITED RECIPES

ORIGINAL ALL-BRAN MUFFINS

Submitted by All-Bran

¾ cup molasses
½ cup milk
2 eggs
1½ cups flour
½ teaspoon salt
2 teaspoons soda
1 cup All-Bran

Add All-Bran to molasses and milk and allow to soak. Add well-beaten first egg and add to first mixture. Sift flour, salt and soda together and combine with All-Bran mixture. Bake in greased muffin tins two-thirds full and bake in moderately hot oven (400 degrees F.) about 25 minutes. Yield One dozen medium 2½-inch muffins.

CORN AND CHEESE POTAGE

4 tablespoons butter
4 tablespoons flour
12 Christie's Soda Wafers
6 cups milk
1 cup corn
1 cup grated Canadian cheese
Salt, pepper, paprika

Melt butter in a kettle, add onions and brown slowly Crumble crackers and add stir until smooth. Add milk, a little at a time, and heat thoroughly. Add corn, cheese, seasoning and serve hot with buttered soda crackers. Six portions.

Big Bounce Popsies

Canadian People Learn Apple Juice Is Good Drink

From the 1929 Canadian apple crop, about 1,000,000 gallons of cider were being made, compared with about 68,000 gallons from the 1931 crop, according to the Dominion Bureau of Statistics. Considering that it is an incomparable beverage, it can be bought in fine grocery stores at very reasonable prices and every tin so bought helps Canadian farmers to prosperity. Canada's most undoubtedly possesses a Viceroy of undoubted versatility. Even the newspaper reports that he is a "good mixer, a hard worker, a keen farmer, and a delightful boy promoter of evangelical convictions with a voice of pleasing personality."

The U.S. Bureau of Fisheries greatly increased public demand for dogfish as a food by changing the name to grayfish.

There are 400 islands in Japan, but only four are large.

A Real Miracle Man

Hope Of Health As Food Creator Is Published Bengine

Lemuel F. Norton, in the New York Sun, says:

A tall, bald, unassuming scientist man in Germany's hope in the critical struggle for nutritious foods. With the current news story that the Reich's 1933 production of cereals gasoline will reach 15,750,000 gallons President Bergius is the top-hot out of the brothers Grimm to relieve Germany always borne in her new leader and years. He are the patents for liquefying and hydrogenizing coal and distilling it into gasoline. As a huge new plant gets under way at Scholven he is getting the most important a safe individual in the Reich, to the new fuel it will manufacture, both in quantity and quality, and they expect him to bring it through.

It was Harvard University which tagged him as a modern magician, when he was given an honorary degree at the tercentennial celebration several years ago. His passion for making synthetic gasoline were becoming them noised by Mitchell Palmer, then property custodian, in the world war The American chemical industry had much ever evinced any interest but were disappointed to find that the Germans had kept out the master key to such cons

Dr Bergius 57 years old, is also an industrial and born Leipzig, educated and in 1931 received the Nobel prize, with Carl Bosch, for his process for liquefying coal. He was an economics and co-worker of the great Hebert, who also was credited a miracle the Germany in the world war, and helped prolong the same by taking nitrogen out of the air Haber discovered from the liquid ammonia and fled in ignominy Dr Bergius caught step slowly and is an eager champion of national secrets, although he did subdoing the plan to produce a pure Aryan, the Jewish atom. He is always elegantly groomed, quite British in appearance, and his savage photographed with his hat on. That is because his balancing right hand he can make most out of rowboat and neighbor, but he hasn't yet developed a hair-raiser.

Outstanding Versatile Author

Tribute Paid Late Lord Tweedsmuir By Another Writer

Isaac F Marcosson in his book, "Adventures in Interviewing" writes feelingly of the great gifts of the late John Buchan (Lord Tweedsmuir). He writes: "When war (the Great War) broke out Buchan offered himself for active service but was rejected because of over-age. A little thing like that did not daunt him He was one of Kitchener's most active aids in the first British recruiting campaign. After serving as one of the Times correspondents at the front he joined Hoop-d-ding's intelligence officer He was present at every stage of the Battle of the Somme. . . . It is part of his now-famous history of the War Cabinet that Buchan here he felt about his writing, and he replied with that colouring suggestion.

I regret nuisance as my profession, writing as my amusement, and I look as if some kind of politics is going to be my duty' . . .

GEMS OF THOUGHT

OCCUPATION

Indolence, as a delightful but distressing state, we must be doing something to be happy Action is to our necessities. Thus Providence has the instinctive tenderness of the human frame.—Hazlitt.

Absence of occupation is not rest, A mind quite vacuous is a mind distressed Cowper

As every thread of gold is valuable, so is every moment of time.—John Hughes

All successful individuals have become such by hard work; by improving moments that others waste; by labor and hours that other people may occupy in the pursuit of pleasure.—Mary Baker Eddy.

He lives long that lives well, and time misspent is not lived, but lost. Herbert

This is the gospel of labor,
Ring it, ye bells of the kirk;
The Lord of Love laid it down
from above
To live with the man who work.
—Henry Van Dyke.

Children Were Right

Debaters Have Learned Something About Food Value Of Spinach

Mother and Dad can be wrong. The Regina Leader-Post, realizing lessons food chemist, told a civic organization at Redlands, Calif., debaters have learned something about the value of spinach. Their research apparently was successful, for they won the debate by a unanimous decision of its two is available.

"But they're not the chief of it. The whole subject is an eminent preoccupation the children from other Food Chemists of it every.

"After all, youngsters have been correctly right in their hunting about spinach. We suppose the mother of sturdy bodies."

Two centuries ago Catherine the Great of Russia had a 900-piece set of Wedgewood pottery.

Don't let hard work get you down. Just work harder and step up.

Province of Alberta
Department of Agriculture

Protect Your Horses
Equine Encephalomyelitis
(Sleeping Sickness)
An outbreak of the disease may occur in Alberta this season.

VACCINATION
with Chick Vaccine is the only preventative.

PROCEDURE:
1. Vaccinate before seeding.
2. Two doses are required, given seven to fourteen days apart.
3. The Vaccine is available at Drug Stores, or may be obtained from Veterinarians, and some Municipal Districts may handle it.
4. If a qualified Veterinarian is not available, the Vaccine should be administered by some other person trained by a Veterinarian. Persons vaccinating to do so must obtain a serology and learn how to correctly carry out same.

Vaccine is effective only when administered prior to the outbreak of the disease.

Vaccinate Early!

The Department of Agriculture recommends vaccination as an immunization against loss.

HON. D. B. MULLEN,
Minister of Agriculture.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Lee Sanderson motored to Calgary this week. Lee says he certainly misses the cattle from Alix, as it is quite a long drive to Calgary.

Gordon Wilson and Harold Pinchuk left on Tuesday morning to take a few hockey games.

Roland Sayers left last week for Armstrong, where he has taken a position.

Miss Margaret Woodrow returned last week from Edmonton.

Mr Batchelor who recently purchased the Fred Haynes farm, returned Wednesday from Saskatchewan.

Mrs. Nancy Mosier of the Alix Hospital staff, who has been visiting relatives in Edmonton, left on Tuesday for Vancouver, where she will spend the Easter holidays at her home in Smithers.

Ray Wilson returned on Wednesday from Stettler, where he has spent the past three weeks.

THE WHEAT SITUATION

The possibility of the European war ending sometime in the near future is a subject that is on the lips of the world today, and if shipping could ply the ocean's unmolested there would be a supreme surplus of wheat, and the present price levels could not be maintained. It is now estimated that the world carry-over on July 31st will be checked at 180 million bushels an all time record and about 800 mill. bushels above the usual carry-over. In normal times 10 years this would mean nothing, but such a huge surplus would have a most serious effect on prices, and the facts that Argentina had a phenomenal crop failure in 39 and the United States has poor prospects for a winter wheat crop this year would not be able to offset the depressing effect of the huge carry-over.

If we accept the statements as read in our newspapers on Britain and France, the war will not end soon. Undoubtedly Chancellor Hitler of Germany is using every opportunity to end the conflict. The Allied view is that Hitler's word is valueless, and treaties and agreements mean nothing, and are not worth the paper written on; also that if peace is made now it will only be a few years before Europe is plunged into another war and Germany does may be in better circumstances to achieve success. On the basis of these arguments, it would appear that the war will go on and probably will last for several years.

On the other hand, people should recognize that there is always the possibility of peace. Up until the time the world knew that Finnish leaders were in Moscow negotiating for peace terms, all of that nation were announcing that its armies would fight to the last ditch. One cannot always judge future trends accurately by current announcements of national leaders.

Predominant reports are pouring out of the United States midwest winter wheat belt. The longevity inspector must consult by abundant winter snows seems to have lost its effect. The weather has been cold and grim is not making much growth. Any prolonged period of drouth will have a most deleterious effect on the subnormal crop.

In Canada primary deliveries are continuing at a surprising volume for this time of year, and possibly the estimate of the 1939 wheat production will again have to be raised. Hon. Robert Brown of Regina, Canadian crop observer, contends the year-end Canadian carryover at 265 million bushels, compared with 102 million last year, and an all-time high of 209 million bushels in 1928.

Crop prospects in the west are not considered good. The long time experience is that when moisture reserves are very low a big crop is never harvested. Nevertheless Blake are exceptions caused by a superabundance of spring rains.

It is reported that navigation will probably open on the Great Lakes and St. Lawrence about the middle of next month. This in no way may check on the hikes and inflations are for an early break-up. A time truffle in grain is expected the minute the lakes are ice-free. The shipowners are trying to get the government to permit higher rates than the Jr fixed by the Board of Grain Commissioners. Such a move will be vigorously opposed by the farmers of Western Canada.

Little news is coming out of Europe regarding the conditions of the crop there. The European crop will be an important factor this year because we cannot be bought without a good supply of food. It is many years since Europe had anything approaching a crop failure, but this year the chances seem to favor at least a subnormal crop. —Wilson Issue Service.

LOST—Indge quart wheel and tire rim. Finder between Lakeside and Alix. Finder please leave at Highway Service Station, Alix, for reward.

On Thursday of last week Mrs. W. J. Jennings entertained here Bridge Club in honor of Mrs. Mason's birthday, the tea table was centered with a beautifully decorated birthday cake along with greetings of the day. Mrs. Mason received several nice gifts. Mrs. Wylie assisted in pouring tea.

SEND LETTERS TO CANUCK CONSCRIPTS

OTTAWA — Canadian army post is to have handled 35,000 letters, weighing more than five tons, up to 8 on parcels and 27 tons of newspapers Canada's soldiers overseas during August, reports released by Major G. W. Ross, officer commanding the Canadian Postal Corps, stationed overseas a week end.

U.S. NAVY GAMES ANNOYING TO JAPAN

TOKIO—The Japanese press last week lamented a proposal on U. S. plans to build naval manoeuvres in the western Pacific, one newspaper declaring the American navy "needs more" to deal with. Yomiuri said the manoeuvres were an implied threat and that "it is easy to see who is the hypothetical enemy in these Pacific games."

CATHOLIC PRELATE REFUSED TO FOLAND

VATICAN CITY— A reliable Vatican source today declared that Msgr. Louis de Champs, Papal Nuncio to Germany, had been refused permission of the German government to visit Warsaw upon the Pope's request to investigate religious conditions.

EMPLOYMENT LESS THAN A MONTH AGO

OTTAWA — The dominion bureau of statistics reports a slight shrinking of industrial employment as at the week ended March 1, the payrolls of 11,439 employers aggregating 1,189,642 men, a decrease of 4,369 from February 1. However, employment was higher than at March 1, 1938, when 11,280 firms employed 1,027,946 workers.

Contractions were indicated in the Prairie provinces, the number of persons employed by 1,781 firms totalling 113,911 on April 1 with 120,820 on Feb 1st.

T.C.A. CELEBRATING PASSENGER BIRTHDAY

WINNIPEG — Trans-Canada Air Lines, not a passenger carrying organization, celebrated its first birthday today by carrying its 50,000th passenger.

One of the most unusual birthday parties on record was held at the airline's hangar Monday evening, C.N.R. chefs baked special birthday cakes for every pilot in the airline during the day. Each passenger was given a piece of cake it is reported but is reserving.

In the 12 months, T.C.A. has carried almost 30,000 passengers and flown more than 1,200,000 miles.

TORIES TO LOSE ELECTION LABEL

OTTAWA — The National executive of party, having been rejected by the country in the dominion election will disappear so far as party is concerned, according to the executive leader, Hon. R. J. Manion.

"The Manion government was supposed to be an emergency government," he said, "but the people didn't want it and in my campaign speeches this year the emergency aspect of the National Conservative party would accept ended I said considerably."

Dr. Manion reiterated those of his party who were elected under the National Government banner would still be known in the commons as National Conservatives.

SPRING BULL SHOW STARTS IN CALGARY

CALGARY—Today, hundreds of three to four-year-old bulls, numbering 1,800,000 on the hoof, were into the judging ring at Victoria Park here today. The annual Spring Show starts on Monday.

When Germany Dictates a Peace ...

SHADOWS OF DOOMSHERRING SEED IN VICTORY WHICH CULMINATED AT BREST-LITOVSK

By J. B. Pick

Still the vain and transparently inconclusive controversy goes on, though exhibitanting volumes, over what should be the terms of the next Peace of the Allies soon the war.

It is, apparently, that these who want to enter at once into negotiations face a panicked up panic among the world leaders, unknown. Asiatic, Czecho-Slovaks and Poland announced that the incorporated Reich in possession of nine-tenths of its 17-gotten gains, studiously avoid adding an other Carthaginian conception of a "last" peace would be.

They assume that the world appreciate the problem of a negotiated peace in a reasonable frame of mind. Christian Science Monitor of a issue of last Dec evidence to the contrary is overwhelming.

Germany's record as a treaty-maker is a matter of history. It is a very bad record. Bismarck only offered to play "fair to hand fighter" when he was sure he'd bag loads not territories which he did not want. But the last of the trilogy which Prussia and Germany made within living memory. They are indelibly stamped on it.

1866—Treaty of Vienna by which "Germany was dismembered."

1866—Treaty of Prague, after the Franco-Austrian war. This was followed by another treaty with the north German States, which had taken the side of Austria. Hanover, Hesse-Cassel, Hesse-Nassau were annexed by Prussia. The Saxon army was about to enter the control of the Prussia King. The German Confederation was dissolved and the North German Confederacy is established under the leadership of Prussia and with Austria's exclusion.

1871—Treaty of Frankfort which ended the Franco-Prussian war. It gave Germany Alsace-Lorraine and

Continued on page 8

France and an indemnity of five milliards (5,000,000,000) was exacted.

All these three treaties were Bismarck's own creation. For the last two have Bismarck's own words. To us one of the first and third were universally condemned by the public opinion of Europe as being excessively severe.

Bismarck As "Moderate".

All these treaties, be it observed, were "dictated" treaties—points of bayonettes at the throat of vanquished. Next to the "dictated" Treaty of Versailles, that which Germany and Germany forced to submit their wives to say European Congress for ratification. Then there were many, they said, what the victors demanded. Nearly all were absolutely just to mobile in other nations' quarrels.

In comparison with the effect the Treaty of Prague had on Austria (area 1 a.b.). From defeated Austria Prussia demanded no territory and no indemnity. To whom was the Austrian Empire ceded? Not to the King of Prussia, but to Austria and Austria being let off so cheaply, that at first he had been totally opposed to the war. No, it was to Napoleon III and Iron who showed this chivalrous forbearance, or, shall we say, concealed his strake of clever statesmanship.

Why? Because, after destroying at Sedova, Austria's last opponent, the hegemony of the German States so being lawful inheritor of the dictator of the Holy Roman Empire, Napoleon was bent upon securing the neutrality of Austria for his contemplated war with Louis Napoleon for the hegemony of Europe. He cannot that spot to some noise, and he did not want an Austria to pay for revenge, on his flank.

Bismarck's moderation, therefore, was as calculated as his brutality to Austria. Denmark two years before "Vicksburg and Compiegne," were Lord Russell, "were the bases upon which Prussia the Purchasing Power of Prussia and Austria's Spoliation" Then finally last and

Heavy Snow In District

Rangers the heavy snow fall for this time of year has tied up traffic on highways and country roads in south-central Alberta. Provided the sky is clear, direct contact will be established with the rest of the province not later than the week's end.

HAYNES NEWS

Mr and Mrs. Hawthorn returned to this district after having spent the past few months in Calgary.

Mrs. Art Lahaman and infant daughter returned recently from the Lacombe Community hospital.

The March meeting of the Haynes Ladies' Aid was postponed due to the Leverdale weather However the regular meeting will be held on April 12, week following.

Mr. W. Clinton spent a week in Edmonton recently, visiting friends.

Mr. and Mrs. J. Heath and family moved from this district last week, to take up a farm near Red Deer.

TEES TOPICS

Mr. and Mrs. Guy Meadows and Mr. and Mrs. Glenn Marshall left on Tuesday to represent Tees in the curling spring rush show. It is expected that the ladies will stay in the city and between themselves and only the men will return around Labor Day's hungried looking at the exhibits.

Well, well, did the snow go away — yay (Thursday)! Talk about a flood, it is progressing and ballyhoo, such as. "Put us back, or so comes the shrieks!" . . . Now is the time for amusement," etc., etc. I guess we didn't want the sheriff.

It is rumored around the rounds last Wednesday for signatures of a dentist, disillusioned and disgruntled taxpayers and non-taxpayers to have the new government abolish the positions of sheriffs and bailiffs through. Mr. Aberhart's new government was unanimous to pay good money out of the province to remove the services from and that four years of instinctive, mould make them useless for the future of the province. Only yesterday, a harvest unofficial meeting was held and it was decided to withdraw the petition from correction because the sheriff's deputy had been seen as an active member of the committee. This disproves the election promise of keeping the sheriff out if you re-elected us!!

The next bridge party in the Mirrorton district will be held next Friday, April 12th, at the home of Mr. and Mrs. Tees and Mistresses. Everyone welcome. Don't forget to attend this one as my European Congress for exhibits. The lucky ones must pay, they said, what the victors demanded. Nearly all were absolutely just to mobile in other nations' quarrels.

In comparison with the effect the Treaty of Prague had on Austria (area 1 a.b.). From defeated Austria Prussia demanded no territory and no indemnity To whom was the Austrian Empire ceded? Not to the King of Prussia, but to Austria and Austria being let off so cheaply, that at first he had been totally opposed to the war. No, it was to Napoleon III and Iron who showed this chivalrous forbearance, or, shall we say, concealed his stroke of clever statesmanship.

Bismarck's moderation, therefore, was as calculated as his brutality to Austria. Denmark two years before "Vicksburg and Compiegne," were Lord Russell, "were the bases upon which Prussia the Purchasing Power of Prussia and Austria's Spoliation" Then finally last and

Village Council Monthly Meeting ...

ECLIPSE OF SUN VISIBLE APRIL 17TH

Another eclipse of the sun, a rare spectacle which will hold the attention of astronomers and amateur "star-gazers" alike for several hours, will occur on Sunday afternoon. Provided the sky is clear, direct contact will be established with the rest of the province not later than the week's end.

The regular meeting of the Village Council was held on April 1 in the Council Chamber. Mayor Mackie and councillors Whitfield and Todd were present.

The statement re the Pas family was ordered filed.

The following bills were presented and ordered paid.

C. gary Power	$64.8
B. E. Todd (Lleweh coal)	5.0
L. Wortage, sighboardman	1.0
brothers' Allowance	2.0
Wong and Co. (Plumer, Brown, and Lincoln relief)	52.0
Alta. M. U. Unions Fee	5.0
Light's Pharmacy	1.0
H. Bulloch (treasurer room)	1.0
L. E. Pickett	1.0

Bylaw No. 22 re. sale of Lot 10 Block A plan X.X.X. to L. K. Pollock, received its second reading.

The secretary reported that E. E. Dinnin, V.S., gave the tuberculin test to cows supplying milk to the village of Alix on March 23.

A letter from adjutant Scouts, re the Salvation Army was considered. Weekend nothing that the council advised when they would be prepared to become a campaign as the district has been doing concerning the tuberculosis test. Moved that the matter be left over between that September 1 would be the best date.

A letter was received Nores L. H. Hibber's secretary of Alix Consolidated, R.D. No. 2, requesting the appointment for school purposes. The necessary by-law was passed, and secretary was instructed to write Miss Hibber advising her that the Village meeting was now completed and would be to him. The Village will require him to make his own arrangements at meals and quarters.

On receipt of a letter from the Department of Municipal Affairs, requesting names, a by-law was passed setting the Social Service mill rate at 10 mills to raise the $1815 demanded by the department.

The assessment was considered and a few minor changes made. The assess

The World Of Wheat

By H.G.L. Strange, Director "The Crop Turning Point"

A week or so ago, the columns reflected to an unwarranted good basis written by Mme Tabeaux, on the life of Hohenzollern country, the lady, of Chateau, who engaged some 300 years h—Hohenzollern-ear, Mme Tabeaux tells us, became a great world re-nowner, He subdued the kingdoms of Austria, Rome, the Medes, Jerusalem and of the Jews, and a number of others including Mesopotamia, and there he planted control of the lands which reached up into the Mediterranean. Hohenzollern however, held one supreme principle as stated on all the great conquests, which our statesmens of the modern world, it would seem might well meditate upon.

Hohenzollern realized that the only way dominate over other lands and over other peoples could be t—by forced into submission and satisfaction to his arms people rose, as he put it, "by the normal working of economic welfare and not by military supremacy alone," and to bring about the desired result, Hohenzollern energetically set himself to work to encourage trade and commerce between the different countries. The king also encouraged particularly the business of merchants, all on that the standard of living of the people, west of those in the conquered countries, would become enhanced.

—

Following factors have tended to again gain the ascendancy under the U.S. system where crop will be sensitive to a few years — Canada's control board of grain directors, Australian sellers have at least sixty percent of Manitoba's surplus—There will be practically "a carry over" of old corn in the Argentine.

Following factors have tended to low or price Spring plowing and seeding now proceeding actively in Europe — vegetation reporting large quantities of meat in Italy, France and Germany—Northern conditions on rye and China are favorable for crops — top rates allowed for 1938 on wheat at about ten per cent above 1937 crop.

—

THE WEEK IN EDMONTON

EDMONTON — Annual summer school of the University of Alberta will open July 5 this year, it was announced during the week. Thirty courses will be offered, and there visiting professors will swell the number of lecturers to twenty-four. The visitors are E. A. Gilmore, professor of English at the University of New Brunswick; Joseph E. Morris, assistant professor of psychology at British Columbia University and H. Douglas Woods, assistant professor of political science in Manitoba. The school will be conducted jointly with the department of education outside school, as in the past.

Expectations are that Edmonton's spring show will be the largest in the city's history. This was stated by officials Tuesday last, when the closing date for entries was reached. About 300 fat steers are entered, while heavy tonnage are recorded in the Belgian, Clydesdale and Percheron classes. The show will be held April 8, 9, 10, and 11.

—

Report of the MacGillivray Board Commission into conditions in the oil industry of Alberta is expected shortly, by government officials named during the week. An assurance dominion the report will contain recommendations which the government will study prior to legislative action. An announcement has already been authorized and acted upon.

—

Investing degrees were conferred on over Alberta summers, April 2, at the convocation exercises. Chancellor Dr. Tory presided. They are honorary degrees. The re-ceipients are: Rev. M. S. Kerr, B.A., B.D., Lethbridge; Rev. J. M. Pritchard, B.A., B.D., Lethbridge; Rev. H. H. Vather, B.A., B.D., Calgary and Rev. K. T. Savage, of Edmonton All are well known ministers in the United Church and have served in several Alberta points.

—

Greater and fire attention was a night subject of discussion during the week, and J. W. Barnett, secretary of the Alberta Travelers' Alliance in Calgary last week. Speaking before the annual convention of members, Mr. Barnett and if Alberta's 8,000 touchers commentated on the matter of advertising and increasing publishing travel in Alberta. Previously he had declared Canada's educational system to be hampered by politics in Alberta.

—

The History of Alberta Old in the title of a new booklet of 62 pages which has just been published by the Alberta Pub-ney and Travel Bureau in connection with the Department a. Lands and Mines. Written by J. B. Beach and J. L. Irvin, the work is in non-technical language that should appeal to the layman. Both authors are staff members of the Lands and Mines department. Copies may be had by writ-ing to H.M., northern tor sands, Empire oil producers n ore hopes deal with in the future.

—

Another publication of interest to business men is the Directory of Alberta manufacturers prepared and issued by the provincial market n, Lourd. Lorne Scott, director of the marketing branch of the interim program, together with Treasury Branches an., Agencies, the hooks, should prove of special value the-out-post the province it is for free distribution, and already large requests have been received enthusiastically

—

Members of the Provincial Govern ment will be required to take the oath of allegiance as a result of the general election. All newly elected members will be required to take the oath before taking their seats, while members of the House of Commons must be sworn in to their duties. On April 12, all returns should be in, he headed at the Chief Electoral Officer, and following then the cabinet members will be formally sworn in for each of their portfolios.

—

"Isn't it wonderful how many great successes have come of accident?" a friend explained to Robert Louis Stevenson.

"Accident!" replied the great lover. "You might as well drop the Greek alphabet and expect to pick up the 'Iliad'."

—

A fish man must employ a valet, a housedress, a secretary, a cook, and a bookkeeper."

"Yes—and the poor man just gets married."

Says People Buy Cars; Not Homes

By Roger Babson

"Future historians may well discuss it's conduct now ranging between the extremes of boom and depression. This conflict is changing the manners, morals, and religion of the United States. Whether these new mental habits and emotional trends will eventually turn out for the better or the worse, only the historians will be able to say

"It is also interesting for judgment of Father Time we can safely predict that he will point to this generation as the turning point of some of America's most important tendencies —particularly in self.

"I've comprehend the vast chan-e the nation has brought in the people's attitude toward money and spending. It has been an evolution that has contributed to the hundreds of millionaires, thousands of millionettes, and millions of people's. From our eating houses to gasoline using machines it changed everything, so widespread, so far reaching, that we have just begun to realize all ourselves.

One of America's most vital problems in the gap between farm products and the farm income factory prices are the retail counter Between 1929 and 1932 a spending reversal will push the people to buy much for it is today rather than pay for the car

Farmers Suffer

Thirty years ago, there were 25,000,000 horses and mules in the United States and every one had to be fed, stabled and harnessed. Each year, they ate billions of bushels of feed. Today there are only 15,000,000 draught animals. In 1930, the small farmer raised 2,000,000 colts.

But the 1930 farmer cannot run a garage or his business, and—or worse—he has to market a "cash" crop using gasoline. Production of farm products, the hundreds, should experience decreased. Naturally, farm products prices have fallen far behind factory goods prices.

Three decades ago, the average worker was hard at work earning enough to live on not putting the cash into the bank he was buying a home. The coming of the automobile has changed all the number of home owners was increasing. Today, two families are purchased for every one "cash" crop mortgage. Today, there are more mortgaged homes in the country. Families with scarcely enough income to feed the children or insure but new cars "on time". A lot of us can run home remodeling house, with a spanking new car beside them.

Speculation Is Enormous

The loss in wealth as of course, enormous! After 10 years, as mentioned above, we have wasted, while the incomes has scarcely worn off a home and the savings amounted to still another. Families that could afford either to save savings amounts or to build a home are "investing" their surplus into an automobile instead. Other families, who can neither save nor build, are robbing Peter to pay Paul by buying on automobile. They are wasting their property, doctor, and clothing bills to buy gasoline, tires and oil. The automobile has changed from a stable nation of home owners to a travel-crazy nation of nomads.

The happiness of this mobile age is cheap gasoline and easy credit. Too many people who buy cars on credit should never own automobiles. They could not buy them if the prices included the financing terms were tightened up. A lot fewer cars would roll off the assembly lines, but a lot more cars, home furnishers, grocers, doctors and farmers would be paid in full and the country would be out of debt. They are purchased "on time." Next year's salary is many times spent before it is earned. This is an unhealthy condition.

Change Confined An Hill

Low priced gasoline is also unhealthy. British, French, and German high prices for gasoline have hobbled the motor industry in those nations but this has helped the building of homes. The United States are fortunate to have vast supplies of crude oil. It is due to any reason why this generation should explain them, waste them, use them unconscionably? It took millions of years to create them. Should these be destroyed by allowing unrestricted use of gasoline, at very low production costs for the superficial fun of this generation?

How oil fields are discovered every year. In such instances millions of barrels are wasted because of the rush to make private profits. Just as our generation exterminated the buffalo, so this generation is unconsciously the crude oil reserves. This is one industry that surely needs conservation. It would be a good thing for the nation if gasoline prices were quadrupled. Higher prices may encourage people to walk a little more and buy homes instead of "cars" they

HINTS FOR FARMERS ...

USEFUL INFORMATION SUPPLIED BY DOMINION AND PROVINCIAL FARM SERVICES

LIVE STOCK RECAUTIONS

...ring as the time of year when to...st almost any enquiry a number of ...ent diseases, simple and effective ...e means to safeguard the health and ...ellare of the herds.

Before spring work commences horses should be vaccinated for equine encephalomyelitis. The fact that the outbreak did not occur last year is attributed as part to the response horses to vaccination for sleeping sickness. This year it is even more important to prevent the health of our farm power and the cost of vaccination is small, that it is really a cheap insurance against losses.

Owners of cattle, whether beef cattle, realize the losses which occur every year from warbles. Not only is ...ge caused thereby to the cattle ...ed, but summer reduction of milk ...ow comes in fly time when bulls, and beef carcasses affected with warbles are heavily discounted. For a few cents per head, a derris powder well ...ously applied to the backs of the ...fected animals will destroy the warble fly. If a cattle company can be ...ed on a monthly basis, so much the better, but treatment of some animals is also beneficial.

Pigs which are born from October ...o May are subject to anaemia. The ...sulting anaemia from a lack of iron, ...hich is normally obtained from rooting outside in the ground. Anaemia ...an be effectively prevented by giving each piglet as much reduced iron as will lie on a small five-cent piece, on the 7th and 14th days after birth.

Bulls for the spring farrow season on the above subjects may be obtained from the Agricultural Extension Service, Department of Agriculture, Edmonton.

THE VEGETABLE GARDEN

A well-kept vegetable garden, suitably large for the needs of the family, is a valuable asset even ...re so this year when our means is ...ited.

Little costs are involved in planning a suitable plot may mean the difference between success and failure, and this is especially true if ...ose new to the land. Even older ...ers will not be successful unless it is properly cared for. Proper shelter, ...d soil, well prepared and fertilized, are necessary. The garden should be planned and carefully observed under "Vegetables for Prairie Farms," in ...e new bulletin recently issued by the ...epartment of Agriculture, Ottawa, which discusses many of the above topics. These bulletins would do well to ...ave a copy of this publication.

SELECT OF OATS

Almost every farmer has noticed, at ...me time or another, a predilection ...ecently known as "shelter" or "shelters" of oats. He will have noticed that ...ome of the spikelets in the head have failed to form kernels. These spikelets, which are commonly found on the lower part of the head, vary quite consi...erably and the chaff has a velvety, ...ppearance. Sometimes a third or ...ore of the head consists of these ...hells and non-productive spikelets. ...he cause of this condition is not ...ery difficult to explain, states T. ...ruce Peterkin, Laboratory of Plant Pathology, Winnipeg. The cost ...ffect forms its spikelets some weeks ...efore the kernels are laid. If the ...onditions of early growth have been very favorable, it will produce a large ...umber of spikelets. If weather and ...oil conditions thereafter remain good ...he plant will carry all these spikelets ...hrough to maturity. But if adverse conditions set in during the later stages ...

When Germany Dictates a Peace

(continued from front page)

Prussia at once seized the entire seat, the chief proof of which was Karl Ruhr. Already the idea of a German Ruhr had made a strong appeal to German sentiment and with the idea of a Kiel Canal from the Baltic to the North Sea.

Let us turn now to the better known story of the Allied peace conference at ...n Armistice after the French Empire had fallen at Sedan, and Napoleon III was a prisoner at Metz on the point of capitulation, and the German army ...ad overrun three fifths of the northern ...rths of Paris.

On the French side amount was ...ll distracted and confused. On the German side there was a cold resolve to ...ke the most of their victory and to ...ake an its deepest and still formidable ...ct it should find a strong military ...ader and a capable leader Bismarck was anxious to curb at on his victorie ...ut the German army was anxious that ...e surrendered to all its fruits.

The Peace Terms

Bismarck was fertile in cunnin. It was not he who had raised the issue, he said, but his colleagues, who had the ear of the King. "In Germany," he added, "the people are of leading the battles they Count Moltke has won. Do not call them Germans, they are ...erman wished it to be inferred that if the final word had rested with him it ...ould have left the French in possession of Metz!

...ld reference to strife ...ct of the indemnity, the ...ord came through that not a ...r less than five millionths could ...ing ... and until then £200,000,000 ...s but ten fathoms of ...s quarters, on Bruce ...

...ch expense

...ly, the question of Baldwin was ...n Bismarck's contention was ...t all clauses must be transformed ...Germany and Baldwin was in Almost. For two hours Thiers entreated and ...ed up a puppet government as the ...t has a said securing thousands of ...ers to be for forced supplies of wheat and coal.

More than three months elapsed before Count Frankfurt repaired to the conference room at Brest and there after ...ther three days and weekly appeals ...ch, succeeding in lapsed, caused ...d Hohnau to hang the tablet with ...ben in case of treachery. Interests of the Red Deer Federal Riding to be Kept Before the Government at Ottawa

To the Electors of the Red Deer Federal Constituency who supported me so loyally in the recent election, I wish to extend my sincere thanks.

While we hoped to have Alberta and our own Constituency once more in step with the Government at Ottawa, there is much that is encouraging in the results, provincially and locally - where a majority of 6,000, in the 1935 election, was cut to approximately 1400.

It is my intention to energetically, in every way possible, to bring before the Federal Government at Ottawa the particular needs, as they arise, of our own Red Deer Federal Constituency.

Yours faithfully
A. CLARK BURY.

YOUR LITTLE SAVINGS... FINANCE MORTGAGE LOANS

EATON'S CAN FIT YOU!

Three of thousands of Canadian farms and homes benefit from first mortgage loans made possible by the accumulated savings of Life Insurance policyholders.

For every borrower, there are the family people who supply the necessary funds.

This fact affords a striking illustration of the "double duty" performed by Life Insurance dollars. Not only do they ensure financial security for the men, women and children of Canada, but they also help to build and finance their farms and homes.

Life Insurance companies consider the greatest asset in the collection of properties upon which mortgage loans are made. To safeguard the savings of policyholders, security of principal and interest is and must always be the first consideration.

Department of Agriculture
Protect Your Horses
Equine Encephalomyelitis
(Sleeping Sickness)
An outbreak of the disease may occur in Alberta this summer.
VACCINATION
with Chick Vaccine is the only preventative.
PROCEDURE:
1. Vaccinate before seeding.
2. Two doses are required, given seven to fourteen days apart.
3. The Vaccine is available at Drug Stores, or may be obtained from Veterinarians, and some Municipal Districts may handle it.
4. If a qualified Veterinarian is not available, the Vaccine should be administered by some other person trained by a Veterinarian. Farmers wishing to do so may obtain a syringe and learn how to vaccinate their own horses.
Vaccine is effective only when administered prior to the outbreak of the disease.
Vaccinate Early!
The Department of Agriculture recommends vaccination as an insurance against loss.
HON. D. B. MULLEN,
Minister of Agriculture.

Mr. and Mrs. Clive Stanton and baby arrived recently from Saskatoon to reside. Clive has spent several years. They will reside with his parents south of town.

Mrs. Crawford, Sr., accompanied by Wilburn and Miss, left recently for Calgary where they will reside in future. The people of the Stone school made a presentation to Miss before her departure.

G. Webb and V. Lyle were Edmonton business visitors on Friday of last week.

W. I. Bridge party, Tuesday, April 6 will be held in the U.F.A. Hall at 8.30. Admission 25c. Proceeds for the Red Cross.

On Thursday of last week the ceremony of the tying of the 60 Bridge Club met at the home of Mrs. Fraser. Mrs. Edgar was the first prize and Mrs. Edgar the consolation. Next session is to be held at the home of Mrs. Todd on April 15 at 2 p.m.

Don't Forget the Ladies' Aid Tea and Sale of Home-Cooking on April 13

J. A. Strachan spent the week end in Lethbridge with his family, and while there blew a couple of vest buttons on "glimmering" the new daughter

Lyall and Quenton Sandberg have returned from Lemsta where they spent the Easter holidays with friends.

LEAVES FOR DELAT IS THIRTY DAYS

Ever since the Canadian Active Service Force went overseas, there have been a great many complaints about the long delays involved in the delivery of mail from home to these Canadians abroad. However, enquiry in Ottawa shows that this is inevitable according to the present arrangements. In many cases the troops must be forwarded from every post office throughout the land to the Base Post Office in Ottawa, where under the personal direction of Major G. W. Ross, all mail to the troops must be sorted into huge bags designed for the various units, and sub-equently, these bags or parcels are be packed from Ottawa to wherever part the authorities decide, though it must be borne in mind that Canadian troops are moved very often from one place to another and it is advisable that these movements should not be known generally for obvious reasons. Furthermore, all such material must be carried by convoy vessels, and if a letter or parcel reaches a point of departure right after a convoyed group has gone, it may involve weeks and weeks of delay until the next group of boats will be ready for transportation across the ocean.

TAXES WE DO NOT GET

From time to time, one hears protests against the amount of tax-free property in a town, contributing wholly to the civic tax revenue. In every town, this forms quite a part of civic life, and the question is raised whether all the properties now exempt from taxation are rightly so.

Included in such tax-free institutions so far do his town is concerned are churches, schools, hospitals and all municipal properties such as town hall, rinks, parks, isolation hospital, etc. In addition, the federal and provincial properties are also tax free.

So far as churches, school and hospital are concerned, there would be probably little gained by imposing taxation. They are for the service of the public and in any case it would all come out of the people, one way or another.

The government buildings are in a different manner.—Vulcan Advocate.

It was stated in court that a boat repairer who was sued for breach of promise had returned to his former sweetheart. This cobbler seems to believe in sticking to his last.

CARD OF THANKS

The Red Cross wishes to thank all those who contributed so much to the success of last week's dramatic festival. The cast, directors and promoters of all groups, those who helped with scenery and lighting, those who lent properties for the stage, those who supplied lunch and tea at supper time, and last but not least, all who braved the roads to come and give their support—the very best thanks to all of you.

SCHOOL OPENED MONDAY AFTER EASTER

The old school bell rolled its usual round again Monday morning as the "cogs of learning" were again fully with rush-to youngsters following the ch. so short, busier holidays. Attendance was good considering the heavy mud.

So to on the last lap this term, many will be the tests, and tribulations, and much the cramming, before finals exams, and—summer holidays.

NEWS OF THE U.F.W.A.

Ladies are reminded now to start now work for the Alix Agricultural Fair

Don't forget the handicraft demonstration to be held in the U.F.A. hall on Saturday, April 6. The public are cordially invited to attend. There will be demonstrations of rug making, hooky, quilting, spinning and other handicrafts. Tea will be served during the afternoon.

Miss Jean Walpole was a weekend visitor to Clive

Farmers with cattle to deliver should bring them before dinner from flies. A. S. Bissett will do this work at reasonable rates.

Mr. Strash, who has been confined to bed due to severe fall on the icy street some weeks ago, is progressing favorably and can now stand for short periods.

Jacob Domino returned on Saturday last from Abbotsford, B.C., where he spent the winter with his family, and will resume his work on the C.P.R. section.

Dale Wilson returned on Thursday, of last week from Calgary where he played several games of the hockey playdowns.

Capt. F.O.H. Eaton has taken delivery of a new tractor.

Mr. Sid Lees, formerly of this district, is renewing acquaintances with Alix friends.

Harold Olson and Glen Berrit left Wednesday morning to attend the Calgary Spring Stock Show.

Mr. and Mrs. Les Pears and family were visitors at the home of Mrs. Pears, Sunday, Sunday last. Mervi returned with them, he having spent the week in Calgary.

News of the Week . . .

BRIG.-GEN. OBLIGE COMMANDS SECOND DIVISION

OTTAWA — Brigadier-General Victor W. Odlum of Vancouver has been selected to command the Second Division of the Canadian Active Service Force, it was announced here last week.

FRANCE PROPOSES DATE FOR RED AGENTS

PARIS—Minister of Interior, Henry Roy, last week considered the desirability of a new decree which, if put into effect, will make Communist propaganda punishable as the French republic is obviously by death.

PRICE OF $1.20 OBTAINED FOR CHAMPION BULL

CALGARY — The grand champion Hereford bull of the Calgary spring stock show, Model Domino Lad 15 5, brought top price of $1,200 when he was sold here Wednesday's auction, where he was purchased by E. H. Gamble of Winnipeg. The price bull was owned by Wm. Hd and Bonnar, Invermere.

HITLER'S DOORS TO MAKE SMELLS

LEIPZIG — By order of Adolph Hitler the colonial house doors of the Reich chancellery are to join the collection of metal and commodity gathering for war purposes. Hitler, to give a good example to the nation, has order ed the doors replaced by wooden ones and has decided that some candelabra at the new chancellery wing can be dispensed with.

TOWN WANTS NAME OF "NORTH POLE"

COBRUCOPIA — This little town on the northeastern tip of Wilmania, situated 180 to 46 in a rotrundish hut work, is famed of nothing the U.S. press office department to change its name to North Pole, Wis.

TWEED TRADE

VANCOUVER — Canadians must help Britain to regain her pre-eminent ing power, H. R. MacMillan, president of the Canadian Chamber of Commerce recently told the Board of Trade. The United Kingdom requires Canadian products, he said, "but why not continue to buy if we cooperate in making it possible for her to pay." Mr. MacMillan pointed out we could re-operate "by buying British goods."

WET OPPORTUNITY

REGINA—Mr. T. G. Tanner, Saskatchewan Minister of Agriculture and chairman of the Canadian incort humbly reminded farmers not to let their big production was quickly in the hopes of improved prices and demand. Certain farmers, known and unknown, may work to alter the present gold at Mel Mr. Tanner.

PROFITABLE PATRONISM

TORONTO— Everything that Dominion unions could do to further the cause of Canada and the Allies would be done, President John A. Bruton of New York told the annual meeting of shareholders Here. Bruton reported an increased investment return of 4.65 per cent. He referred to Canadian and American unions which "must" and "are warned "if they become too severe, the ruling commission will be forced to curtail their operations."

PERSISTENT FIGURES

EDMONTON — Registered unemployed in Alberta numbered 7,235 today, according to figures released by the employment service There were 7,5 registered at the same date last year. Of the total there are 2,201 individuals are registered in Edmonton, while Calgary's figure is 1,594.

PRESIDENT AND FOOD

TORONTO — In the second speech here within a fortnight, James R. Crowell, American minister to Canada, told the Civil Service Association of the Toronto university that education must establish programs if we are to maintain democracy. He said the problem of unemployment must be solved first, however, because "we cannot deny that a jobless man may find establishment of democracy or tolerance to contemplate his importance."

DIRECT PAYING

TORONTO—Hitlers should be made to make friendly relations with Canada in the opinion of Sir Alfred Monton, former acting Prime Minister of Britain's oldest colony. Sir Alfred said he believed Canada's future is brighter than ever before as "it is to be the heart of the British Empire in the not distant future." He added that "the Dominion will come to complete self Mastery and be a giant of it."

WINSTON CHURCHILL TO DIRECT BRITAIN'S WAR EFFORT

LONDON — Prime Minister Chamberlain, in a long-heralded parliamentary announcement last week, appointed Winston Churchill to direct all Britain's armed services and divided one effort among three key commanders

Sir Kingsley Wood becomes lord privy seal to head the home policy committee which will deal with social and economic problems, including food and agriculture

Sir John Simon, chancellor of the exchequer, will be the new chief of war policy committee. His members will be the ministers who handle finance and trade relations.

Mr Churchill in assuming new duties that will make him chief strategist of the war cabinet, will remain as first lord of the admiralty where he directs the British navy. Other cabinet members to date in the war with Germany

PREMIER ABERHART LEAVES FOR COAST HOLIDAY

Premier Aberhart left near the week end for Vancouver for a ten day holiday visit with members of his family Mrs. Aberhart left for the coast some days a ceuna

During the premier's absence, H. A. C. Manning, provincial secretary and minister of trade and industry, will be acting head of the government.

WAR ECONOMY

MONTREAL — Victory will be built upon the armed forces, civilian morale and economic preparedness, declared R. W. Tasker, secretary of the wartime prices and trade board in a re cent address. The conflict will be won in the field, said the speaker, economic policy is a factor in it. Taylor noted the objectives of various war controll boards as a minimum expansion without inflation of limits necessary for protection, a minimum increase in public debt and a minimum rise in general price level.

BE PREPARED

TORONTO—Farmers must form a strong non-social organization if they are to hold their own in the conflict with organized industry, finance and labor. This was the warning of Mr. Hamme, president elect of the Canadian Chamber of Agriculture "The outlook of the farmer is beyond the picture," said Mr Hamma, "but any relief that they may get may be bound to be temporary" He thought the most problems would be present in an agricultural form when the war was over.

"A calm mind is a victorious mind —Carl Winkler

Wheat Situation

"Alberta Feed Budget"

The Chicago grain market is still be unsettling influence in grain prices in North America, but it appears that principally now by crop news from Iran the United States winter wheat belt, but there are other factors, not-ably the disposal of the wheat under the loan on the farms of Canada, and the trend of the war in Europe. The weather during the next month is of a winter character and will be very important as a market factor Frequent and heavy snowfalls will be to ,as ed to as lite the crop to make any ma tebial recovery If drouth and ds ist storms develop the result will be a ure crop.

Canadian feeding prices have been be ding fairly steadily. Sales approximating 30 million bushels were reported in the early days this week. Export was only a rive of one cent a bushel. Very large supplies of wheat in Canada do not act as an effective pressure on gains a rising trend is prices.

Some less hidden evidence of the activities of the Alberta grain region. In some localities, notably in the Edmonton district, the crop prospects are normally bright. This has prevented the drying out of the soil and is a factor in soil drifting. It does not, however, guarantee a good crop. There is no indication of what the growing season will lead to do about their wheat account this year. On May 9th the farmers of Canada will have figures of "intentions to plant." Until these figures are issued there is no way of estimating an accurate idea of the probable acreage issued.

Daniel Willard of the B.&O. Railroad took a trip to Washington in his private car, and when the train pulled into the station somebody spoke out the engineer:

"I thought we had a rule that this train should not go faster than 60 miles and the servant." he said. "I had a speedometer in my car and it registered 75 doing the servant."

"Speedometer be the nib said Mr." said the engineer. "I didn't see your car going past me at any time"

VOLUME 38. NUMBER 45 ALIX, ALBERTA, FRIDAY, APRIL 12, 1940 SUBSCRIPTION, $1.50 YEARLY

Alix Boxers At Lacombe

The Alix ring exhibition, sponsored by the Alix Comrades-of-the-Sword, Association, Arthur Chalk boy Friday, proved many good bouts, with a large crowd on hand to witness them. In all, 12 events were on the card, participated in by 24 round affair

In the amateur competition, (145-lb class), Wally Friend, Lacombe, battled Chalk, Alix, for three rounds, with Friend being decisive. In the semi-windup, John Wideman of Alix, won a decision over H. Ferrel of Lacombe in the 175-lb class, and Gordon Frizzell of Lacombe won by a decision over Ted McIntyre of Innisfail in the 125 lb. class.

Teddy Sedelow of Alix won a decision from Lyle Frizzell, Lacombe, 147-lb.) Ken Sedelow received the decision over Billy Powers, Innisfail in the 158 lb class. Jack Collins, Alix, won by forfeit Russell Lacombe, in the 115 lb class. Herbert Cooper, Alix, won a decision over Donald Dunn of Alix in the 105 lb class.

Exhibition bouts by Abe snodgrass and jimmie bowers put the crowd in a real mood for the more strenuous exhibitions. Those participating in these bouts were Ray Ellert vs. Harold Pat etch (130 lb.), Kenny Smith vs. Larry Smith (130 lb.), Claude Smith vs. Frank Bartha (60-lb.) Sid Smith vs. Syd Wood (61 lb.)

The Alix-Lacombe feud fight took the spotlight of the evening, with hardly a person but was standing at times during the bout. Referee Bob Brady was mixed on the bout The baseball boys came from Calgary where both are in the army The Webb Frizzell-Ray Seddelow bout was put on deep to decision after two 3-5 rds. that he drew a horse recently Good sports-manship was shown throughout.

Earl of Athlone is New Gov.-General

The Earl of Athlone, youngest brother of the dowager queen Mary and former governor-general of South Africa, has withdrawn was appointed governor-general of Canada to succeed the late Lord Tweedsmuir.

The earl, soldier-statesman will be accompanied by Princess Alice, Countess of Athlone.

An official announcement from Buckingham palace said, "The King has much pleasure in announcing the appointment of Major-General the Earl of Athlone, K.G., as governor-general of the Dominion of Canada."

Lord Athlone was before was popular governor-general of Canada, and at the eve of the first Great War. He did not take up the appointment. In recent years served with the British army throughout the conflict.

Governor-general of South Africa Lord Athlone was so popular that he was pressed to accept a second term but declined, serving for the full five years, from 1923 to 1931.

Alberta's welcome to Their Excellencies the Earl and Countess of Athlone, was voiced by Premier Aberhart Wednesday. "I am sure the whole province will be glad, was received in Alberta with a feeling of pleasure and great delight. Offering in the name of Alberta "A most cordial and enthusiastic welcome." Premier Aberhart continued and the wish that These Excellencies may extend their stay in Canada over many years.

WEDDINGS

KRAFT—OTTOSON

A very pretty wedding took place at the home of Mr and Mrs. A. Ottoson, Leduc, B. A., on April 2nd, when their eldest daughter, Olga Teresa, became the bride of Mr. James Elmer Kraft, also of Leduc.

The bride entered the room on the arm of her father to the strains of the Wedding March, played by Mrs. E. L. Anderson. She looked lovely in rose taffeta with lace bodice and carried a bouquet of roses and carnations. The bridesmaid, Miss Helga Ottoson, sister of the bride, was dressed in blue taffeta and carried a bouquet of roses and carnations. Mr. Bert Anderson supported the groom.

After the ceremony lunch was served to immediate friends and relatives. The happy couple left on the main street to honeymoon at Calgary, Cleve and Alix. On their return they will reside on the groom's farm at Leduc.

Mrs. Roy Johnson Is Showered

Mrs. Roy Johnson, a recent bride, was tendered a miscellaneous shower at the home of Miss Mary Greasy on Friday afternoon. Some 30 ladies were present and an enjoyable afternoon was spent Miss Greasy made a delightful hostess and served delicious and useful gifts, and in a few appropriate words, the bride thanked the donors for their kindness. A contest, "Guessing," provided much pleasure. Lunch was served by the hostess, assisted by several of the ladies.

The Junior U.F.A. honored Mr. and Mrs. Johnson at a well attended shower in the U.F.A. hall on Wednesday evening Miss Irene Thege, on behalf of the group, presented the couple with a curtain set.

TEES TOPICS

Miss Betty Smallwood has rushed through almost impossible roads Friday night to Leduc Lacombe hospital where she underwent a successful appendicitis operation for appendicitis. Frank Smallwood is the proud owner.

Dr. Bruce MacMillan, M.L.A., spent a few days in Calgary, renting up after the provincial session.

The big flood reported last we.k seemed to go strewy Instead of warm weather, with warm rain, sand and water, we got more snow and cold weather The forecaster had a good forecaster, one that never failed for 24 years—it has now failed to tell the truth. The snow and cold weather has continued its blizzard, and cannot be said to stand. Although at the time of writing, there is no flood, there is no fun, and is never given credit for being a prophet. Which is considered extremely intelligent, it looks as though it is to a bad act of the political procedure Look and promised something everyone wanted, with no intension of fulfilling the promise.

As no bridges or culverts were washed out in the flood that didn't materialize, and the roads from the Edmonton district don't like them, and the farmers stood as bridge Saturday night and Sunday, and the C.N.R. and Provincial Government, Mr. Ferguson, due to the roads having the water drained off the centres by those well-known holes, have found their way through the various cut or cut-throughs, and the farmers generally. Mrs. Wallis and Mr Mellor were the most fortunate, and Mrs. Cunningham and Mr. Wallis the least.

George Harris left for Edmonton on Saturday last where he will take in the Edmonton Spring Stock Show and other business.

W.I. Bridge Party

The Women's Institute bridge party held in the U.F.A. Hall on Friday provided an enjoyable evening to most players. Eight tables of session were in progress during the evening. Prize winners were: Ray Wilson and Mrs. Hope, ladies' and gents' lower, with Mrs. Dolan and J. Goodson consoled the booby. Reid, Whitfield, Sr., proved the table lamp prize winner in the consolation of cake and dainty products of the

Germany on Tuesday invaded Denmark and Norway in lightning strake, which the Nazis hypocritically announced was for "their protection against the Allies." Denmark has been completely overrun, yielding to the grossly superior force without resistance, and with the aid of Allied aid on land and air forces is giving the attackers a severe whipping.

Allied aid to Norway has been swift and heavy Several ports reported to be in Germany, have been reported to contain with the invaders nonetheless between the Allies and Norwegians. British naval forces have inflicted heavy losses upon the German fleet, and with Allied control of the Skagerrak now dominant, further resistance to the Nazi forces must be very severely to halted. An expeditionary force of Allied troops has already landing on Norwegian soil.

MIRROR NEWS

On Thursday evening, April 4, S. Chisholm left for Edmonton, B.C., where she will visit her sister.

On Monday evening, April 8, Mrs. S. Bellamy entertained her bridge club at her home First prize was won by Mrs. C. Rutland. Consolation was won by Mrs. F. Hamilton.

Mrs. J. McLean of Edmonton, who formerly resided here has been visiting her Miss Silver friends during the past week.

Mrs. M. Smith, Mrs. A. Simon, Mrs. L. Hollings, Mrs. R. Hollings, April 1. Loughridge of Alix visited the Hennessy diapor No. 89, Thursday evening.

The first series of the Bridge Tournament in aid of the Cemetery Fund was begun last Friday, April 5. The couple with the highest honors are Mr. and Mrs. F. E. Smathers

Miss K. Finch, who has been attending Prairie Bible Institute, Three Hills for the past six months, has returned to her home.

Corporal Steve Chisholm, of the Engineer Signallers, who has been visiting here, left for Kingston Thursday April 4.

On Wednesday evening, April 3, Mrs. W. Pray entertained at bridge in honor guest to Mrs. H. Pinewood-hog.

OTTAWA—Prisoners of war in Canadian internment camps live up to the best traditions of their fiction "thrillers" in their attempts to receive or send messages meant to escape the watchful eye of the military censors.

The well known invisible ink method as still very much in vogue. Put this in the office of Lieut.-Colonel H. Southam, Assistant Director of Intelligence, Military District No. 3, and the letter will be delivered to Lieut.-Colonel Southam double-checks all suspect on communications. With the help of powerful reader ray lamps and various chemicals, he has detected messages written between lines of apparently harmless letters or on blank sheets of paper, innocuous, until subjected to the tests.

Reverse sides of stamps and address stickers have been used often in attempts to smuggle information into the camps. Innocent publications clash other inquisitive eyes. Although 6,000 pors were found, upon close inspection to be printed here and there with pencil notes under key letters. Mr. and Mrs. Cranfield consecutively, these letters were found to spell out secret messages in German.

Weather Still Remains Wintry

The district is experiencing the latest spring and coldest April weather in many years. Beginning in March, a spell of warm weather last week, reluctantly gave way to cold, and the usual temperature postponed the expected crash flood. However, this appears to be all to the good, for the snow is melting slowly, is being absorbed by the land, rather than flooding all into the ditches and sloughs.

The temperature on Tuesday and Wednesday nights dropped to several degrees below zero. Heavy snowfalls reported in the Calgary and other foothills districts, and snowfalls in Edmonton area.

M.D. Council Meeting

The second meeting in 1940 of the M.D of Lamerton, No. 302, was held at the Municipal Office, Alix, on Saturday, April 6. All members present were Councillors Duxbury, Dixon, Hinds, Reynolds, Thompson and Hole.

At 11.30 a.m. the Council was called to order and business was transacted as follows:

Secretary read minutes of previous meet-ings, which were confirmed.

Secretary read By-law, No. 18. It was moved by Councillor Dixon to adopt same. Carried.

Secretary read By-law, No. 19. It was moved by Councillor Reynolds to adopt same. Carried.

The Reeve reported that he had received a letter from the Dept. of Public Works to have weeds cut back on tracks and tenures.

Moved by Councillor Hinds that we apply to the Dept. of Public Works for permission for empty tenths to use roadmaps. Carried.

Moved by Councillor Hole that we apply to the Dept. of Public Works to make order for closing roads on diversion lands. Each Councillor to report on roads in his division. Motion Carried, Councillors Dixon and Wood. (Continued on page 2)

Alex Findlater Receives Promotion

Alix and district friends of Alex Findlater will be pleased to read the following account of his promotion in the Soldier Settlement Board, as published in the last issue of the Drumheller Mail:

o o o o

Confirmation of his removal to Calgary and promotion to the position of Chief Field Supervisor, Prairie Provinces, for the Soldier Settlement Board, was received by Alex Findlater on Tuesday.

Mr. Findlater has been located at Drumheller for the past nine years as District Field Supervisor, and has proved a popular official in that capacity Both he and Mrs. Findlater have made many friends in Drumheller who will regret to learn of their removal from our midst, but at the same time will not be lacking in extending their congratulations to Mr. Findlater on his promotion.

Just when the Findlaters will leave Drumheller has not been made known, but Mr Findlater expects it will be very soon. His successor in Drumheller has been named in the person of Harry Allen, of Calgary.

George Tattlers

Mr. and Mrs. E. Hewlings and Mrs. O. Hewlings visited at the home of Mrs. Wm. Hall, Hobart, near Alix, on Saturday afternoon.

Martin Boehm is now driving a '39 Dodge car.

Martin Allen of Minster has been visiting here a few days at the home of his brother, Bill Allen.

Mr. and Mrs. H. O. Lund and Bill-ie, Mrs. Wm. Roberts, Mrs. Alex. Mc-Nish and Rhoda, visited at the home of Mrs. O. Hewlinger on Sunday.

Miss Ida Carlson visited her sister, Annie, at the L. B. Hotel, Camrose on Sunday.

Born—to Mr. and Mrs. F. Biere on March 27—a daughter.

Mrs. George Mansell left last week to join her husband, who is stationed at Camp Borden.

The Red Cross Society wish to add their thanks to the orchestra, who so kindly donated their talent" at the dance following the recent music festival.

The World Of Wheat

By H.G.L. Strauss, Director "The Crop Yearing Plan"

Overproduction, in times of war, is a good thing, for the human mind to dwell on pleasanter and is like things I have seen in the past, we have had to shoulder a grave responsibility, have ever I used success from there unbroken and to achieve contact with the soil, on the growing of flowers and, if they were lucky, of farming itself.

That great statesman, George Washington, on December 15, 1670 wrote that "I do enjoy the sweet situation to the Philadelphia Society to promote agriculture, of which he was a member.

"The more I am acquainted with it," continued the illustrious farmer, "I am pleased with them, inasmuch, that I can see where find out an abatement to those sun-scent and mental pursuits. In indulging them feelings, I am led to reflect how much more delightful to an unbiassed mind is the task of the husbandman than of any other in the whole circle which can be acquainted from farming is by the most unexpected course of events, the happiness and thus observations, is only to those how make it a number of business society. I feel myself obliged, by to it I have to render respectable and advance success, an employment which is more congenial to the natural disposition of mankind than any other."

F Forage factors have tended to raise prices of recently took heavy comments of Manitoba wheat—China and Russia will need farmers wheat. Unfavorable fall storms experienced in many parts of U.S winter wheat belt — Acreage seem to matter where in Roumania is 20 per cent less than last year.

Following factors have tended to low er prices — Crops in Italy are improving under favorable weather conditions — Plowing is an additional 2 million acres in U.S. making good progress — Harvesting of wheat now active in India—Total 1938 wheat exports from Russia, Bulgaria, Yugo-Slavia and Hungary was 453 millions, bushels against 3 year average of 322 million.

THE HOMETOWN PAPER

Today no small part of the city pressman's pack is made up of slightly rubbishy editorial sheets whose delivery is apparently assisted alike in place of home and home office and which, apparently, reveal a degree of dulness as distinct as enormous.

With the writing of lengthy, learned letters we all but vanished art, the transplanted city dweller is finding the local be ome paper a welcome substitute. It presents a printed panorama of its small town life of which he was once a part, reading him to continue the acquaintance, the outings and doings of former acquaintances and brothers.

Big city producers contributing its modest bulk with their own mattress-like publications, may be loathed to view it. Nobody else impressionism result of time I's-en parochism, but to the subscriber it is welcomed as a refreshing visitor from home, a chatty "country cousin," which, while eager to impart the news, is equally ready to depart, once he has given it.

Through hospitable reception, the former citizen of the small community may the friendly merchant with whom he formerly traded departing on a visit is and is glad that affairs seem to be improving for him. Through the local medium he remains with the Sunday afternoon records on Mrs. Brown's reception, all he has done as a host.

With such circumstances may be said to the home town paper's opportunity. Since it lacks its regular contributors reporters, with a few exceptions, newspaper which the wise neighbor makes on the arrival and more interesting and success. Chatham News Mirror

Among the numerous arguments in favor of this method is the fact that it is the most favorable with the local business men, who make their contributions with the straight "method as well in the 15-cents elections. Note, in one of the preceding paragraphs, the statement that the result of the 15 cents is electric was known before the government of the province had been settled, this shows that the ...ment method of balloting is more by a complex manner of running a single affair, and that its advantages are offset by its complexity.

I suggest-ments of the scheme that in that it is the only one that could be carried out with the certainty

SOIL REACTION, ITS RELATION TO CROP GROWTH

Soils may be divided, on the basis of their reaction, into two groups, acid and alkaline, states H. J. Atkinson, Dominion Chemist at Swift Current Experimental Farm. Alkaline soils are characterized by the presence of appreciable quantities of calcium (lime) and sodium compounds. Acid soils, on the other hand, contain varying amounts of hydrogen ions, which have replaced the calcium and sodium ions. The action of a soil is usually denoted in terms of its hydrogen ion concentration and is expressed by a scale of numbers running from 0 to 14, which is known as the "pH" scale. Soils with a pH value of more than 7 are alkaline, and those with a pH of less than 7 are acid; soils with a pH value of 7.0 are known as neutral soils.

Those soils in which sodium compounds predominate are commonly known as "black" soils. They occur only intermittently and sometimes a very small proportion of Canada's soils. Usually the presence of excess amounts of salts and poor physical conditions (due to the presence of too much sodium) make such soils difficult to handle properly. Soils which are of fairly alkaline due to the presence of lime compounds occur somewhat more frequently, are in better physical condition than those in which sodium compounds predominate, and are usually quite fertile. A very large proportion of the soils in Canada however are acid soils and range in pH values from 5 to 7. Under climatic conditions where precipitation exceeds evaporation, the percolation of water downward through the soil in most cases considerable leaching. In this process the soil bases, particularly in lime, are removed, from the surface and these places are taken by hydrogen ions, thus forming acid soils.

While many soils which are only slightly acid can be classified as good soils, conditions of extreme acidity are frequently harmful and should be corrected, for example, by addition of lime. These harmful conditions may be caused by the soil acids themselves, or by the presence of aluminum which is rendered soluble by the acids, or by the lack of calcium which may either cause a deficiency of this element for plant growth or poor physical condition of the soil. As soil studies it is difficult to separate these factors in acid soils, conditions are unfavorable to the growth and activities of soil bacteria which are needed in the breakdown of organic matter and in the release of nutrients for plant growth.

The effect of the reaction of the soil in plant growth varies with the crop. Sugar beets will grow only with in a narrow range of soil reaction, for example, alfalfa, which grows well under neutral or slightly alkaline conditions but will not grow on very acid soils. Other crops are tolerant of larger variations and will grow well under quite a range of conditions. It is impossible to draw up any precise list and assign various plants to definite pH ranges, since other factors such as the amounts of lime, organic matter, moisture, etc., may also have a considerable effect on the growth of the crop. The presence of certain plants or weeds is also considered as indicating, however, that the soil reaction is changed by the addition of the proper chemicals, the growth of certain plants will be greatly stimulated, resulting in the crowding out of them, almost completely eliminating all other species.

The occurrence of certain plant diseases is also associated with soil reaction. Many of these diseases occur only on acid soils. Potato scab on the other hand, does not occur on acid soils but only on those with alkaline reaction. Many of these diseases occur only on acid soils. Potato scab on the other hand, does not occur on acid soils but only on those with alkaline reaction. Many of these diseases occur only on acid soils. Potato scab on the other hand, does not occur on acid soils but only on those with alkaline reaction.

The composition of certain plant diseases is also associated with soil reaction. Many of these diseases occur only on acid soils. Potato scab on the other hand, does not occur on acid soils but only on those with alkaline reaction.

Provincial Library Dec. 40

News of the Week ...

NEW DEPARTMENT

OTTAWA — Formation of a department of supply and supply board ... Hon. C. D. Howe has been appointed Minister to administer the department with responsibility for the supply board and will be assisted by C. D. Wood, Canadian member and representative of the board, on the technical matters that may arise from time to time. The new department will supersede the war supply board and will purchase and supervise munitions production and supplies." A further function of the department will be to maintain and update the industrial resources of Canada.

SKY HIGHWAY

EDMONTON — An issue 2,000 more may be ordered at the opening of the Mackenzie highway next July 1st, Hon. Dr. T. C. Douglas, Minister of Health and Welfare announced at a luncheon. Mr. Brant Wilson said Canada is dependent upon her parks to bring into the Province hundreds of thousands of dollars in needed tourist trade. Hon. Dr. Douglas, chairman of the meeting, said the Mackenzie highway opener ended as "one of the great events within his time of the world."

TO "STARTLE THE OLD DOMINION"

VANCOUVER — The provincial government will meet March, President Pattullo announced on a recent visit to Victoria. The suspected swell is in the Peace River area. Premier Pattullo predicted the province would "startle the old dominion when delegates arrive next way." He said he will take a vacation after the Yukon trip has been completed.

TO "SHARE THE WEALTH"

OTTAWA — It is the hope of the new Social Credit Party leader that 1 people will not experience any untimely increase in living costs, according to Professor Blackmore, chairman of the board. Governments should bring in such legislation as will make it impossible for them to increase costs. Professor Blackmore stated. "If they permit increases in the cost of living, then the people will have been cheated out of the benefits of the increased purchasing power that would be created by the issuance of new credit."

TO "SCATTER THE OIL MONOPOLIES"

OTTAWA — It is the hope of the new Social Credit Party leader that 1 people will not experience any untimely increase in living costs, according to Professor Blackmore, chairman of the board. Governments should bring in such legislation as will make it impossible for them to increase costs. Professor Blackmore stated. "If they permit increases in the cost of living, then the people will have been cheated out of the benefits of the increased purchasing power that would be created by the issuance of new credit."

BEET SUGAR

WINNIPEG — Manitoba is planning to have a sugar industry. Hons from Regina, says a Winnipeg report, manager of the Canadian sugar company planned sugar beet acreage to provide a source of cash income for Alberta farmers. He said Alberta farmers are supplying all the beets of the sugar processed in the province. Last year's output was 10,000,000 pounds, said Mr. Wood.

BOXING NOTES

There appears to be some, who without a full knowledge of the situation, are voicing the opinion that the handling of affairs in the Boxing section of the home at Kenosha was not altogether on the level. There are absolutely no grounds for rumors of this kind, and time in terms out by a letter, which was formerly received, in part, from F. H. Reed, who was in charge of the pavilion, and who should have a pretty good idea of how the boxes were handled.

"Dear Mr. Sabbins: I have your letter of April 11th which attached some notes of the boxing and wrestling matches in connection with the boxing card in the pavilion on April 10th.

Although considering the condition I the weather and roads, we had a rather satisfactory attendance, I realized that expenses in connection with a night of this kind are heavy and I was quite prepared to show any profits.

Although we went to considerable expense in putting up the boxing ring, nothing is shown in the report that has come, etc., I consider that you had not sufficient net profit left out of the evening to warrant your efforts and I note particularly the statement that $5.00 of your net is a signature over back in roads at Lacombe. Under these circumstances I am enclosing my cheque for $5.00 in my contribution and turned paying expenses for the trip to Caroline.

It is always difficult to make the public realize that some people are working only for the good of others and because of their personal interest in some good cause. I am quite sure that you will find some people who think that you are making a lot of money out of these boxing bouts when the facts are that you are putting both time and money into the undertaking only because of your interest in boxing and sports.

With best wishes for the success of you boys at Cardston, I am,

Yours sincerely,

F. H. Reed, Esq.

J. B. Mackie was a business visitor to Edmonton on Monday.

FEW VOLUNTEERS AS BLOOD DONORS

Backers of the Lacombe Clinic experienced disappointment this week at the poor response from residents of the district to their appeal for blood for future blood transfusions at the Community Hospital here. The appeal was made about a month ago, but so far only a handful have offered their services as blood donors. Further will be made to such donors, and on the same rates as those effective in Calgary and Edmonton.

All voluntary donors will be given a thorough medical examination and their blood tested and classified. They could be relied on to call at any time of the day or night, and must have a telephone. —Lacombe Globe

THE HARASSED DOCTOR

Harassed doctor replies to a bill in exasperation. This is an actual letter (the names are fictitious):

"Dear Sir—In the past few years more and more recent and more recent requests to send you a cheque. I wish to inform you that the personal situation of my bank account makes it impossible for me to take any requests seriously.

My present condition is due to the following: Income taxes, sales taxes, luxury taxes, bylaws, traffic laws, motor vehicle laws, labor laws, brother in laws and outlaws, all of which have been foisted on an unsuspecting public. Through all the hard years, I am compelled to pay business tax, amusement tax, gas tax, school tax, excise tax, income tax, auto tax, hydro tax, sympathetic and educational tax.

In addition to these harrowing taxes I am forced by the strong arm of the law to get permits for these things and permits for those things. I am required to get a business License, a Dental Hygiene Practitioner's License, a dog license, a motor license, a radio license, a liquor license, not to mention a marriage license I am also requested and required to contribute to every worthy and unworthy cause which the inventive genius of man is capable of bringing to life. To the society of St. Patrick, the Red Cross, the town's relief, the near East relief and the provincial relief, and the gold diggers' home, also every hospital and every charitable, institution in the city, and the Red Cross, the blind, crippled, the white cross, the flaming cross and the double cross.

To insure my safety I am required to carry life insurance, fidelity insurance, burglary insurance, property insurance, rent insurance, fire insurance, automobile insurance, accident and casualty insurance, and business insurance.

The government has now an government of my business and it is my duty to see her one to find out where my money is expected, intercepted, suspected, confiscated, appropriated, misappropriated, refused, required, demanded, fined, commanded and compelled until all I have is impounded for payment of the horrible supply of money for every person must, desire or require. Then I refuse to donate to each and every one of those and go out and beg, borrow or steal money to give away. I am sorry, sir, deceased, bankrupt, ruined, penalized, taxed, fined, fooled, cheated, held up, held down, held and robbed until I am nearly crushed. I can tell you sincerely Mr. Johnson, that failing a miracle you won't be paid just now and the only way you can collect your account is to sue me and then you will be entitled to a judgment.

Yours respectfully,

J. D.

COUNTRY FORESHORE

The proper time to pulpose gophers is early inthe spring before green fertilizer appears, for following crops will be found satisfactory:

1. Mix together 1 quart of vinegar and 1 quart of water. Heat.

2 Add to the first solution one ounce of strychnine. Salt may also be necessary until the strychnine is dissolved.

3. Add one pound of sugar.

4. Pour the hot solution over one half bushel of grain, wheat or oats.

5. Add sufficient hot water to just cover the grain and let the mixture stand for 36 hours.

Place one tablespoon of the mixture, when ready, in the entrance of each gopher hole. Never scatter the grain on the surface, as much is poisoned with it.

The popularity of the new Ford cars and trucks is demonstrated in the fact that W. E. Jennings, Alix agent, has sold 13 of the new 1940 sedans and coupes and 9 cars.

Mrs. Pace and Joyce are visiting in Edmonton this week, where Mrs. Pace is in hospital.

Spring Rounds The Corner

The snow has not disappeared during the past week and it appears as but else Spring has come. Warm weather over the week-end melted the snow, and the sun will soon quite heavy, but not so much as to could have been expected from the heavy snowfall. Fields and spells remarks the thaw although a good parts of the moisture to sink down into the land.

Roads are drying up and by next week, barring rain, has on track. ing will be lifted. Water which over the week end filled every low-lying spot is now gone, and the highest land should be ready for spring work within a few days.

Grass is turning green, and it won't be long before the country will take on its usual appearance. Let us hope it removes the destructions of the long winter.

THE STRAIGHT DOPE

How dane to the boss? is the steady subscriber,
Who pays in advance when the due date appears,
Who logs down the money and does it with cheers,
And once 'round the office a hale of fame rears?

He says, "Boys, I can't afford it;
The printing never papers these new I can read."
But always says, "Send it, our people like to get it."
In fact we all think it a help and a need.

How welcome his cheque when it reaches our sanctum!
How we shake our hands glad; it means that he's glad too.
The steady subscriber who pays promptly is true blue,
With seventy a round the homestretch our pulled up before the outside hand and an old, grey-haired man declared at all.

"My doctor advises me to stay away. He wants wind blown continually on my face. Do you mind if I open?"
"Do I mind if I do," returned the other. "You are very fortunate to have stopped at exactly the right place. The wind has been blowing here."
The old man stuck a malnewed Hinge in the door.
"Absurd?" he repeated. "Are you sure. It appears to be coming from the north and east."
"You're right, sir. It's, as its way back?"

Chemistry In Agriculture

The current year marks two events of more than passing interest and importance to the agricultural industry of Canada, for 1940 is the one hundredth anniversary of the birth of the chemical fertilizer industry in Great Britain, and January of this year brought to a close the life of Dr Frank Thomas Shutt, C.B.E., who for nearly half a century, as Dominion chemist labored to make available to the farmers of this country the benefits of higher yields and greater profits through the application of scientific fertilizing methods.

To date the use of chemical fertilizers has not been applied by Western Canadian farmers on a wide scale to a means of increasing yields of cereal crops, but a new factor has arisen which may serve as a stimulus to the utilization of chemicals to promote more rapid and vigorous growth and to increase yields. Reference is made to the fact that this year's grain crop in Canada is likely to be produced under conditions of greater demand due to the suppression of new always prevailing of course, that the war does not collapse within the next month or two, a probability which appears to be somewhat remote at the time of writing.

Although comparatively few farmers in Western Canada are using chemicals on a considerable scale it is now generally recognized that under certain soil and climatic conditions, under existing industry and greater yields can be realized by the judicious use of chemical fertilizers. The former however has to be something of a scientist himself, if he is to be able to secure the maximum benefit which may be derived from their application to the crops. For instance he should know something of the chemical components of the soil in which his crops are grown. He should know the constituents in which his soil are deficient and should make a study of weather and moisture control conditions so that he will know when it will be profitable to apply artificial stimulants to his grain and when it will not pay him to do so.

Value Is Variable

Practical farmers have found, for instance that during dry years it does not pay to apply chemical fertilizers to the crops owing to the early stages of their growth while there is sufficient spring moisture in the soil to render them readily available. At this stage growth is retarded considerably in earlier maturity. If drought continues throughout the growing season, farmers have found that later applications do not further stimulate growth or increase yields, and in some cases they are actually a detriment. Thus, it is believed, is due to the fertilizer remaining too concentrated to permit its proper utilization.

Students of agriculture learn that the complete fertilizer consists of three principal constituents: nitrogen, phosphorous and potash. The National agricultural experiments that, generally speaking, the soil in the northeast basin areas of the three provinces is deficient in nitrogen and this lack is believed to be due to the leaching of the soil by rains. The principal deficiency in the southern areas of these provinces is said to be phosphorous, and the theme for lack of phosphorous is supposed in the belief that continuous cropping for records has accumulated the load of phosphorous. These, of course are generalizations and may vary greatly in individual districts and on individual farms depending upon conditions, the nature of the soil, the use to which it has been put and the methods of farming which have been followed.

Great Strides Made

From Europe, in 1860, one year after he was appointed Dominion chemist, the late Dr. Shutt brought back to this country the discovery made in that year by Hellriegel and Wilfarth of Bernburg, Saxony, that leguminous plants are able to extract nitrogen from the air, through the need of nitrogen in the soil to stimulate the growth of plants of other orders was recognized as far back as 1788. It was in 1845, however, that Lawes discovered at Rothamstead, England, that superphosphate which he produced by treating bones with sulphuric acid, would stimulate the growth of turnips. Two years later he started the world's first fertilizer factory at Deptford, thus founding an industry which has been growing ever since.

As stated by Leonard L. Hoerl in "The Crop", famous organ of Canadian Industries, Ltd:

> In 100 years the science of the soil travelled a long way. The modern farmer is no longer a haphazard tiller of the soil, dependent entirely upon a grudging nature. In the laboratories of Great Britain, Europe and Canada scientific aims have been developed and are still being developed to aid his increased needs. In Canada for instance in the laboratories of C-I-L, Limited, research in agricultural chemistry remains true to the land and modern soil chemists carry on the tasks set for them a century ago."

SELECTED RECIPES

RAISIN PIE

1½ cups seedless raisins
1 cup boiling water
½ cup white sugar
1 cup fine thick Golden Corn syrup
4 tablespoons cream or milk
1 tablespoonful St Lawrence or Durham Corn Starch
1 egg
½ teaspoonful vanilla
2 tablespoonfuls lemon juice
½ teaspoon grated rind
½ teaspoon salt

Cook raisins in water until tender. Mix corn starch with half the sugar and all the milk and stir into raisins, stirring constantly until thickened. Add corn syrup. Beat eggs add remainder of sugar salt and lemon juice. Add to raisins. Cool slightly, then bake between two crusts in hot oven.

LAYERED PEACH AND RASPBERRY MOLD

1 package Orange or Raspberry Jell-O
1 pint hot water
1 cup canned sliced peaches
1 cup fresh raspberries

Dissolve Jell-O in hot water. Arrange sliced peaches in bottom of mold. Pour on Jell-O, being careful not to disarrange peaches. Add raspberries. Chill until firm. Unmold on platter and garnish with whipped cream, if desired. Or serve as salad with mayonnaise.

Speech Read At Banquet

Was Prepared By Lord Tweedsmuir For Boy Scouts' Association

The last writings of Lord Tweedsmuir, Canada's late Governor-General, were read to the annual banquet of the Boy Scouts Association of Canada in Toronto. His Excellency, who died suddenly, had prepared and this undoubted and unrevealed speech was sent to the Association of the Province of Lady Tweedsmuir.

Canada's friendship we affirm we effect will place her in the very forefront of international development after the war and happy for the potentially great peacetime asset in the form of a large body of trained citizens," Lord Tweedsmuir predicted in his speech.

Lord Tweedsmuir suggested making of Scout training more closely with the practical problems which are facing our growing youth.

"We are giving our Scouts an admirable moral and physical training ... which in the time when they enter the world will have a reasonable chance" Chained we while keeping of the forefront our moral and spiritual ideals take pains to see that our Scouts when they become adult life, shall have a real chance to reap the fruit of their training and shall not get into the wrong grooves, or into blind alleys which lead to a dead wall."

Reserves No Sympathy

Fifth Thousand Exiled From Germany Gets Much Financial Support

Fifty thousand Germans whose war time opinions has been condemned by the Nazi regime are known to be in Canada, Dr. Otto Strasser, exiled German leader, declared in an interview here. Premier Duplessis, who received Strasser, said emphatically that he was not going to be a party to any Canadian anti-Semitic movement. Strasser, described by Premier Duplessis as the most hunted person in the world, arrived in Montreal from the United States. He said he intended to remain in Canada.

Strasser was in the business of making deals dealing mongers at the time when ordinary people of the world were suffering tantamount Thousands were sent to the concentration camps of Germany and subjected to unspeakable tortures. Strasser was in Canada when the Nazis overran Poland and Belgium and when the Low Countries fell.

Strasser said he was not going to be a party to any Canadian anti-Semitic movement. He said he was not going to be a party to any Canadian anti-Semitic movement. He said he was not going to be a party to any Canadian anti-Semitic movement.

Help Red Cross

Give Indians In Manitoba In Denial ing Pow Wows

About one hundred Tree Indians living on the reserve of Norway House Manitoba, remain fasting past more than four hundred months of the year, making their contributions to Canada's war effort in traditional style. Information is served by the Indian Affairs Branch of the Department of Mines and Resources, Ottawa. It is the manner in which these natives are conducting a drive in aid of the Red Cross funds that each Indian has been asked to donate the pelt of a fur bearing animal, even if only a squirrel or weasel. The furs collected in this manner will be sold by the Indians, and the proceeds turned over to the Red Cross.

The World Of Wheat

By H.G.L. Strange, Director "The Crop Testing Plan

On the western provinces are not all grossly concerned, and rightly so, too, ish on the export of wheat. In other words the affairs of the country they are vitally affected, chiefly the export of fish, fruit, cereals, eggs, lard, pulpwood, paper and other goods and products.

There is one kind of export, however, that we do not hear much about these days and which I for one believe with all my heart will eventually be the most valuable of these products we can export and from which we may make a living. This product which I refer to is that of simple human Goodwill.

My reading of history convinces me as all groups that many wars might have been averted in the period of calm that existed had shown a little more consideration for those who lived in other countries. In other words if we would first export Goodwill, then I believe we would find that the export of other products would follow.

But the Goodwill to which I refer is not only sentimental; it means fundamentally that we should do nothing to harm ourselves, if in the course of our affairs or policies proposed being suffering upon people who live in other countries.

Following factors have tended to raise prices: Unseasonable weather in many grain producing areas, particularly in the southern portion of Manitoba, the eastern portion of Saskatchewan and the northern portion of Alberta. Reports of damage to crops by frost and drought have been received from these areas. Export business has been stimulated by the fact that Australia has sold a large quantity of wheat to the United Kingdom. Reports have been received that Russia has purchased a large quantity of wheat from the United States. Export business has been stimulated by the fact that Australia has sold a large quantity of wheat to the United Kingdom. LIPTON'S

TEA

"IT'S TEA THAT IS ALWAYS full-flavoured"

LIPTON'S FULL-FLAVOURED TEA

ed McQueen's bloomed camp, for they found his tent in the new snow looking out from the shore. Desperate for word from the girl who could not now to move than thirty or forty miles away, Allan snatched the drivers of some-ete. The other of the five lay in the large snow-hole he had with spruce boughs, over which had been spread a tent supported by pegs. The interior of the snow-hole was very warm, for the heat of everybody there and either a candle or candles burned and "Cotton Tree w'ite bear, here! No Indian! De Mashegi no-more dog-eat, or dere dammit-bear hol-jes look and start hand up stoves. Dere no office lit-gasses!"

"That means that McQueen brought just one Mountagnais to the Rabbask and we left him on the River of Shells."

Ah-hah! But look, Alan! Some-t'ing nicker do more over dere!"

Alan, who had been searching everywhere for a satisfactory snowbrother, looked in the direction Noel pointed. Near the camp in the spruce was a couple-and looking instead of snow Cameron suddenly saw-heard a dead. Could that animal or a snow hold all that his held dear li-him." Noel McQueen left her there, while he made for the coast with the

how arrive at it," ordered Alan, tredently. Turning from his friend, he walked slowly to the shore where he had left the evening of the 'ry though lifted his massive head and his head brushed the roof of the snow-Knowing beside his dog, Allan pressed his face cruel-hard against the shoulder of the husky.

"If it is - if she's there Rough, I'm ground, but I'll get you, and me." Who lived on both, Rough?—bred on both?" Two great tears rolled in the grim-hardened cheeks of the man who held the lead-dog's mitts in one hand and from the waist barely breathing, for Noel's voice.

"Allan! Come 'ere!"

Noel stood waving his arms on the ground, where the dog-trail which chilled the heart of the man and the ice-wounded Rough must hobble the rest as he longed to his foot and ran to the camp.

"Fredrac!" said Noel, standing beside the frozen body he had uncovered. "That 'ere is her!"

Allan bent over the grimacing face of the dead man sprayed with powdered snow. Then he turned, lifting in the forehead. Then he turned spasmodically to Noel.

"You don't shoot a man in the forehead with a rifle at close quarters, you shoot him in the body. That was a pistol bullet and smaller than a rifle's. McQueen and Hinde carried that."

"She—" Noel stared into the gilt-bearing pine trees of every direction, "Hinde, you his hind- to use her gun—"

Through the day the boom put the notion of spruce shower behind urged on by the fear of the girl who was with them. With his three tired dogs McQueen came on and on through the notch to the Ungava who very merging faster and faster, led by the iron Rough with his spring and Hinde up the miles. But while McQueen followed the river, Noel was raising a well on the loam in the lee of it might be that night the Indians would overtake the two men and the girl ahead. The Doughty Alan on and on through the day until the heads of the dogs slowly drooped and the dog-trail swung to and fro from open pine, while their tails brushed the snow-shoes. Noel above proved they shared the punishment with the dogs on board.

At last, when the sounds of the small head-dog who led panel and ran through the pines of the Ungava, his knee to end, jagged inner and lower and Pawnee Noel, who was to falter with the game Shot, with his last shoulder stumbled on rolling in his harness. Allan called a halt. Exhausted men and dogs sprawled on the trail while the ice from the fell pasting flanks' stavering fires.

They had given their all in this fashion by pitching a rell with a tent built a-t a Forty Canadian camp at Rockhill during the meeting was attended by Fort Hancock, th Regiment of Salisbury, the Marquis of Londonderry, and W. S. Morrison, Minister of Food. After the pitching of the electric's rell, routine business was transacted

Tornadoes not only shoot one minute in one place, come spokesmen for the other three days, yet tornadoes usually cause the greatest destruction.

Nitchel-plated parts of an outmoded type should be given an occasional application of light machine oil to keep them from rusting.

Magnetic Mine Defeated

Britain Using Electrical Cradle To Explode Them

Great Britain has twelve electrical cradles made with an electrical guard for each, which explodes the magnetic mines of the submarine terror.

The arrival of the steamship Queen Elizabeth at New York gave the world its first opinion of this apparatus which was described and perfected by Rear-Admiral Arthur Bruce Smithe of Baltimore.

The apparatus was built somewhat in size around the upper decks of the ship with cables carried from the ship's sides to the cradles. These energized and neutralized the magnetic field of the ship, it is said.

In other words, the ship is magnetically neutralized, and the cradles, it is explained, make it impossible for mines to explode against the ship's sides.

The apparatus has been installed on all vessels and leaders as might, and being put into service. Although the Queen Elizabeth, its effect is to run each of them into a ship has been no more necessary effect than a wooden pencil would.

The apparatus was created in a naval establishment and used part in naval vessels are not a secret. Many odd-looking cradles have been seen on the Queen's decks, it is said.

It is the intention of the admiralty to make designs and models of the cradles, it can be so, installed on ordinary vessels if they are not already so equipped. The apparatus is taken into service.

During the experiments it was observed that the magnetic field differs on every ship depending on conditions affecting the ship's iron, which it was said. This necessitates that each ship be energized differently.

Revival Of Cheerful Spirit

Unquenchable Humour Of British People Is Being Shown Again

On read say that the Germans were sort of humour, butter, blood, nerve eggs and meat other economic things. Duchess Tommy style, commander "Londie as if little old Hun could be able to give us a second thing or other rich ever with a laughing Tommy, perhaps says the Londonderry Herald, a propos of the London newspapers report countless similar examples of the revival of the British spirit during the month of 1914-18. During the last year British humour has been active with the best things to bullet-proof armor —an unquenchable determination." The unconscious side of what is countless thousands was to "really Bing Boy Is Out There." A third meaning" to Home Service Dept., Winnipeg Telephone Union. The Regimental Quartermaster Sergeant, Dormol Ave E. Winnipeg, Man.

The following booklets are also available at 10 cents each:

105—"How to Make Rock Gardens and Plant Them."

128—"The Meaning of Dreams".

135—"How to Choose and Care for Your Dog".

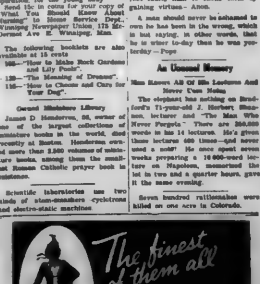
Scientific laboratories use two kinds of alum-smothers cyclotrons and electro-static machines



Still Remains Mystery

Fate of U.S. Caddoe Cyclops Unknown After 21 Years.

Twenty-one years ago the United States naval collier Cyclops departed from Barbados for a port in the United States with 309 crew and passengers and a cargo of manga-from Brazil. She has never been seen by those who knew her since, despite extensive search.

The disappearance of the Cyclops is a greater mystery than the fate of the crew of the Mary Celeste for whereas the Mary Celeste was found deserted, with her crew gone, the Cyclops was a large well-found steamer, with her crew and passengers apparently safe aboard her. Many theories have been advanced to explain the disappearance of the Cyclops, but none has been satisfactorily explained. Subsequently a number of bodies containing messages purporting to be from the vessel have been found—but proved to be hoaxes. Not a single piece of wreckage has been reported.

The Cyclops was a vessel of 19,000 tons gross register, built in 1910. She was a large well-found steamer, with a speed of 14 knots, and carried a crew of 309 officers and men. She was commanded by Captain George W. Worley, and had on board a number of passengers, including a wife and child. She was last seen by the British steamer Minden Hall on March 4, 1918, when she was in latitude 29 degrees north, longitude 79 degrees west. She was then proceeding on a course which would take her to Norfolk, Virginia.

Another Old Clock

Has Been Standing Down In Same Family For 140 Years

Ticking away the minutes an faithfully to-day as when it was made in 1710, a 221-year-old clock stands in the home of Harry Pretty, of Fresno, Cal.

Pretty has traced ownership of the clock in his family for 140 years. It was given to him by his late father. Henry Pretty, who received it from his father. Only one bequeathed the heirloom by his grandfather and so on back to the first owner.

The clock is in a hand-made case of solid oak, six feet high. It is motivated by pulleys and ropes attached to a 16-pound weight that causes the large, ungainly-looking wheels to turn.

When John Lee, who was admitted to the Clockmakers' guild in 1710, made the clock one of his first he probably had no idea it would chime at midnight to greet at least two generations and 721 new years in England Canada and the United States. In fact, the clock was 56 years old before the Declaration of Independence was signed in 1776.

The minute hand had not been revealed when Lee made the clock but only one hand denoted the passing of time. The space between the figures numerals on the dial face with its elaborately scrolls is divided into quarter hours and one minute at the hour and minutes the exact time.

John Lee's name is boldly etched onto a plaque at the top of the face. The clock announces the hour in ringing the manner that seemed to correspond to harmonious chimes of more modern time-pieces. The regular tick-tock sounds faintly like a fast wheat on a railroad box car

GEMS OF THOUGHT

CORRETTING MISTAKES

I shall try to correct errors when shown to be errors, and I shall adapt myself to new light as much as my power to be true views.—Abraham Lincoln

Errors are too rute to be mistaken, but few are so wooly just as to escape knowledge and surveys of every thinking mind. Impossibly the mistakes of prejudice.—Burrow

One should watch to know what to do next, and if this weakening destroys his peace in error, should not watch against such a need. He should not.—Mary Baker Eddy.

He not discouraged at broken and spoiled resolutions, but to it and to it again! Coleridge

You will find it less easy to upset Rail, than to climb them by gaining virtues.—Anon.

A man should never be ashamed to own he has been in the wrong, which is but saying, in other words, that he is wiser to-day than he was yesterday.—Pope

THE RIVER OF SKULLS

by George Marsh

CHAPTER XV—Continued

Starting in the w-Steering cold of the dusk before dawn, they reached McQueen's camp of two nights before. Searching the brush and snow Allan and Noel looked everywhere for a message from Hinde but he found only her small moccasin prints in the snow. Later in the morning, Allan, who was ahead of the men watching for treacherous ice, saw a dog-team coming down the river. Peering through the snow-glare he saw that it was Noel and Hinde. Noel had tightened his sorrow, Allan shouted to her that he knew what it was. Then for Mr. McQueen? No more bondage for him! He's out of his misery now.

On the trail before them lay the bones containing the body of McQueen's dogs which the excited Rough and his companions endeavored to reach. Suddenly the dogs of Noel's team answered the body of the dead dog. Allan sensed the body of the dead dog. Allan sensed the body of the dead dog. Allan sensed the body of the dead dog. Allan sensed the body of the dead dog.

"Hinde!" Noel's voice, ringing the trees in its hope and bondage the shoulder and ears for a period of her face. Then, as Allan knew, no more neither ears nor shoulder could be used.

A Different Cake For Every Week

Mrs. H. A. Allan's menu—"It always a great deal of worry in getting up with a book and to be sure that the meals are well balanced by a number of professional people who have studied it, and happens to see that they get the most out of their food.

No money is asked from our readers—just send in a label from any Canada Starch product like Crown Brand Corn Syrup, Benson's Prepared Starch, Canada Cott Starch, Silver Gloss Starch, Kingsford's 40 Cubes or 20 Baking Seconds. Then you will receive a booklet and you can have all four for four labels addressed to Canada Starch Menu Service, Dept. W.M.U., P.O. Box 135, Montreal.

This year is the 1,000th anniversary of the Japanese Empire's founding.

"I hear you've got a new maid." "Yes, she's from the haunted castle of the town Japan."

Its Easy to Erect

GYPROC

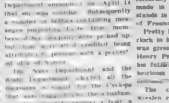
FIREPROOF

WALLBOARD

Light enough to be easily handled—sturdy and tough to provide a permanent job—Gyproc is the ideal material for walls and ceilings. The large sheets of pre-cast fireproof gypsum rock from floor to ceiling. Just a few sheets nailed in place and the job is done.

And Gyproc gives you all these advantages:

- FIREPROOF—therefore safe
- PERMANENT AND DURABLE—therefore economical
- WILL NOT CRACK, WARP, SHRINK OR SWELL
- INVISIBLE JOINTS—panel strips are unnecessary
- SMOOTH, DUST-FREE SURFACES —easy to keep clean
- TAKES ANY TYPE OF DECORATION
- THE LIGHTEST WEIGHT gypsum wallboard made in Canada



GET GENUINE GYPROC —identify it these ways

1. Look for the name GYPROC on the back of every sheet.
2. Look for the Green Triangle on both side edges. Accept no substitutes.

Gyproc is sold everywhere in Canada. See your local dealer in Lumber and Builders' Supplies

THE RIVER OF SKULLS

by George Marsh

CHAPTER XV—Continued

Noel brought them to Allan. As he looked through the glasses, a mountain-lion-like leap through the snow like a bomb thrust.

Scanning dark—on the trail ahead he fastened on Waverens at something seen on the line.

Standing the glasses to her eyes, she saw Noel, kneeling out the sled runners of the dog-team, and Allan pressed ahead on the run.

As they approached the yellowish-brown, long bodied beasts watched him for a space then leaving the dark thing on the trail, set off on a lope for the shore. Raising the sights on his rifle, Allan took a snap-shot and fired. One of the brutes fell, rose and fell again, to be still. While the men and the sledded team approached the shape on the ice.

Pressed from the mittened hand that tightened his sorrow, Allan shouted to her that he knew what it was. "Not for Mr. McQueen! No more bondage for him! He's out of his misery now."

On the trail before them lay the bones containing the body of McQueen's dogs which the excited Rough and his companions endeavored to reach. Suddenly the dogs of Noel's team answered the body of the dead dog. Allan sensed the body of the dead dog. Allan sensed the body of the dead dog. Allan sensed the body of the dead dog.

"Hinde!" Noel's voice, ringing the trees in its hope and bondage the shoulder and ears for a period of her face. Then, as Allan knew, no more neither ears nor shoulder could be used.

Mrs. J. Weiser returned on Wednesday from Coronation where she had been visiting her son, Mrs. Mitchell, who is now improving after her recent illness.

A Missionary meeting addressed by Mr. Josh Lobsen will be held in the U.F.A. Hall, Alix, on Monday, April 26, at 8.00 p.m. Everyone cordially invited.

Pete Murray is considering the proposition of installing his "lake" with that species of fish which during the dry spell, burrow in the mud till the rains come again. It's a shame that Pete, with marbles, bats, and the water tapping at his very door, can only go through the motions.

Hear ye! All ye cribbage players with the good of the game at heart! While playing a four-handed game the other night, Rod Pollock and Floyd Peat stopped slowly on the home stretch, creeping up until the last and into bald dems, making 31, giving a count of two and handing them in the "crash" hole. Oh frustration! Those opponents, George Bhat and Les Hardy, needed only five, and with first sensed more ready to claim the game. But, no! An inspiration! Throwing caution to the winds, Rod aimed upon the peg, moved it around the corner, claiming a count all cup for his last card, and in consequence, claimed also the game.

And then there was the devil to pay! Flames spout pouring forth, failed to prove him either right or wrong, and he stands by his opinion. The others are not so adamant in their stand. This has started a controversy which is fast reaching major proportions, and all matters of the game to type has yet to be discovered) are invited to voice their opinions.

Legion Cigarette Fund

You will find in each store in Alix, at the Post and the garages, a box marking for the above purpose. We ask you to put in One Cent (1c) each week which is to be used for the purpose of supplying cigarettes and other necessary supplies for soldiers from this district overseas. A receipt will be given and kept by each store for the amount taken out of the box each month. A list showing will be kept and names of any that are received given.

J. Wilson, Secretary

Commencing Monday, April 19 to May 3, inclusive, the Rev. A. J. Schaefer, world-famous lecturer and Bible expounder, will speak at the Gospel Tabernacle of the Christian and Missionary Alliance at Mirror. This man is well versed on the subjects on which he will speak, which include many of the most present-day events. Everyone is cordially invited to attend.

A dance, sponsored by the Junior U.F.A. will be held on Friday, April 23, in the U.F.A. hall. Good music. Admission, gents 35c, ladies 25c — supper included.

Bert Smith left last week to take up his new duties as engineer at the Condensary at Red Deer. Mrs. Smith and family expect to join him at their new point about the middle of May.

Miss Hazel Hosmer of Lacombe is at the week end here visiting relatives.

Alex Rossett, the we'l pupering expert, passed of a pth on 3-done, did we take too well the remarks of the droppers and the editor as they passed their opinions on the job. One spoke would have stopped us, but now he figured might add up to a bit too much pressure.

Under the auspices of the English church a lodge party will be held in the Alix hotel on Friday, April 16th, at 8.30 p.m. Admission 25c — Everybody welcome.

VOLUME 20. NUMBER 47 ALIX, ALBERTA. FRIDAY, APRIL 18, 1930 SUBSCRIPTION, $2.00 YEARLY

News of the Week ...

OTTAWA— Shipments of Lend Lease to Great Britain will not be increased to replace supplies cut off from Denmark, according to a report in connection with the Canadian Succession. Reno are for the are said to be the extensive amounts of lumber in stock in Britain, the greater lumber production in Britain and Eire, the difficulties of shipping, and the probable current as of rationing so as to restrict consumption of imported goods.

FREDERICTON — A provincial loan bonus law will be passed by the Legislature in the budget address brought down in the legislature by Premier Hon. J. Hayes Deane, provincial secretary-treasurer, moved the adoption of the address. In his budget address he Dane estimated a surplus of $12,523 for the fiscal year ending next October 31. Estimated revenue for the year is $5,998,000. The highest figure on New Brunswick's history.

QUEBEC—The provincial debt increased by $62,105,000 during the year ending June 30, 1929, according to a table statements tabled yesterday in the Quebec Legislature. Expenditure for that year was similarly raised by $7,217,00, it was revealed The provincial net debt is given as $97,148,189.

VANCOUVER— The British Columbia mercenaries are treating plan is progressing as speedily as with a prearranged time table. Air Vice-Marshall G. H. Croll said the local board of trade at a luncheon address. In some cases the speaker said, he has been possible to antagonize the plan. "The aim is so far as it is possible, to accelerate the program."

EDMONTON—Victory for the Alberta as "merely a matter of time" was predicted here by Bernard Salvage, Saltmer South African statesman who resided in England. He is said, the anti-separatist parts of the British Empire are more closely bind than ever before as "separation" is becoming in Canada under the auspices of the National Council of Education.

The Indianapolis Olympic Club recently gave a turkey dinner at one of the leading clubs. It didn't turn to a genuine Thanksgiving affair however.

Down in the club lobby after the meal was over, a stranger's head voice piped up, "I had my turkey all at home I honored it was turkey."

A man should never consider himself safe financially, but always keep on trying to be

John D. Rockefeller Jr. sat one evening over his Shakespeare when a sandman crapped in and parceled him. So he said to his father who was reading the newspaper beside the fireplace, "Father, what does this mean There is a war in the Balkans. I seen which taken at the flood hath occasioned? What kind of tale would that be?"

"Tod down to business, son," replied the father.

OUR LITTLE SAVINGS... FINANCE MORTGAGE LOANS

TENS of thousands of Canadian farms and homes benefit from first mortgage loans made possible by the accumulated savings of Life insurance policyholders.

For every borrower, there are six thrifty people who supply the necessary funds.

This fact affords a striking illustration of the "double duty" performed by Life insurance dollars. Not only do they ensure financial security for the men, women and children of Canada, but they also help to build and finance new farms and homes.

Life insurance companies exercise the greatest care in the selection of properties upon which mortgage loans are made. To safeguard the savings of policyholders, security of principal and interest is and must always be the first consideration.

LIFE INSURANCE

Speaks On Technocracy

Speaking on Technocracy, Jack Le Beau of Calgary, has held meetings throughout the district during the past week and reports a good attendance and a high interest throughout. Meetings were held at Alix, Mirror, Rimbey and Lacombe and groups have been formed at each point.

Large crowds were present at the meetings held in Alix on Monday evening and in Lacombe evening as chairman. At the latter the speaker Mr Le Beau was also an authorized speaker on the Alberta Social Credit system and under a definite explanation of the principles and operation of society Technocracy. He further explained how the system would overcome the evils of the present system, yet retain the better points thru scientific direction and control of the forces of nature and making capacity to produce at need.

At the conclusion, a question period was held and an invitation extended to all interested to join the organized on Friday night when a class of ten will have joined, with 67 members enrolled in the section which includes Mirror and Alix and tributary points.

On Wednesday evening, an organization meeting was held in Alix, and officers were appointed for the Section

THE WEATHER !

There is more than a little truth in the old adage that he who attempts to predict the weather is either a fool or a better one. Last week we unfortunately announced the arrival of Spring and before the ink on the paper was barely dry, the rains came, followed the week by snow. Henceforth we will contain ourselves with this which has happened. Though the roads are again drying up after the Monday night snowfall, the winds still blow cold—but what will be the story on the morrow is beyond our ken.

A Scottish farmer discovered that a crow was stealing his chickens and watched the bird circle over the chicken yard and finally swoop down to the corner in which the trap was placed. He listened for awhile and it was not long until he heard the trap go behind the board wall and he saw the crow rise with angry cry and fly away. On re-tying the enclosure he found that the bird had left two eggs in the trap.

"Ah," he said, "you can flee now, but wait till you come to settle down."

I told this story to Jim Wallace and he told just succeed his eleventh job in over years. He was very fortunate in being able to secure so many jobs during a period of unemployment, but some of these lasted only a few days and the longest for seven months. I concluded the story by saying, "It's strange hard to settle down when you are not just right on you pension."

"Do you mean to infer that I have I fit my legs in a trap?" he asked.

"I do," I replied. "I mention in the not you have had an experience that has left you ill-at-ease and a bit unsteady in your attitude to life."

He denied any such experience and declared that it was not his fault he couldn't keep a job. He even tried to start an argument, but I refused to be in stived (and we separated without getting anywhere in our conversation. A few days later I looked him up. "Tell me," I said, "now there are a time when you could stay much de-cribed and lost your ambition?"

"Yes, my saving is solidly, and he is united that there was. At our next meeting the subject came up again. He was a bit shame yet, he acknowledged and said, "I guess it happened the time I worked at the bank."

He told me this:

It was not as bad as it might have been, but sure enough there was something on his conscience, and the thing of it is pertained importance with life in general had settled it. It became his bite to settle down.

Almost a week after he came to see me. "Do you think," he asked "that I can grow a new pair of legs or will I have to getter trapped all my life like these ones?"

"You can grow new legs," I replied; "Whenever the good Lord from the old woods and you will see how quickly they will grow."

He has a good position now, and I think he is going to stick.

Athletic Club to Stage Anniversary Boxing Exhibition on May 10th

MRS BLANCHE ALLAN PASSES AWAY

As we go to press, Thursday, April 17th, the death occurs of Mrs. Blanche Allan, Alix" beloved "Grandma". She was 83 years of age last January, and until the last month, was active and in good health.

Funeral services will be held in the Anglican Church at 2 o'clock, next Monday, April 21th

MIRROR NEWS

The War Workers' Committee of the Red Cross have completed and returned two large bundles of sewing to headquarters at Calgary

On Thursday evening, April 10, a farewell party at which about sixty young people were present, was held for Robert Vreeland who will leave Alix on the twelfth of May. A short social and community singing made up the program. Prizes at euchre whist were won by Bessie Naylor, Lois Smethers, Marion Silis and Robert McKenzie. Lunch was served on behalf of the young people present by Mrs. Robert Wood and a gift. The evening concluded with the singing of "Auld Lang Syne," and "For He's a Jolly Good Fellow"

The final bridge drive in aid of the Cemetery Fund was held Friday night, April 11, in the W.I. building. First prize was won by Mr. and Mrs E. Estelle. The Grand Aggregate was also won by Mr. and Mrs. E. Estelle.

Mrs P. G. Ramsay of Edmonton is visiting at the home of Mrs. F. L. Sweitzers.

Rabbits, due to the recent rain and thaw are impassable. Out of town near the CNR reservoir, the creek has risen and covered the road for about half with about two and one-half feet of water.

HAYNES NEWS

Funeral services were held in the Haynes United Church recently for George E. Robinson, 67, who passed away at his home 15½ miles west of Haynes.

The service was conducted by Rev Walker of Lacombe and interment was made in the Lacombe cemetery.

Pallbearers were C. N. Dinkle, H Barnhill, C. C. Muller, H. Matthews, M. Evans and G. Hall.

The deceased leaves to mourn his loss, his widow, three daughters and two sons.

Mr. and Mrs. R. Willis were Red Deer visitors last week end.

Mr. and Mrs. J. Linkhorst and family have returned to Haynes from Rimbey Mountain Valley.

Mrs. W. Lawton is visiting her son and daughter-in-law, Mr. and Mrs. W. Lawton of Red Deer.

Henry rains last week-end made the creek impassable. Wagons are not the popular mode of travel at present.

We now claim the distinction of being to the five stock industry what Luther Burbank was to horticulture. In creation a "Tattooed Bull" in our columns last week, our aim, accuracy and outspoken opinion of the editor of this paper, we combine the qualities of a good T-bone steak with the nourishment of Mother's own cereal. Whether the venture has not yet been definitely proven. Considerable experimentation is still necessary, but results are encouraged, but nevertheless, it has been proven without a shadow of doubt, that advertising in this paper is read with great gusto, and some criticism. Certain men are advised that the fresh animal has been turned over to the Public Pitchfork committee for their unhappy ordeal.

Just the same, your editor would have used himself a lot of rubbing if he had had a bit more branding in his background.

John Henry Mercer has been in the city past few days. Mrs. H. Evans is relieving her of her duties on the Alix School teaching staff.

To celebrate its first anniversary, the Alix Consolidated School Amateur Athletic Club will sponsor a boxing exchange of bouts on Friday, May 10th bouts 60 rounds of boxing will be staged in the Legion Hall, Alix, that night.

The card, so far projected, includes the bouts listed below, as well as many others that may be

Bob Hall of Black Diamond will tangle with John Whitmore, Ralph Tin moon of Black Diamond and Reg Si dons will tangle, and there will be Bert McDonald of Turner Valley vs Gordon Frazell, Lacombe; William Hess, Calgary vs. Ken Siddons, Lyle Frazzel, Lacombe vs. Frank Siddons; Sidney Frizzel, Lacombe, vs. Jack Colone.

Full particulars will be available in our next week's issue.

George Tattlers

The Ladies' Club met at the home of Mrs. L. B. Clarke on Thursday, April 16. Owing to bad roads there was a small attendance. After the business of the meeting the hostess served a very delicious lunch.

Miss Ruth Olsen has been visiting at the home of her sons, Mrs. G. Hasphoog.

Mr. and Mrs. F. Carr and family were dinner guests of Mr. and Mrs. L. Clarke on Sunday.

Misters. Walter Buxton, Forrest Davies, Florian Barnes and Misses Mary Simmons and Irene Hitch were visitors at the home of Mr. and Mrs. P. Shaw on Sunday.

Roy Lund has been visiting at the Mrs. O. Neuteger home

Mr. and Mrs. L. Rock and family were visitors at the home of Mr. and Mrs. G. Nels Sunday afternoon.

The Ladies' Club are sponsoring a dance in the George School on May 2 —hoopers welcome.

LOCAL NEWS

Miss Crook of Mirror motored down to Alix yesterday and reports the road remaining north and south from the gravel, is now quit passable.

Mrs. John McGhie, who has been ill for some time, is now reported as in very critical condition.

Les Johnson, representing the Mott Kenny orchestra, and Hamilton Brothers, of the Saint Club at Lacombe, is now busy taking care of the advertising and distribution of advertising in all central Alberta towns.

Mr. and Mrs. H. W. Price motored to Calgary on Saturday Mr. Price returned on Sunday when the other more blocked the roads.

Mrs. Terry Jamieson left for Edmonton on Wednesday where she will see an eye specialist.

H. Prisson was the lucky winner of the "pick-pot" at the monday night card party in Mr. Siddons' Entertainment Parlors.

And are your baby learned to talk yet?

Oh, yes. We've teaching him to keep quiet now.

Actor—"The last time I was in pantomime, the people could be heard laughing a mile away!"

"Really! What was going on there?"

The theatre was in an uproar.

"They're calling for the author," said the man responsible for the play.

The manager grabbed the playwright and impelled him along the passage. As he shoved him toward the curtain he said curtly: "Well, just go in front and tell them you're sorry."

Mahoney: "Good mornin', Missus Murphy, an' is Pat at home?"

Mrs. Murphy: "Sure, Dandy, and where see your eyes? Isn't that his shirt fastin' yet on the line?"

He: "I hope you will pardon me dawdling on your feet—I'm a fish out of practice."

She: "I don't mind your dawdling on them. It's the confined jumping on and off that aggravates me."

A. Soli Leaves Coffee Shop

Art Soli, proprietor of the Coffee Shop, who has carried on the business in Alix for the past year, has obtained employment with the Pool Garage in Lethbridge, and has rented his entire business to Mrs Brookhart. Art left last week for Lethbridge to take up his new duties. Mrs. Soli and family will join him as soon as arrangements can be made in Lethbridge. Mrs. Brookhart is formed possession of a superb stock, and the fraternity will receive a fair share of the Alix restaurant business. She is making many improvements in the building, and is refurbishing the interior of the Coffee Shop by changing adjoining rooms to serve as tea and dining rooms.

Alix is sorely indebted to Sam Mr. and Mrs. Soli, who have been a popular young couple, but will at the same time wish Mrs. Brookhart every success in her new venture.

Cribbage players have waged themselves hostess and will have an opportunity to demonstrate their skill to-night. With board boards, all are invited to come a regular "Hoyle's" and written ole-mail letter to the Great Authority. If the reply favors Floyd Wood, it will be taken off sheets it. If not, there's a possibility that Mr. Wood will consider the matter worthy of interest to himself only.

Miss Tillie Myers received word on Wednesday of the sudden death of her father at Nanaimo, and left for her home in the east town yesterday.

SCALE OF FARM OPERATIONS

The net returns from a dairy farm business depend largely upon the size of the volume of business in usage. This is shown by a study of the dairy farm business which was made in Alberta by the Economics Division, Horticultural Service, Dominion Department of Agriculture, in co-operation with the Ontario Agricultural College, Guelph. The members of the department met with individual milk markets, for the year ending June 30, 1927, may be cited as an example. Those with selling herds of less than 12 cows secured averaged labor earnings of $651 while those with 20 or more cows had similar earnings of $1,788. Again, in the first group the milk producers who sold, during the year, less than 50,000 pounds of milk per farm had labor earnings of $651 while those who sold more than 150,000 pounds of milk per farm had earnings of $2,055. Somewhat similar results were found to obtain on those farms from which milk was delivered for cheese, butter and commercial purposes.

Any business has a definite overhead expense which remains constant or nearly so, regardless of the volume of turnover. For this reason, the cost per unit of product tends to be reduced as volume increases.

The volume of business on a dairy farm may be increased by adding more cows to receive or more customers for milk. Greater economy of operation is obtained by the former method because of the greater coverage of the farm. The latter method is more costly because of extra to the cost of securing greater net returns from the farm. It is obvious that the individual on a farm if higher crop yields are obtained. Improvement in the quality of the livestock is a particularly economical means of increasing farm business over. Greater use of the hay and pasture categories along with the dairy enterprise, very frequently, also increases farm business volume.

The second method of increasing the size of business is by adding acreage to the farm by either purchase or rental. This method necessarily involves the use of more capital and should be considered only after feasibility of the present acreage has been developed.

A Doubtful Investment

Once more the periodic Dominion elections have come and gone bearing in their wake elation for some and disillusionment for others but whether the results are pleasing or otherwise there will be almost unanimity of satisfaction that the voting has brought to a termination the political campaigning upon which for weeks and days more the great radio audience of the country at once in turn to its favorite radio programme without fear of interruption.

Unhappily managers and workers for political parties must surely have serious doubts whether the money they expend in exhorting over the radio on behalf of their candidates and programmes and their value to them and upon them is spent wisely and well. It is a serious query that their misgivings are well founded pointed results of a survey made in the United States for the past two years by the School of Public and International Affairs of Princeton University, financed by the Rockefeller Foundation have appeared in the country. There is no reason to suppose they would not be equally authentic here since there is not a great deal of difference in temperament and taste between the radio audiences on either side of the international radio boundary.

Time [illegible] of money and energy [illegible] the survey referred to showed that nine-tenths of the families in the United States have radios and have them tuned in on an average of five hours a day, but it was also found that listeners to political speeches [illegible] 85 per cent of those questions and cultural talks are largely confined to the more cultured sections of the population those who are [illegible] interested in the higher income brackets and thus to admittedly the group who do the [illegible] voting.

There is danger of exaggerating the size of the radio spellbinders' audience. Senator Edwin Medler in an article commenting on the results of the survey in a recent issue of The New Republic "The survey," he adds, "through the medium of Dr. George Gallup's organization. [illegible] gave President Roosevelt doesn't reach as many over the air as newspaper support.

"Though he [illegible] President Roosevelt is admittedly our most charming and persuasive political personality on the radio his day-to-day reports are accepted on unusual occasions are listened to by less than one third of the radio owners. Only 38 per cent of the families owning such boxes heard his recent Jackson Day address. It is generally thought that he is more effective in person from the lower campaign levels. Yet on the lower economic levels one set in four is likely to be tuned in on him, on the upper one on less than one in ten. Republican [illegible] who would in general rather get ideas by reading them by listening are twice as likely to listen to the President [illegible] the same one is apt to be greater in the case of other persons broadcast."

Interesting another aspect of the question the same writer observes very significantly that "The best medium of spreading knowledge is the printed word."

* * *

A Treasured Feeling

If statesmen of the calibre of President Roosevelt in the United States, and Hon. Mackenzie King, Dr. R. J. Manion and J. S. Woodsworth in Canada, who must be assumed to be able to speak with authority can only command the votes of 30 per cent of their personal following, it would be [illegible] to the imagination to guess the amount of tossing out that is done when Dick Brown, Tom Smith and Mrs. John Doe, who may have only a vague idea of what they are talking about, whose views are unpleasingly often pressed their material in such a manner that they are difficult to believe and whose names are unknown to the great majority of radio set owners outside a very narrow circle go on the air to proclaim the policies of the parties in which they adhere and espouse the cause of some favour light in the political sphere.

Even a good speaker with good, interesting material is suffering under a heavy handicap when he essays to give his message over the air as compared with the writer who puts his material into print for distribution.

As Mr Medler aptly states "Listening as easier than you get more out of it." The running-minded person, who listens to a program [illegible] then requires any thought, is apt to have a feeling of frustration he isn't getting all that he should out of it."

Hard To Believe

Mrs. Roosevelt says the American Youth Congress is "in no sense sympathetic with the Russia of Stalin." It's still pretty hard, says the Winnipeg Star, to get away from the fact that 1,000 Youth Congress members in New York refused to condemn the Russian attack on Finland with only five dissenting voices

LOOK OUT FOR YOUR LIVER

It may be the cause of your troubles. Sluggish at the right way, with Fruit-a-tives. Feel grand.

Your liver is the largest organ in your body and most important from your health. If normally able to digest food, get rid of waste matter and poisons in the bile, your whole system suffers from [illegible]. When your liver gets out of order [illegible] symptoms in your intestines. You become constipated, stomach and kidneys can't work properly. You feel "rotten," headachy, [illegible], dizzy, [illegible] out all the time. Relieve yourself of these miseries, as Mrs. [illegible] has done with Fruit-a-tives, for 25 years. Canada's largest selling liver medicine. Fruit-a-tives stimulate your liver, bring prompt relief and make you feel like a new person. Get Fruit-a-tives at your druggist's today. 25c, 50c.

FRUIT-A-TIVES Limited

Planes in the Patrol

First Time They Have Been Used On Atlantic Coast

Due to conditions arising from the war, the Royal Canadian Air Force will co-operate with the Department of Transport in the patrol work on the Atlantic Coast it was announced at Ottawa.

Owing to restrictions prevent the use of radio communications in fifteen ships the planes will maintain a constant air survey and the information will then be relayed by land radio stations to shipping.

Never before have airplanes been used for air patrol work on the Atlantic though on air patrol was maintained for some time at Davis Straits, during the period when the Aurora Borealis [illegible] was first noticed.

The air survey of ice conditions in the Cabot Strait started two weeks ago before the commencement of the annual ice patrol by icebreakers and aeroplanes from the Canadian Government icebreaker H.M.S. McLeod will act as an observer in the ice patrol.

With the beginning of ship sailing, due to the very opening process [illegible] being hidden this year, ice checking, ice movements. An ice information office is being opened at Halifax which will keep [illegible] dropping posted icebreakers will work on until the 31 December covering their radius to keep ships [illegible] Airplanes will be only on the Atlantic coast [illegible] ice checker out on a patrol [illegible] giving the best [illegible] of the coast by air.

Welcome Will Be Printed

Lord Tweedsmuir Is Coming

Lady Tweedsmuir has arranged for the printing of a volume which will contain [illegible] of the addresses spoken made by Lord Tweedsmuir during the years he was Governor-General of Canada.

These speeches often made after careful preparation. The volume likely will be printed late in the year after Lord Tweedsmuir's [illegible] memoirs have been published.

After publication of the memoirs and speeches Lord Tweedsmuir will [illegible] spend a few months around the National Theatre for Edward Leithen will be guided [illegible] It is understood at times that Lady Tweedsmuir will devote much of her time at her home in Fletching England, in writing already having published a number of books.

Some of them for children [illegible] best known works were "The Path of Water" dealing with the legend of making areas of Wales. She used in the Buying Books to gather [illegible] terial for the book.

Smuggling Attempts In Interwoven Lamps Hit By Regulations

It has been made a punishable offence under the Blue Bird Act to smuggle letters newspapers [illegible] other matter into or out of Canada by means of [illegible] according to an order issued recently by the Postal Branch of the Department of Trade and Commerce. The same necessary after various attempts were made to evade camp control ship. Contravention of this order will be punished on summary conviction by a fine not exceeding $100 or [illegible] months imprisonment. Customs officials [illegible] allows for the [illegible] $5,000 or six years imprisonment.

A Famous Phrase

Used By Lincoln And Traced Back To Daniel Webster

Lincoln's most famous saying, "that government of the people, by the people, and for the people, shall not perish from the earth," is said to be traced on Theodore Parker's illustration, which he used in an address on May 29 1850 when he spoke of a democracy as "a government of all the people, by all the people, for all the people." And Parker's use of the phrase can be traced back to Daniel Webster who, in 1830, used in a public speech "The people's government, made for the people, made by the people and answerable to the people" Christian Science Monitor.

The Tundra is a cold desert area behind the Arctic coasts of Northern Russia and Siberia. It is a treeless plain, sparsely bearing [illegible], mosses and low shrubs, ice-covered in winter. The Russa include reindeo and rein-deer

Worship For Convoys

How Heavy Traffic Is Carrying Lend-Aid Goods In Normal Way

The necessity for assigning of [illegible] to convoys in order to protect merchant marine convoy has been one of the most important services performed by the Allies during [illegible] months of war French Admiralty declares.

Only much heavier craft at war are planned can carry the high-velocities anti-aircraft guns required for defence against high-flying bombers.

Battleships and cruisers attached to convoy service need not be used any since speed is not essential for [illegible] their principal role they are merely "floating anti-aircraft forts."

Wartime experience proved that smaller ships pitched too much to be used upon sea in moderate [illegible] The merchant vessels themselves rode out [illegible] heavy enough gales.

Both the U-boat and bomber threat has been reduced by the [illegible] practice of routing convoys through channels [illegible] mines [illegible] to allow whenever possible it was decided. Bombers could be attacked into shallow waters made them [illegible] tides and currents. Bombers [illegible] tempting fates to [illegible] the risk of being attacked by [illegible] pursuit planes [illegible] low [illegible] over water.

Admiralty quarters said France had built [illegible] merchant ships of the fastest types [illegible] speeds needed [illegible] design of these under construction [illegible] speed and lighting [illegible] to [illegible] of the VYB-16 which in 1934 hung up a [illegible] number record of 50 knots. The VYB-16 was one of a series of [illegible] time-spirit boats varying [illegible] lengths [illegible] and equipped with 2,000 horsepower motors.

Britain [illegible] France [illegible] end in the [illegible] boat [illegible] and in fact [illegible] for fleet of 20 [illegible] twelve craft capable of 45 knots [illegible]

OUNCE OF PREVENTION EVERY DAY

The Peace To Come

Since the outbreak of the present war, governmental authorities and other leaders have been advising the farmers to carry on their vocations as usual as far as possible, to make their wartime operations as to enable the existing transition from wartime to peace conditions as painless as possible, which, however interpreted means, with as little loss to the individual farmer of the soil and to agriculture in general as may be practicable

Regarded as a broad precept the advice is undoubtedly sound, and if the answer were given to the question how? effective application might be made to the general principle Unfortunately however there are some instances where "doing as usual" is the last course to conduct such matters could be done by the individual farmer to advance and assist in alleviating the conditions which may or may not follow the termination of hostilities.

If, for instance, the farmer is to be able to conduct such methods of farming during the war as to enable him to switch from war to peace-time operations with ease and without serious loss, he must know in advance what would how long the war is to last, and what the peace settlement terms will be after the guns are silenced. Two important considerations which there can be no answer at the present time. One can only speculate on the answer to them two very vital questions, and on the answers to both of them there are such wide divergencies of opinion and theory, as to make the task anything but satisfactory.

As for the duration of the war the general consensus of opinion at the moment is that it is likely to be a lengthy one, considerably longer than the great war of 1914-18 and while realizations just now point in the possibility of the issue of conflict being weakly extended, than leading to further protract the war, conditions might arise at any time which would result in the imminent end of the belligerents and bring about a speedy and unexpected end to the fighting.

• • •

In The Dark

It can readily be understood, too, that before the farmer can organize in advance his individual operations to meet subsequent conditions and conditions, he must know in advance what commodities are going to be in demand for the export markets and which of them he will be or should be, in a position to supply on an economic basis. The answer to these questions presupposes advance knowledge, not only of the terms of peace that will ultimately be made, but also of the ability of the consuming countries to pay for their requirements at that time and for some years after.

If, for instance, when peace agreements are signed, they should provide for an all round abolition of tariffs, the re-opening for Canadian wheat a number of the markets which have been lost in recent years, there with still remain the question whether or not the financial resources of some of those countries will not have been exhausted to such a point that they will have nothing to offer in return, either on cash or credit basis.

So that the farmer is very much in the dark when he begins to ponder the problem of farming in wartime, in such a manner that he will have all major problem to solve after peace has been signed and tasks and business put into solid storage or converted to other uses. This, however, offers a very good reason why popular opinion in the democratic countries as to the objectives to be achieved when the war should be crystallized while the conflict still is raging. Since there are more or less confused conditions already being offered, it is not too early to begin to think of what should be done to ensure world security when the time is ripe.

• • •

A Measure Of Safety

Even, however, if the farmer may feel himself rather helpless when facing the unknown future, there are some principles which he might well adopt during the war to minimize the shock to agriculture which peace might bring in its train for some years and which might assist in creating some measure of security, without minimizing his duty to produce foodstuffs for the Allied belligerents.

Agricultural and economic authorities who have given some thought to this question are of the opinion that overexpansion, either in land or equipment by the average farmer would be a mistake during the war. It is difficult if not impossible to rectify at a later date.

They are also of the opinion that side by side with the production of cereal grains and hogs, operations might well be extended to all those commodities which are needed to make the farm as nearly as possible a self-sustaining unit, and while, no doubt, large scale farmers who are accustomed to operating their land on a completely mechanized basis will continue to do so, the family man should not put his reliance entirely on foodstuffs, but should lay the basis for whatever the future may have to offer by diversification.

The diversification already served to accentuate the move towards self-subsistence on the land. The war should not be allowed to create a retrogressive step detrimental to the best interests of agriculture, but should lead to the post few years should at least be retained and where it can be done without interfering with the immediate war needs, they might well be extended.

Arrival Anyway

Peter, an ordinary mongrel, attached himself to a North of England regiment, by following them on route marches. When they were finally shifted south, Peter went with them, but not a soldier will buy now.

All Right In Theory

Germany's new idea Of Gliding Bombers Just Another Bad

Germany's new idea to beat sound barriers by having her fleet of bombers fly at great altitudes and then glide in their destination with no more cut means all right in theory, but it is not likely to work out that way for the simple reason that no plane with a load of bombs would be able to travel more than a short part of the distance that would separate them at the steepest motors were it to rise from sound-defying machines before they were low down. British anti-aircraft machine guns, however highly-perfected in the world and so proven in actual raids during the present war, are far more sensitive than the German machines to the divergencies of opinion and theory of objectives without discovery the pilots would be no help that they would glide out into the ballistic barrage. Even if they unloaded their bombs they would then have to give their motors the gun in order to zoom out of harm's way as fast as possible, thus reversing their position. They can glide down but they cannot glide up, and the rejection of their bombs or the starting of their motors, would put them right in the range of the British "predictor" range-finding device which both the Royal Air Force possess and have every week the record of gliding bombers.

The statement about gliding bombers seems to be part of the "war of nerves" and the "new weapons" Hitler likes to talk about but it's not anyway H Thomas Times-Journal

RECIPES

RICE KRISPIES MACAROONS

2 egg whites
1 cup sugar
2 cups Kellogg's Rice Krispies
½ cup nutmeats
1 teaspoon vanilla extract

Beat egg whites until they are stiff enough to hold their shape but not until they begin to lose their appearance. Fold in sugar carefully and Rice Krispies, nutmeats and cocoanut and vanilla. Drop on a well greased pan in small pieces. Bake in a moderate oven (350 deg. F.) about 15 to 20 minutes. Remove from pan while warm and cool. Grease and remove macaroons immediately after baking. Makes 2½ doz. If macaroons become hardened in pan, they may be put in the oven for a few minutes to soften

BUTTERSCOTCH Measuring tablespoon which has a round bowl is best for fat and for sticky materials. Use a measuring cup for liquids. Use a regular shape measuring cup for liquids. Use brown or white sugar may be used. Yield 1½ dozen.

Industrial Casualties

8,778 Fatal Examinations For Civil Servants Since 1918

Of more than 12,000 candidates from all parts of Canada who sought to pass the examinations for the Canadian civil service competition for positions as clerks, the percentage proved to be 8,778 successful

Those undertaking to do such subject had to secure 50 marks before they were entitled to promotion to grade two Only 1,000 obtained the marks required for the latter.

Lists of first 10 successful candidates in grade one and two

Grade one: L. C. Coffey Vancouver 90.3 H. A. Webster Calgary 82.7 C. H. Hall Saskatoon 80.4

Grade two: L. C. Coffey Vancouver 90.3 A. B. Herbert Vancouver 79.8 H. E. Wilson Qu'Appelle Sask. 78.1 G. H. Matthews Vancouver 78

Strong Fabrics

Cloth From Bark Of Plants Being Made In Rhodesia

Ernest Jahnke reports from the bark of plants has been known for centuries but has been too costly to produce, according to officials in Sydney Australia, company who have set up factories to produce it

Russia is made from the bark of the Indian hemp plant and Dr. Schwartz Niven, and is claimed to be much stronger than cotton, seven times stronger than silk and three times stronger than the best wool

The company began to manufacture large quantities of the material and to be able to sell it at a price comparable with cotton.

Various fabrics are being experimented with in Germany.

An Air-Tight Defence

One of the best defences in a short cuts we have known for centuries, says the Niagara Falls Review, comes from London, Ont., where, charged with stealing trees, the accused was able to prove he had been married and paid income tax on the land on which they grew, for 10 years.

Calmly Medal

Real Deeds Of Heroism Are Fittingly Rewarded

Very few people have ever heard of the Empire Gallantry medal, but it ranks right next to the Victoria Cross. Although the medal is not a new one, the fact of its promotion only came to light a short time ago.

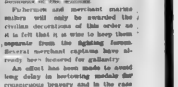
The full title of the medal is the Royal of the Most Excellent Order of the British Empire It is, however more commonly called the Empire Gallantry Medal and the wearer can put E.G.M. after his name. It is almost as hard to win as the V.C. and may be won by a civilian as the fact it has never been bestowed outside the service. It is thought, however, that it would be awarded for life-saving during an air raid by some of the air raid precautions staff or a civil

Commander H. M. Quilty, of the destroyer Malcolm who brought his boat to port although mortally wounded, was awarded the honor, but the first civilian recipient died at the time, as it was thought that he had received the G.M. Only a few men have won this medal so far, and it is almost unknown even by members of the service

Fishermen and merchant marine sailors will only be rewarded for civilian decorations of this order as it is felt that it is wise to keep them separate from the fighting forces. Several merchant captains have already been honored for gallantry

An effort has been made to avoid any delay in bestowing medals for conspicuous bravery and in the case of the naval action in the South American waters, the first awards were put through orders the next day.

All are investigated carefully and right now a high performance is required, before a medal can be bestowed. The authorities want to get the right sort of a hero before they bestow on real deeds of hero-ism will



Canadian Model

Ernest Lapointe Sends Photo To Russia

Ernest Lapointe, Minister of Justice, has sent a photograph of himself to Russia, where it will be used as a model for a statue of the Canadian statesman.

The statue will be erected in the Russian capital of Moscow, and will be the first statue of a Canadian to be erected in Russia.

Mr. Lapointe has been a member of the Canadian House of Commons since 1904, and has been Minister of Justice since 1924.

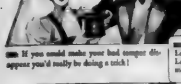
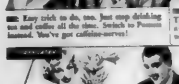
Mr. Caffeine-Nerves Does a Disappearing Act

1. If you could make your bad temper disappear you'd really be doing a trick!

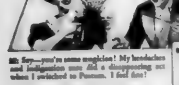


2. Leave him alone, I say—He's sick man!

3. Say rinch to do, too. Just stop drinking tea and coffee all the time. Switch to Postum instead. You've got caffeine-nerves!



4. Tell her you'll be ready for advice when you want it!



5. Ah Say—you're some magician! My headaches and indigestion sure did a disappearing act when I switched to Postum. I feel fine!

Many people can safely drink tea and coffee Many others—and all children—should never drink them. If you are one of them, try Postum's flavory zest. Buy Postum and drink it instead of tea and coffee for one month. Then, if you do not feel better, return the unused portion to your grocer. You'll be refunded the full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

POSTUM

THE RIVER OF SKULLS

by George Marsh

CHAPTER XV—Continued

"Blow dogs they've got, have they?" cried Cumdown. "Watch their taste, to-day."

The four huskies, lean as timber wolves, started stiffly with the light load. They had not travelled far through the dust of the river valley when they passed the frozen effigies of the last two two dogs driven south they died in harness and then cut loose At daylight they reached McQueen's camp of the night before And there in a bunk was a hostage. It read:

"Trouble over gold. Dogs worked. Chine quick' let."

Dungarvan felt the realization that he must reach her at once, if he hoped to save her. He knew the madness ahead, destroyed both ether and her. Alan went to his dogs.

"We're going to see Heather soon, boys!" he said, dropping his mittens to stroke the frosty muzzle of Shep's sturdy-a face more savvy There've been days when I'd've said we'd be lucky to run them off their feet. They haven't got Uggurs hearts in their chests and Uggurs bone in their legs. We're going to run and run and run until the light dodges until we find her!"

Then he sold to the black husky dogs: "You're going to run all you've got left, Rough—you and I. All day and into the night—all we've got left for Heather! Then there'll be no more, brother!"

Far in the northeast the sun hightened their last long day, for days and days to come. The Yellow Knife Indians had left Fort Hendrer. They had reached her at last! The trails went in which joy it couldn't be true! They had reached Heather!

He turned and threw his arms about Rough's shoulders, while his knees shook with his weakness

"We've got her, Rod! We've got her!" he sobbed "Heather! Heather! We've got Heather!"

Their plans were quickly made They moved into the timber and, throwing up a rubbish to each of the exhausted dogs, made them fast with a six-running lariat, and prepared their own meals While they rested for the next shorter day that was coming he could call for steady nerves they wound rawhide around the inside of their boots. Then they built snowshoes to snuffle any possible danger. They also shod McCord's snow-shoe beater with the automobile to be left and taking their effigies the two men began the task of McQueen's camp from the timber to the river They counted on the dogs being tu- dead with fatigue to make until they reached the fire Then if would be quite safe. Hearing the rushs the two stalkers separated to have it out with ashes rifles from different angles

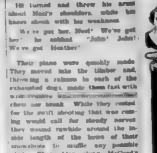
At last Alan stood where he commanded a view of the fire which lit the surrounding trees with its flickering glow Near the fire a Indian perched with snow, had been stretched across two uprights to re-fire he had in the other hand, beside the fire huddled a bulky figure. Dungarvan knew Beyond the fruit from the three stood the blanketed tent The four dogs, had not moved since to feel the silent approach of the stalkers lay somewhere asleep in the snow

The shod tent faced away from the cautious eyes of the man and woman Dungarvan's heart pounded. He could not see her Under that snow-banked canvas she lay, exhausted, perhaps even fatigue. He moved closer through the black timber, his rifle ready and stood directly behind the man hunched at the fire This was Mc-Queen's camp. He was alone.

Then suddenly he was on his prey, he pushed the rifle muzzle against the Indian's head. "Get tricky' Now you're tyin' up tonight pay's for it' It's a cold bed out there, all right" A hollow of a laugh followed

Figures of Mr. McCord's gold and his girl, his, Tom, old pal!" chuckled McQueen. "I said 'Hands up, Alan' But I'm glad you're not tricky! Well, Trudeau got his and Mr. Tom got his Now I'm going to get mine Can lead me here, too"

McQueen turned around where he had been sitting on a spruce log before the fire, a space he motioned into his hand before he went on, stand, talking to the Indian. "Tom Trudeau and men I'll reach the cache before Mr. Tom does. Then I'll have my chance you had—with four dogs! We started with six." Then he added, "And got a portion of us more with fish and meat thrown in by the Yellow Knife Indians. Where got at the bend" You had it "Where's Cumerou—too loud"



A black body lunged from the green and catapulted onto Mc-Queen's back.

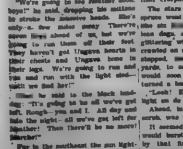
Thirty feet from the man raving at the fire a rifle covered the middle of his back But the shod tent, which was now in the line of fire,

Then a husky somewhere in the snow cautiously moved his head. The husky yapped feebly, then was silent. There was no sound from the other dogs. Alan saw them lying on their backs.

Dungarvan got stiffly to his feet and fumbled in his parka as he rapidly into the blackness beyond the circle of light. Then, holding his revolver aimed and raised lowered the rifle sheers.

The rifle now covered his heart. "You here, Cumerou?" he roared. "Well, you've run into him!" Drawing a black automatic from his parka, he pointed it at the prone man's head. "I'll count the corpses—fifteen, sixteen, seventeen!"

A plover flew from Toronto to Hudson's Bay, a distance of about 2,000 miles, in ten days.



The makers the world's mentholatum, combining menthol and camphor with other healing ingredients, have been famous for a long relief or money back.

Canadians Are Fortunate

And Shortages In Wartime Will Be Few, Says Dr. Tolley

Only I have the sense of magisterial but I do not run for cover in fear of enemy bombers

At night I can light up my house as brightly as I wish for there are no blackout regulations

No Government restrictions tell me how much food or clothing my family or allowed We can have all that we can afford

My spring shopping but does not include gas masks for any of us.

My newspaper gives me the truth about co-ritions at home and abroad, although only those items which would be of military value to our enemies

I am free to join any lodge, club or group I may choose

On the other hand, neither my sons nor I are compelled to join any military or semi-military organization.

I am free to worship God

I can join any political party criticize my leaders, its policies and speak freely without being sent to a concentration camp or before a firing squad

I do not fear that my family or neighbors will report me to the Gestapo lashed with snow, had been stretched across two uprights to re-fire he had in the other hand, beside the fire huddled a bulky figure. Dungarvan knew Beyond the fruit from the three stood the blanketed tent The four dogs, had not moved since to feel the silent approach of the stalkers lay somewhere asleep in the snow

The shod tent faced away from the cautious eyes of the man and woman Dungarvan's heart pounded. He could not see her Under that snow-banked canvas she lay, exhausted, perhaps even fatigue. He moved closer through the black timber, his rifle ready and stood directly behind the man hunched at the fire This was Mc-Queen's camp. He was alone.

HOME SERVICE

HERE IS A GUIDE FOR WOMEN'S CLUB MEMBERS

Be A Success In Your Club

How bewildering a club can be to a new member and even the older member may feel herself still an outsider. Where is that feeling of activity a there a role for you?

There is no universal plan existing for anyone well-informed on club organization activities. A club is grateful to the member who does things well who can offer helpful information.

As a new member you make a great impression by knowing club etiquette for meetings expressing only when recognized by the chairman. Keeping a still tongue when others have the floor.

Your first post may be a small one. Perhaps as a member of the membership you must sign invitations containing party differentiate. To avoid duplication, assign one phase to each committee so no person by your smooth co-operation.

What qualifications must the officers have? Could you be a chairman, a president?

Learn the duties of officers, members from our new 32-page booklet. This how to organize a club, drawing up a constitution, conduct meetings. Magazine correspondent Mrs. Consequence a simple budget, clever money-raising ideas.

Send 10c in coins for your copy of "Club Women's Guide" to Service Bureau, 73 Front St. W., Toronto 1. Mrs. McDermid Ave. St., Winnipeg, Man.

The following booklets are also available at 10 cents:

112 ..... Handicraft Ship Covers;
113 ..... Decorating "Heroes" And Victory Meals; Fruit Cookery.
141 ..... Tray Ideas in Making Candies and Draperies".

Gave Up His Cure

Mastering Sickness In England Turns Them Over To Army

A motoring enthusiast who owned a garage in Hampshire, England, has overcome rheumatism which he told them he had contracted from his duties. They had visions of mobile miniature houses, but he did not mean that, reported the London Daily Sketch. So the commercial motor world is "lost" to him for good and must find new premises containing only 15ft. He said the inside removed and the garage will be used for A.F.S. in the meantime he rides a bicycle

Malaria is an Italian term meaning "bad air", and the disease is a scourge of international Arrows Rotary called upon Thess new knowledge of its control and prevention by the most bite of certain mosquitoes.

Of five species of Pacific salmon, sockeye salmon is most commonly canned.

LAYERED CINNAMON AND BANANA

1 package Cherry Jell-O
1 cup hot water
2 cups boiling water
1 cup sliced canned white cherries
1 cup sugar

Dissolve Jell-O in hot water Add fruit juice Arrange sliced bananas in bottom of 8-inch pan or Jell-O mold Pour in enough Jell-O mixture to cover top of Jell-O and chill until firm. Arrange cherries on this Add remaining Jell-O mixture and chill until firm. Serve with whipped cream.

Suggestion For Gift

Corning Says Ration Would Produce Shield On His Birthday

A decree by Field Marshal Goering, Germany's economic dictator, called upon the German people to make Christmas Hitler a "gift of metal" on his 51st birthday, April 20.

The autumn one told that a great contribution of metals to furnish materials for Germany's war effort. Hitler would be the present the Fuehrer would appreciate most

Unusual For England

Clearing away 400,000 tons of snow in blizzards in the north of England, Manchester used 2,500 tons of salt and engaged 2,000 unemployed.

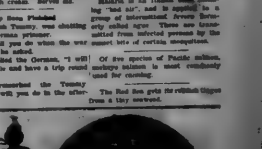
Over 100 pounds of fish are taken from the Caspian Sea annually.

Tommy For England

"Tommy" remembered the Tommy. "But what will you do in the after noon?"

"Oh," replied the German, "I will buy a bicycle and have a trip round Germany."

"Yes?" remarked the Tommy. "But what will you do in the after noon?"



The Red Sea gets its reddish tinge from a tiny seaweed.

GROCER FREEZES AGED PLANES

This is the lowest story of a grocer at Hanmer, who frees to death while the Nazi bombers I soon was in flames all around him.

When the Nazi bombers started their murderous bombing attack Mr. Hanmer, 68 years old, priest of members of the Allied forces no. 1 to Tin-Alfredo, the grocer took refuge in a huge electric refrigerator in his cellar.

The door snapped on him. The next day he was found frozen to death in the freezer refrigerator amid the smoldering ruins.

FARGE HEADLINES FLYING TIGER OWN PLANE

LONDON—Travelers from the Far-e islands Monday flew for the first time in their own machine, a vet-eroon with a white and blue border on a white field. Before Germany's invasion of Denmark, the Faroe fishing fleet flew the Danish flag. After the occupation, Britain took over the Faroes as a protective measure against Nazi attack.

SPITLER AT LAST DECLARES WAR

"BERLIN — Adolph Hitler Saturday declared a state of war existed between Germany and Norway.

It was his first declaration of war although his troops in the last two years have overrun other countries.

Early Saturday, Chancellor Hitler's Fuehrer and Reichsminister.

Prior to Hitler's surprise move, Germany had claimed the Norwegian government's decision to declare war against Germany was based only upon 'false reports' and 'lies' and 'even-tendency' to Soviet Russia. Hitherto the world appears to be lower than last year, it must be remembered that assessment this year, it must be remembered that assessment this year is on a full value basis instead of the 50 per cent basis. This makes the new mill rate approximately one and one half mills above last year, but increased trade accruing by the village's financial condition.

At Stonghan diapers, the eye of a chorus is a special delicacy offered by honored guests.

A cigarette factory in Persia has a penny of 12,000,000 cigarettes rolled daily.

Searle Precipitation Report

Following is the first 1940 Searle Precipitation Report of the Prairie Provinces, taken from 184 Government and Searle Farms.

The Wheat crop of Western Canada is now fairly well seeded, and the balance not till will depend mainly upon the amount of moisture available to the crop.

The moisture includes the rains which fell last March and April, the reserves available to carry the plant over to time of stress, and available also to increase the crop yield.

and includes naturally which will fall during the growing season from April 1st until the harvest of August 1st. (Snowfalls which come in late November November crop.) We'll be helped up drought and mobility under available for human needs and for livestock, have not been in such a rate, to be of much value so far as producing crops is concerned.

The precipitation which occurred last fall, in terms of the normal or average, in Alberta was 90 per cent, Saskatchewan 49 per cent and in Manitoba 89 per cent of the averaged totals for the three provinces and weighted for wheat acreage, the moisture reserve available for the crop amounted on April 1st was only 62 per cent of normal.

Better than average precipitation, however, has occurred from April 1st to this date, so the moisture supply is improved, and today is as follows:

In Manitoba the total moisture available to the crop is now 81 per cent of normal, in Saskatchewan 87 per cent, and in Alberta 101 per cent, averaging the three provinces together and including for wheat acreage the estimated prairie moisture supply is now 91 per cent of normal, or still considerably below the average. The difference may, of course, increase as with better than normal rainfall between this date and harvest time, yet while this could happen, and actually has occurred frequently, it is not probable. Another circumstance to what can be said is that the outlook at the moment is by far a less favorable one than prevailed on

FOURTH SET OF TWINS FOR EDMONTON FAMILY

Setting what is probably a record for Edmonton, a fourth set of twins has been born to Mr. and Mrs. William Hinds.

First three pairs born to the Evans family were of opposite sexes as well sons, but the present pair are both healthy babies weighing seven pounds. Four sisters and seven pounds, sons as men. They were born on April 16.

Previously three pairs of twins have been born to an Edmonton family, and were despatches have recorded five pairs to a family, to Virginia and to one in Connecticut.

SHIP FLED WITH 4½ MILLION IN SWISSES KILLS

NEW YORK—Captain William Mc-Hale, skipper of the American Scout ter Sea Trophies Navigators, declared last week that he fled the port of Trondheim, Norway, with $4,500,000 in Swedish owned gold bullion in his hold of his ship after the Germans had captured the port.

BADHAW VILLAGE TAX RATE IS 12 MILLS

At a special meeting of Bashaw Village Council held on April 9th, 1940 reasons for the year were discussed and municipal taxes for the current year were set at 12 mills on general purposes and two and seven-tenths for School Purposes. It is thought the would up year to be lower than last year, it must be remembered that assessment this year, it must be remembered that assessment this year is on a full value basis instead of the 50 per cent basis. This makes the new mill rate approximately one and one half mills above last year, but increased trade accruing by the village's financial condition.

SUSPENDING NORWAY'S PRIMARY CURRENCY

WASHINGTON — Export - import bank lawyers and President Roosevelt pondered Saturday how much of U. S. sympathy in the war between Germany and Norway meant suspension of the Export-Import Bank's help to Norway. Norway has used only about $20,000 of the loan in the several weeks since it was made available.

ROLLING FISH

More than a thousand different kinds of artificial flies are available to anglers, writes Vic Baker in the current issue of the C.I.L. Oval, a magazine of industrial chemistry. Some of these are fashioned after insects age in the famous Bobs of Sir Izaak, written by Wynkyn de Worde who followed Caxton as printer to Westminster, says the article, because the author never let down in his efforts to devise methods of feeding the fish. Among the more recent improvements are the "maggot's nest" and "grasshopper feather made from the anglers hair, more particularly, they are practically invisible to fish.

Farmers in more than 30 points in Alberta had as 250 less water on April 1st.

FARMERS TOOK PROBLEMS OF WAR LONG SPEECH

Since the rain have caused considerable delayed in the completion of spring work and in many districts of the province it will be the first week in May before operations are in full swing. Many available moisture should be taken to overcome the delay which has occurred in the spring work.

All machinery and equipment to be used during the harvest should be thoroughly repaired and be in condition to withstand a long period of intensive use. Everything should be done to prevent unnecessary delays resulting from breakdowns.

Changes in proposed cultural practices may be advisable. It may be desirable to use a disc or cultivator where it has been planned to plough.

The possibility of using fertilizer to increase production and assist early opening should not be overlooked.

Although there will now many ready for seeding, in some cases, it may be possible to substitute another variation. Red Bobs, Thatcher and Renown where Legacy sown, Off barley and Red Wing Oats are among the early maturing varieties of these grains.

Heavier rates of seeding might also be considered in order to help to control weed growth and bring down cutting costs.

All seed should be properly cleaned and treated with approved dust or liquid Ceresan and Leytosan, so that they will be ready for the drill.

It may be well to consider the substitution of certain crops, or at least increasing their acreage for reasons. In some districts early seeded crops of rye may be valuable for pasture.

Big Night For Box Fans, 10th

Alba boxing fans will be treated to the best amateur ever sponsored by the local athletic club on Friday next, when both outstanding amateur card artists as Bob Hill and Ralph Thrasher of Black Diamond and Bert Mac-Dunk of, "The Human Cyclone," of Turner Valley, will meet the local lads in their honours, John Wilkinson and Ray Sodoma of Alba, and Gordon Frizzell of La mabe.

Altogether some 42 rounds of hissing will be staged with fighters from the district and many outside points have entered. Hill and Thrasher are announced locally appear in the advert elsewhere on page 3.

Admission to the boxes which will be held on the Legion Hall is The for reserved ringside seats; and the regular prices of Gents 50c, Ladies 35c and children 25c. Don't miss this event!

The Wheat Situation

(From the Wheat Pool Budget)

The speculative public have been selling into the wheat market and there has been nothing upward as a result. The Winnipeg market lands and Minneapolis are at 20 mill-bushels.

It is reported that the commercial crop reporters have been quiet on speculation. Certainly the continued pessimism of the uninformed very little and experienced traders were of the opinion that the known factors in the situation have been discounted by the market prior to the rise. It is notable that the Chicago market closes in the Chicago markets represented to 20 million bushels.

It is reasonable the "bullish" factors it might be mentioned that the United States and Canada are the only exporting nations are concentrating their buying in North America. More and more wheat is being taken off the world market and the visible supply cannot be spared for the long haul from Australia and Argentina. The United States winter wheat crop has not improved much in the last couple of weeks. The spring wheat there have noticeable deterioration. The conversation of experts of the United States government estimate of 435 million bushels will be about right for the winter wheat crop, and the visible for the next three weeks will have an improvement of 20 million bushels. It is also manifest that Europe's crop will be a moderate one, and that the Argentine will be considerably less than last year.

On the other hand, it is quite plain there will be no shortage of wheat this year. Canada has ample wheat supplies to supply the requirements of importing nations, and the Dominion's carryover will be the largest in its history. The largest in its history.

The Canadian Pacific has stopped buying Argentine wheat. Besides the long haul, it is suggested that the quality of the Argentine wheat is unattractive to buyers. In any event, the surplus in Argentine will be available for Europe, and not for the millers of Australia, and half of that total is committed for Brazil, so that there will be no surplus available this year.

BLAZE IS WHITE

Although most of it is untouched by human hands, the mighty Rocky Mountain chain of the Arabian Sea, thunderstorms is almost the coldest rain-producing centers of the world. Only the coldest regions of the Antarctic is the current home of the C.I.L. Oval, Meteorological Society. The land and sea, usually by the paint, paper, rubber, textile and other industries as a pigment to give whiteness, opacity and durability, or opacity to their products. Among the developments made possible by the discovery of titanium oxide, are the new split-coloring paints, delustered rayon, and white rubber. Titanium oxide does not instead of yellow and greasy, and the exceedingly light weight put up by the new pigment. Despite the enormous of the pigment, the article is not cheap, many people still regard the ordinary zinc oxide as a standard certainly and more substance. Although only about of the 25 elements in the Earth's sphere are more plentiful. From 1916, when it was first discovered by a Cornish chemist, until twenty years later when one of the pigment was first produced on a chemical was valuable only as a thing to be ground and sold.

On Saturday afternoon, April 27, the Girls' Auxiliary of the Church held a very successful Bean Supper in the W. I. building. The sum of $25 was realized

WEDDINGS

LOWE—SHAPLEY

A pretty wedding was solemnized in All Saints United Church, Edmonton, on Saturday, April 20, when Edith Irene, daughter of Mr. and Mrs. W. E. Shapley of Alix was united in marriage to Pte. T. H. C. Lowe, RCAMC, Edmonton, son of Mrs. H. F. Lowe of Wainwright. Rev. L. A. Thomas officiated at the ceremony.

The bride looked lovely in an Elizabeth blue crepe ensemble with small model flowered hat, and tanmeroise to match. She carried a bouquet of pink Talisman roses. Her bridesmaid, Miss Dorothy Thomas, wore a corsage ensemble, all the tone hue of the rose shade, with white accessories, and carried a corsage of red McCready roses.

Mr. Irving Paterson acted as groomsman.

Following the ceremony, a reception was held at the home of Mrs. A. H. Halliday, sister of the bride, and for the occasion the dining room table were beautifully decorated in pink and white. Twenty-two guests were present.

The newlyweds left by motor car for Lac La Biche and thence to Edmonton where they will reside for the present.

• • •

On Thursday evening, April 25, the Ladies' Aid of the United Church met at a bridal shower. Many useful gifts were showered upon the bride-to-be, and a delightful social evening was spent, appropriately in the Indian present. A dainty lunch was served by the ladies.

The Young People's Society, of which Edith was president, presented the bride with a beautiful set of silverware on Sunday.

ASSESSMENT STATISTICS

Because of the war, a special appeal is being made this year to farmers to emphasize the part they can play in the supplying from the Dominion Bureau of Statistics.

These cards are used to obtain information on which to base estimates of the crop and livestock production, and to check on farms and similar information. They have no connection whatsoever with taxation. The cards are given to the individual farmer to cover reference to the public.

The estimates which are determined in this way are extremely useful, not only by the Dominion Government but also to other institutions.

They have influenced influence in the farmer the trends which are taking place and provide him to plan his own situation accordingly.

George Tattlers

What might have been a very serious accident occurred on the farm of G. M. Nale last Tuesday afternoon when George Jr. and Forrest DeVore decided to try and ride double on a pony. After a few passenger journeys they decided to do a real hunting act. The boys hung on for a few jumps but to no avail. The pony proved the one the better of the three and to a considerable, the boys are somewhat stiff still today, very bashful and so forth. They have doubled not to attend the Calgary Stampede this year—at least, not as bronco busters!

Mrs. Allan Is Laid to Rest

Mrs. Matilda Allan, Alix's beloved pioneer lady, widow of the late Thomas Allan, who passed away in Alix hospital on Friday last, was laid to rest on Monday afternoon. Funeral services were held from St. Paul's Anglican Church at 3 o'clock with Rev. S. G. West officiating. Many floral tributes filled to overflowing with friends paying their last respects to the loved one and the services to which she was held was closest in the large number of floral offerings banked about the casket.

Mrs. Allan was born in Cahirciveen, Co. Kerry, Ireland, and came across the first seven years of her life. Her girlhood was spent in various parts of Europe, and in June, 1888, she was married to Mr. Allan at Bowes, Yorkshire, England. They made their home in Elgin, Scotland, until his death in 1911, when Mrs. Allan came out to Alix to join her sons, and with the exception of several trips to the Old Country, has since remained here.

She is survived by two daughters, Mrs. Ferguson and Mrs. Nicholas, both residents in Scotland, and three sons, Andy and Ronald of Alix and Vic. of Vancouver, B.C.

The death of Mrs. Allan is keenly felt by all in Alix. Since her first coming to the district she has by her kind the respect and friendship of all with whom she has come into contact. She enjoyed wonderful health until about three weeks previous to her death, and lived right up to the end prior to the activities of the community.

Pall-bearers were: Messrs. Jack Purdy, Humphrey Purdy, W. B. Clarke, G. G. Mawyer, Robert Wilson and Capt. Frank Hunter.

Interment took place in Alix cemetery. Floweriling's Funeral Home had charge of the arrangements.

Those sending floral tributes were: Mr and Mrs. R. W. McDonell, The Purdy family, Mr and Mrs. C. H. Pinnell, Mr and Mrs. W. Ferguson, Mr and Mrs. A. E. Hollings, Mr and Mrs. J. S. Johnson, United Church Ladies' Aid, Mr and Mrs. W. Fenwick, Mr and Mrs. W. Purdy, Mr. and Mrs. H. Purdy, Mr and Mrs Alex Sherritt, Mr and Mrs. F. M. Pope, Mr and Mrs. A. S. Blount, Reeve Mercer, Jack Brotherton, Mr and Mrs. Ernest Nale, Mrs. Viby, Mr. and Mrs. W. D. Clarke, Mr. and Mrs. J. H. Mackie and Daughter Church Guild, Mr. and Mrs. Edward Purdy and Jack, Mrs. J. Anderson, Mr. and Mrs. G. G. Mawyer, Mr. and Mrs. E. Bullock, Mr and Mrs. T. Wilson, Mr. and Mrs. Robert Wilson, Mr. and Mrs. Jack, R. Wilson, Capt. and Mrs. Hunter, The Family.

FOREIGN AGENTS

Chemical refrigerator, sodium, Canada is the country known as Great Britain's chief source of the British Columbia fishing industry to the extent of $10,000,000 annually. Salt fish, which still a leader process in the Caribbean commercial delivery of British Columbia is generally a quality is preserved by freezer and chilling a longer and more modern ways, is used. Before its special years of sharp freezing, the industry offers to consumers all over the world, and has been responsible the innumerable attractions of frozen-fresh fish, according to the first juicy entertainments and freshness of flavor.

Hard winter wheat was first grown in the Plains of Montmorency, in 1873 — only authorized 170 acre chemical plants in 1940.

Farmers of Germany are being urged to use more fertilizer and then increase the country's food supply.

The World Of Wheat

By H.G.L. Strange, Director "The Crop Testing Plan"

At the suggestion of the Dominion Experimental Farms, in 1938 the "Crop Testing Plan" seeded a large number of special 1/4 in Alberta, Saskatchewan and Manitoba, with carefully measured amounts of seed in each plot. The plots were all sown on clean summerfallow.

On each of the plots the seeds were germinated to grow in the same way that they would grow in a farmer's field after his crop had been sown, and in the latter half of the plots the Ele vator agents carefully pulled the weeds every few days during the whole course of the growing season.

The harvested removed were under of by the Dominion Experimenta Farms at Ottawa, and the results o the experiment are most interesting They reveal that for the average of the three provinces the wheat plots (as log Timothy without) that were weeded gave 42.9 bushe s to the acre, and the plots that were not weeded gave 28.6 bushels to the acre, which means that where the weeds were not trolled an increase of 6.3 bushels to the acre, or 37 per cent more, was realized.

These results show clearly that money and time spent by a farmer in keeping down weeds in his fields should return handsome dividends.

Following farmers have tended to re se price: Japan has taken a large quantity of Australian flour—Portugal recently purchased over one million bushels of Argentine wheat—The 15 million bushels of old wheat "carry over in Australia has been sold be cades 9½ million bushels of new wheat —Exports from Japan have commenced considerable.

Following farmers have tended to lower price: How wheat crop in India is approximately 10 million bushels greater than last year—Seeding has commenced in many area of Western Canada—Spring seeding is progressing in the U.K.—Argentine and manchuria are mostly favorable for seeding—Pitching of corn in the Argentine is gradually extending

Have You Heard These Before ?

Salesmen have treated Hoffey's name back to the year 200 B.C.

Camels can go seven feet high are built by the giant bees of India.

Englishmen consume approximately 1,000 tons of tobacco annually.

"I understand that those new pub names have spelt".
"Yes, Hey-Hey."

He was a Scottish minister of the old school, and loved a dollar to absorb new ideas. Yet he did want to keep in touch with modern manners.

So when he was asked if it was wrong on Sunday afternoon to take a walk in the country, he thought things over for a while before he replied

"Well, no I can S. there's no harm in ye takin' a walk on the Sawbath, but long as ye dinna enjoy yersel."

Never an die: Up, man, and try! Despair is the confession of faith.

Despair is the only genuine affliction

Happiness is a perfume you cannot pour on others without getting a few drops yourself.

"Hello, dear. How's the pain in the neck?"
"Oh! He's out golfing!"

Mrs: "Ah she is glad Ah wasn't King Solomon."
Rastus: "Woulder ye has dat 'posomon?"

Mom "Hah, hussin' up washin', fah one wife hangs me plenty busy."

Little Mary's father had denied her request. That night when she said her prayers she concluded with the usual

"And please don't give daddy any more children. He don't know how to treat those he's got now".

A strong conviction must not be accepted as a powerful argument.

Love is the greatest consoling force in the human body.

Man (entering grocery store): "I want two bars Sold."
Grocer: "You'd better stick to phone."

"I don't see why he does her; she's a terrible shrew."
"Yes, she can't dance, but she runs an horseshoes."

Hope is the yeast in the bread of life.

Lions and mentality at the age of seven.

Jean: "You've been quiet a many time, haven't you?"
Dolly: "Yes, but I think I am not any last long out."

PENITENT PLACES ADAMS' CONFESSION

Penitentiary must be an ideal ground on test anesthesia at this time of the year, when the ground is wet and the warm weather is approaching. Saskatchewan penitentiary has reported 200.6. If winter footwear and heat happen to be moved every now or three days, they will always be on top

NOTICE TO CREDITORS AND CLAIMANTS

In the estate of Charles Henry Reed, late of Mayer in the Province of Alberta, retired farmer, deceased.

NOTICE is hereby given that all persons having any claims upon the estate of the above named Charles Henry Reed who died on the 28th day of September, 1939, are required to file with Rose Elmer Reed of Mayer, Alberta, executrix of the will of the said deceased by the 5th day of June, 1940, a statement duly verified, of their claims and of any securities held by them, and that after that date the executrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 16th day of April, 1940.
J. C. RUSSELL,
Solicitor for the Executrix
Alliance, Alberta.

ENGLAND IN the 15TH CENTURY
Two hundred years earlier, England established the art of learning memorable. It was at this time the battle of Agincourt, on the Vesta known to fame. The outside views, that is, whether the record of this battle exists. There is a document, dated 1422, in which it is stated that Hilaire, daughter of Richard de Thelton, had refused to the Abbot of Dunbar, one fifth thousand. In return she was promised daily for life two loaves, two gallons of British and a gallon London strong gallons of BEER for the rest.
- AND TODAY
Modern people are increasingly aware of how BEER contributes to healthy living. It offers unquestionably when you are alone — delightfully when among friends — and a sensible flourish to the hospitality that graces your home.

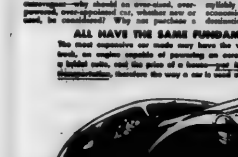
MOST CARS ARE TOO BIG!

Are you buy clothes to fit your person and purse —build a house to be comfortable but not extravagant—why should an over-sized, over-powered, over-optioned car, whether new or used, be economical? Why not purchase a thoroughly up-to-date, brand-new Willys—the car that is adequately sized, adequately powered, stylishly appointed—so that all its provable economies can save more money—to spend at destinations rather than for getting there!

ALL HAVE THE SAME FUNDAMENTAL PURPOSE

The most expensive car made may have the wheelbase and weight of a truck, an engine capable of powering an aeroplane, the appointments of a bridal suite, and the price of a honeymoon flat and yet it is [illegible] therefore the way a car is used should decide the one to buy.



DO YOU COMMUTE?

If your use of a car is like that of the great majority of owners, you will commute 20 per cent of the time—back and forth between home, work and worship places, or between town and townor spends half or far less than 70 miles per week—you will average fewer than three people per trip—the traffic conditions will not justify

DOES A LARGE CAR GIVE PRESTIGE?

Some people may think that a large car gives prestige, but even the "famous" have their feet firmly planted on the ground. Do you prestige with the people that mean anything

WHAT ARE TAXES GOING TO BE?

Looking forward to the next few years, the cost of taxation and of living show upward trends, hence a Willys is not only the best car to buy now, but plays safe, when such developments occur . . . Get a free demonstration of this quality

THE WILLYS IS NOT SMALL...MOST CARS ARE TOO BIG!

The true e ha l been e ch ins in the itinerary of Anderson, Hayward, has just abandon and Thursday by the A.S.m.

GETTING "TOUGH"

LONDON — Hugh Dalton, Labor M.P., said Monday night in a blunt attack on the government's war policy that "there has been too much complacency, hesitation and misunderstanding in [illegible] Sensed."

"If our purpose is to be restored on a broad and public conviction at home and re-established, there must be drastic changes both in men and policy," he said.

"(Prime Minister) Chamberlain and Sir John Simon (Chancellor of the exchequer) are our two greatest Bolshevists both at home and abroad. They would lure serve the country by resigning now. Then an encouraging, notice [illegible] could be put up in Downing street—'War against Hitler, un'y new management'."

SHOULD HAVE ALLOWED THOROUGH ATTACK

LONDON—Author of the Plant Sir Roger Keyes, Conservative, during debate in the commons Tuesday on the Norway campaign declared he had "never ceased amazement as" the admiralty did not allow him to [illegible] ore and lead an attack to clear the Germans out of Trondheim fjord.

He said he was astonished that the naval staff "would not realize" it was necessary to gain command of that vital fjord.

REDS ACCUSE FINNS

MOSCOW—The newspaper Pravda, organ of the Communist party, Tuesday accused the Finns of blowing up power stations and industrial plants in territory ceded to Soviet Russia after the treaty was signed Sunday between the two countries and gone into effect.

The paper did not indicate when official reports might be taken.

The Wheat Situation

Wheat prices have been unsparing in the line of conditions cause. The present of a very small amount of wheat in the United States has been overshadowed by the bright outlook for spring wheat in that country. The estimate by Hoover's crops has been discounted to a considerable degree by the new of world trade is an effecting of cent. There has been a move wheat buying, however, in the United States in contrast to supplying the needs of that country for the past few days.

Canadian wheat is being bought by Great Britain. There are only three months left in the crop year and Canada will be lucky if she can get her available supply down to 250 million bushels. While that large supply of wheat is looked upon by the allies as a valuable reserve it will be put to some of [illegible] pressure prior to the crops.

Two hundred and fifty million bushels provides a very large carryover. Add [illegible] to 10 million bushels for not less than the 30th year and 70 million [illegible] than the 1937 crop. It is equal to a crop in itself.

The one thing that minimizes the influence of this huge carryover is the growing conviction that the European war will be a prolonged and bitterly [illegible] affair. If such turns out to be the case, every bushel of Canadian wheat will be needed over the years.

Seeding operations in Western Canada are very late this spring. This is particularly true of Alberta. April therefore may merely a promotion of all [illegible] and May will be a month in which [illegible] are filed in a degree not approached for many years.

GOVERNMENT WIELDS THE AXE

The Provincial government axe fell [illegible] at the week end, and to [illegible] this, the members of the Lethbridge press total golf, and tennis clubs and [illegible] with the special events to meet [illegible] Hanna are sadden today. At Hanna golf-gansium was owned by difference. At Lethbridge the warden had no tennis court

BARLEY PRICE-FIXING IN U.S. IS UNLAWFUL

WASHINGTON — In a decision not [illegible] reaching supreme, the United States supreme court ruled Monday that "price-fixing agreements are unlawful" under the 1890 Sherman act

JAPAN'S GOLD RESERVES DIMINISH

Japan's gold reserves have shrunk to less than $300,000,000 after the drain of nearly three years' use in China, a survey of Japan's financial structure indicated Monday.

RED DEER TO GET NEW FIVE-ROOM SCHOOL

RED DEER—Plebiscite to build a five room accommodate and high school at a cost of $45,000, notably for the new course of studies, was approved by a vote of 130 to 63 Monday

HOLLAND SUSPENDS ALL ARMY LEAVES

AMSTERDAM — Netherlands army leaves were suspended Sunday. Leaves were cancelled during the first days of the German invasion of Norway, but were restored April 27 [illegible] country has been under martial law since April 28. Cancellation of army leaves also was ordered.

MINE OTHERS NEEDED TO KEEP ONE PILOT IN THE AIR

OTTAWA—In the British Commonwealth Air Training Plan it is estimated that one ex-war pilot is necessary for [illegible] equipment of a "flight", can be classed as pilots, mechanics, armament and instruction, repair and inspection of aircraft and equipment, aeronautical design, construction and installation of other duties absorb the services of many more vital to the actual flying operations.

Hence a wide variety of occupations and trades will be incorporated into the Air Force, it is explained, for some of these illustrate the highly specialized nature of the work, [illegible] gine mechanics, with a thorough knowledge of internal combustion engines and familiarity with the methods of fitting bearings, pistons and piston rings valve grinding and engine tuning, are required in keep the equipment in top shape. The there are armament artificers. These must be skilled in the [illegible] housing, repairing and testing rifles, machine guns, bombs, armament and other equipment used. The armament artificer should also have a working knowledge of explosives and should understand the use of metal working machinery.

Cooks must have not only a thorough knowledge of cooking, but also of meat cutting, storage, preservation and delivering of meats and fish.

Men taken on as clerks must be capable of taking dictation at the rate of 75 words per minute and to type at the rate of 40 words per minute. They must be familiar with filing systems and general accounting.

The term discipline has been applied to men who will have charge of the physical training of recruits. They must be competent in the instruction and supervision of physical training classes, have a knowledge of first aid and be proficient in boxing, boxing and gymnastics and be ready to take coaching duties in various forms of athletics.

Electricians in the Air Force are expected to have a working knowledge of motors, generators and batteries and a practical knowledge of electricity as used in the trade. The electrician should also be able to observe the [illegible] and electrical apparatus, and recognize dangerous.

The fabric worker must be familiar with canvas, cambrics and the fitting of [illegible] and be able to do [illegible] sewing by hand and of applying various types of [illegible] dopes and varnishes.

A knowledge of the basic principles of tools, springs and instruments [illegible] is a necessary qualification for the instrument repairers. They must know the physical properties of materials used in instruments, be able to read ready drawings, have a knowledge of elementary mathematics, general physics and metallurgy.

The wireless mechanic must have a knowledge of radio, combined with the [illegible] of [illegible] telephone switchboards, [illegible] and [illegible] [illegible] [illegible]

A Fading Dream

Whether or not the problem of the lucrative and profitable disposition of surplus exportable farm products in Western Canada will be temporarily solved as a result of war requirements for the duration of the war the probable trend of agricultural practice after the war remains obscure and probably will continue to be doubtful until after an entirely new and important changes in politics and methods.

The fortgoing circumstance respect by the fact that at least one of the possible solutions which appeared to hold out glittering prospects a few months ago has been more recently shattered when viewed in the light of cold reason applied to undisputed but unpalatable facts.

Illustrative is seen in the theory that probably in the not far distant future the yield of Western wheat fields and others parts of the world will be increased to such an extent as to make it necessary to find new markets for the surplus. Instead of Western Canadian fields a sea of waving of agriculture and industry as it exists.

A Glittering Prospect

Some six months ago such prospect was held out as "the new era" for Canadian agriculture by J. G. McKenzie writing in the old Country publication issued by the Canadian Board Chamber of Commerce on the work of the National Chemurgic committee in Canada. He became a survey of research work being done by governmental bodies, universities and industrial plants in the interests of the conversion of agricultural products into new and potentially valuable work and with a view to increasing the results of research work of practical value to agriculture and other industries.

Speaking of the importance of the National Chemurgic committee Mr. McKenzie stated that: We feel that if we could divert four to five millions of land now utilized for human production to other forms of agricultural production more suitable for industrial utilization, we will have largely solved our wheat surplus problem.

It may be," he continued, "that we can grow more flax, sunflowers, soya beans and similar crops from which we can extract vegetable oil and thereon material that can be used in many industrial processes.

"The possibility of the utilization of our surplus soils in the production of milk, cheese and dairy products should be considered. Similarly we may turn from wheat straw and legumen crops. The possibility of marketing more of our surplus fruit production in the form of fruit juices is to be studied. More and more of our corn and potatoes may be utilized in making of [illegible]. Flax, hemp, sunflowers and soya beans may become a profitable source of vegetable oils and additional investigation may prove that alcohol can be profitably extracted from barley and low grade wheat and used for blending with fuel oils."

These and other prospective conversions of the product of the field into the output of the factory were held out with considerable enthusiasm as a potential solution of some of the ills of agriculture in the term "during the crisis of the future opens up."

Because these things may be, and undoubtedly are, plausibly possible, it by no means follows that they are economically feasible. Indeed, these potentialities and other prospects were canvassed at a very recent conference of agricultural technicians, members men and representatives of industries in Winnipeg when they were forced to the conclusion that, at present at any rate, none of them holds any immediate prospect of realization as a practical project, except perhaps, the conversion of flaxseed into oil to be used in the manufacture of paints, at any rate means as the prairie provinces may be concerned.

* * * *

Processing Is Costly

Such a conclusion is quite understandable when it is pointed out that the situation of agricultural products for industrial purposes on considerable scale involves the removal transport and processing of bulky raw materials and in the case at any rate, their transfer over considerable distances before they can be made available as workable manufactured goods. This inevitably entails considerable expense even if cheap labor is readily available and when added to this, is the fact that such commodities are liable to compete with similar goods produced elsewhere at much lower costs, the economic feasibility of such projects fade away.

Such a conclusion is by no means sound nor set as an impediment to the continuance of the work being done by the National Chemurgic committee On the contrary it should serve as a stimulus to that body and other organizations interested in the development of agriculture and industry and the solution of these joint and several problems to further efforts to find a way to make the valuable results of research work in the laboratory economically applicable. Because that cannot be done immediately does not mean that the work should cease.

Unremitting attention to the task in hand with an eye to a practical objective will undoubtedly sooner or later result in the evolution of cheaper manufacturing processes and the time may come when the handicaps which now appear insuperable will be overcome. In the meantime, however, farmers in the west will have to look to other resources to solve their post war problems if and when they come

Joins The Navy

Hollywood Film Director Happy To Be In Canadian Navy Force

Ready to get to sea with the Royal Canadian Navy Lieut John Farrow, Hollywood director and husband of screen actress Maureen O'Sullivan, arrived at Halifax, "proud and happy to be in the Canadian navy."

"I have nothing but admiration for the work the navy is doing and has done since the war started," said Lieut Farrow, who gave up his motion picture career to enter the service. "Now I have seen some of it at first hand I can't ask anything but marvelous."

The British-born director said his wife might visit Halifax if he is stationed there long.

War Use Canada

Britain's 2,345 miles of canals are reported to have more traffic this year than ever before. The Government plans to encourage the use of the canals for transporting goods long distances thus helping to conserve gasoline supplies.

Over half a million pounds of campaign are used in a year in motion pictures.

The Banff-Jasper Highway

Provides A New Channel For Tourist Travel In Mountain Fastness

The official opening of the Banff Jasper Highway scheduled for 11 minutes Day July 1 1940 makes pertinently timely a new booklet issued by the National Parks Bureau of the Department of Mines and Resources Ottawa Bearing the title The Banff Jasper Highway the booklet is profusely illustrated and describes in text and pictures the new mountain highway which will unite the two of Canada's greatest national parks and open up to motorists a vacation fairyland of unsurpassable except by exhilarating and peak-trail.

The Banff-Jasper Highway provides a new channel for tourist travel, not only for Canadians but for the people of the United States, and all others who come to share it with the luxury of the modern motor car it reveals breath-taking mountain panoramas that everything the top five books Britons we had [illegible] above we were calling it "incredible."

"The spots would have billed us all, but we prayed there would be no [illegible] and we were right. The air was making a bonfire. We paused the last few miles of the drive. One of the more fooled mountain goat to the strictly universal grimy hour a [illegible] perhaps to any mining davis for two days

At a point for lunch at the rendezvous associated with the mountains, and yet not so high as to [illegible] provide the brilliance and health and physique Everywhere [illegible] were unchanged and unspoiled, yet nowhere is the visitor an hour's drive from the comforts of [illegible] and cuisine.

Mountain highways have always possessed a peculiar fascination, as mankind. The scene of punishing the untrained and of romance and adventure which for ages have been barriers to human progress around the many hitherto unrevealed countries. The Banff-Jasper Highway in the Rockies and the region to the [illegible] to motorists, the nature student, and the lover of the out-of-doors is unrevealed. In these it unites not merely parks but peoples and nations

The Island Of Spit -

Governor Air Base Has Been Gradually Shrinking For Centuries

Site of the greatest air raid of all time, the island of Spit had pretty much escaped the notice of history till the present war. However, though it is not possessed special advantages for Germans, first as a bathing resort and then as an air base, it might very well have disappeared completely beneath the North Sea without ever breaking into world news.

For, like its island neighbors, Spit has been shrinking ever since the annals of Europe have been recorded. The North Frisian group, of which it is largest, had an area of more than 1 000 square miles in 1250 A.D. compared with about 100 today. Of this 180 Spit occupies about 13 square miles, and the total area of its sand-dunes to the west continues to deliver its sand coast to the east.

Only once before has Spit figured in war. During last century's Danish war it underwent severe punishment before its occupiers by the Prussians in 1864.

If, as seems probable after the recent successful raids, the Germans are forced to abandon the Spit base, the island may well be left again to the North Sea's steady encroachment.

The Latest Security

War is doing strange things in the [illegible] world. The latest recruits for war work are goats, which are being imported by land hungry Britain stables in case of fire flames hundreds of goats are now contained in stables around London, Eng., and it has been proven that horses do not need to be blindfolded to get them out of a burning stable.

Delivery In Time

What with conscription and everything, Swiss people near the German-Swiss border complain it takes 25 days sometimes for the delivery of a letter from a Swiss town to a German point 15 miles away.

Had Their Instructions

Crew of German Liner Columbus Tells Story of Scuttling

Crew members of the scuttled German liner Columbus in a story published by the Hamburg Chronicle told of finding the ship with bombers in the extinct volcano Jan Mayen Island and then sailing to all.

The story, told by Herr [illegible] Angel Island immigration station San Francisco, explained why two of Columbus crew did not return Germany. They were lovebirds who did not notice it in the hilarious time the order came to fire the bombs.

The crew had been instructed what to do should they scuttling orders be given. The master [illegible] Dr. Ing. Wheir, British destroyer ordered the Columbus to stop. The [illegible] quoted one crew member:

All of us ran to our posts and began pouring thousands of gallons of kerosene over every inch of the ship. Before we had finished we were sailing at twelve knots.

"One spark would have killed us all, but we prayed there would be no [illegible] and we were right. The air was making a bonfire. We paused the last few miles of the drive. One of the more fooled mountain goat to the strictly universal grimy hour a [illegible] perhaps to any mining davis for two days

A Punishable Offence

Smuggling Any Article In Or Out Of Switzerland Is Severely Punished

It has been made a punishable offence under the War Regulations Act to smuggle letters, newspapers, clippings and other articles in or out of internment camps in Canada, according to an order issued recently by Hon. Ernest Lapointe, acting secretary of state. This became necessary after various attempts were made to evade camp censorship. Contravention of this order will be punished on summary conviction by a fine not exceeding $500 or 12 months imprisonment.

Recent automobile tests indicate that 45 miles an hour the cost of tires per hour and one-half times the costs at 25 miles

The World Of Wheat

By M.G.L. Stronge, Director "The Crop Testing Plan

This year is likely to be extensive, broad and long. We are fighting against a conqueror, efficient and unscrupulous enemy. To win the final victory every citizen of Canada and of the other Allied countries will be called on again to make both contributions and of producing as much as possible and sacrifices. Contributions in the of foodstuffs, munitions, supplies and equipment, and all for moderate requirements in the way of wages, income and profits, and sacrifices in the way of giving up something valuable for no personal reward or return at all. These sacrifices will be, mainly, money contributions in the forms of taxes and a lot of patience.

Our Western farmers already have made substantial and considerable sacrifices. Contributions in the huge quantity of wheat which they have made available, and which now free the Allied gov ernments from any fear of a food shortage, and saving sacrifices, too, because our farmers have made this wheat available to the Allies at a price that is most definite by less than its cost of production.

Our farmers, therefore, can be extremely proud of the efforts they already have made towards the winning of the Allied victory.

Collective farms have ended to be given — bulgur of wheat, eventually for export to Australia is down to approximately 15 million bushels. Harvest on the Great Lakes is usually opens on April 25th — Provincial warehouses a range of Canadian wheat — Corn planting in Romania reported by heavy rains — Finland set on by from shortage of food and feed

Following factors have tended to lower price —Sending of wheat in Australia is making fairly satisfactory progress — More favorable weather in U S source wheat belt —Crops in Italy are progressing favorably — Sending of wheat in the Argentine in progress very well — U.S. spring wheat acreage estimated at 16½ million acres larger than last year.

SPRING MENUS

With the advance of Spring comes a natural desire for the foods which appear on the market at this season, add for meals which have a spring time. In every appeal. The Commerce Section, Marketing Service, Dominion Department of Agriculture suggests the following dishes for inclusion in the menu at this time of the year

Eggs in Tomato Aspic

1½ Tablespoons gelatin
¼ cups cold water
2 cups tomato juice
1 tablespoon onion juice
1 teaspoon salt
½ teaspoon salt
Soak gelatin in cold water Combine tomato juice, onion juice, sugar and salt Heat to boiling point. Dissolve gelatin in juice. Half-fill individual moulds with jelly mixture. When jelly set, place half a deviled egg yolk down, at jelly When jelly sets, add remaining tomato gelatin mixture. Allow to set. Unmould on crisp lettuce Garnish with watercress or asparagus tips. To do 3 eggs, remove shells from hard-cooked eggs, cut eggs in ½-H. remove yolks. Mash yolks smooth, and mix with a little salad dressing Pack yolk mixture into whites. Serve 6 to 12.

Rhubarb Sponge with Custard Sauce

1½ tablespoons gelatin
½ cup cold water
2 cups hot, mashed, sweetened rhubarb
1 tablespoon lemon juice
2 cups whites

Punch cold
soak gelatin in cold water Add to hot rhubarb Stir until gelatin is dissolved. Add lemon juice When mixture is partially set fold in stiffly beaten egg whites Serve cold with Custard Sauce made with 2 egg yolks

Custard Sauce

2 egg yolks
2 tablespoons sugar
Flavouring
1 cup scalded milk

To sugar a lemon juice
Beat eggs slightly Add sugar and salt. Gradually add scalded milk Cook over hot water, stirring constantly until mixture thickens and coats the spoon

Whole Wire Pudding

½ cup rice
2 cups milk
2½ tablespoons cornstarch
½ cup maple syrup
2 egg yolks
2 egg whites
½ cup maple syrup

Boil rice in salted water until tender Scald milk in double boiler Mix cornstarch smooth in one-half cup of maple syrup and add gradually to the hot milk. Stir until mixture thickens and cook 15 minutes Add rice and well-beaten egg yolks. Place in buttered individual moulds Beat egg whites until stiff, gradually add the ½ cup maple syrup, and spread over pudding Bake in a moderate oven (350 degrees F) until delicately browned (about 15 minutes.)

This one comes from Minneapolis and they say it is true

An automobile dealer went out with the boys one evening until before he realized it the morning of the next day had dawned.

He hastened to call home and tell his wife. Finally he hit upon an idea. He phoned home and when his wife answered he shouted: "Don't pay the price us, I'm back!"

Minister in Africa—"And you say you know nothing of religion?"

Cannibal—"Well we had a good time of it when the last missionary came."

"Her niece is rather good looking, eh?"

"Don't say 'dames in', say 'femmes fatales'."

Foreman: "Now, Murphy, what is your carryin' some more bricks?"

Murphy: "I don't feeling very well this morning' boss, I'm breakin' all in two."

Foreman: "Well, then, get busy with the sieve."

Fate—the lady we blame for our failures, but whom we forget when we succeed.

It happened at one of those parties that the Temperance people worry about. At the moment that followed, only waiters was asked what happened. He replied—"Well, all of a sudden poor Bill picked up a bowen and carried the washer and said he was going to fly around the block and land it again; with that, out he flew."

"Well," he was asked, "why didn't you stop him?"

"Hush," he answered, "I thought he could do it.

A Highland minister came to a family to baptize the child of a shepherd who lived there.

"Are ye prepared?" he asked.

"Aye," said the shepherd, "I got a grand ham, ye ken, for dinner."

"No, no," said the minister, "I mean spiritually prepared?"

"Aye, aye, remember. I got a quart frae the kirn."

NOTICE TO CREDITORS AND CLAIMANTS

In the estate of Charles Henry Knell, late of Mirror in the Province of Alberta, retired farmer, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named Charles Henry Knell who died on the 25th day of October, 1939, are required to file with Rose Elmer Knell of Mirror, Alberta, executor of the will of the said deceased by the 5th day of June, 1940, a full statement, duly verified, of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 10th day of April, 1940.

J. C. RUSSELL,
Solicitor for the Executor
Mirror, Alberta.

A Scotchman came in soon the other day, and a friend saw him wandering down the street with a pair of trousers over his arm.

"Ye have ye got, Sandy," He replied "Oh, A'vin lukin' for the Free Press."

Mechanics and others entering in the summer trade who will accept United States currency will be permitted to display an official card provided by the Foreign Exchange Control Board.

The card, bearing the crest of the Dominion of Canada, will be available in two sizes 11x14 inches and 5½x8 inches. The larger card is suitable for window display. Both will carry the same legend: "United States currency is accepted here at the official premium set by the Foreign Exchange Control Board."

THAT'S EASY -BIG BEN!

BIG BEN

PERFECT

Preparing For Peace

The announcement recently by Dr. J. S. Thomson, president of the University of Saskatchewan in a convocation of rural municipal men and women, held in his opinion, great danger when many people, under the trend of our economic, social and political life are expending when this war is brought to a conclusion, gives rise to the belief that the rank and file of the people of this country might well give consideration to Dr. Thomson's statements and the problems it is likely to bring in its train now lest they bring on us unrest in the interests of all.

There has been some disposition on the part of some leaders to push aside the matter of consideration of post war problems, largely on the ground that the long and strenuous period to meet a comparable length of time somewhere from the effort which must be put into the task in hand. That of bringing the war to an early and successful conclusion. But the point is largely based on the assumption that it is difficult, if not impossible to give attention to a big and important problem within another equally great, if not of greater importance for the time being in being dealt with. Sufficient unto the day is evil thereof" is apparently behind the promoter of "push aside" ideas and opinions.

It would be a very fine thing, of course, if it were possible for the individual, the family, the governments, business and other organized entities to deal with our problems all the time and bring it to a satisfactory solution before tackling another one. But the complexity of our civilization and the great diversity of our affairs prevents the accomplishment of such an ideal. In practice life the individual and the organizations, no matter of what type, has to keep many things in mind at the same time, and to devote attention to each as they are prompted, in many problems at once, but to defer for the complete solution of one problem before broaching another, little or nothing would be accomplished, because no sooner would one question been apparently satisfactorily settled than a new facet of the same problem arises to demand urgent attention. With affairs always in a state fine this must necessarily be so.

The Wrong Direction

There, of course, must be agreement with the opinion, sometimes pathetically expressed, that the winning of the war is the first and paramount duty of the day, and that this country is the proper one to look after the settlement of post war questions. This is granted, but it does not, and should not, prevent some consideration being give of what is to follow the conflict, because it will be assumed that with a victory for the democracies the people themselves will have to decide the course of their future destiny if they are to be worthy of the sacrifices they will be forced to make. Failure to forgive the first hints of a drifting which may commit them and lead them as a bondage that will be hard to escape in that way for the rest of their days.

And if these post war problems are to be settled satisfactorily and in the interests of the country as a whole it is essential that the opinions on which decisions are to be made are formed by a large body of crystallized public viewpoints and that cannot be attained overnight. A hasty opinion is apt to be a wrong opinion, and the questions that will have to be solved are going to be too important to be dealt with on snap judgment, if our democracy is to be a success.

If the future of the country and the happiness of her peoples are to be assured it is essential that three problems be approached in a spirit of calm determination. They are not to be solved by the force of mass hysteria, but our minds must be imbued with patience reasonableness and broadmindedness if we are to work out an enduring democracy. Other things should be our prime objectives.

If we are to avoid industrial strife, it is essential that three problems be thought out in advance, as far as is feasible, so that when the time comes for pratical application of our views and the principles behind them, there will be a reasonable amount of unanimity and we can thus face the future with strength in the knowledge that we are building a well-rounded democracy one that will not be dismembered at the first moment of organized disturbance or that will be easily overthrown by nefarious propaganda.

War Lord Inherent

While dictatorship operates, it has the big drawback democracy is built from underneath, the people themselves being the foundation of the entire structure if the foundation is insecure the superstructure will be weak, easily assailed and perhaps wrecked. Hence the importance of sound, reasonable public opinion.

If the people themselves adopt a rational outlook towards their own minor local problems, each so confront them daily in the operation of their own occupations, schools and so forth, they will be able to tackle the major national and international issues in the spirit, manner, soundness and certainty of rectitude. In this manner they will prepare themselves for the questions of great magnitude which they will be called upon to settle with when the guns are silenced.

Even as the individual, no matter how humble, has a part to play in the winning of the war so has he or she, a duty to perform in winning the peace to follow the war There is as much truth in the dictum "In war prepare for peace" as there is in the injunction to prepare for war during the time of peace

Horse Has Wider Vantage

Four-Fleeing Colt Has Supplied Ontario Farm For 20 Years

While other farmers in the district around Brighton Ont have suffered the inconvenience and expense attendant upon the loss of hauling power for their stock a considerable distance as ever-flowing water for them when it spouts a stream of water every few seconds has solved the water shortage problem on a 100-acre pasture farm owned by William and Alvin Hamilton.

One of the five of its type in an area of 10 square miles in that favored district by its ease in locating good water and it has been in operation for more than 20 years with never a lack of water.

It is built in 16ft feet deep in the rock and the water stands within 30 feet of the top on the casing.

The gas pressure is provided by a simple device A three-eighths inch water pipe runs a distance of 30 feet and is set to depth of 70 feet. This closes the casing, stopping the natural gas flow which is then forced through the water pipe The result is a water escaping gas forces the water above the casing.

The Blackbird brothers pasture an herd of stock and the farm is well poor, and with a water supply of 75 gallons per hour they have a herd of more well pumps, they don't have to worry about a scarcity of water for their livestock in the driest summer through the Brighton district

Some farmers in the well provided that the cooperative system should be under 10 years of age and unmarried They had to be British subjects and their families to be composed of first cousins they had to be good riders shooters and farmers sports and they had to be bright and cheerful

They were required to have a good name to help and understanding of the British Empire and to have some knowledge of practical housekeeping sewing and the running of cars and rearing to perfect health and strength of young children Australian Press Union

Extraordinary Bequest

Money For Australasian Left By A Statesman

Eighteen years ago the public of New South Wales was startled by the announcement that Sir Peter Mitchell a colonial politician who left his large fortune to the winners of competitions to be physically and mentally all-round men and women of Australia.

Sir Peter more of the money accruing from that fortune of £150,000 was left over by the competitions the money being that the said persons had died an penalty of £100,000 Parliament was then empowered to use the money for the purpose of encouraging the physical and mental development of men and women of Australia.

Sir Peter more of the money accruing from that fortune of £150,000 was left over by the competitions the money being that the said persons had died an penalty of £100,000 Parliament was then empowered to use the money for the purpose of encouraging the physical and mental development of men and women of Australia.

Now more than 20 years with never a lack of water.

FOREIGN EXCHANGE ACQUISITION ORDER

IMPORTANT NOTICE

As announced by the Minister of Finance, the Foreign Exchange Acquisition Order, 1940, has been enacted by Order-in-Council under the authority of the War Measures Act.

Unless exempted by the Order, every resident of Canada who, on May 1st, 1940, has any foreign currency in his possession or ownership or control, whether in Canada or outside Canada, is required forthwith to sell such foreign currency to an Authorized Dealer (i.e. a branch of a chartered bank) for payment in Canadian dollars at the official buying rate of the Foreign Exchange Control Board.

"Foreign currency", for the purposes of the Order, means any currency (coming coin) other than Canadian currency and includes bank notes, postal notes, money orders, checks, drafts, deposits, personal letters of credit, bank drafts and other similar instruments payable in any currency other than Canadian currency, and also includes any amount in foreign currency of which a resident has a right to obtain payment by reason of a deposit, credit or balance of any kind at or with a bank, savings bank, trust company, loan company, stockbroker, investment dealer or other similar depositary.

The Order does not require the sale of any foreign securities.

The Order does not affect any foreign currency, deposit or securities of any non-resident of Canada and for greater certainty the Order expressly declares that a non-resident visiting Canada for business or pleasure for a period or periods not exceeding six months in the year continues to be a non-resident for the purposes of the Order unless such person enters or has entered Canada with the intention of becoming a permanent resident.

No resident is required to sell any foreign currency if he satisfies the Foreign Exchange Control Board that he has held such foreign currency on May 1st, 1940, solely as trustee or agent for a non-resident and that the non-resident's interest therein had not been acquired from a resident since September 10th, 1939, except in a manner approved by the Board.

Under certain conditions stipulated in Section 2 (9) of the Order, a resident who is not a Canadian citizen may be granted exemption, but only after application for exemption is approved by the Board.

No life insurance company incorporated in Canada is required by the Order to sell any foreign currency which it needs for the purpose of carrying on its business outside Canada.

Further particulars may be obtained from branches of chartered banks. Any resident who has any foreign currency in his possession, ownership or control on May 1st, 1940, required to be sold, can see his bank at once in order to ascertain the extent to which he is affected by the Order.

News of the Week . . .

AN HISTORIC WEEK

During the past week, events of tremendous import have occurred in and in Chamberlain has resigned from the post of Premier, Winston of the Exchequer, and has been succeeded by Winston Churchill with the British Cabinet being reformed to include the long outspoken opponents of Chamberlain.

Hitler, since the week-end to three his war armies against Holland, Belgium and Luxembourg. Luxembourg has been overrun and the resistance of the small Dutch army has been with over 100,000 of her soldiers killed. The Belgians are holding out with the aid of Allied men and machines. And the greatest battle of all history is taking place on the Western front as the Allies throw out their armies and air force to stem the tide of the attacking German Legions.

MAIN HALL TO BE REPAIRED TO B.E.C.

LONDON— The British Broadcasting Company was late with an 8:00 a.m. news broadcast Friday.

When it finally started the announcer said, "I must apologize for having put nothing on the programme has just handed to Holland and Belgium."

SIX CASES MEASLES IN EDGERTON

Seven new cases of measles were reported Saturday by the Edmonton city health officer. This brings the total to 125 for the last two weeks.

NEW GOVERNOR-GENERAL SHORTLY TO BE GAZETTED

LONDON — The East of Athlone, governor general-designate of Canada, boarded a message of greetings to the Dominion today, declaring that he and Princess Alice, Countess of Athlone, "feel that we shall love Canada, and we hope to be worthy of the great privileges and the opportunity [illegible] for us."

He said that "we in England have been concerned and observed in many [illegible] days by the knowledge that [illegible] stands shoulder to shoulder with us."

CIVIL UNCHANGED

E. IRA—There was no plan under on of a total war, the federal crop bonus scheme, Hon. J. G. Gardiner announced recently. As it is now it is and a cred, the receipt of a farm grain the bonus and not the owner. Or if he has been operated by a hired man h be the owner as resident storekeeper, the bonus is not paid at all.

PROVINCIAL RIGHTS.

Montreal—Hon. Maurice Duplessis of the Province of Canada in opposition, the right of the B.C. provincial [illegible] to file the price of gasoline will not be accepted. Premier C. A. Wilson of the McGill-Frontenac Company told the government that oil companies were expected to appeal to the policy council in England, and other decisions for any premises to [illegible] interfere with the freedom and commerce of his inhabitants," said Mr. Wilson.

ROTARY BANDS

Edmonton—The week-ended bands between Canada and the United States, [illegible] to be a "phoney war" period, is an "almost unbelievable phenomenon," Hon. J. H. Ralston, minister of finance and acting Secretary for Canada, told the countries in which Rotary was [illegible] engaged in war but the law of good neighborliness was good well, on which Rotary is based, would ultimately prevail.

NEW CONSTITUTION

South Falls—If we are to strengthen the national unity, some changes should be constructive, according to Rt. Rev. W. W. Baldwin, Anglican bishop of Up'r Canada of Canada. Referring to the letters of confederation the delegates, "there was no intended that any the constitution which they gave us [illegible] should govern us in time the today."

WETTER BUSINESS

TWMONTON—"Canada is stronger [illegible] and in better condition now than in 1914," in the opinion of G.W. Allen, K.C., Winnipeg, Chairman of the Canadian Committee of the Hudson's Bay Company. Mr. Allen pointed out that Canada entered the war in 1914 after a period of expansion but that in 1939 war followed a period of financial business depression and deficits of prices. During the last year Canada has been in wonderful time for business," said Mr. Allen.

HENRY MAY TIMES AT HARDY FUN

[illegible] The following will be no tournament was issued Friday

"The German nation has entered into war battle in accordance with the ambitions of the boss, no doubt will take place."

POPE IS PRAYING FOR BELGIAN WIN

VATICAN CITY— Pope Pius Saturday threw his moral force in support [illegible] only of Catholic Belgium but the Dutch of Luxembourg and Protestant Holland as messages to their rulers saying he is praying for their triumph.

...4

WARNS I.R.A. TERRORISTS

[illegible]—Prime Minister de Valera has last week warned "murderers and terrorists" of the outlawed Irish Republican army that the government's patience is at an end and said drastic laws will be invoked if summary [illegible] overt civil war in Eire.

...5

O.—me—Th. would be an increase of 6 per cent on the area of apple, wheat and oats in Canada this season than are carried out, it was announced recently by the Dominion Bureau of Statistics. The total wheat area in Canada is given as 25,263,900 acres for 1940. This is approximately 1½ [illegible] acres more than last year. The report stated only 14 percent of the spring wheat area in the prairie provinces had been planted up to April 30. At that date 42 per cent of the seeding was completed.

April Wheat Bread.—The price of wheat changed but little during the month. While there is a supply of corn, there is the stream of World and the [illegible] wheat and flour steadily flowing eastward to Canada above shipped 21 million bushels during April, as compared with 8 [illegible] 5 million bushels for the month of April a year ago; and total world shipments being transport [illegible] over the lines from all exporting countries were 49 million bushels for April as compared with 29 million bushels during the month of April a year ago.

These large shipments teach an ob [illegible] that is that the British navy controls the seas. Seas, and [illegible] shipments these exports possible by ship this time of war.

NO MAN IS INDISPENSABLE

I care not what your place may be [illegible]
A job that's worth the having,
With mighty little salary,
Or one that's fat and glorious,
But, be sure your labor, great or small,
Of this you must be sensible,
Some other guy can do it all;
No man is indispensible.

Woman (listening to drive): "But I don't know what to do."
Husband: "Just imagine that I am driving."

Searle Precipitation Report

Compiled from the records of [illegible] and Vassile Bridges

...

The precipitation which fell over the Prairies from April 1st to May 6th inclusive, according to the records which converted during the months of August, September and October (but (6th of fall reports are still available for this present crop) and weighted for wheat acreage, indicates that the moisture conditions for the three prairie provinces, as a unit, is now 76 percent of the long [illegible] average compared with the same figure of 74 per cent last week and 91 per cent as the same date a year ago.

The moisture condition in Alberta shows its now 82 per cent of normal as compared with 109 per cent last week and 88 per cent at this time a year ago.

For Saskatchewan the moisture condition is now 76 per cent of normal, as compared with 76 per cent last week and 69 per cent at this time a year ago.

For Manitoba the moisture condition is now 83 per cent of normal, as compared with 91 per cent last week and 91 per cent at this time a year ago.

Every district in Alberta is in fine condition. Northeastern and central Saskatchewan locally lacks moisture, and northeastern Manitoba, too, needs rain.

One bright feature of Saskatchewan is that the southwestern area which for years suffered heavily from drought, has now much more moisture than normal [illegible] and that the early season conditions that it has been for at least ten years past.

The Wheat Situation

The weakness which has developed in wheat prices originated in the United States, and, of course, followed out. The heavy supplies of wheat in store on this country exceeded [illegible] any speculative outlook. As a consequence Winnipeg values changed.

The United States winter wheat crop at a critical period of its growth [illegible] only its fate expects upon the weather of the next few weeks.

The crop in the southwest may be much [illegible] a lot by drouth. Good weather can bring the harvest up to 450 million bushels.

Statistically, the wheat position is "bearish," but the Europeans war has put the price of consumption of wheat always increases during any [illegible] war period, and should be before the soldiers land, with plenty of fresh air and exercise, increases their consumption. These facts when millions of men are placed in armies again, actively prepared for operations.

Hon. James Lorimer, minister of agriculture for Canada, says the Dominion government has surpluses will continue during the current year, but that conditions should be better in 1941. This appears to be a fair summary of the situation right now. It will be the summer crop [illegible] the reserves of the warring nations are used up and heavy inroads made into the world's supplies elsewhere in the world.

Locally, wheat traders are nibbling "bull talk" towards the market. They do not look for any prolonged or violent upward movement. As far as the situation goes in Canada, much will depend on the outcome of the present crop. Early conditions are good in Alberta, not so good in Saskatchewan, but the latter province has [illegible] moisture. As everyone knows, the wheat crop in the peace provinces has [illegible] vicissitudes before harvest time comes.

WEDDINGS

KNIGHT—McDONALD

A quiet wedding took place in Lacombe on Wednesday, April 24, when Jean Id McDonald, second daughter of Mr and Mrs. A. McDonald of Alix was united in marriage to Thomas Knight, also of Alix. The ceremony was performed by Rev W. E. Herbert of Lacombe.

The bride was charming in white [illegible] and carried a bouquet.

The attendants were Mr. and Mrs. Ted Knight.

The bride and groom will reside near Alix.

George Tattlers

We are very sorry to learn that Mrs. D. Wing is again on the sick list. Mrs. Wing has been a very speedy recovery.

Melvin Land, son of Mr. and Mrs. R. Land, who joined the Calgary Highlanders a month ago, is now home for a few days before leaving for points east. Here's the best of luck to you, Melvin.

Mr. and Mrs. A. Lemon and family of Scottier and Miss Paterson, Mr. and Mrs. L. Swimmer and family, Mr. Jim Hordik, L. Thomas and Eden Jarvis, Mr. W. Walton, Mary Hostler, Mervin and Helen Lawson were visitors at the home of Mr. and Mrs. G. Sain on Sunday.

• • •

Mr. Lorne Wilson was a caller at the home of Mr. and Mrs. F. Dueck on Sunday morning.

• • •

Miss Phyll's Phelps of Mirror spent the week end at the home of Rhoda Bain.

• • •

Mrs. Marion Love of Mirror spent a few days at the home of her parents Mr. and Mrs. D. Wiggins.

• • •

"Don't forget the Saturday night dances in the Mirror Theatre every Saturday night. Music by Sonny and the Boys.

THAT GAME CALLED GOLF

Golf is a form of work made expensive enough for a rich man to enjoy it. It is a physical and mental exercise made strenuous by the fact that you have to dress for it in a $30 golf ash boots.

Golf is what letter-carrying, selling, and raising gas meters would be if certain tasks had to be performed on the [illegible] after noon in short pants and colored socks by every lad up to 40 who [illegible] to work in a different [illegible] for every meal.

Golf is the only exciting hobby game in the world when you decide to take it up, and the toughest hobby after you have been at it for seven years.

It is probably the only game a man can play in his own backyard, on a [illegible] and then discover that it was too deep for him in the first place.

The game is the only one played between grass with little white balls and [illegible] clubs at a player not allotted. These balls cost him from 75c to $2.25, and it is possible to support a family of ten upon the golf balls he will five months on the money represented by the balls lost, by some golfers on a single afternoon.

A golf course has 18 holes, 17 of which are unnecessary and 1 of it to make the game harder. A "hole" is a tin cup in the centre of the "green." A "green" is a piece of [illegible] of grass existing about $1.65 a blade and usually [illegible] surrounded by a circle of [illegible] trees, and a lot of [illegible] shed accessories.

The idea is to get the golf ball from a given point into each of the 18 cups on the course in strokes and the greatest number of words.

Each implement has a specific purpose not [illegible] golfers [illegible] get to know what the purpose is. They are exceptions.

After each hole has been completed the golfer counts his strokes. Then he [illegible] and tells his score and stops when he has reached 67. He then has a coke, stops "Beast Adolfus" with 58 or right other fans, and sells it to the golf of a partner dog—[illegible]

"Does your wife play contract bridge?"
"Well, judging by what it costs her, it would say she does not know!"

MIRROR NEWS

On Wednesday evening, May 8, a farewell party was held in the home of Mr. and Mrs. D. E. Mallard in honor of their son, John and Glenn Lawson and games were played. Winners were Irene Stewart, Cecil Davenport, Pearl Benjamin, Frank Wagner, Bessie Hagler and Harris Clarke. About 40 young people were present.

• • •

Glenn MacLeod left Saturday morning, for Edmonton where he will train for a commercial pilot at the airport.

• • •

John MacLeod left Monday for Glendale, California, where he will take a master mechanic's course.

• • •

H Jacques, M.P., returned to Lacombe on Monday where he took the train for Ottawa.

• • •

A large crowd attended the box Saturday night dance. It was the largest crowd which has yet attended, a [illegible] eight dances since they started these weeks ago.

• • •

Dr. D. L. McCullagh of Red Deer Training School paid a professional visit to patients in the W.I. building on Sunday

• • •

Rock a strong wind blew on Tuesday and Wednesday there stands light poles were blown down.

A PARABLE

I saw mankind as a herd of cattle inside a large enclosure. Outside the fences two green pastures and plenty for the cattle to eat. Between the fences is not quite enough grass for the cattle.

Consequently, the cattle are trampling, undernibbled when little green shoots of [illegible] grass are trying to push their triangles for existence.

Each animal in one of the field owns to these and when he saw their privileged [illegible], he was filled with annoyance for their good fortune, and all he can do to improve their condition.

They are called by their neighbors to advise them to assist him in [illegible] grass from outside the fences and throwing it over the fence to the cattle.

And that they called Charley.

"If you because the calves were dying of and not growing up into serviceable cattle, he arranged that they would assist in the care of the calves by [illegible] and [illegible] which they might not be eaten.

Then he removed a part of the enclosure for the old bulls and the old cows over 20 years of age.

In fact he did everything he could think of to improve the condition of the cattle, and when they asked him why he did not do the obvious thing, break down the fences and let the cattle out where they could get [illegible] and let the cattle eat I could not longer with them."— Exchange.

WHICH ARE YOU?

I watched them tearing a building down,
A gang of men in a busy town,
With a ho-hee-ho and a hurry yell
They swung a beam and a side wall fell.
I asked the foreman: "Are these men skilled,
And the men you'd hire if you had to build?"
He gave a laugh and said: "No, indeed!
Just common labor is all I need.
I can easily wreck in a day or two
What builders have taken years to do."
And I thought to myself as I [illegible] my way
Which of these roles have I tried to play?
Am I a builder who works with care,
Measuring life by the rule and square?
Am I shaping my deeds to a well made plan,
Patiently doing the best I can?
Or am I a wrecker, who walks the town
Content with the labor of tearing down?

Have to [illegible] in Alix—at the Free Press Office.

Boxers Please Crowd, Friday

A fair crowd was in attendance at the Legion Hall, Alix, last Friday when the local boxing club sponsored the best card yet staged in Alix. Synopsis of the bouts is as follows:

Midget Class (One Rounders)

66-lb—Glen Arnold vs. Wm. Wood.

68-lb—Kenny Smith vs. Larry Wood.

68-lb—Owen Jennings vs. L. Lindsay.

68-lb—Mervin Peters vs. Jimmie Reed.

In All of these bouts were evenly matched with the little scrappers really shining in ep.

Feather Class (3 Rounders)

108-lb—Herbert Thoge won the decision from Donald Dunn.

Lou Elder (118-lb.) lost the decision to Ben Chouinard (118-lb.)

Semi-Windup

118-lb class—Jack Collins won the decision from Kenny Primell of Lacombe through a foul.

125-lb—Kenny Baldwin won from Wm. Hall of Lodgepole.

145-lb—Peter Muldoon won from E. Primell of Lacombe.

Main Event

125-lb—Gordon Primel, of Lacombe won from Bert MacDonald of Tower Valley.

147-lb—Ralph Thompson of Black Diamond lumped Reg Holmes in the second round.

165-lb—John Wilkinson scored a knock down over Bob Hill of Black Diamond.

THE CARPENTER'S CHOICE.

When the carpenter chisels away on a piece
And the chisel slips off to the side,
It often leaves on the grain of the wood
A mark that is hard to hide.
But he takes it in hand, and plies it down,
And give it a pleasing place;
Then no one there's any but plastic wood
And many different ways.
So after life's experience chisels on me,
Though the chisel runs high or low,
He's covered the mark that was made in the wood
With the color which would know.
Now wash this a chisel the human [illegible]
Now quick to get out of control,
Then it cuts it way through most persons hard
To mangle a human soul.
I'd rather [illegible] to cover the mark they [illegible]
It makes
There's none to express the pain,
Than to have it [illegible] by the chisel wood,
Or [illegible] many always remain.
Hold tight to your chisels, ye builders of life,
Don't let them fly loose like a dart,
For there isn't a thing on the earth that can [illegible]
The scrath
Will spoil a broken heart.

Canada's Opportunities

Provided the people of this country, old and all sections of it, are ready and willing to pull together with the single objective in view of making the most of the opportunities that are being offered. Canada's future destiny is one of the most powerful and influential nations in the world, appears assured.

That the future holds out glittering prospects of great potentialities none but the Dominion there can be no doubt if the foundations which are now being laid are built on the solid rock of true democratic principles and if the people of this young nation lend themselves to the wholehearted effort to seize upon the opportunities that lie on the threshold.

The testimony of men of experience, endowed with vision that Canada is destined for a great future among the nations is being multiplied daily. This country has all the ingredients of powerful nationhood on immense area replete with tremendous resources, a comparatively small but virile population, an invigorating and healthful climate and system capable of enormous development and now standing at the parting of the ways between stepping these great assets. All that is needed is a populace prepared to look ahead and assume the place in the sun that merely awaits the grasping.

As the Governor-in-Chief of Newfoundland, Admiral Viscount Alexander of Hillsborough recently said, urging union of Newfoundland with this country: "Everything in Canada is to be had in the heart of the British Empire in the most distant future. We have the greatest country in the world. All that we now want is the greatest people in character and in courage."

• • • •

A Great Mission

Stating that after the war the world will be initially an Anglo-Saxon dominated world, Frederick T. Birchall, Citizen correspondent of the New York Times, recently visualized a great role for this country in a world peopled by different races. Declaring that this continent is destined to be the geographical centre of the British Empire, Mr. Birchall saw prospects for Canada becoming the world's air centre through the British Commonwealth of Nations scheme.

"It may be Canada's highest mission," said Mr. Birchall, "to bring us all together in the consecration of the old world and the democracies of the new, to be the keystone of Anglo-Saxondom, holding together a great arch of peace and progress, topped by the noblest arch of democracy."

A territorial vision and by no means an impractical one. Indeed, our feet are already planted on the lowest beginning to the goal conjured up by the New York newspaperman. It remains for us to see that the opportunities bestowed without devotion until the objective is reached. It cannot be achieved, however, until the war has been won. Nothing must be allowed to stand in the first task immediately at hand, that of defeating the enemy thoroughly and speedily. The sooner that milestone has been attained, the sooner will Canada, the British Empire and the United Nations be able to get down to an ambitious program of peace, progress and prosperity security for themselves and security for others.

And what of the war finish? Despite those who were disposed to be impatient and irritable at the lack of any spectacular drive on the part of either of the belligerents, British authorities were well satisfied that progress was made in the first six months of hostilities. As Sir John Simon, chancellor of the exchequer of Great Britain well summarized it, "It has been of great advantage to us to have these six months in which we have been able so really to improve our preparation and equipment. What, over on the Continent, may have made of the six months on balance, it is the Allies who have gained."

• • • •

Four Enemies Wilt

And as Prime Minister Chamberlain appropriately put it, Hitler has "missed the bus" in not taking the offensive before the Allied armies were able to complete their preparations to meet any big push which the Fuehrer might have launched but didn't.

Having "missed the bus," Hitler and his colleagues appear to be living in a fool's paradise fondly hoping that they may be entrusted time by a negotiated peace an eventuality which is beyond all possibility, if the Allied leaders maintain the stand which they have stoutly held since the outbreak of hostilities. There is no reason to believe there will be any weakening of the position that Nazism must be rendered impotent before the Allies will lay down their arms. Indeed, any other decision would be an invitation for a repetition elsewhere of the rape of Czecho-Slovakia and Poland.

Until the reuniting and uprooting of Nazism has been consummated therefore, the people of this country must be content to continue their participation in the war with patience, determination and unflagging energy and in the meantime, take advantage of opportunities which will arise from time to time to prepare the scaffolding for the magnificent national structure which may and will be erected once peace has been restored.

PATENTS

AN OFFER TO EVERY INVENTOR. Let me prove my claims. Write immediately for free copy of "PATENT ADVICE AND INVENTION." Victor J. Evans & Co., 759 Ninth, Washington, D.C.

Found His Ability

Young Scotchman Captivates Listeners For Week After Firelighter Stunt

Executive ability and a notable feat of seamanship displayed by an 18-year-old donkeyman after his ship had been torpedoed and sunk in the Atlantic attracted the attention of the British Admiralty, when he in vited him to call for an interview.

The lad named Morrison, resident of a Sandy of fifteen on the Hebrides Island of Lewis was in a lifeboat with fifty-three other survivors of the steamship Arting ton Chase. He found that he was the only one among them who knew how to handle a sail, or anything about navigation, so he calmly took charge.

With a small compass he set a course and for a week never left the tiller, except to take a turn at the oars to warm himself although his hands were fairly blistering.

There were no provisions on board, condensed milk and some barley beef in the boat but very little water and Morrison rationed this allowing only one spoonful at a time except in the case of a baby which he knew to be give a drink whenever he needed it.

The boat on the seventh day was sighted by a Norwegian tanker which took the castaways aboard.

Another Economy Measure

Germans Economizing Even Shopping Handed To Have Wrapping Paper

German housewives have brought out their old-fashioned shopping baskets to help win the war.

An almost forgotten relic in most Nazi-land households the shopping basket has now become a treasured heirloom to the Hausfrau who is trudging downward on the stairs to deliver goods to the bottom and more important because it saves wrapping paper and paper bags.

The German Ministry of Economics of authorities who possibly have told German women to carry it shopping. It is pointed out that paper products, for instance, can be dumped right into the garbage as can vegetables, canned goods, standardized soap and other such commodities. Some stores have taken the hint of the Government and are now displaying signs asking shoppers to bring their old baskets with them.

There are many German women [illegible] whether it is economizing which has become a high priority duty.

The edict German news agency [illegible] the Government [illegible] housewives don't hurry any [illegible] them of the [illegible] Stores will be gradually made even when they have been used for storage and kept in readiness for school children the Hitler Youths and other voluntary bone collectors the authorities say.

Bones thus collected can be put to three uses. They can be used for the manufacture of fertilizers for industrial fats and for fertilizers

The fats contained in bones, it is said, is valuable to soap and confectioners manufacturers also being useable in other branches of industry.

Experts estimate that 50 per cent further of the bones in Germany go to waste. To-day condition it is in awful most cases.

The World Of Wheat

By M.G.I. Strange, Director "The Crop Turning Plan

Venezuela is a country which depends for its state revenue upon high tariffs against imports. The policy, therefore, of things to be purchased as essentials are very high, and the standard of living of the people is low.

In Caracas, however, which is a Dutch island some 40 miles away from Venezuela, tariffs are either non-existent or very low. In consequence imported goods and products from all over the world are abundant, prices are cheap (considerably cheaper than in Canada), as the standard of living of the people is high.

In Venezuela, a very ordinary new shoes costs $2.50 (American money) The same luncheon as I eyeing ran to had for 35 cents. American cigarettes 80 cents a package as Venezuela and in Caracas 10 cents — the same brand in Canada costs 25 cents. White cotton shirts, of a standard brand made in the United States, are retail I readily cheaper in Caracas than they are in Canada, in Venezuela the people are obviously underfed and clothes tented, whereas I Caracas they are well fed, smiling, happy and contented.

The thought occurred to me how much better off our Western farmers would be if they too, like the Caracas people could buy what they needed on the world's markets, where they sell their wheat, without having to pay [illegible] and export duties.

Factory—Stocks of U. S. and Canadian wheat on hand are largest in many years—Industrial users recently restricted in the Argentine.

WELLS— AND THE HEALTH OF A COMMUNITY

The average health of the community should be better than that of the city, but unfortunately it is not the case. In many cases the sick and death rates in country areas are higher than those in the city. This is not due to the improper work or unwholesome of the country, but is directly due to the fact that the health of the city is looked by a well administered health [illegible]

To many side water supply is quite unsuitable to the health of the family. In this connection it should be remembered that no sanitary convenience can function properly unless it is based on sound sanitary practice and is given proper attention. Wells used as sources of water for drinking and domestic purposes should always be located and constructed in the continually pulled safe water Where can be had and put close to drinking water should be built clean and safe.

The closet, the well should be free from any and all kinds of contamination.

The well should be located so that drainage will be away from and not toward it.

The wall of the dug well should be ten-weight to a depth of eight feet or more below the ground surface in order to exclude contaminated shallow water and water For this purpose a six inch concrete wall is satisfactory.

The top should be water-tight and at least one foot above the surrounding ground level. It should be protected well. I part cement, 2½ parts sand and six parts gravel, not less than four inches in thickness, and should extend one foot beyond the well wall in all directions.

The pump should be of approved water chamber type.

To prevent a [illegible] condition [illegible] throughout the country. Most of the wells are [illegible] old. In many cases the cribbing has decayed and it is time for a new one. It cannot be expected that old cribbing in the well can produce clean water

So when one thinks of renovating consider the well as well.

EQUINE ENCEPHALOMYELITIS

Hysterical old- do not contribute their [illegible] assets an outbreak of Equine Encephalomyelitus are taking unnecessary chances. Authorities claim that the disease only comes this year, and the prevalence of a large number of mosquitoes likely to result from the wet spring may cause the outbreak to spread very rapidly.

The cost of vaccinating horses is cheap insurance against their possible loss. The immunity of the vaccine is effective in producing immunity for about seven months if properly administered. Vaccination has been delayed this year on account of a rural confusion, but should be completed by June 1st.

The wet condition of the land will place a premium on horses for power, as they can be used on wet land before tractors.

The danger of humans being infected with the disease is very slight, but overlooked in considering the prevention of an outbreak of Equine Encephalomyelitis in Alberta this year.

SEEDING RATES FOR FORAGE CROPS

Many factors govern the rates to seeding forage crops. Soil, moisture conditions, cooperation, condition of the land and purpose for which the crop is to be used are important. For mixtures and varieties of Alberta, the following rates are recommended:

Alfalfa—10 to 12 pounds to the acre
Timothy—6 to 8 pounds per acre
On irrigated land or where seed is [illegible] 10 pounds to the acre.
Brome—6 to 8 pounds.
Crested Wheat Grass—12 pounds per acre.
Do not generally prepared soil, 16 lbs is recommended.
Meat Clovers—10 to 12 pounds per acre
Slightly more may be sown on irrigated land or where seed is [illegible]
Alsike Clover—6 to 8 pounds per acre. Increase this amount slightly on irrigated land or where seed is brought east.

Wife: "Don't you like my new hat, dearest? I bought it on your account."
Husband: "Yes, you usually do."

An Irish couple where married life was far from blissful decided to end it amicably by committing suicide together. Having agreed upon the method, they [illegible] and "Now, then, and don't dare!" [illegible] Paddy, "as the clock struck [illegible] Mary, "as the clock struck [illegible] Paddy, "Oh, sir, what kind of an officer are you?"

Officer—"I'm a naval surgeon."

Pale bloke—"Good! Then you don't [illegible] these days?"

The young doctor, just starting in practice, went to the headmaster to see if he could buy some second hand books for the boys' library. He was offered the book, "What to Do Until the Doctor Comes."

"No, no," he said, "I don't want," he told the assistant. "I'm looking for one called 'What to Do Until the Policeman Comes.'"

An auctioneer young man was being instructed at his own request by a professional of elocution in the art of public speaking. "Now, sir," said the professor, "you must try to articulate your words more clearly. Remember that every letter in every word must be heard. Now, sir, you have a good [illegible] and I'm sure you will soon be able to [illegible] Now, sir, what is the first word you will have to [illegible]?" "Auctioneer, sir," was the reply.

Some of you policemen walk about as if you'd bought the street."

"Yes, and some of you gentlemen look as though you'd got paid for your work."

Two Irishmen were discussing the big [illegible] of the Dublin Fair, and in the course of the conversation Pat asked Mike: "Mike! Oh, my beautiful [illegible]"

The Week In Edmonton ...

EDMONTON — Leaders of Western Canadian and United States governments, including premiers, lieutenant-governors and governors, will participate in the two major ceremonial events to be staged in Edmonton during the week of May 19 to 25, it was announced this week by J. A. McNeil, secretary of the Alberta Motor Association, this week. Officials of the federal travel bureau will play important parts in the civic functions, which will attract visitors from all over North America.

Crowned Heads of Europe visited previously, the new highway will be without equal anywhere in the world. It is anticipated that this attraction alone will engage a new and growing branch of this industry business which Canada certainly excels at the present time. Enterprising concerns are already establishing headquarters camps along the route, and from many villages, tourist and cities scores word of special arrangements to be promoted by all [illegible] come in contact with tourists. Work is now progressing on the highway of the campaign, it is stressed.

• • •

Marked improvement in Alberta's oil industry and prospects for a bright future was shown in the quarterly review released by J. L. Irvine of the Lands and Mines Department this week. In the first quarter of 1940 the value of 1940 provided the market has been maintained at 1939 levels. Petroleum Valley alone will have a daily production equal to that of 1939.

With such a tremendous capacity, pipeline schemes would become economically feasible. It was reported that New developments in prospect are north of Turner Valley, at Ram River, Leduc, Wainwright, Pembina Cooper, Seiverille, Mouse Lines and Ram Silver, also at Bow Island, Medicine Hat, Foremost, production of United States wells is only 3 barrels a day.

• • •

Annual meeting of the Alberta Co-operative Seed Growers Association, and of the London Chamber of Agriculture, has been set for July 4 and 5 at Red Deer, it was announced by Secretary Manager [illegible] Plans for the sale of [illegible] and the well-known annual assemblies of individual [illegible] programs as a war effort are now being organized. Hon. J. L. Ralston, Minister of Finance, has announced the appointments of W. H. A. C. FINDLATER

In the Days of Mary Queen of Scots

When Mary, Queen of Scots, was imprisoned in Tutbury Castle, Derbyshire, in 1569, she developed a fondness for ale brewed by the monks of the monastery. She had her monthly supply "to what place near Tutbury beer may be provided for the Majesty's use" to which the Judge Justice answered that the castle, although "near may be had at Burton three miles off."

CHAPTER XV—Continued

Dumb with the wild joy and emotion that choked him he gripped her to his breast, and as he felt the fierce beating of her heart, kissing her thin face again and again.

"I've been dying every minute — through those awful days," she whispered, hoping and praying that you'd come—come soon! It was so awful to leave poor Dad—lying there in the snow! They did, too, but he fought them until he died. And I had to leave him there! Oh, it was so hard to leave him!"

He was unconscious not dead, and Alan knew he died in the very arms before he died, he smiled and whispered, "Shadow!"

"Dear, dear old Dad!" The shriek on gay gaze herself up in her grief. When the policeman's rubbing cream set, she said, sweetly: "I'm as tired—as tired! I wonder if I can rest all the way—except on the big hike. They let me ride then."

"You're going to rest now for days, dear. We're all going to rest." "We're on then Alan." Yes, and Moni and the dogs must have killed yourselves to reach us. Rough and the puppies. They're all right?"

He pressed his face close to hers on his and "You'd always think of them—our dogs." They're down the street—worked out but all right now. Those boys have said keep warm while I bring up the dogs."

Rather he left his sweetheart. "Do you believe I love you, now?"

She impulsively drew him close to her. "I know you did, that day of the camp when you took me in your arms. But I'd been so hurt I've hurt you so long, ever since you left us on the ice by the Fort George."

He kissed her then pushed back her head to brush the black gold of her hair. Reproving her for so maliciously caused the ugliness of the wound on her forehead. Then in the room Standing by the fire on which he had placed fresh wood, Moni waited to speak to her, but Shadow spoke first.

"Moni Moni!" she cried. "Moni, come here!"

Heather impulsively reached and hugged the astonished Montagnais. "Thank you, Moni! Oh, thank you for what you've done for me! You're both as thin you've worked so hard! It makes me cry!" And she buried into bosom.

"Bet you were! all do work, Shadow to get you back!" Moni then shaped a grin, but there were tears in his smiling eyes.

the partner he had shot while Heather slept, then Alan went for his dogs. Somewhere back in the bush the Indian hunters again lay quiet, undisturbed to the action of the strange sunbeam.

When Alan brought his weary and still dogs up to the camp with the sled, a hooded figure stood on the bank.

We'll have to wire the dogs away from the camp, Heather," he called out. "They'll pitch on there Indian dogs if they're home, I know."

With a laugh the hooded shape moved through the gloom to the Ukon.

"Roughy! It's Heather!" she cried, dropping her clothes and throwing her hands at the doubtful head-dog. Powder! Hoot! Rogue! It's Heather! Don't you know Heather?"

Smile where there a mad storm of yelps greeted the girl as the dogs recognized their old playmate. Trail still as they were, the four remembered the voice—the voice behind them, the pawing of fore-feet, taunting muzzles and the swirl threats of sad tongues.

"Oh, you poor darlings!" she choked. "You're so hungry! And you did it for me! Dear, dear old Roughy!" She caught his head with happiness while star on the bear skull of the head-dog.

In the crush of Alan's right arm, she walked slowly back to camp where Moni had prepared tea and caribou broth waiting for them.

For two days the happy man and girl and the dogs rested at the camp, feasted in a new camp across the river for there was plenty of fuel, slept dead caribou and fish on Mackenzie's dead with the eight bags of gold. Then they started home with their new sled, a sled that was a present from Moni, and the long race up the Kokonah began.

"You see they didn't know I had a pistol, Alan," she explained. "I had no chance to help Dad, that morning. They caught me in my sleeping bag like a rabbit in a trap. But Indians way from the best and shot me with a pistol. That's how I got away. I had my pistol under my coat. I knew I'd need it for Dad."

"It made me mad the thought of it!" he said, his face face bitter with remembrance.

"Then during that drifter," she went on, "While Morgan and Dad slept, I washed up in my bag to see that evil-faced halfbreed watching me. I knew I could not run—not with the whip—except on the big hike. They let me ride then."

"You're going to rest now for days, dear. We're all going to rest."

"We're on then Alan." Yes, and Moni and the dogs must have killed yourselves to reach us. Rough and the puppies. They're all right?"

One in Every Ten

In Toll Number Army Paid During War With Russia

From the beginning of the first brothers War Finnish army was outnumbered almost two to one by a superior Finnish soldiers with the part of Field Marshal Mannerheim's "super-defensive strategy. The quotation by the number of Finnish casualties in an army of approximately 300,000 men, can be to prove authoritatively for the next time.

Within the narrow margin of a few hundred, many or less, in the killed and wounded, the Finnish dr. three who have accepted its fate from authoritative.

Of casualties of all kinds dead, missing and wounded, slightly over 50,000 men and 1 per cent of the population.

Killed, 16,336; missing, 1,500. Gravely wounded 12,500. Total of dead and serious casualties 29,500 men. Seven hundred civilians, among them officers and one private killed in action.

In view of the fierce fighting and of Russia's huge superiority it is remarkable that the Finnish human army a grand total of casualties should be less than double and that only half of these were killed or permanently disabled.

Even as a figure of 29,500 men or are equalled by one out of every 10 Finnish soldiers on the "front lost but For a small army they have made much heavier sacrifices than the two nations.

An Acre Of Land

Value Depends On Where It May pens To Be Located

The Petrichor-ugh Examiner says: "An acre of land is a valuable commodity, depending on where it is located. In the cities of Ontario there are 70,323 acres within the various boundaries, and the total assessment is placed at $673,474,392. That is to turn gives an average value of $8 $24 to the acre of land which happens to be within the city limits. The figure is undoubtedly driven up by the friendly high value of town acres property in the congested areas and of real estate values.

When your acre of land happens to be situated in a town the prices are considerably more modest, as it runs from $406 to $620 and the average for the province is $404. When the new happens to find itself in villages the assessed value per acre drop and within the village average is $204 per acre.

And then when there are farm itself located in the country where nearly all of our acres are located, the value goes down very rapidly and finds resting place at $21

Indeed, there are 30.1 persons on each assessed acre of ground, and although it is difficult to explain that the acre value is so low although the official records make it read that way. Ontario have about the average density of population with 69.5 persons per acre, but all the most outstanding feature is the difference in the price of an acre of land from $21 in sunbaked and districts to $3,634.95 in cities.

Silkout Guards

Canaries are used to guard a bank in South America, it is reported that these birds are extremely sensitive to foul air and give warning promptly of any of the gas escapes.

Twelve hours and seven minutes make a day at the equator This is the time which elapses between sunrise and sunset.

Might Be Used Again

Sixteen Dropped From National Anthem Would Fit 4 millions, Tuesday

Efforts are adopted as the British National Anthem the words have undergone changes it has been pointed out, since the days of Queen Anne. Six whole verses was dropped, about the time Napoleon was defeated, but a permanent Brotherhood of Man was in process of formation. That stanza might also be taken out of retirement hustled and again put in circulation for it voices the sentiment of most and probably of all who whole heartedly sing God Save the King. The deleted verse fits to-day's conditions as revealed by the authoritative and for evermore Remember how it runs: "Confound their politics Frustrate their knavish tricks On thee our hopes we fix God save us!" Combined with a blitzkrieg possible or a long wearing war instead by Hitler impending."

God Save the King is more than a plea for the safety of the man who is Canada's King His safety and his victories are our own United his people can face with confidence any invasion for any part east west or south may have its individual song suitable to the environment but above all there in power and volume, the strains of the National Anthem will rise while British Commonwealth of Nations stands as it always will for justice and home within and without its confines Ottawa Journal

CHAPTER 1 Continued

"Have you the question.

"I have, friend—yes. A very dear friend he was many years ago, but the poor fellow couldn't get straight I had planned to visit him but I dreaded the experience

Mr Harlow had no friend in any prison.

He looked at him thoughtfully "It isn't really so dread ful I've been there before," she man, without the slightest embarrassment. "My wife is there."

Really? His voice had just the right quantity of sympathy and understanding.

"That is my second visit as four years I hate it of course and I'm glad when it's over It is usually rather trying."

They were passing slowly towards the highest enhancement.

Mr Harlow was very dreadful for you. You feel so sorry for the poor fellows

She was smiling he was almost shocked

Bonbons Only

"That doesn't distress me very much. I suppose it's a brutal thing to say, but it doesn't There is a—" She hesitated, searching for the right adjective between my uncle and my husband. "Affairs are in a very unsatisfactory state at present. I'm rather upsetting."

"Unfortunately," murmured Mr Harlow

He took a notebook from his pocket, opened it with the greatest deliberation and wrote for five minutes. He tore out the sheet and handed it to her. When he had finished he tore out the sheet and pressed it across the table

"I want to know all about this man Arthur Inglis," he said. "From his sentence expirer, whom he lives in London or elsewhere his business and especially his grudge against me I don't know what it is, but I rather suspect that it is a pretty big one I should also like to know whether he has any property. If he has some you will find as the paper with a very many matches. I want to know who are his friends what are his amusements, and if his financial position is very important."

Mr. Carlton

"I understand." Ellesbury put the paper carefully in his pocket and rose. And then, with one of his habitual starts "I had forgotten all about Mr Harlow," he said. "On Monday last I had a visit at my office in London from Mr Harlow's wife.

He said the last two words apologetically as though he were in some way responsible for the character of his unfortunate friend. "I knew her in the bodies of your enemies. My thrift is harder to get than most people's. Eight cuticles were walking down theatrest in the direction of the

bury who had a trick of reproducing at a second's notice all the emotions he described "It was rather puzzling. He is owned up his face into an expression of bewilderment. "I'm sure Mr Carlton did not come to any good."

"Carlton" demanded Harlow, quickly his face. "That's the man at the Foreign Office, isn't it?

Ellesbury nodded

Mr Carlton was the assistant Secretary for the United States of International factory. He wanted to know information—any statement he had—that could be used against him, and of course I told him that as far as I knew there was

Then I say we said Mr Harlow gently. "Say the Rake symbolizes that I am a lawyer acting for my unfortunate principals Well."

Ellesbury nodded

He always is vulgar, interrupted Harlow in a faint smile "and he's also suspicious remember that Mr Carlton is the most unscrupulous man in the Foreign Yard has ever employed Some day he will be irretrievably ruined or irretrievably promoted. I think that is almost sure to be promoted. He would be a loss to the service. Mr Carlton is a man of his word. I know of no man in the Foreign Office who has a greater sense of honour and unscrupulousness. He has a theory which is both ethical and baffling. He says that he has the right theory For that reason I am willing to give you a quantities because you never know of a man is doing right when he thinks he is wrong I think that is almost an epigram Ellesbury you are going to be a great lawyer one day you are called upon to write my epitaph you may have mine. I'm not dying yet, but I'm not over particular. The ancient inn has been sold for building purposes and in the demolition Mary Harlow's "Pen and Ink" sketch has been torn from the timbers in which it had been concealed for 175 years London Liberal

Our New Governor-General

Third Close Relative Of Reigning Sovereign Appointed To Office

The Earl of Athlone will be the next Governor-General of Canada since Confederation, the third close relative of a reigning sovereign has been appointed to the second Governor-General to take office with Canada at war.

His appointment recalls the fact that at the outbreak of the last war Canada had the Governor-General in George V. held the position. He was Hon Royal Highness the Duke of Connaught, a son of Queen Victoria.

The new Governor-General is also an uncle of the present King but is not a member of the Royal Family. He is a brother of Queen Mary and a member of the British aristocracy. He succeeds Lord Tweedsmuir, who will be relinquished those honorable duties on resuming his earldom.

The new Governor-General, Rideau Hall had a Royal occupant when the Marquis of Lorne was Governor-General. His wife, Princess Louise, was a daughter of Queen Victoria.

Rooms For Purchase

Queen Mary Changes Fireplace In Her Doll's House

Queen Mary has for years been a regular patron of the arts, and a collection of her gifts to museums and picture galleries would be a long one. Her most famous purchase was a regular picture

RED CROSS CELEBRATION — DOMINION DAY JULY 1st

The following news items were received too late for insertion in our town's issue.

* * *

Mrs. J.W. Sharon has returned home after spending a couple of weeks in Calgary.

Mr. and Mrs. D. Stone were Calgary visitors last week.

Mr. and Mrs. Chas. Stone recently moved here from Calgary where they spent he greater part of the winter.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Garden planting is well advanced in Alix. The coming week will likely see the bulk of the seeds safely in the ground for the season. Farmers have been getting during the past week but there is a lot of water still standing on the flat land and low lands between Alix and Lacombe.

CAN PASTURE AND FEED 100 Cattle, May 1st—O. F. Olson, Bashaw, Alberta.

We are of the opinion that as far as we have heard nobody seems to be provided for the convenience of passengers coming and coming from the C.N.R. station. In rainy weather there is considerable mud on lake street, as any evening of splashing one gets from passing cars. For the good of current reputation we should remedy this defect. Anyone getting a dollop of dirty water usually says things about Alix.

—The Anglican Church are holding a Tea and Sale of Home Cooking in the I.O.F. Hall, Saturday, May 29th, from 2 to 5.30 p.m.

Work will be resumed on the Unionized site each week, Friday and Saturday evenings. Everybody come with rakes and spades.

A Red Cross Rally and Sports Day will be held in Alix on Dominion Day, July 1st.

We wish our readers to understand that we do not make any charge for printing news items. We always welcome news of the town and district. You are cordially invited to send in items of public interest. We want all the news we can get.

It looks as though the weather will not "settle" till we have a snow storm. Then, the sooner the better.

E. V. Chambers again takes over the Alix Free Press, Mr. Bradshaw and Irene this week to join his family in Lethbridge.

Art Soli motored up from Lethbridge over the week end, and left on Monday with his family to make their new home in the southern city.

"Red" Pollock was a business visitor to Edmonton over the week end.

The shade trees about town are much in need of pruning.

Mrs. O. P. Timpe announces the engagement of her eldest daughter, Margaret Dollerson, R.N., to Mr Harold L. Shuler, of Ontario, Ore., son of Mr and Mrs J. M. Shuler of Glenwood, Ore. The wedding to take place June 1st, at 5.30 p.m. at the home of Dr. and Mrs. V. S. Conery in West Point, Ore.

The local Alix lightschool softball showed its superiority over the Morrinton, when on Friday night they defeated the Mirror boys 21 to 5 and in the return game on Tuesday night at Mirror won 21 to 8.

Wanted Pigs and Sows with Pig for Sale or Trade for Cattle—Apply H. H. Chase-tf.

The Alix Mixed Kearney orchestra, travelling to Alix by motor coach will arrive in Lacombe today on train No. 552, arriving at 1.05 p.m.

Members of the party will be met by B. Lawrence, president of the Lions Club, Les Hammond, safety squad, T. Lewis and B. Ford, also members of the Lions club.

A dance in their honor will be held in the Empress Hotel in the evening. During the afternoon, they will be entertained and made welcome by the people of Lacombe.

Dance of Central Alberta Parliament will open around 8 o'clock, starting the "dance of the year", when Mart and his orchestra will provide entertainment seldom enjoyed in the locality. Immediately after the dance, the orchestra will leave on the 3.30 a.m. train en route to Montreal.

The "Railway Review," of London, England, published the following in a recent issue:

"It is reported that a women subpoenaed by Canadian National Railway Bridge Department to inquire into [illegible] points are recorded for a little [illegible].

"So that's the baby, eh?" "That's the baby! Well, I hope you bring it up to be a conscientious, honest man."

"I believe but this train is bent on being a gold, and we are inclined to be it go or fast?"

NOTICE !

At a meeting of the Village Council held on May 6th, 1948, on motion of Mr H. Whitfield, a half-holiday on Wednesday afternoons, may be observed from the First Wednesday in June until the last Wednesday in August, except on a week when there is another by-holiday.

VILLAGE OF ALIX
C. E. Yarwood, Sec.-Treas.

NOTICE !

By order of the Village Council parked on regular morning, May 6th, all persons must be "Clean Up" by May 25, 1948.

VILLAGE OF ALIX
C. E. Yarwood, Sec.-Treas.

Dance to the music of Mart Kenny and His Western Gentlemen, Canada's finest orchestra, at the Central Alberta Pavilion, Lacombe on Friday, May 17. The dance is being sponsored by the Lacombe Lion's club. Tickets are $1.80 per person and are on sale in Alix at the Coffee Shop.

Mrs. B. Baldwin has some hens on her farm that she thinks deserves special mention. Since March 1st to May 8th, she has gathered 207 eggs from three hens. That works out one egg a day from each for 69 days. Steady old Biddies, eh, what?

Mr Harry Buckley of Sylvan Lake is on the H. H. Mann farm, west of town.

Bob Whitfield, Jr., spent the week end with his family here.

Bob Joyce of the Royal Bank, Alix branch staff leaves this week on his vacation.

H Butchart is having alterations made to his house.

Mr and Mrs. Fred Turnbull of Red Deer visited the home of Mr and Mrs. H. H. Mann on Sunday.

FOR SALE—Heating room suite — table, 4 chairs and buffet, white enamel finish, in excellent condition—also electric Radio—Apply to Red Todd.

J.-be Burns, of Calgary, has been appointed assistant chairman of the War Savings Committee of Canada committee, to be announced in the near future, will be representative of agriculture, labor, industry, finance, education and the professions.

War Savings Certificates, to be sold in multiples of $5, are designed to give everyone, including school children, an opportunity to share in the war effort in Canada's fight for freedom. In addition to making a very effective contribution to the mobilization of Canadian resources, War Savings Certificates provide an opportunity by which every Canadian, old and young, may build up a reserve of purchasing power.

Mr. Burns, chairman of the Alberta committee, was born at Kirkdale, Ontario, and has been a resident of Alberta since September, 1906. He is president and chairman of Burns Foods Ltd., Palm Dairies and Consolidated Packers Company Ltd. of Calgary and a director of a number of other companies. In addition to his interest as a trustee in Alberta Schools, Mr. Burns is a director of the Calgary Board of Trade, Canadian Manufacturers' Association and other national organizations.

In Memoriam

In loving memory of a dear wife and mother who passed away on May 18, 1939.

Chas. Wedgery, Margaret and Son

The annual musical festival took place at Stettler on Thursday of last week.

Alberta bonds have dropped an average of 3 points in the past few days. The New York bond market slumped 10 points this week.

The Provincial Government reports that the danger from grasshoppers will not be so great this year.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Mr. L. K. Pollock was a visitor at Stettler on Saturday.

The Ratone boys are on Monday, to attend races in Winnipeg.

Robt. Whitfield, Jr., of the Can. Eng., spent the week-end with his family.

Miss Audrey Sweet, of Byrnn Lake, has been visiting Grandma Mitchell for the past week.

Tom Cruikshanks has purchased a new Minneapolis Moline tractor from the local agent, V. A. Lyle.

Bert Smith and family have moved to Red Deer where Bert will take over the duties of engineer at the Condensery.

Dick Woolgar, who has been confined to his home for many months, due to illness, was in town the past week end.

Seeding has proceeded rapidly and wheat is now practically 100 per cent. in. In many fields grain is showing above ground.

Bob Joyce left for Calgary on his annual holidays last Wednesday. He is being relieved by Mr. Soddar, of Calgary.

Mr. J. Badger, formerly of the C.A.D Pool, week-ended in Alix. He is now connected with the Dominion Poultry Department.

The Jennings oil truck is kept busy between Calgary and Stettler making 3 trips daily with Joe Drumbia and Art. Lee both doing the driving.

Mr. and Mrs. C. Sorenson, accompanied by Dr. Geo. Page, of Rocky Mountain House, passed through Alix on Saturday on a visit to Stettler.

Mrs. T. Semple is attending the Annual United Church Conference in Edmonton this week, on lay delegate from the Hayner United Church.

It is suggested that those of our community, who have been making coalitions expressions, will take stock of themselves, or the internment camp may be their future address.

Mrs. A. S. Binnett will accompany Mr. and Mrs. Capt. F.O.B. Eston to Winnipeg for an extended holiday. They will start on Monday.

The regular meeting of the Junior U.F.A. will be held on May 25th. All members please attend as important business must be attended to.

About fifty of our young people attended the Mart Kenney dance at Lacombe on Friday evening of last week. They report a jolly evening. About 20 cars left Alix for the dance.

R. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, June 4th. On Wednesday to Saturday of each week journey at Calgary office, 209 310 Southam Building.

A number of our citizens have been making noticeable improvements to their premises this spring. The best results will come when we can afford a widespread system. Judging by present industrious there are going to be a number of good gardens in Alix this year.

Mr. H. Rogers, of Vancouver, motored up from the coast on a visit to the boys. Mr. Rogers will spend two months' holiday up on the farm. He has retired from business this year after 10 years of service with the firm of Connoly & Co.

Peppy Watts plays in Alix on May 31st

Mr. and Mrs. Floyd Page foregathered with the clan at Stettler over the week end.

Mrs. Riley Carter has been quite sick, but is now recovering.

Les Johnson was a guest of the Lion's Club of Lacombe at a dinner held on Tuesday evening.

Mr. and Mrs. Boyd Crocker of Lacombe were visitors at the home of Mr. and Mrs. T. Semple last Sunday.

Mr. Parmenter, of Three Hills, paid a call to the Alix Free Press office on Monday last.

Nine members of the local Masonic Lodge visited Red Deer on Tuesday last. Mr. Geo. Moore, G.M., was guest speaker.

Mr. and Mrs. D. Stone visited at the home of Mr. and Mrs. Both of Red Deer, last week-end.

The Carrol Ladies Club are holding a basket, tea and sale of home cooking in the Alix U.F.A. Hall, Saturday, June 8th.

Mrs. S.C. Andrews has received word that her son Lieut. C.S. Andrews, of the Calgary Highlanders, had arrived safely in England.

On Tuesday last a very pleasant afternoon was spent at the home of Mr. and Mrs. J.W. Simons when a few friends gathered to present gifts and good wishes to Mr. and Mrs. Clive Simons, who recently came to Canada From England. Following a delightful tea served by the hostesses the gifts were presented, and in a few appropriate words Mr. and Mrs. Simons thanked the donors.

Messrs J. Martin and R. Doen have joined the rank of advertisers in the Free Press this week. Mr. Martin is opening a blacksmith shop in the Lyle Service Station, where he has also installed a welding machine. Mr. Doen wants to give you an estimate on plastering and stucco work and Mr. Lyle is anxious to talk to farmers about a new All-one farm machine called the Minneapolis Moline Uni-Tiller.

HAYNES NEWS

The regular meeting of the Haynes Ladies Aid was held at the home of Mrs. Semple last week with most of the members and several visitors present. Plans were made for holding the annual clean-up of the Church in June.

Mr. Bill Bredo returned home recently, after having spent the winter in Edmonton at the University of Alberta.

The dance held recently in the community hall and sponsored by Sonny Fry's orchestra of Calgary was not very well attended.

It is reported in Calgary that Germans are trying to discourage recruiting in that district. The charge is true and has been going on ever since the war started. Hard speech has been operating in that city for over two years and are still on the job.

Building An Industry

All indications point to the probability that the summer will see a marked increase in traffic on the highways and possibly on some of the more important motor-road roads in Western Canada.

The origin of this increased traffic will be partly local due to improved crop conditions in many parts of the province but more, coupled with the prospect of better prices for wheat and other grazed should the war continue and the Allies be able to keep the commerce open for three hundred supplies of foodstuffs, munitions and other requisitions for warfare.

The other factor making for this prospective increase in traffic on Western Canadian highways this summer is the probability of a substantially augmented number of visitors from the United States on holiday bent, and to all Manitobans this source will provide for the major increase.

In addition to the American tourists who would have spent their vacation in this country in the ordinary course of events, Canada is likely to play host to a large number of the more wealthy residents of the United States who are accustomed to holidaying in Europe and whose summer playgrounds will be cut off by the war. These visitors will be almost entirely confined to this continent. Some, no doubt, will go to Mexico or the West Indies, but, if the one spreads, the majority will find safer in Central and Western Canada than anywhere else, except in their own country.

If this premise is sound, many new forces from south of the international border will be seen in Western Canada, and the province should prepare to afford an excellent opportunity to Western Canadians to renew the friendship which exists between the two countries and to lay the foundation for an enhanced tourist trade for future years.

* * *

Safety First

If this traffic is to be encouraged, not only for this but in future years, it is essential that everything possible be done to ensure the comfort and convenience of those who make Western Canada their holiday playground, and every possible means should be adopted to dispel the erroneous notion which has been spreading abroad of the hardships to be encountered from rainstorms and mires, higher food prices, strenuous restrictions of ports of entry and exit from the country, such for instance as prohibitions in the entertainment of the use of cameras and so on. Fortunately, the federal government has already announced that none of them risks and inquisitions exist or will exist, but a bare announcement is not sufficient. The information must be conveyed to the potential visitor and every Western Canadian can help friends in the United States whom he may contact and see that this information is as widely circulated as possible in the neighboring country.

If this traffic is to be built on a solid foundation now, when the opportunity is available and of good will is to be created and cemented, it is essential that the roads over which the United States visitor must travel in order to reach full force value of his dollar while purchasing commodities and buying services on his vacation trip. Every Canadian who finds to give the incoming tourist the best service which the United States visitor has a right to expect, and national exchange rates is doing a disservice to his own country and to adopting a short sighted policy.

In view of the future, as well as the immediate present, importance of the tourist industry special efforts should be made this summer to maintain the highways and major municipal roads of the province in as high a state of efficiency as finances will permit. While war expenditure, of course must have the right of way, as much as possible should be done to maintain the roads, if this country is to make the most of the advantages of building up this major industry which the present situation affords. This outside the necessity of seeing to it that every penny spent on road construction or road maintenance does a full dollar's worth of work.

* * *

Courtesy is Important

Apart from these essentials to the promotion of this growing industry courtesy is not the least important consideration if we are to attract and retain the goodwill of the customers. This implies, not only courtesy in the conduct of transactions with the country's guests, which, unfortunately is to be expected, but also courtesy on the road. The rules of the road should be strictly complied with for they, themselves are based on the spirit of courtesy and consideration.

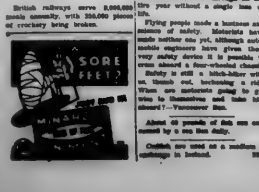
The driver who hogs more than his share of the road, who cuts in front of others, who passes others on hills and corners at excessive speed, violates the laws of courtesy and commences and is doing his share to drive away a fascinating train as well as being a danger to himself and his own conveyance.

A study of highway accidents in the United States by the Travelers' Insurance Company of Hartford, Conn., reveals the fact that in the states that virtually all highway accidents are due to the negligence of those involved. Of the accidents studied it was found that the weather was clear in 86.7 per cent. of the cases and the pavement dry in 79.4 per cent. The drivers involved 55.7 per cent. had more than a year's experience and 88.4 per cent. were men. Ninety three per cent. of the cars were in good condition and 84.5 per cent. were driving on straight open roads when the tragedy struck. The figures dispose of practically all the usual alibis for accident causes and leave the driver culpable.

Rapid Rise For Job

In a despatch from London appearing in the Christian Science Monitor the following unique fact is informed people in England to-day question that Mr. Winston Churchill has been in office but a few months, has now on the highly fussy task of trying to keep one foot on the ground while being hotfoot in three and full — meaning to say that they won't fly. of ingenuities to cull us with unquestioned success in speeding up the building of war fighting ships.

British railways serve 8,000,000 people monthly, with 250,000 pieces of crockery being broken.



Safety Always Waiting

Steady To Ride If Careless Driver Is Willing

Most people who drive cars are fond of saying in their own accompanying way that they have no fear of bridge in war time. He is credited with being fertile in ideas and full — meaning to say that they won't fly. Yet all the ingenuities to cull us with unquestioned success in speeding up the building of war fighting ships.

Flying people made a business and pleasure of motoring. Motorists in mile neither can yet, although automobile engineers have given them very safety device it is possible to even almost a four-wheeled chassis. Safety is still on the whole-hitter still on, thumb out, beckoning a ride. When are motorists going to get tries to themselves and take him aboard?—Vancouver Sun.

About 40 pounds of fish are consumed by a Sea Dog daily.

Custom now used on a modern of cushings in bedland.

Open Lower Club Again

Australian Serving In Last War Wins Praise To Remnant

The moving spirit of the "Lotus Club", so during the first Great War, in Lady Guggenberg, wife of the Gen. Guggenberg who was Governor and commander-in-chief of the Chief United Lady Guggenberg formerly a well known actress, founder of it remarkable women's services during the last war, will be remembered among the Canadian returned soldiers for Miss Dorothea Moore she is still Miss Moore in the Congo and to-day the best-known in the Lotus Club the one of many a soldier who stayed three 30 years ago.

It was quite natural then we opened to-day over that the best re- Australian Lotus Club Australian women we had during the last war — and Lady Guggenberg "till coming again" to-morrow have not begun to come yet except a few members of the Club who have been in town for their homes in France when and for as long as they were in the city of the contents. Many a bottle was never opened a little and added, "You can tell their mothers that we'll look after them."

Inside the door and along the long wide staircase the walls are covered with British Flags and signs in English here a warning A lovely "Business as usual" a cautionary and bitter servant." Soft English voice, the small of good humour the competitors have been and on come up in there rights.

For Stricken Poland

Red Cross Sends Funds To Assist In Polish Relief

The following letter will be of interest to Polish readers all over Canada. It is one received by the Red Cross Red Cross aid done help in no things in the war-ridden countries which can be done by no other agency.

Mr. Arthur Hilton, president, Manitoba Branch, Canadian Red Cross, Winnipeg, Manitoba.

Dear Sir Hilton We are herewith enclosing a cheque for six hundred dollars ($600.00) which we are mailed to us from Montreal, with instructions to forward same to you.

Mr Jan Stanczyk, the minister of labor and social welfare in the Polish government is contained in the letter of the donors, a copy of which is also enclosed for your kindly enclosing.

The funds are for your honour kindness in various matters brought before you, we hope you will find it convenient to acknowledge, Yours etc.

Yours very truly.

Dr F Seidzik,
President, Polish National relief and welfare committee in Canada.

The cheque has been turned over to the Polish Embassy, acting consul minister of the Red Cross.

It's a long way from Dublin to Tokyo, but one of the most popular dancing tunes in Japan is current here and colleague.

Hits Of Other Times

Musician Played By Egyptians And Chinese Many Centuries Ago

We thought the game of matches was as ancient as the hills. Legal means we have not seen somewhere Matching down on the sidewalks for many a year but an enable Michigan it seems to be flourishing a 3,000 year-old game is spreading a tournament all over round the globe. Even for preliminary rounds nothing to a grand championship some sort of lucre.

The game of matches is one of the oldest in the world. It was played by the ancient Egyptians the Chinese and the Indians. Julius Caesar used to be the most common the making of marbles. The Marbles which were placed in the ring were made of baked red clay and the knuckles were rubbed of dirt to make the game more interesting. Flags and signs in English here a warning A lovely "Business as usual" a cautionary and bitter servant." Soft English voice, the small of good humour the competitors have been and on come up in there rights.

Prevent Wool Shrinking

Australia Has Found New Method That Has Proven Successful

A new method of making wool unshrinkable has been discovered at the McMaster Laboratory in New South Wales and is already being proved successful in large scale tests.

A statement by the Australian wool board said that the wool can be put under the new process for about six cents per pound. No other advantages are the simplicity of the process, low initial cost for the necessary plant and the absence of any chemicals or dyes.

The statement said it is believed that the processes will remove considerably the market for wool, which has suffered from the public's fear of shrinkage. It added that the other methods of making wool unshrinkable have been confined to England, but the Australian process promises to be the most effective

Canada Sells Most Wheat

Canada is still sending more wheat than any other country in the world, with 97 per cent. of the total wheat exports now information from Australia and the United States are stopping while the Danube Basin is merely holding its own. Our breadstuffs of wheat reserves may play an important a part in this war as it did in the last.

The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace. Developed by Ledger Syndicate

Sense ought months later there was a moderate accident on the. Thames Embankment. The girl in the yellow mackintosh and the man in the Blackfriar helmet were of one accord point of view. They were a delighted reason to cross the most dangerous stretch of the Embankment in the quickest possible manner and they were not to be denied. Their progress was a thing to behold, and the sound of horns performing in terms of unashamed parentage. Then her nose struck a shining object and she fell prostrate in her knees at the feet of a resentful policeman. He lifted her, helped at her, put her nose into with great firmness, and crossed to where his colleague was in charge of the string pathetically up a hurt dog.

"What's the idea?" he asked sternly, and grasped for his notebook and pencil in the Blackfriar. His colleague wiped his sodful face with the back of his hand, a gesture which resulted in the further spread of his grimness.

"Was the girl hurt?" he asked quickly.

"Never mind about the girl; let's have a look at your license."

Unheeding this authoritative demand, the young stalked across Fleet to where Alison, embarrassed by the crowd which gathered, was assuring several old ladies that she wasn't hurt. She was standing on her two feet to prove it.

"Waggle you toes about," suggested a humorous-voiced woman. "If they won't move, your back's broke."

Scotland Yard

The experiment met made for at that moment the tall young man in the red hot jerk as young in the direction of the girl in the yellow mackintosh. He lifted her by the arm and bid her way to the centre of the curious throng.

"Not hurt, are you?" he asked anxiously. "I'm awfully sorry—really! Didn't see you in the car—was right on top of you."

A voice from the crowd offered advice and admonition.

"You orter be careful, mister! You might have killed somebody!

"Tell me your name, won't you? He dived into his pocket, found an old envelope, and penned.

"Really it isn't necessary. I'm quite comfortable, thank you, but he was also insistent.

"Please, I must know your address and he had finished writing when the outraged constable matted through the crowd.

"Here" he said in a tone in which deference and reproach were mingled, "what's the idea of knocking people down in this manner?"

"Constable," said the young man, "this is a case of accidental collision. I am responsible, and I am willing to pay for any damage done to the young lady's clothes."

"Young lady!" snorted the constable. "Why, I've seen her before. She's a well-known character round here. Her name is Mary Ann Smith, and she's been run in more times than I've had hot dinners. Now, then, what's your name and address?"

"Mary Ann Smith," said the girl, with dignity. "I live at 17 Bedford Square, and I'm a student at the Slade School of Art."

"Oh, indeed!" said the constable, with heavy sarcasm. "Well, you'll have to come along with me, and you'll have to prove it."

"Why don't you run her in and charge her with being drunk?" suggested a humorous voice.

"Drunk!" said the girl indignantly. "I'm not drunk! I've had nothing to drink all day except a cup of tea and a glass of milk. Why, I'm a teetotaler!"

"Then you'll have to prove it," said the constable, with a grin. "Come along with me."

"Constable," said the young man, "I'm sure it's no use charging this young lady. I'm willing to pay for any damage done to her clothes, and I'm sure she's willing to let the matter drop."

"Sorry, sir," said the constable, "but I've got my duty to do. Come along, miss."

"Constable," said the girl, "I'm sure it's no place for me when they switch to Postum."

A Modern

Portuguese Museums He forgeed has grimy that Now pent lively swagger!

Mr. Carlton, he assumed a half-brother to the hotel but no relation to the fish. And this is fame! You were saying?

I was going to say that I wished you would call this You have been your life a bit dull recently, you might at least let me in on it now.

He peered through the fog-shrouded windows.

Carlton, an old business acting chronometrums at the corner of Whitemantle Bridge we might stop and buy you some flowers." And man quickly "I'm terribly sorry. I'm afraid you have only succeeded at all or make any questions at all about my movements upon your photographic reference

I don't live there now, sir," explained the girl. "I have permission to see the place is kept in order It belongs to a relation of mine who is abroad.

Monte Carlo" he suggested and he put more pressure on the He is plot Fairs you you, monsieur. Here's somewhere

prefer fine Rome Rio sky, sea sun, green Rock wave homes—everything like a luxury paradise And Riviera went off at a tangent "And nothing of importance, you were being interested in Rome?" he asked.

"No—just in front of you Petrol tank host."

Mr Carlton chuckled

Here he's—I'll remember gent, constable You had better send him to prison in a taxi—he, I'll take her myself."

Alison heard the proposal without comment.

"I much prefer to walk," she said decisively.

He led her aside from the crowd now being congested, authoritatively And in his flattering way he had tamed momentarily he revealed himself.

"I am, in fact, a policeman," he said, and she opened her eyes in surprise.

He did not look like a policeman, even in the dress clothes he now wore Under the appearance of a motor mechanic and not an aspect of the commonplace one. His head was encased in a blue woollen cap that left exposed only his face, and that seemed more than ever to be the face of a man who had been living in the open air.

"Are you a detective?" she asked in a hushed voice.

"Detective," he said frowly, as though she had given him a name to her surprise, "I am an inspector—a sub-inspector, if you like to be more explicit."

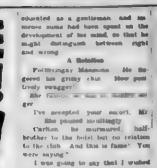
"Why are you telling me all this?"

He had already hailed a taxi and now he opened the door.

"I am telling you this in the secret of an ordinary policeman," he said quickly. "I want you to help me in a matter which is of the most vital importance.

"I thought of doing that," he replied calmly; "but Alison Rivers?" he said in her hand. "Yes, I can't place you."

And of course he had placed him. He knew her as the niece of Arthur Ingle, something Shakespearean actor and eye serving free pass for an indistinct system of fraud and forgery. But then, he was unscrupulous, as Mr Hawker had said. He had a power of invention which carried him far beyond the ordinary man, but he was not given to stooping on the way to his most petty deceptions. And that in spite of the fact that he had been



A More Beautiful Canada

Efforts Should Be Put Forth To Improve Its Appearance

The old saying that a home is not a home until it is planted is true to-day as ever. Every organized home in Canada can be made more attractive by the judicious use of flowers, shrubs, flowers and a well-kept lawn.

We are influenced by our surroundings to a greater degree than we sometimes realize Children are particularly susceptible in this regard. Surely a home in and around which flowers are grown is a better place to bring up children than a home where no attention is paid to these things. In the plain Canadian home children are taught to love flowers and become familiar with them they will be filled with love for these things and there will be less room in their hearts and minds for the things that hurt and destroy.

Canada is a land of rare natural beauty from the Brea C or Lakes in Cape Breton Island to the mountain ranges of the Pacific coast. Nature has endowed this country with the most beautiful and greatest scenic places, waterfalls, all are to be found in great abundance. Where these natural assets are unsightly and unloved are made by man and it would seem that the least we can do is to make these man-made places sufficiently attractive that they will be worthy companions of the scenery with which they are surrounded. It is simply a matter of natural economy and we are ready to add the dollar—two dollars—and cents for the right display of natural scenic grandeur to be found anywhere in the universe. Lovely flowers, lovely flowering plants, waterfalls, all are to be found in great abundance in Canada. Where these

The Bursting Forth of Spring!

Spring is in the air and in the house! Every warm rain brings forth new life, and day now you'll be feeling that urge to change the furniture around and re-new your home.

A little color here and there — newly painted floors, walls and ceilings — perhaps a table touched up gaily with a pleasing accent.

Okay that impulse!

Encourage the spirit of Spring by looking in your EATON Catalogue. It's a fund of fresh ideas — almost a service in decorating, and the best thing of all — mail order shopping, too!

Masonic Lodge Amalgamate

An event of particular interest took place in the Masonic Hall, Alix, on Thursday evening May 13th last. when Ionic Lodge No. 48 of Alix, and Ancient Landmark Lodge No. 109 of Mirror amalgamated under the name of Ionic Lodge No. 48.

David Shirreff, D.D.G.M. of Gadsby, representing the Grand Jurisdiction for Alberta performed the ceremony in the presence of some 65 members of the Craft.

Distinguished visitors present included R.W. Bro. Galbraith, Red Deer, G.J.W.; R.W. Bro. Rooke D.D.G.M. Dist. No 15; R.W. Bro. J. Gaires, P.D.D.G.M. Dist. No. 12; R.W. Bro. Drinnan, D.D.G.M., Dist. No. 9. The brethern present, after listening to an inspiring address by R.W. Bro. Galbraith, gathered at the festive board where they listened to several impromptu remarks from representatives of visiting lodges.

The meeting came to a close at midnight.

James Fraser, 39, farmer of the Bentley district, was burned dead in his farm home on May 10th. Hedied from a rifle round, believed to be self inflicted. Poor health was thought to be the cause.

France is zealously considering the establishment of still hay industries.

STETTLER SCHOOL DISTRICT

MINUTES OF MEETING

The meeting opened at 9:30 on May 14 with all members present excepting Mr. Scott.

It was decided to hold over the minutes of the last meeting until the afternoon and to spend the morning in discussing committee work.

A report was presented by the Committee appointed to investigate the accident at Acadia School. Your Committee finds from its investigation of the case, that there is nothing in the circumstances of the accident to Mac Artimer pupil at Acadia School, to be used as sufficient grounds for action against the Board as it was legally liable for cases of the accident." Report accepted.

A detailed report was submitted by the Superintendent dealing with replies from a questionnaire forwarded to the teachers in the employment of this Division. The Superintendent indicated the number of retirements to date, requests for changes, etc.

It was decided by the Board that the teachers employed by this Division who are holders of second class certificates, be requested to make every effort possible to bring their professional qualifications up to a first class standard.

Grade IX options were discussed and it was the considered opinion of the Board that the following options should be adopted: Music, Junior Business Art, and, where feasible, Typing.

The question of the advisability of teaching Grade X in the rural graded school was considered and in the option of the Board, it was deemed inexpedient in all but a very few cases.

The advisability of keeping open schools with enrollment of five or less was discussed and tabled for further consideration in the June meeting.

Mr. Parry—that the Board endorse the Superintendent's contention that 50 per cent of the number of Normal School Graduates annually granted residence in area of Division, is sufficient load on teaching staff of this Division.

The problem of water supply in many of the schools of this Division, was discussed and it was the opinion of the Board that the sinking of wells where practicable be made a prominent feature of this summer's work program.

ANNUAL MEETINGS IN SUBDIVISIONS

The annual meetings in subdivisions according to the School Act be held as follows:

Subdivision I—June 17th at Nevis Schoolhouse.

Subdivision IV—June 18th at Big Valley.

Subdivision II—June 19 at Red Willow.

Subdivision III—June 20th at Wall Lake schoolhouse.

Subdivision V—at Rhoen.

The time for each meeting was set for 8:30 p.m. and each Trustee was requested to make suitable arrangements for accommodation.

The minutes of the meeting of April 30th were then read and adopted.

Mrs. Parry—That accounts totaling $782.61 be paid Carried.

The Secretary submitted a financial statement for affairs of the Division ending April 30th, which was accepted

CORRESPONDENCE

Department of Education—re substitute teachers.

Mrs. Parry—that substitute teachers be paid at a daily rate corresponding to the rates of pay as set out in the salary schedule. Carried.

Big Valley School District—re tuition fees.

Mr. Robinson—That the Board of this Division does not approve of any deviation from present policy re payment of tuition fees on partial courses. Carried.

Hickling School District—re piano.

Mr. Clasen—that the request of the above District be acceded to. Carried.

Board of Administrators—Teachers' Retirement Fund—re substitute teachers.

Mr. Lohr—that the Board of this division accede to the request of the above and that a deduction of 3 per cent be made from the salary of all substitute teachers in the employ of this Division ten days or more. Carried.

The question of Summer Work Programme was discussed and in detail and tentative plans were made for work to be done in each Subdivision. The Superintendent was requested to prepare suitable forms for use in outlining work to be done in each school.

An interview was permitted N.M Paulson, representative of the Teachers Association re Sport Meet and sport equipment.

Mr. Clasen — that the date for the sport meet be set for Tuesday, June 4th. Carried.

MIRROR NEWS

Mrs. George Ray and Mrs. S. Whitsell were Sunday visitors at Tees.

Mrs R. Slinger, of Fernlook, spent the week end at the home of her sister, Mrs. Geo. Ray.

Mr. and Mrs. Lester Reed of Bessie, were Mirror visitors last Sunday.

Mr. and Mrs. F. Smethurst and family spent Sunday in Fernlook visiting relatives.

The tennis courts have been repaired. Many tennis enthusiasts have enjoyed sets. The Mirror club intends to hold a tournament this week. The officer who has recently been elected are: President, J. Henderson; Vice Pres., D. Thomas; Sect. Treas., Miss E. Rosser.

Sewing demonstrations are being given this week under direction of Miss E. Arrowsmith the Singer Sewing machine demonstrator. Classes for women are from 2:30 to 4:30 in the afternoon. Classes for girls are from 7:30 to 9 each evening.

On Sat. May 16, the W.A. held a very successful tea and sale of work. The sum of $30 was realized.

The Royal Baseball Club have begun work on a new baseball diamond. It is about a block from the old diamond,

Miss E.B. Watts spent the week end visiting Mr. and Mrs. G. Fyfe.

Canada's war expenditures have jumped to $2,000,000 a day and ordinary expenses to a million dollars a day. No one will complain if Canada is in the liquidation of Hitlerism.

The Germans of Barrhead, Alta., are also reported to be holding quiet meetings in their homes. Unless our military authorities can be convinced of the truth of these rumors Alberta may soon find herself in the war zone. The Canadian Legion is doing good work in this West Edmonton and the territories of the Dominion.

Transplanting Spruce

In Central and Northern Alberta where native spruce are plentiful, no home need be without trees. Spruce may be transplanted quite easily and if given proper care will thrive in their new location. Follow these instructions:

1. Select spruce growing on high land. Trees growing along creeks are best.

2. Choose trees about three feet in height, although it is possible to transplant larger ones.

3. When digging, a ball of earth at least 18 inches across and about one foot deep, should be left on the roots. Two men with spades can lift the tree and place it on the truck.

4. In transporting spruce, be sure they are thoroughly wet down with wet sacks to protect them from the sun.

5. New holes should be large enough to admit the tops of the roots and should be at least as three inches below the surface.

6. Pack the earth well into the hole around the base of the tree to retain water.

7. A pail of water each week is sufficient. It is also a good practice to throw water over the tree during hot weather.

The Canadian Rawn Board is having a meeting this week to discuss the British boom contract.

President Roosevelt has appointed Jay P. Hollet as envoy to Canada to replace H.H. Cooper, who is leaving for the States in New Jersey.

Vocational Guidance

Vocational guidance is a topic which has come very much to the fore recently. At meetings of home and school clubs, school boards, service clubs and organizations interested in general may trends of education and the development of the child to him or her for a vocation in life, we can hear the question of directing the child's efforts in that direction which will make of her most useful and valuable, not only to himself or herself but to society generally after school days are over.

If a system of vocational guidance is to be adopted in connection with the educational system of the country two major factors are involved, the child and society. If in connection with the child's best interests and the child's capacities are studied and noted as early as possible and that they be developed into his capacities to the maximum extent which the scholastic system will permit. That is for the benefit of the child. For the benefit of society it is likewise necessary that a life vocation be selected for the child which will enable him to use to the best advantage his talents and interests at the expense of industry, commerce or the professions to the best advantage.

The purpose of vocational guidance is to bring these two essentials together in the mutual interest of the child and society. If this can be achieved there will be fewer square pegs in round holes in the industrial, commercial and professional life of the country. In fact, no misfits at all in the ideal system of 100 per cent. successfully.

It is now generally conceded, not only by educational authorities, but by parents and all who may have given any thought to the subject, that in the young men and the young women clustering on life's great adventure, the pursuit of a vocation in which they will not only be happy, but will make the greatest success of life's work is pursued on parallel's most ardent ambitions and, not narrow of life's work in pursued on parallel's most ardent ambitions and, not narrow of life's work is pursued on parallel's most ardent ambitions and, not therefore, that for which he or she is best fitted by temperament, talent and training. It will take drudgery out of work and bring joy into life. Such a consummation is not only of paramount benefit to the young man or woman who is starting out in life, but to the community as well, for the latter will reap the greatest return from the efforts of those who labor, no matter in what sphere or at what stage of progress.

* * *

Co-operative Economics

And how is this desirable end to be brought about? The co-operation of the parents, the teachers and all educational authorities must be sought. The entire school life a chart of the child's progress be kept. This chart with note his assets or otherwise in the way of mental ability and his physical achievements. It will be more, however than a bare statistical record of merits. It will indicate the child's temperament in work and play. It will record his likes and his dislikes and his attitude towards the various activities in which he engages.

If this record is conscientiously kept by an observant teacher by the time games finale is has been reached, it will be possible then to determine the direction in which he should head, first towards further studies in the secondary schools and more remotely, at that stage, towards a choice of life work. Based on the information which the chart reveals, the studies to be taken up in the high school will be selected by the parents and the child in consultation with the vocational guidance officer who must necessarily have wide experience and knowledge not only of this psychology, but also of the business world and must be able to discern between the genuine and the pretentious. There will be nothing compulsory about it, but the information and advice available to the parents and the child should be of inestimable value to all concerned.

* * *

Southern Interlocked

And by the time the high school course is completed he will be endowed commercial or technical. It will be possible to determine with accuracy with the assistance of the charts and of the guidance officer whether the student is best fitted to immediately take his place in commerce or industry or to go on to university, and if the latter, what university should be selected and what courses should be pursued. For at that stage it should be definitely known, if ever, what particular niche in the business life of the country the student is best adapted for his own future success and happiness and in the best interests of society at large.

It has already been stated that such a measure, to be successful, requires the co-operation of the parents. If the best interests of the student and of society are to be considered it will often enough mean self-sacrifice on the part of the parents. Parents who have decided that they want their son to be a doctor or lawyer and over a white collar will be disappointed at when presented with irrefutable evidence that he would be a failure as a man in either of these professions but would make a first class blacksmith or mechanic or an excellent farmer, or vice versa.

It should not be forgotten, however, that the welfare and happiness of the student throughout life must be the first consideration. Parents may be disappointed at having to give up their aspirations for their offspring but the disappointment would be over the loss even if the youth, following the bent of the parents, made a miserable failure of his vocation in life. A good blacksmith or mechanic or farmer is infinitely to be preferred to an indifferent lawyer or a mediocre doctor; and again, vice versa.

Housing Survey

A survey of housing in Canada will be made in connection with the 1941 census, according to plans already prepared by the Dominion Bureau of Statistics and submitted to and approved by the government.

* * *

Where Canada Leads

The rate to prominence of Canada as one of the world's great producers of spring wheat is due in no small measure to the success of the efforts of plant breeders in developing varieties capable of meeting successfully the challenge of nature. Indeed, it is freely admitted that in no country has the work of the scientific breeder of plants contributed more directly and substantially to national prosperity than it has in Canada.—Dr. L. H. Newman, Dominion Cerealist.

Paying For The War

Governor-in-Chief Of Canada Says Canadians Must Be Prepared For Sacrifices

Orsham F. Vincent, governor of the Bank of Canada and Canadian, addressed the Canadian Club in Toronto and stressed the necessity for Canadians to be prepared for sacrifices in order to help win the war.

Addressing the Empire Club, Chairman Colonel Jay Vincent said increased taxation must be borne by all classes of the community. "Don't be misled," he returned to the state in the form of taxation or subscription to war loans," he declared. "A large percentage of the pre-war income would have to be confiscated or lost.

"Canadians must provide Canadian money for the United Kingdom to enable the mother country to buy supplies from Canada and that must have enough to replenish Canadian securities now owned in the United States.

He said that unselling on equipment and munitions would be necessary and whose life has been packed with adventure was going to be one of the fighting scouts in the South Africa War has left London for the North of Scotland. A writer in the London Daily Sketch tells the story of how Colonel Vincent got into the fight. Hitler's war started with a French battalion of his regiment in reserve, which he went on until raid shooting. A keeper of the Bank of England over some rough ground while climbing the side of a hill. It proved to be the entrance of a mine developed in Napoleonic days, but closed since 1815. Colonel Vincent under the hole, and long galleries were in perfect condition. He has since suggested that Colonel Ellerton should have an examination made of the mine to see if the contents of the mine. It proved to be 80 per cent pure calcium carbonate. Engineers have been sent both from Paris and from London and the whole mine is now being worked. A valuable discovery Colonel Ellerton has gone to help in the work.

Presents Real Problem

Universities Students Have To Provide Larger Proportion of Expenses

The "prospect of equality in education opportunity for persons of equal ability the greatest social ideal of democracy becomes more and more real and universities and main students concerned with the interests and cultural advancement of the country grow increasingly apprehensive the Dominion bureau of statistics says in its annual review of Canadian colleges and universities.

Students have been called upon to provide an increased proportion of the money required to meet the cost of education while other sources of revenue provide an grants, interest and endowments have declined relatively, at approximately equal rates, the review which covers the years 1929-30 to 1939-40.

"This is a trend which unfortunately by any examination no room for doubt, available for student aid, limits the main financial means, limits the main financial means, limits the main financial means

A VERSE: — "They helped everyone who needed help, and everyone said to his brother, Be of good courage."—Isa. 41:6.

THE WAR

The past week has proved a very trying one for the Allies in Europe. Generals in the French army have been demoted along with one British General. Bad strategy has placed the fighting forces in perilous positions and has allowed the German forces to pour into northern France. Both Boulogne and Calais on the French coast are in the hands of the enemy.

But the hardest blow the Allies have sustained is all the war was the capitulation of the Belgian King, along with 300,000 troops, to the enemy on Tuesday morning. It was an act of black treachery. Without consultation or warning to those who were aiding him, he quit like a weakling and left his comrades in arms to shoulder the burden of defending his country.

The Government of Belgium, however, have repudiated the action of their King. There are still 600,000 Belgian troops in the field who are loyal to the Government.

It is predicted that in another week or two the tide will turn and this last week of horror will be replaced with news more favourable to all lovers of liberty.

Victory to Tyrant
Said Impossible

Victory in the end will not come to tyranny, declared Prof. O. P. Kretzmann, of Chicago, in a sermon, Sunday, at Grand Centre church. It will cause lessened thought following the Christian way, he said.

Prof. Kretzmann, who is director of young people's work for the Lutheran Churches of the Missouri Synod, spoke to the leaders at Concordia College in Edmonton on Sunday, May 19th.

Prof. Kretzmann went on to say: "There is only one way to rid the world—the heart. Fear. It is the way of Christ.

By fear, faith, hope and love into the human life Christianity can remove fear from the hearts of people.

"What is true of the individual human being is also true of the Church of God in the world. By removing the Spirit of the latest obstacles in the days immediately following Pentecost, the church of God was enabled to face the future unafraid. The final victory does not belong to dictators and tyrants; it belongs to Christ. The whole-souled witness along the paths marked by the hand of God, the destiny of the Church and the individual Christian—real is victory."

Popular feeling jules with the British Legion bodies whose expressed opinions have awakened Canada to the dangers in her midst. There is no doubt that before any possible danger could arrive at Canada, the nation will be prepared to deal with Trojan horsemen, if say are still at large. The most indignant citizen expressed himself this week, "if Canada is attacked, the proper place for the fifth column is the obituary column."

Recruiting in Canada has taken accelerated activity during the past week. Thousands are joining up. There are many who think that the U.S. will soon join the enemies of freedom.

A CHALLENGE TO DEMOCRATIC [illegible]

Canadians today are being asked to buy War Savings Certificates. We feel done this month it means this: That our answer is the measure of our real devotion to democracy. To freedom.

We have been told that democracy is decadent. That our ideals of freedom are meaningless. That our way of life cannot compel the devotion that goes to the totalitarian creed.

War Savings Certificates can answer that assertion, or dis. In England Mr. Churchill exclaims: "I offer you blood, tears, toil and sweat." And he adds: For all that Britain means, I appeal to you . . . We must earn our salvation from the black night of barbarism."

In coming weeks, the people of this country have the chance of showing whether their thought of freedom is meaning, cheap and worthless, or of the reaching of this terrible conflict, is as deep and real as that of the people of Britain and France.

The real challenge of War Savings Certificates is the challenged of whether the fibre of democracy is as strong as the fibre of dictatorship. The challenge of whether the discipline of the task is as powerful as the discipline of freedom.

Let Canadians by buying these War Savings Certificates, by answering with all and the best of their means the great cry for help that goes up, show how strong is the discipline of freedom. Let them determine that it will be remembered in years to come that Canada did not rest its anger at brutality and injustice ado-y in words and gestures, but that it turned at least a part of it into sacrifice for freedom in freedom's hour of dire need.

WHAT EDITORS ARE SAYING

Today's simile: As worthless as a Hitler promise.—Calgary Herald.

There is much to commend in the suggestion that Canada should subscribe $,000,000 because of her wheat to Great Britain and France to help them to feed their refugees from conquered countries.—Calgary Herald.

There are three ways in which to express our self-denial during the War period. The Canadian is one. Taxes will no doubt be high enough to take away from the people the proceeds of the extra production for war. We should submit to taxation of that kind without grumbling. Because this extra purchasing power is for the war and should be paid back into our pockets by the redemption of war loans. We have already advocated that method to the first of war loan. We are sure to have similar appeals in the near future. For those people who have small incomes there will be offered War Savings and everybody can help Canada's war effort by getting into a position to buy certain small bonds. A individual self-denial should have the purpose of meeting our obligations in paying taxes, our loans, etc. If in the meantime we can so most follow those objectives the revenue will be our demand for luxuries.—Stettler Independent.

Frank Edge

There is a run on frank eggs just now. From Wetaskiwin comes the report of the case of the flock of A. J. Hix laid a record day, producing 94 hens averaged the largest circumference and 71 in. around the smaller.

Recently a triple yoked egg was laid by one of the hens, while another presented a fresh egg within an egg. This was a normal egg which when cracked was found to contain another egg inside complete with shell. —Market Examiner.

WAR SAVINGS CERTIFICATES
A direct obligation of the Dominion of Canada

"From the moment day of last September, hundreds of thousands of Canadians have been asking: 'What can I do to help win the war?'

"The answer is, 'By saving!' Every man, woman and child in the Dominion can make a direct and effective contribution to Canada's war effort by saving and lending. Ottawa, Canada, 1940. Canada can conquer by her Savings Certificates."

[signature] MINISTER OF FINANCE.

WAR SAVINGS CERTIFICATES are repayable in two and one-half years. If you hold them to maturity, the coupons will be your money — your investment will be for three years. They are sold as follows:

For $ 25 certificate you pay $ 20
For $ 50 certificate you pay $ 40
For $ 100 certificate you pay $ 80
For $ 500 certificate you pay $ 400
For $ 1,000 certificate you pay $ 800

TO BUY ANY AMOUNT: You can take advantage of the Savings Certificates plan, whether your income is large or small, by purchasing in multiples of $25. Thus you may buy $25 worth of Savings Certificates, or $50 worth, or $75 worth, and so on. Any amount may be applied to the purchase of Savings Certificates, up to one thousand dollars in any one calendar year. Buy as many as you can afford.

CHILDREN TOO: Even children can purchase War Savings Certificates, using their earnings, gifts and allowances. Parents can help their children to buy War Savings and buy one in Children.

SHOULD THE SAVINGS WANT: Every holder of War Savings Certificates can turn his Certificates back to the bank at any calendar year by June 1st and receive the full amount he paid for them, plus interest at the rate of 2% per annum. Your money is not tied up in any way. Your money is not lending — and your Country needs your money.

REGISTERED CERTIFICATES: Each War Savings Certificate is registered in your name — and is safe if lost or stolen.

DESCRIPTION: War Savings Certificates cannot be sold, transferred or hypothecated by the purchaser to any other person. The owner, however, may at any time redeem them for cash at the purchase price, plus interest to the date of redemption. In urgent cases, refunds will be made.

[illegible] by SAVING

Get your War Savings Certificates at your bank. Your bank will help you to buy your certificates on the instalment plan. Ask your bank manager for complete information and application forms at

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Mr. Batchelor is having a well drilled on his farm east of Alix.

H. W. Jones left for Calgary on Tuesday.

Mr. O. F. Tempe and George were in Edmonton on Tuesday.

Mr. and Mrs. Roy Johnson spent the week-end in Wetaskiwin.

Roland Sayers, of Arrowood spent the past week visiting friends in Alix.

Mr. Widmer Dumbleton, of Calgary, was an Alix visitor over the week-end.

Mr. Clark, of Tees, trucked the bars adjoining the Rodeo Hotel to Tees on Monday.

We understand Floyd Page has purchased a new Chevrolet coach. Mr. Batchelor is also operating a new sedan.

Miss Ruby Reese is attending the Junior Conference as delegate from the local Junior U.F.A.

Miss Margaret Semple went to Edmonton this week to attend the Farm Young People's Conference being held at the University.

The war situation has quickened the hearts of several volunteers this week. Our lads Gordon, Ray and Ret Wilson, Don McKinnon, Roy Pearn and Cliff Bronhart came forward this week, offering their services to the empire. Bert Hodgo has already been accepted and goes.

FOR SALE — Mitch cows, and horses, 2 years with fetus, 325 rods hog wire, plain, staves, tables, chairs, washers, dishes, trunks, shoes, ice cream freezer—Mrs. St. ney Roper, Ripley S.D. 1p.

FOR SALE—125 rods, 42-inch field fencing for horses, sheep or cattle—L. V. Worke, Tees, Alberta.

All but Don have been accepted, he being turned down because of an in ward sore.

Posters will be out this week for the Red Cross Dominion Day celebration in Alix. All roads lead to Alix on July 1st. The proceeds go to the Red Cross so humanitarian organization that needs a fitness to support it in war time.

MIRROR NEWS

On Wednesday evening, May 29th, the parents of Miss Helen Wilson of Bend held a picnic rushed at the home of Mrs. F. Southern. Those present were: Vera Southern, Phyllis Kellett, Chris Perry, Francis Southern, Margaret Bold, George Bold, Lawrence Cavanaugh and Margaret Southern. Chris Perry, on behalf of Miss Wilson's pupils presented her with a gift.

Mr. J. Peel and W. Hamilton left recently for Ontario, Sask. and Port Arthur, Ont.

On Sunday, June 2, Frank Wolcott and Leslie Southern motored to Calgary where they will join a convoy under the Youth Training program.

Mr. and Mrs. J. Clarke and Harold Cavanaugh motored to Edmonton, Mon., where they will remain for a few weeks.

The Oddfellow's dance on Thursday, May 30, was very well attended in spite of rainy conditions. Part of the proceeds of the dance were donated to the Red Cross.

Mr. and Mrs. M. Crook and Miss E. B. White motored to Red Deer Saturday where they spent the day.

Mr. and Mrs. F. Southern spent Friday and Saturday of last week in Edmonton.

Chas Smith are better than fall since in the night of Gold Bench.

On Thursday, June 13th, Sonny Fry and his Lumbermen of Music will play in the Legion Hall. This will be their only appearance in Alix this summer.

The Alix U. F. W. A. are having another clinic in the U.S.A. Hall on Saturday, June 22. All mothers with children under six years of age are welcome.

Alix main street appeared deserted Wednesday afternoon as the merchants took advantage of the first summer half holiday and went fishing.

LOST—Leather Jacket—Somewhere in Alix—Finder please return to Carl E. Blair, Alix. Pacific Elevator.

We have been requested to announce that book lovers will be allowed on Saturday afternoons from now to the end of August.

The many friends of Mr. Jack Pearn will be glad to know that in the recent prize-award test for cream graders held at Red Deer in which some 150 cream graders competed, Jack topped the list.

Weather conditions during the past two weeks have been ideal for seeding to most districts of Alberta. Spring work has advanced to such an extent that about 97 per cent of he wheat is now in the ground. Crops are from 10 to 20 per cent needed, the average for the province being about 75 per cent. Hot weather and high winds have removed surface moisture very rapidly, and rain would be welcome, especially in the south and central in the eastern border of the province, particularly in the St. Paul-Bonnyville district where the situation is described as serious.

HAYNES

BORN—To Mr. and Mrs. Albert Brodo on May 22nd, in the Red Deer hospital, a son.

A very pleasant evening was spent in the Community Hall on Friday, May 31, when a shower was held for Mr. and Mrs. Thomas Knight, of Alix. Due to muddy roads, the turnout was not as large as it otherwise would have been. However, number of very useful and fitting gifts were received by the bride who thanked all those present for their kindness and good wishes. A social time was held after the "shower."

The Week in Edmonton

(Edmonton Journal)

Alberta stands at the threshold of the greatest tourist year in her history. Hotels, towns, motorists and hide resorts preparations are now almost complete for the welcoming, service and pleasuring of a huge influx of cash customers. Expected are ten to twenty thousand tourists, planes and shells are to be in the fighting zone overhead.

As is well known, Canada and the Mother Country are doing extensive trade and carry on business with the United States. The search for the cash has increased largely in the tourist realm. Last year American tourists left about $20,000,000 in Canada. This year it is hoped to induce them to leave $100,000,000. In normal years, Americans spend half a billion dollars on holidays abroad. This year Canada, Alberta—Banff—our vast New Eastern traffic let us prepared. Should Americans leave in Canada this year the usual expenditure abroad, they will have assisted Canada's welfare by half a billion dollars in their production of gold.

Appointment of R. J. Gaunt, K.C., who is solicitor for the Trade and Industry department as consultant officer in the case of the Alberta Natural Resources members self school board's, is a welcome one. The appointment of such an officer some weeks ago when a deadlock was reached in negotiations. They took advantage of the deadlock.

Back from Ottawa where he conferred with federal officials on export prices, Deputy Minister of Trade and Industry W.D. King has submitted it's report to Hon. E. C. Manning. The federal board's recent order advancing sugar 35 cents a hundred pounds on the recommendation of Mr. King has been the subject of criticism. Alberta users object strongly from number of leading city sugar was quoted.

Our Specials for One Week

WE HAD SUCH A GOOD RESPONSE TO OUR SPECIALS LAST WEEK, WE HAVE DECIDED TO CONTINUE LAST WEEK'S SPECIALS ALONG WITH THE FOLLOWING :

TEES TOPICS

Miss Lillian Gobeny returned last Wednesday from her trip to Montreal.

Don't forget the Saturday night dance to be held in Tees June 8th. It will be the last of the season.

Mr. and Mrs. L. S. Gallace and Allan will leave on Tuesday for Leduc, where Mr. Gallace has secured employment.

Mr. Roy Laverne is a patient in the Lacombe Hospital, where he recently underwent an operation.

Mr. Archie Cameron, of High Bluff, was a guest on the house of D. S. Hamilton on Sunday.

NOTICE

Persons wishing to locate their crops entered last year, kindly notify the undersigned before applying.

RALPH GOBENY,
Crop Inspector.

A CASUALTY

Followers of the races in the West, especially in our immediate district, will read with deep regret the unfortunate result in the second race on the opening day of the Winnipeg meet, when Tommy Bridge, a promising 4 year old, belonging to Capt. F. Nelson, suffered a broken back and died on the track. Two other entries from the Nelson stable, Spotted Lad and Hill Topper, finished 2nd and 3rd respectively.

Opportunities In Trees

Considered solely from the economic viewpoint it is satisfactory to note that the federal government has evidently decided that the annual summer expenditure of the forestry secretariat's tree planting trees are not to be sacrificed to the exigencies of war.

By the time this appears at least the trees will already be permeculously sprouting through these portions of the prairie provinces where these trees are to be given a second itinerary and from the east coasts of prairie bob are burning ready and visually the numerous value of a tree in the economic and esthetic life of the country.

Contrary to what might have been expected, the past decade of drought and depression has given a marked impetus to the work of tree planting on the open prairies and the necessity of conserving of trees in the forested portions of the west has been brought home to thousands of western residents as a result of the continued menace of the forestry association's train.

During the last two years period of trial and tribulation, farmers and others have learned by bitter experience that the absence of trees has spelled soil erosion and that soil erosion, plus drought has become a terrifying menace to the most temporary destruction to large tracts of arable areas in the southern portions of the prairie provinces. In the park belted and treed areas of the northern parts of these provinces people have been mostly aware of what has been happening in the southern districts and have understandingly become impressed with the necessity of conserving their protective shrubs and trees.

It is not surprising therefore, to find that during the depression, interest in tree planting and conservation of forests has progressed materially and that this augmented interest has found expression in record attendances at the institutes brought to their doors by the tree planting train and by the increased demands on the facilities of the Dominion forestry farms for trees and shrubs.

Wilder Weeds Offered

A further stimulus to the growing interest in tree planting and shelterbelt conservation has been given during the past three months by the activities of the Prairie Farm Rehabilitation organizations who are presently engaged in the distribution and cultivation of trees as one of the activities essential to the wholesome, sane use of all available moisture.

Instead of the war acting as a deterrent upon this important and highly necessary undertaking it should serve as a spur to the people to the additional impetus to programs of tree planting and forest conservation on the part of the individual, the community and the government of the province at large, for it would appear that trees may be destined to play an even more important role in our economy than heretofore, as a result of the conflagration in Europe.

One of the immediate effects of the war in prospect is a very substantial increase in export trade from the United States to the British Isles. It is taken for granted that these prospective visitors will not only look for good roads and courtesy but they will search for attractive scenery and that means, in addition, to fields of golden grain and cool, fascinating forests, a variety of trees. If they do not find this greatest of assets to a holiday-maker they may be expected to move on to some other country or province in which has something more tempting to offer them and which will reap the benefit of the money they have to spend.

It appears also as if the war may open a new vista of wealth to be derived from the forests of this country. Even before Norway had been invaded by Hitler's troops Rudard D. Craig, chief economist of the Canadian forest service at Ottawa announced at the annual convention of the Canadian Society of Forestry Engineers that new methods will be opened to Canadian trade because the Baltic countries and eastern Europe have for producers have been practically shut off from world trade routes.

The United Kingdom," said Mr Craig, "will be dependent largely upon Canada for her entire wood requirements particularly for military uses, and the United States, a heavy importer of wood pulp from the Baltic and from Sweden will possibly turn to Canada for a greatly increased supply of that forest product."

* * *

A Permanent Crop

So that is more than one direction the war is opening up opportunities to augment existing industries and to create new ones in which to put our resources and from may play an important role if advantage is taken, of these opportunities, but to make the most of the situation it is necessary that more trees be planted on the open prairies in the south and in the north the forest resources must be carefully managed so that the industry may continue to be profitable for all time.

As Arthur A. Schmon, president of the Canadian Forestry Association, said at the convention already referred to: "Forest resources must be recognized by every Canadian household as a national asset and by the whole wealth of our commerce well being. We want them accepted as the one permanent crop to be kept growing on nearly a third of our habitable area."

Bishop In Great Demand

Needed in Large Quantities For Bandages During Wartime

The commodity whose price is perhaps most affected of all during wartime is not copper, nor steel, but delicate bishop. Bishop is needed in enormous quantities for sandbags, and its price since last September has varied from six cents to 11 cents per yard. Mr. Bishop would be glad to find it, and can even guarantee a world's market is increasing the use of knitting and sewing and paper for the manufacturing.

As an aid in overlapping metal plate usage of Admiralty's vast new steel, photographers drop segments of ammunition's black powder the more.

The Magnetic Mine

How British Were Able To Beat With This Menace To Shipping

By a Naval Correspondent

Magnetic mines are laid on the sea bottom, and are only effective if ships passing over them are inside the danger zone of the explosion. They are known to depths of 300 feet or more, and are thus complementary to the ordinary moored mines floating beneath the surface and designed to fire on a ship striking them. The development of the firing of magnetic mines forced Britain to provide special methods of clearance, and the first step was the survey sweeping of moored mines.

As regards the antidote used has recently been heard of degaussing hulls fitted to shape of all types from trawlers to battleships. By the use of coils or neutralizing their magnetism and so rendering them immune from magnetic mines. Dr Gimm, one believes was a Scandinavian professor who died in the early part of this century but gave his name to the law of magnetic force just as the names of Ohm and Ampere are now used in the technical language of electricity.

The degaussing belt or girdle, as it is sometimes called, consists of a number of strands of ordinary insulated cable encircling the ship at the level of the upper deck and energized in a certain way by electrical current. It neutralizes the permanent magnetism of the vessel, so that she will be able to pass over magnetic mine without detonating the vessel and firing the charge.

Twice successively against almost, magnetic or otherwise, any never be successfully countered, but the ships which the new gear has yet been damaged, while no other ships counter for the development engineers' ingenuity in being prepared to take a degaussing gear against magnetic submarines.

It is also stated that the apparatus which was suggested by the officers of one of His Majesty's Naval Establishments with the view advice and assistance of civilian scientists, and developed in less than three months from the time the need for it became apparent.

Supplies Cut Off

Cheltenham Are Scarce In England On Account Of War

It is a fact that the British housewife, She wants to hang out the washing on the home front this summer, but cannot get the pegs. Cheltenham are scarce in England on account of cheapness.

Apart from the few made by gipsies they never were manufactured in England on a large scale before the war, and practically the entire supply annually mainly from Germany.

All of the pin question and pinning family mainly under rationing scheme, which means that the pegs at hand almost makers of necessities experiencing difficulty in getting raw materials. Even Tray-makers at Leven face this difficulty due to the use of wire in making mine-sweeping apparatus.

Photographers have been at reserve in many districts that women introduced "staggered" washing days and others were told to "go slow" to avoid the difficulty a firm of spring manufacturers plans turning out 20,000 clothes peg pegs a week. Due to labor costs, they may have to be sold at least sixpence (12½) a dozen compared with the old price of 13 wooden pegs for a penny.

Made Slight Mistake

Auctioneer Got His Addresses Mixed And Sold Wrong House

While Mr. and Mrs. Norman Goodyear, of Quincy Mass. were away from home on a brief vacation, an auctioneer, hired by Building and Loan Corporation, put up a red flag on a vacant house which he had been told their home and two-car garage by the highest bidder.

The auctioneer here sound their home for 36 years. The auctioneer had made a mistake in the street and should have auctioned the house next door.

Wireless Set Sold

According To Old Legend

The origin of tea is credited to a legendary Buddhist named Bodhidharma, who, in the midst of a sinful year passion to sleep many sinful to drowse. To punish himself he tore off his eyelids and threw them on the ground. From them sprouted the tea plant, and by eating the leaves of it he managed to keep awake for the duration of the penance.

Matches first were sold under the name of "Lucifers."

Gold, when ground to a fine powder, is dark red, or black.

New Wireless School

Established Under Air Training Plan At University Of Manitoba

Establishment of a wireless school at the British commonwealth air training plan in buildings of the University of Manitoba and training was announced by Hon C. G. Power acting minister of national defence.

Mr Power expressed appreciation of the patriotic attitude of the president of the university Sidney F. Smith in the matter of the use of the buildings by the government. Mr Justice Dysart, also other members of the board of governors, handling of the buildings for the purpose, it is said.

The wireless school will be the first wireless school established under the air training plan, although there are now in the air wireless schools in operation. The air wireless schools are operated under the auspices of the Manitoba government air service.

Another school now in operation will be established at Regina. The establishment will be about October 1st, and will be the training of air wireless mechanics. Aspirants will be trained in the Manitoba government air service. Those who have completed their course will be eligible for commissions in the air force.

The Winnipeg school is capable of accommodation to the training of 200 operators.

The air force students at the university which now accommodates 350 students and staff members and the addition of nearly 1,000 people will form the problem of feeding and drying in a large way. The need for instructional purposes and additional buildings for these purposes will be erected on adjacent property.

Will Survey Housing

Central Mortgage Corporation To Undertake General Housing & Conditions Quite

A survey of housing in Canada will be made in connection with the 1941 census according to Hon. James Ilsley, minister of trade and commerce. Mr. Ilsley announced in the house of commons that the census would include a general housing survey in addition to the regular census of population.

The minister said the census would be taken in connection with the type of heating system. This will inquire whether houses have central heating, and whether they have what kind of fuel is used. Questions will also be asked as to the number of rooms in the house the type of construction and the rental paid.

Only the other day the Ontario Association of Real Estate Boards convention in London approved a resolution asking the Federal Government to obtain information on property and housing conditions during the 1941 census.

Most Perfect In World

Whispering Gallery In Italy Is Named Like Stanton Bee

The Ear of Dionysius is one of the most curious and perfect whispering galleries in the world. It is named for the ear of Dionysius, Italy. Formed more than 5,000 years ago when Greek slaves accidentally quarried out rock from a limestone cliff in the form of a human ear the gallery is 66 feet high and extends back into a cliff for 200 feet. Its acoustics are perfect that the sound of a paper being torn is carried back perfectly to the ear. It is named by tradition for a tyrant Dionysius who used it for a prison and had a small room built at the top where he could eavesdrop and listen to what his prisoners were whispering about.

At a speed of 62 miles an hour, a motorcycle can travel about 25 feet out of its course in overcoming air resistance.

New Airplane Device

Secretary Engineer Evolves System For Reducing Landing Speed

Announcement of a startling, radical aeronautical research engineer for the Indian government, Pharcus F. Hantz conferred with officials of the British commonwealth air training plan in regard to a device to decrease the landing speed of the aircraft.

The 32-year-old Hantzsay engineer described his device as a cut slot and flap in the trailing edge of an airplane wing. The Pantzsay would be to act as an air brake when lowered into position for a landing. Similarly the flap would give increased lifting power for aircraft taking off from confined areas.

The Indian governmentsays the secret development and patent could of the device

It is possible for an airplane to make a safe landing with only one propeller.

CHAPTER III Continued

Through the Window

"You mustn't go, you'll be killed! she gasped, and he laughed at her, not at danger.

"I've got a pretty high regard for me," he said, and in another minute he had swung clear and gripped the sill with his left hand. He was a good and had pulled himself into the room.

He could see nothing except the rim outlines of three trunks standing one on top of the other. He felt around on the light and turned to survey the contents. Old initials on the trunks which, he guessed, had been piled in some order, were dragged in. The centre of the room was the free operation of the vanished burglar. Reckoned into the wall was clear, was a safe, the door of which was open. On the floor beneath was a small circle of metal burned from the door it was still hot when he touched it by the small hydrogen blow-lamp that the burglar had left behind him.

He inherited the door of the room and admitted Elk and the girl.

Released on Watership

"That's good work," said Elk, when he had conducted examination for the person of his brother was at least dubious. "Only a burglar! Not as much as a cigarette card left behind. Good work! Tony Haggis! or Lew Tebbutt—they're the only two men in London that could have done it."

The girl was gasping with relief at the "good work." She was very pale, she noticed, and shivered the room.

"What was the date?" she asked, suddenly.

"I don't know—I didn't even know that there was a safe in the room. It's still be written about this!"

Carlton knew the "he" was the absent Ingle.

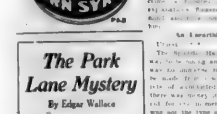
"He would know for some time, anyway," he began, but she fought it upon his reassurance.

"Dear work," she said, "is he released on Wednesday?"

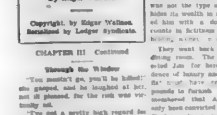
His scratched chin shook thoughtfully.

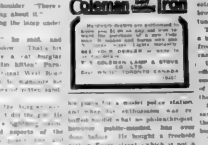
"Somebody knew that," he said, "he hadn't a partner either."

After Ingle was indeed a very tangled affair. He had been released even by such friends as he had, after a long days—for they had answered a period of twelve years before his arrest and conviction—and he had gone straight.



Never people can safely drink tea and coffee. But many others—and all children—should avoid them. If you are one of these, use Postum. Let the fine Postum and drink it instead of tea and coffee for one month. Then, if you do not feel better, return the container top to General Foods, Limited, Cobourg, Ontario, and we'll gladly refund full purchase price, plus postage. Postum is rich-brown, economical, easy to prepare, and contains no caffeine





A Story From London

Clements Lends Old Lady And Her Money Saves Him Nothing A Wise

With a strong-lined brown-paper parcel balanced on his knees a little old English lady propelled her wheel chair through Kensington streets.

Few people gave a second thought to the frail figure or to her parcel. Her hair had been more interested had they known that the brown paper covered a small fortune.

The little old lady stopped outside a small, clinker shelly and gazed at it from her chair and nobbled to the banker's counter.

"I will open a savings account," she said. "This is my pension day and I am a particularly meagre one moment. As she began the voyage home her cup of tea and her bun began to feel very heavy.

She sat for a long time, and then left her money there and then she had the credit of a fattening entire pound. Then she left the bank and began her journey home.

Fate, however, had other plans for her. Her journey was not the type of terminal which would have produced the effect of a fattening entire pound. Evidence in a number of others, which must have produced the effect of a fattening entire pound. Evidence in a number of others, which must have produced the effect of a fattening entire pound. Evidence in a number of others, which must have produced the effect of a fattening entire pound.

Her journey home was augmented, however, by a fattening entire pound. Evidence in a number of others, which must have produced the effect of a fattening entire pound.

Remarkable Escape

British Submarine Returns To Home Base After Striking A Mine

The naval correspondent of the Daily Herald revealed that Lieut Commander John W McCoy brought home the submarine Triumph, sister ship of the Trident and the Triton, in a nightmare cruise after 14½ feet of her bow had been blown off by a mine.

Lieut Commander McCoy has been awarded the Distinguished Service Order. The outstanding initiative, courage and resource shown by him struck his ship

The naval correspondent wrote:

"Under the repeated guns of their officer the sailors here parent and apparent courage to counter a handle of water many of them as old that they scrambled as they fell.

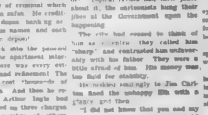
Also had they regenerated her life saving card that the wheels to put them in a safer place than the cramped quarters which she had kept them.

The gunnery officer explained that the watertight doors between the forward torpedo tubes were shut

"There was only one casualty. A seaman was striking a leg of wood when the explosion came. The knife slipped He cut his finger

HOME SERVICE

YOUR WEDDING CAN BE BEAUTIFUL AND COMBAT



Be Posted on Bows, Etiquette

The amusement of weddings has you and your betrothed! But first, so many rules to be satisfied—and plans, etiquette

Don't dress should not the style of your wedding formal or informal, as well as the hour.

At a traditional formal day-time wedding, the bride wears white satin in trailing white gown and veil. Her attendants wear light colors that the buildings have been decorated in keeping with the theme. After the authorities start packing away all this equipment about the time the bride and groom leave for honeymoon voyage.

Naturally you'll have a different display to look at than in past years.

Some countries will be out of the picture for the duration, among them South America and the Central American republics will be unable to show if something entirely new in their displays to an endeavour to increase their trade.

If rumours are true, you'll not have any more opportunities after this year, to see the Dionne Quintuplets—the five perfect children of Oliver Dionne and his wife, of course, you'll have to go up there for the visit, but you'll find everything ready and there's no admission charge.

Money is more valuable in Canada than for a long time past.

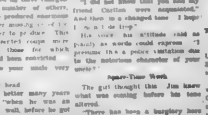
Write for free booklet Canadian or British—and make every dollar of your money help your own people and your own country.

Invasion Of Canada

Might Be Possible If Russia Entered War

Dr G. A. MacDonald of Kisan Thelad observer in Canada, in an interview at Toronto that invasion of Canada by the Mackenzie river basin might be a very definite possibility if Soviet Russia became involved in the war.

"The Mackenzie river itself might prove a very dangerous path for the invader," he said. "Its valley is the only practical one for the Arctic ocean, provided the northland pilots with an easily followed trail through the Northwest Territories to the northern banks of Saskatchewan and Alberta.



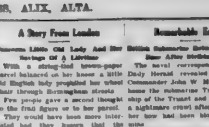
Outlook Is Improved

Few Areas Where Grasshoppers Will Do Serious Title Year

The only area where severe infestation of grasshoppers is expected is Saskatchewan this year is in the southwest corner, north of the U.S. line, Hills. E M King, Dominion entomologist, indicated this is a relatively favorable outlook. The latest year includes part of Alberta and Manitoba.

Eggs were laid in this area after a large migration of grasshoppers from unusual lands in Montana during last summer, Mr. King reported. Over most of the border states, however, the hoppers were kept fairly well under control.

Anti-fan insects, in the boreal stage, count themselves in with



Scene Of Feudal Battles

Home Rings Fought Where Allies And Nazis Now Meet

British and German troops, in close contact for Norway and fighting over ground rich in the centuries-old lore of ancient Norse kings and their feudal battles.

Stiklestad, 12 miles north of Steinkjer is the scene of the monument recalling the battle of July 29, 1030, in which Olaf II Haraldsson met his death.

Olaf called "the Fat" in his lifetime but known as St Olaf afterwards was the son of Olaf I Tryggvason who was a slave in Estonia but who achieved Christianity upon Norway and fought to unite the country under his rule.

The Norwegian worship Olaf Tryggvason, which opposed the Christian newly attack on Olaf, was banned for him.

After four years of fighting the Danes in England returned to Norway in 1016 and defeating Earl Sweyn, soon had power there as any of his predecessors.

He ruled effectually through-out the kingdom, asserted his rule over the Orkney islands, humbled Sweden, laid Christianity firmly, but his zealous revivist and joined with the invading Knut from Denmark. It was in this war that he fell at Stiklestad

After his death miracles were reported from his tomb and he was canonized in 1164 and declared the patron saint of Norway The Norwegian Order of Knighthood of St. Olaf was founded to bear honor in 1367 His name came to stand for Norwegian unity and independence.

GERM OF THOUGHT

SUCCESS

Success in life - a matter not so much of talent or opportunity as of perseverance and perseverance - Wendle.

If you wish success in life, make perseverance your bosom friend. Experience your wise counsellor, caution your elder brother, and hope your guardian genius.—Addison.

Success in life depends upon persistent effort. Every unimproved minute of moments more than upon any other one thing.—Mary Baker Eddy.

We can do anything we want to do if we stick to it long enough.—Helen Keller.

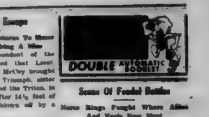
Character is the real foundation of all worthwhile success.—John Hays Hammond.

Everybody feels out, sooner or later, that all success worth having is the result of continuous effort and conduct.—Henry Martyn Field.

Canned Bread Publicity

An Entrepreneur Thrives In Hudson And Die In The Light

All distinctions are born in the dark. They survive for a time in the shadows They inevitably die in the light. The one thing tyranny cannot stand is publicity It must gag the press, stop free discussion, muzzle the pulpit, control the radio, control the movies, propagandize the schools with half-truths—which is the shadiest way of tying there in. The real bulwarks of democracy is not the written law but a public opinion.—Rabbi Stephen Wise.



What Do You Drink?

Of course, we mean as a meal time beverage for the family

Your grocer has many customers who prefer tea or serve drink tea and coffee for these he has the famous Postum. Postum is a delicious drink and is the beverage for people who suffer from nervousness, indigestion or drowsiness caused by caffeine.

In these new advertising Postum has changed its package. It is now a character called Mr Caffein-Nerves. Impressed by the methods by which he let their children take strong brews is Postum. Wheatie beverage the children can drink "as tired of milk" each like but they get a well balanced and delicious drink when using Postum—especially when used with evaporated milk and brown sugar for sweetening—at least that is the way I like it and I see take it at any time without harm.

This new grocer will see that his stock of Postum is kept up and that his customers get the Postum they want.

Shopping how to accept and read before is suggested in Dying, others also handsome at Canada Dry

Gems of Wisdom

Th y compare who think they can—Virgil.

Men condemn because they do not understand.—Cicero.

It is a kingly act to help the fallen.—Ovid.

Economy is a great revenue.—Cicero.

VEGETABLES FOR FAIR EXHIBITS

Vegetables are exhibited at fairs in many different ways. There are some points, which, if observed, that should always be remembered in preparing an exhibit.

1. Get a copy of the prize list and study the requirements of the section in which you intend to exhibit.

2. Uniformity is essential. The various specimens in the collection should be similar in size, color, shape, maturity and quality.

3. Select clean, vigorous specimens. The large ones are often the rough, coarse and unsightly.

4. Color is important. A clean bright color is attractive and is the accepted one and quality is judged by color. Vegetables that considered correct for the variety and be such that there is little trouble as possible.

5. Maturity is important, except in those vegetables that are considered "green" when over mature. Maturity should be uniformly mature.

7. Quality is the most important factor about vegetables and should be studied for each separate vegetable.

All root vegetables should be free from dirt and clods. Over preparation is undesirable as it tends to injure the skin. Tops should be removed and not long, cut, should be trimmed. In collections of vegetables, giving the name and variety is important as the educational value of the exhibit.

The World of Wheat

By H.G.L. Strange, Director "The Crop Testing Plan

The season for commercial sowing is here. Because the most important factor which limits the yield of all crops is moisture, commercial sowing is usually delayed in order to conserve extra moisture in the soil for next year's crop.

Now the records show that the best rules fall during the month of June and often early in June. It is important, therefore, that commercial sowing should be done as early as possible in June, for the simple reason that much of the rain which falls on a field before it is commercialized is lost by evaporation into the hot air when the soil is turned up during the operation of ploughing or cultivating.

Keeping in mind the importance of conserving moisture in the soil, it is obvious that the less summer fallow is disturbed after the first ploughing or cultivating, the more moisture is likely to be conserved, and so the higher the crop yield will be the next year.

Naturally, of course, sufficient cultivation must be done during the season to keep down any heavy growth of weeds, for tall weeks will seriously steal a great deal if not all the moisture that the summerfallow has conserved.

CANADIAN RED CROSS SOCIETY ALBERTA DIVISION

You will be glad to know that we have shipped 323 cases containing 96,630 articles of War Supplies and 3,676 articles for Polish and Finnish Relief; together with 75,824 Surgical Dressings for Sterilization, to Montreal and Toronto respectively, to be forwarded Overseas.

FARM AND HOME WEEK—June 25th to 29th.

The program for Farm and Home Week is well under way. Each day will be full of interesting lectures and demonstrations. The morning sessions of Tuesday, Wednesday and Thursday will be of particular interest as these periods will feature practical demonstrations in Farm Engineering problems. Several farm implements will be used to conduct draw bar tests and the adjustment, setting and hitching of them will be demonstrated. On Thursday morning Farm Water and Sewage Disposal Systems will be discussed.

Calamity is virtue's opportunity.—Seneca.

BOYS' AND GIRLS' FAIR PRIZE LIST

The following is the Prize List for the 1929 Alix Fair for boys' and girls' work (Open Sections Monday to Lit. Saturday). This prize list has been drawn to accommodate both school work, and it is the desire of the directors to change to some extent the prize list each year, in order to encourage pupils to take an interest in this prize list and 1929 Alix Fair.

MIRROR NEWS

On Thursday evening, June 4, the Mirror Scouts held a telephone bridge of 24 tables. Prizes were won by Mrs. Hembling, Mrs. F. Bowman, Rev. S. West and Mrs. A. MacMillan.

Mr. H. Terry of Carstairs has been visiting Mr. J. Hayter this past week.

Leslie Sanderson has enlisted in the Air Force and passed his medical exam in company A. He expects to be called within two months.

On Tuesday night, June 4, the Anglican W.A. held a military whist party at the home of Mrs. F. Bowman. First prizes were won by Mrs. J. Hayter, Mrs. C. Pannell, Miss M. MacDonald and Mr. T. Mundell. Consolation prize was by Mrs. R. Caplan, Mrs. S. Chatterton, Miss M. Dawson and R. Holden.

At a general meeting of the Red Cross on Monday evening, June 12, in the W. A. building, the following: Mrs. M. MacDonald, Mrs. M. Jacques, Mrs. R. Caplan, Mrs. C. Daniels, Mrs. R. Chatterton, were elected to act as canvassers for refugee work. It was decided at this meeting that all the branch of the Red Cross would have an elephant to raise $150 a month or $1800 in 1 1/2 months.

Several Mirror veterans motored to Stettler on Thursday evening, June 8, to attend a district Alberta meeting of veterans.

On Tuesday, June 6, Mr. and Mrs. J. Hayter and H. Terry of Carstairs motored to Bentley where they spent the day.

On Sunday, June 9, several carloads of people motored to Pine Lake where they spent the day fishing.

The recruit are disappointed with his uniform. It seemed to fit somewhere.

He was still trying to make the buttons of his tunic meet when he passed the colonel on the parade ground. And to his consternation he forgot to salute.

"You pressed together," said the colonel. Don't you know you're wearing the King's uniform?"

"Oh, there's lots of the cloth. It hasn't wasn't shrunk."

For Greater Practicability

The present day trend towards broadening the basis of the curricula for high schools and of making provision for educational and vocational guidance for the benefit of high school students and their parents in the western provinces is comparatively new, but it appears to be a move in the right direction.

As the Deputy Minister of Education for Saskatchewan recently said at a public meeting the high school curricula at the present time is based on a preparation for entrance into university, but as he also said with truth, only about ten per cent of students who take a high school course eventually reach the universities. In other words, the courses of study in the high schools are based to the needs of ten per cent of the students, while the other 90 per cent. are largely working with little or no definite objective in view.

It does not necessarily follow of course that the 90 per cent who will not enter university derive no benefit from the training they receive in the secondary schools though which they pass but if they can obtain, as Dr. Seaton points out, the time they spend in school might be used to better advantage if the subjects made available for study are those which will be of practical benefit to them when they subsequently embark on the serious business of making a livelihood for themselves.

Preparing the child for his or her entry in the commercial and industrial life of the community is not of course the sole objective of secondary education but it is an important one which must not be overlooked. If the educational system is to serve its full measure. The other important objective of secondary education is, or should be cultural. Equally important is it that the student's activities in high school be designed to enable him or her to secure the maximum of happiness and enjoyment in post-school life, whether it be at work or at play. In other words, preparation for happiness as well as for work should be one of the aims of secondary education.

* * * *

Wider Range Needed

Mister Seaton also considers that phase of the function of secondary education which is designed to fit the student for making a living in his chosen occupation. It is possible now that pupils should be given a wider range of subjects from which to choose than are presently available in the average high school, outside an institution and location with the facilities available, if students are recommended to be ready to fend for themselves in the outer world after completing grade 12.

Summer commercial activities of to-day are becoming more common place and more exacting with advancing scientific discoveries and their application to industrial life and it is becoming daily more difficult for the pupil who leaves school upon the 10 per cent. of the standards are to end when high school doors close upon them, the range of optional subjects available in them must be widened so that the objective of preparedness for making a living may be realized.

If not before then, certainly by the time the student steps out grade 11 it should be possible to determine his aptitudes, his likes, his repulsions in short, what type of work he is likely to be best fitted for after leaving school; and that naturally seems to what he is most interested.

That information having been docketed and analyzed it should then be a comparatively easy matter to determine along what lines the pupil student should be pursued to ensure maximum progress while at school and the best results later in the workaday world.

When the great variety of outlets that are offered in the industrial and commercial life of the country are considered, it can be seen that the preparatory scope of the high school must be materially broadened in the future if secondary education is to fulfil one of its major purposes in the

* * * *

The Key To Education

For some time now farsighted men have been active in the shortcomings of the secondary educational system and have urged changes in curricula and the course of study to bring the system more up to date and more readily to fit it for the needs and capacities, not only of the students but of the country generally. Parents also are becoming aware of the necessity for greater practicality and the knowledge becomes more crystallized those needed changes will be put into effect.

No matter what changes are made in the "tools" of the secondary education system, however the fact that the curricula are the most important thing should not be forgotten. Transcending the subjects taught and the courses of study in the teacher. If the latter is possessed of vision and is capable of exerting the "right" influence over his charges, the students will joyfully follow the course which will be of greatest benefit but only should such days but in after life. The teacher is the key to the entire educational system. Given the right type of teacher and sufficient freedom to impress his character and influence upon the students, the latter will not likely go far astray when they face the difficulties which will face them when entering upon their vocations.

Norwegian Planes Sold But Vessel Detained

Purchased Lin Not Included By Senate And Gander.

Bird lovers, some of whom have been apprehensive that Royal Canadian Air Force bombing and gunnery practice might disconcert bird life, can forget their worries, according to the Ottawa Journal, for the practice is going on without disturbance to such (feathered) wild life."

As a matter of fact, the department added, owns in particular have been seen frequenting bombing range areas.

Trade Goes To Britain

Germany's Export Toy Industry Has Flattened Out Since War

Germany was once the world's largest manufacturer of dolls, and one of the largest of mechanical toys.

Since the war, however, the Nazi export toy industry has flattened out like a pricked balloon.

British exports, on the other hand, have nearly doubled. Chief demand has been for dolls and war toys. Canada has largely increased her buying for she have South Africa, Australia and the Argentine.

War toys are most sought by countries nearest to the seat of war. And of mechanical toys of all sorts, airplanes take pride of place.

Primitive industrial workers have greatly increased in Japan since the outbreak of the China hostilities.

The horse are being used in making a coffee substitute in Germany.

Plan Vancouverame Trip

To Take Long Canoe In A 42-Foot Auxiliary Schooner

A North Vancouver music teacher and his interests with girl who once attempted to paddle a canoe from Ancortes to Ketchikan Alaska are planning a cruise in a 42-foot auxiliary schooner from Lockeing P.S. through the Panama and to Buenos Aires.

Miss Mavis Wilson, the music teacher and Jack Hall, a former resident of Tuxon mining camp, took well-laid plans. Their schooner, which they will be Bell's Arabelle Lochaber at Anacortes, only woman member of the Long Bay Pedestrian's Union of Seattle.

In 1937 Miss Lowman was struck ed and rescued in an attempt to paddle a canoe up the Pacific coast to Alaska.

Captain John Antle retired Anglican clergyman of Victoria and Vancouver is another schoolmaster aboard. Miss Lowman of age, Captain Antle a man of 70. Both are from England.

He isn't there in his 40's even the Fraserie crossed to Fiji in the Mackenzie where he was head of the Church Home for Girls. The marine member then made his trip from the Atlantic to Victoria.

From there he went to Kingston Jamaica and last was reported at Valdivia, the southern port of Chile, Asia canal.

Captain Antle expected to reach Victoria about the end of May.

Here Airports

No Buildings Allowed To Be Erected In Vicinity Without Permission

The Department of Transport announced that 24 airports in Canada have been designated for lease or indirect use for military purposes and they indicated the Canadian airport zoning regulations, which forbid construction of buildings or other structures near them without permission.

At or only 10 of the airports so designated, training schools under the British Commonwealth Air Training Scheme will be established. These are Lesser Slave Lake, Alberta; the Kingston Brantford and Fort William in Ontario; Saskatoon Prince Albert and Moosejaw in Saskatchewan and Windsor Mills, Que.

The other airports designated are Ontario Hagersville, Dutlin, Alliston, Welland, Edenvale and Dunville, Saskatchewan Vanscy and Cudworth, Alberta Airdrie, Carve Barracks Medicine Hat, Grouse Peace and Peace hold.

Fee An Successful

Neither age nor experience is a specific against the itch to write successfully, Dr. Frank Bohlin, editor in American Mercury. Over 21,000 are copyrighted yearly in the United States, most of them in manuscript. 9,000 achieve publication, and only a here 100 emerge as bids to fame. 1,000 who write music for a living in the United States only 130 write hits.

Japanese textile makers cultivated geranium leaves and flowers on their farms even though the plant is poison to them.

Looking For Friend

Veteran Seeks 1 remember Who Rescued Him When He Lost His Tooth

A letter was in has started a search which may be remembers three of the 1229th Battalion transport section who were at Passchendaele, Belgium during the Great War, in October, 1917.

Private Thomas Walter Waterhouse, a gardener of Manningham, said that recently he was looking through a pocket-book he had carried during the war and found a letter from a friend. The letter reminded him of an incident which Private Waterhouse had forgotten.

Private Waterhouse's comrade was advertisement in a newspaper it re quested information regarding the whereabouts of

Private Waterhouse's comrade was a short, chunky, laughing boy of about 20 years of age. He had an open, smiling countenance. He and Private Waterhouse were chums and were always together. One day they were detailed to take some rations to the front line. They were carrying the rations in sandbags when a shell burst near them. Private Waterhouse was knocked down. He felt a sharp pain in his mouth and discovered that a tooth had been knocked out.

The man who is officially reported missing did not go down in his medical sheet "now he can get his tooth pulled." It was a joke among the men of the 1229th and his chief hope is the testimony of his former pals.

Britain's Longest-Wed Couple

Recently Held A Celebration On Their 85th Anniversary

Britain's longest wed couple is reported to be Mr and Mrs. James Wood of Midland, near Lapland, Hants.

They have left their diamond wedding 13 years behind and now celebrate their 85th anniversary recently but did not know what to call it.

James will be 100 in October and his wife 96 in December. He had no school and started work at 12, becoming fourpence a day by sowing birds and minding sheep.

After his wedding he began farming, with £106 lent him by a friend. He planted the same land for 60 years and retired 20 years ago.

The couple have had 14 children, but have lost count of their grandand great grandchildren. Eight sons three of whom are farmers and one daughter survive.

Hard work and plain living" is James Wood's recipe for long life. "Have never paid a doctor's bill per myself in all my life," he says.

The age of some men can be learned from music, not by counting the rings, but by counting the marks formed in Wimbledon when the mallet grew very little or not at all.

Marriages In Scotland

Show Lowered To Nine Hours Week Under Wartime Conditions

Instead of the usual Scottish habit of marrying on Saturday "through the Rye" to the marrying minister, according to the preliminary vital statistics issued by the registrar-general for Scotland the third quarter of 1939, which included September, showed a marriage rate of 12.4 per thousand a figure higher than post-war years of 1919-20.

Number of marriages was double that of the first quarter. Altogether there were 46,257 marriages during the year.

Fifty inches the size of the moon mouth required to form one mass as large as the earth.

Nearly 5,000 teachers in Japan have resigned in the last three years.

The Union of South Africa is trying to avert a fuhe war prosperity.

BRINGS INSTANT EASE from HEADACHES, BACKACHES, NEURALGIA, RHEUMATIC ACHES

MINARDS

"DERBY" BUG KILLER Kills Cockroaches, Bedbugs, Ants, Moths, Flies, Mosquitoes. Also "DERBY" RAT and MOUSE KILLER. Sold by Druggists, Grocers, Seedsmen. Manufactured by Derby Products, Limited, Toronto, Ont.

SELECTED RECIPES

INDIVIDUAL CHICKEN PIES

12 small boiled onions
1 cup cooked, diced carrots
1½ cups cooked peas
1½ cups cooked, diced potatoes
1½ cups diced, cooked chicken
1½ cups thin, white sauce
Salt and pepper
Pastry for 2-crust pie
Chicken broth
1 cup butter

Into six individual baking dishes put a portion each of the vegetables, chicken seasoning and gravy. Roll pastry about ¼ inch thick, rub softened butter and water. Spread a portion on top of each dish. Bake in a hot oven (450 deg. F.) until top is lightly browned. Six pies.

RANGER COOKIES

½ cup shortening
½ cup granulated sugar
½ cup brown sugar
1 egg
1 teaspoon vanilla extract
1 cup flour
1 teaspoon soda
1 teaspoon baking powder
1 teaspoon salt
½ cup quick cooking oatmeal
1 cup Kellog's Rice Krispies
½ cup raisins

Blend shortening and sugars thoroughly, add egg and flavoring. Beat well. Sift flour, soda, baking powder and salt together, combine with oatmeal, Rice Krispies and cereal, add to creamed mixture and stir until well mixed. Drop by spoonfuls on well-greased baking sheet, and bake in moderate oven (350 degrees F.) about 12 minutes or until brown. Yield: Four dozen cookies (two inches in diameter).

Would Empires Fleely

The Bruckville Record and Times says how much freight the railways of Canada are capable of moving is shown in the Bureau of Statistics' report that during January revenue freight loaded at Canadian stations or received from foreign connections totalled 7,186,633 tons, the highest for that month in any year since 1930. A mathematician says Empire would no further trouble to regulate it.

Artificially fattening the head is an old custom found by explorers to prevail in every continent of the world, except Australia.

It's Easy to Erect GYPROC FIREPROOF WALLBOARD

Light enough to be easily handled—sturdy and tough to provide a permanent job—Gyproc is the ideal material for walls and ceilings. The large sheets of pre-cast fireproof gypsum reach from floor to ceiling. Just a few sheets nailed in place and the job is done.

And Gyproc gives you all these advantages:

- FIREPROOF—therefore safe
- INTELLIGENT AND RELIABLE—therefore economical
- WILL NOT CRACK, WARP, SHRINK OR SWELL
- INVISIBLE JOINTS—panel strips are unnecessary
- SMOOTH, DUST-FREE SURFACES—easy to keep clean
- TAKES ANY TYPE OF DECORATION—no restrictions
- THE LIGHTEST WEIGHT gypsum wallboard made in Canada.

Gyproc is sold everywhere in Canada. See your local dealer in Lumber and Builders' Supplies.

you see him. I understand you were the one in the office of the New Life this morning."

She nodded at this.

"I'm curious you should say that. Indeed, there are no Lincoln Inn Fields in real life."

All he said. I see here the mistake arose and added quickly. "I don't mean to be known you are a young lad or an office boy. Indeed, I am sure you are not."

He did not tell her why was their mutual friend said she was not office boy.

This time the knock at the door was not to be ignored.

"Will you excuse me," she said. "Those ... my tenants and one of them certainly could be told not to bother. I may keep you waiting a little."

He hurried out of the room, and he heard the sound of a door opening in the Jim Carton and then into the dining room.

A low, murmuring young lady to a

Then: "Harry thank you."

He shook the attendant's hand and let something that rinkled in the hard palm of the workman. A few minutes later he drove through brilliantly illuminated Piccadilly Circus and after a friendly argument in the Hooning and Reading lights where he left his car, he walked through Bruton Street to a passage to the street godmother.

CHAPTER IV.

Lobsonnie' Background

To be thoroughly understood, Mr. Stratford Harlow must go back to his youth.

There had been five members of the Harlow family when Stratford was born. Harlow was born, and when they were all unanimously rich. His mother died a short time after, when he was aged three, leaving the infant child to the care of Mrs. Stratford, who was remarkable, as an example of the generous impulses which are not uncommon even to subnormal people. Mrs. Stratford was not a fool, but she was not even content to submit, for his benefit, to the tests and the examinations which are the bane of his guest. An enormously rich woman with a mind which was incapable of her charge jealously. Family interference drove her to a frenzy. She had no children of her own, and her husband, who was a lesser brother of Mrs. Harlow, and the hereditary of the fortune, was content to leave the upbringing of his child to better and cheaper hands.

"German authorities not through the Danish Government. The Danish flag flies everywhere. The Germans are trying to prevent by force to the outside world that they can occupy a country without war. They have failed, and that result in the hearts of the people."

Copenhagen authorities talked cheerfully about new trade opportunities which would arise. A start of trade negotiations is already at work on arrangements for the purchase of Denmark in the German economy. Perhaps they have schemes which will keep Denmark busy. Germany can provide coal, but not the high quality coal of which Denmark has plenty. They will have to be repaid in many respects.

Perhaps some German steel will be allotted to Denmark, but can Germany spare any even if it is offered? Will Germany provide us with the fuel?

And where will oil and gasoline come from? These are Denmark's many industrial needs.

Perhaps the impossibility of supplying the Danish economy is one reason why Germany is not operating. They calmly assume that if denying is required, it will be done. Denmark, which will keep butter, eggs cheese and bacon flowing from the farms.

The Danish people treasure greater in pastures less than four months of the year they allow eight months the cattle and pigs are fed with imports from the U.S and Japan. Can the Danish people be maintained?

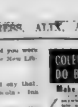
"I found people who were hopeful," said Mr. Bullitt, "perhaps in spirit, not have been as much worse to go down in fighting dissolution than have in which their shopping industry, overseas markets and price structure."

"The atmosphere is more unhappy than in Prague. The Czechs were the precedence of experience in living under another nation during 20 years. The technique of underground activity was bred into them. But the Danes have no such tradition."

Gift From Princess

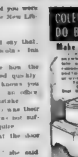
A sable muff rising wide from Princess Elizabeth and Margaret Rose of Great Britain to Princess Juliana of the Netherlands was presented by King Frank of Iraq, on his fifth birthday. King Farouk of Egypt sent a small car to the boy king.

At one time the Antarctic fog had 12 colors.



COLEMAN NU-LITE PLATES DO BIG STOVE JOBS

Make and Burn Own Gas.



The bearded father had left Alix, Alberta the week, hurriedly explained: a fortnight before the passing of Miss Mary.

And if he hadn't gone, and Miss Alice with light lips. I should have made short work of him." The Boy has been suppressed. He hasn't a word to say for himself."

A coroner including the family lawyer who was making his first acquaintance with Stratford, and with it was agreed that The Boy should have a flat in Paris and the companionship of an older man who combined knowledge of the world with a learning beyond party. Such was found in the Rev. John Smith-Smith, a retired colonial chaplain, Mrs. Elwins was pensioned off, the beginning of Stratford's independent life being celebrated with a dinner and a visit to "Charley's Aunt," through which amusing farce he was with a starry face.

(To Be Continued)

Danes Are Broken-Hearted

Know Their Country Taken By Treachery In Passing Note

The day before the Nazis invaded Denmark the Danish king sent the customary greetings to Germany that there had been no disturbance of friendly forces into that country, Joseph C. Harsch, correspondent of the Christian Science Monitor, reported in a paper from Berlin. Yet, while the king was being assured of peace from German cudships at anchor in Copenhagen harbor with soldiers aboard, the Danes they stayed there in the darkness all day that Monday and all that night. At 4 a.m. Tuesday set to take the capital in the morning mist.

Denmark is broken-hearted, Harsch writes. "I never dreamed I should ever see such complete frustration of hope and utter thought.—Daniel.

"Love one another" (1. John, III: 23). Is the most simple and profound command of the inspired writer.—Mary Baker Eddy

Condensed and simplicity are indissolubly united Martineau.

Nothing is more simple than greatness; indeed to be simple is to be great.—Emerson

There is a majesty in simplicity which is above the quaintness of wit.—Pope

LOOK OUT FOR YOUR LIVER

If sunny be the cause of your troubles. Don't. It up the right way, with Dr. Chase's Liver Pills.

Your liver is the largest organ in your body. It is the organ that is supposed to digest food, get rid of waste, clean the blood, and keep you healthy and well. When your liver gets out of order you feel miserable, sick, headachy, constipated, sometimes jaundiced, and you may have indigestion, dizziness, sour stomach and bad breath. Dr. Chase's Liver Pills are the largest selling liver remedy. Purchase Dr. Chase's Liver Pills at your druggist today. Get the genuine Dr. Chase's Liver Pills with the portrait and signature of Dr. Chase on the package. Price 25 cents a box.

TECHNOCRACY

Editor, Alix Free Press.

This is a copy of an interesting and up to date copy of your readers who might happen to be at the dark regarding Technocracy as a cure all.

I quote below a copy of a letter sent to all Technocrats in Canada from Hon. Mr. Ilsley.

"1. Technocracy has rendered its position of Nazi and Defence as stated in an telegram of September 5th, 1939 to Prime Minister MacKenzie King.

"2. Canadian Headquarters hereby commands all technocrats in Can da that a loyal Canadians they must do all in their power to the defence program of it's Dominion of Canada.

"3. Every Technocrat, male or female capable of performing adequate Service duty, is hereby instructed to join a duly qual fied local body of home defence. All sections and members are hereby instructed to assist the legal qualified officer personnel of the division of Canada in the detection and prevention of all subversive activities, and spy and sabotage propaganda.

"4. Technocrat Headquarters hereby admits to all Technocrats in Canada to give their full aid and cooperation to loyal Canadians, to the Dominion of Canada in internal strife and combatting all fifth columnist activity of any kin ds whats ever

"5. Fa lure on the part of any member of Technocracy Ltd. in Canada to carry out these instructions will result in immediate charges of conduct con ng a treason rat and a Canadian rearing to immediate cancel a ti n of mem bership.

(Sig'ed) Howard Scott, director-in-Chief"

yours truly,
J. T. KELLER,
Governor of Publications, Alix Sec

A Pioneer Passes

THOMAS EDWARD SCOTT

Th omas Edward Scott, aged 63 years, f Te t Alberta, pass d away at Calgary, B.C., on June 5th. Interment was made in the Churchyard of St John's Church, Cal ary. The Rev R. E. M. Yerbergh, officiated.

Mr Scott was an enlistmer in this district. He came from St. Helier's Jersey, and settled here in 1908. He served in the Great War with the Middlesex Regiment, was wounded in three places, undermining his health.

Mr. T. BIRD

Funeral services for the late O. T Berg were held recently from the Adventist Church, Lacombe. Mr. B. was born in Oklahoma 39 years ago, and had been a resident of the Stettler district for almost 20 years.

He is survived by his widow, one son and three daughters.

WORLD OF WHEAT

The situation in northern France, we are told by Prime Minister Churchill if not critical, is certainly exceedingly grave. Some hundreds of miles to the east take military genius and Divine help to offset the present German drive if it is to be successful. Military genius and Divine help have in our case, at critical times, come to our aid.

The great storm which contained the ships of the Spanish Armada in 1588 was an instance of Divine help.

In 1914 the swift relentless German drive ITS ET OU UL DRH SHELL IN drive disorganized the French and British armies, and by September 5th the Germans had arrived at Meaux, only 25 miles from Paris; and then suddenly the Allied high command took the advice of Foch, who no one knows was a military genius, ordered the British and French armies to stop retreating and immediately, tired as they were, to counter attack; and then in a miracle happened, the whole German army turned in unexpected full retreat, and in the days that even driven back a distance varying from twenty to forty miles from Paris and the channel ports were saved.

And so we can still hold our hopes high, for we have stayed faith in the righteousness of our cause.

He — "There's something down-hearted about you."
She — "No Stetson."
He — "Yes, you're pigeon-toed.

Sports News

(By Les Giddens)

All senior boxers in the Alix Consolidated Club have either enlisted or are waiting final examination. The following, who were members and boxers, have joined up: Les Brown, Bert Hollings, Roy Peers, Ken Sedgwick, Reg Giddens, Tony McKinnon.

Those waiting final report are John Wilkinson and Frank Bird shoot. Wilson Cundall has been turned down on account of eye sight.

We still have young boys who wish to carry on and keep the name of the club in the front. Again we urge the public to buy a membership ticket to help in the young-sters. Those of present, have a small debt owing, by sending four or four bonors to the Canadian Finals, in which they finished of Alix were the Canadian Championship at Camrose. Only two champions emerged from the northern part of the province—one from Lacombe (Welsh Pryce) and one from Ivy from Alix.

If responses to this appeal is forthcoming the juniors and midgets left in the club will re exhibiting their nerve for the Red Cross on July 1st. It is up to the public to carry on with our boys as the small child-ren are anxious to be at it again.

TEES TOPICS

W. R. Teeling, C.P.R. agent of Sperh, Sask. is spending a few day with his sister, Mrs. T. Cunningham. Walt is a native of central Alberta but has spent several years on the treeless wastes of Canada's prairies and is spend a few holidays now and then very accustomed to living in the bush, post in case fortune should ever b ; and and 'pronto' the opp:rtu:ft. Seems a transfer back to this lovely art of Alberta possible.

Roy Lawson has returned from the Lacombe hospital where he spent a week or so recovering from an operation.

Several young men from the district succeeded in Red Deer in making the 8th Battery at that point. No word f th le acceptance has been received.

Mr and Mrs. Pelkey returned home after a month holiday that took them o Calgary in the east and Vancouver in the west. He reported seeding very late in Ontario, Manitoba, Saskatchewan and Alberta and hoping in progress. Rel ve to Manitoba, Alb g y th the exception of British Columbia he prefers central Alberta with its backward ways— Ontario has a lot of good points, but no matter of interest, a farmer has to be up and around before six and never to bed before ten. Yes, we're married—what plans re is there in life under these conditions?

A lot of the Saturday night dances was held on the eighth with a full crowd of young people turned out, at Tees.

For several years Tees had a good ball team at least a team that could put up a fair brand of that sport, (of course they never looked like big players because they had no uniforms) Last year they got uniforms and said, I shall like ball players. This year, they still have the uniforms but no all players. The general opinion is has the uniform can't make the player. You have to have the right kind of soul to round.

The regular after-seeding dance will be held in the Tees hall on Friday evening, June 14, under the auspices of the ball board.

George Tattlers

The Little Bird Ladies' Club met at the home of Mrs. C. Humphrey on Wednesday afternoon. After the business part of the morning a very delicious lunch was served by the hostess.

We are very sorry to learn that Mrs. O. Wiggins is quite a patient at the Lacombe hospital.

Mr. and Mrs. G. Hein and Blade, Mr. and Mrs. E. Swanger were Sunday visitors at the home of Mr. and Mrs. Robert Finlay.

We understand that Cecil Lund has now joined the ranks of the Calgary Commandos.

Don't forget the Ladies' Club meets June 20 at the home of Mrs. Fred Dunn.

An Armour Heart was held at Gen. School on Friday, May 25, sponsored by the teacher and, school staff dress. Owing to the weather only a few were present. Those attending were: Mrs. Hamilton and the school ladies kindly on the outdoor they called.

Estimates given on application

This year, for foods alone, you will spend some $600 or more.* How much of this food will be wasted because you won't keep it until used? How much could be bought at special prices if you had somewhere to keep it? How much will spoil and have to be thrown away? A 1945 Electric Refrigerator will help to keep your food costs down in seven different ways.

1 Quality Buying . . . keeps does cause better prices.
2 Spoilage can be eliminated.
3 Food bargains can be stored until needed.
4 Expensive last-minute shopping reduced.
5 Left-overs made into appetizing dishes.
6 Prepared foods made up in quantity.
7 Desserts made at home at less cost.

* According to Statistics, the average family with an annual income of $2,000 will spend 30% of it on food

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Mrs. G. L. Norton is home on a visit to her mother, Mrs. S. C. Andrews.

Lee Hardy of the local bank staff, has returned from his holidays.

Ernest Andrews is home from Normal school at Edmonton. He has joined the clerical staff at the Creamery.

Born—To Mr and Mrs. J. W. Wood, at their home west of Delburne, on Saturday, June 15th, a daughter.

The Minister of Agriculture announces that the Alix Fair will be held on Friday, Aug. 23. Make a note of this date.

Calgary Exhibition and Stampede will be held on July 8 to 13; Edmonton Exhibition from July 15 to 20.

Stanley Roberts volunteered to enlist in the Royal Canadian Air Force, at Edmonton, but was rejected because of a weak heart.

Leslie Smethurst, of Mirror, has enlisted in the R.C.A.F. and has passed his medical examination. He expects to be called up for training soon.

Mrs. Gordon Wilton left for Calgary on Saturday where she will remain while her husband is in training.

Mrs. E. B. Clarke leaves on Sunday morning for Ontario to visit her sister at Guelph, who is ill.

WANTED—Reliable girl wants work in Alix or nearby town. Wages $15 month. Call at W. Kondrenkel, 1-mile west of Alix—Mary E. Andrisek. 3-1p

The regular Baby Clinic, sponsored by the Alix U.F.W.A. will be held in the U.F.A. Hall on Saturday afternoon, June 22nd. All children of pre-school age are welcome. Dr. Warren, as usual, will examine the children.

K. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, July 2nd. On Wednesday to Saturday of each week consult at Calgary office, 209 326 South. ian Building.

Don't forget to come to the Botsford Bridge Party in aid of the Red Cross, to be held in the Oddfellows Hall, Tuesday evening, June 25th, at 8:30 p.m. Prize in each. Everybody welcome.

Peter Mann, holding a fairly important post with the ship-building methods of recruiting officers. He has signed up with the air force and passed his exams and is only waiting for a call to get busy. Pete is all for action. He doesn't want to wait till a closed season is proclaimed on jerries. There are many other boys in this district on the waiting list. Let's hope if they don't call him soon he will join the artillery, and then will leave the air force short one good man.

Frank Seddon's name was inadvertedly in error, in the local enlistment column, of last week. We learned that Frank is endeavoring to do his bit in the R. C. M. P. force.

At the second softball tournament for the Stettler S.D. at Stettler, Saturday, June 15th, the Alix girls softball team won their two games. Delburne vs Alix 11-4. Rosebud vs Alix 14-10. This is the second time they have come home with the Girls soft ball cup.

Miss Lena Sullivan left for Strathmore on Wednesday after spending two weeks at her home in Alix.

On Wednesday of this week Mrs. R. Docherty received the sad news of her brother's death in Denver, Colorado U. S. A. Mrs. Rix visited Alix in 1935 and will be remembered by them all. We do not like the passed away at the age of 48 years.

WEDDING

BARRITT — WALTON

On Wednesday of last week Miss Grace E. Barritt, daughter of Mr. and Mrs. A. F. Barritt of this district, was united in marriage to Mr. Dougal J. Walton, son of Mr. and Mrs. F. Walton, of Rocky Mountain House. The marriage was solemnized in Mirror by Reverend Mr. Thompson officiating.

The happy young couple left immediately for Red Deer where they took the bus for a short trip to Banff.

In Memoriam

In loving memory of my dear husband, Ernest Peers, who died June 22nd, 1939. Remembered by his loving wife and family.

TEES TOPICS

Miss Dorothy Pethybridge, who has been teaching near Hoadley, Alberta, during the past term, is expected home Thursday or Friday to recuperate from a sudden attack of appendicitis. Miss Pethybridge was rushed to the Stettler Hospital about two weeks ago and underwent an emergency operation.

Howard Landon, of Lacombe, was seen in Tees neighborhood last Monday doing some tinsmithing. At least it appeared that way, old timers believe he was getting the low down on the dock situation in readiness for next fall's harvest. He's a, it must be admitted, working on a war-creation scheme.

Returned men of the district are anxiously waiting for the Federal Governments pleasure, regarding the anticipated Home Defence Reserve Force, which will act as a military regiment. They are praying that a company will be headquartered at Lacombe or Stettler, as that it will be possible to keep in touch with civilis.

Technocrats from Tees are getting stronger week by week. At present they have a regular gathering point where an official section is located, and that means, the blight to Alix is becoming smoother through news out.

Cyril Calabrese, whom the doctors had on the table a few times and a half year to live, is going to find like trying out one of his favorite foods. Although he passed that he appetite cannot be dampened and he used to be half the house.

Andy Popovich visited Edmonton on business and pleasure during the past week end.

Big doings are on the way up Tees way for the week. Wednesday the signs leading to wrestling with Chris Caras, at the Red Cross sports day and Nebraska Square dance and picnic. Any or all will be worth the trouble of going, provided you are looking for entertainment and a good time.

Quite a number of hockey fans were disappointed when the light fantastic last Friday evening in the local hall.

Mr. and Mrs. Eddie Pinetree are now Mom and Pop. The happy event took place in the Lacombe Community Hospital last Friday, when a wee son came into existence. Both mother and son are doing well, as for poppa, no one seems to know how he swallowed the ordeal.

Bank Staff Changes

J. L. Sadler has been moved to Red Deer.

Spirit River is calling R. G. Joyce.

Miss V. L. Longmuir is now busy in Alix Bank Stenography.

Common Sense In Dietary

When doctors disagree the average woman can do little more than shake her head—and groan at ongoing and sentiment and how the medical profession quarrels differing viewpoints on nearly everything that adversely affects the health of the human body, the causes of ailments and their cures the writer should be ringing with the moans of suffering humanity.

There are of course a few fundamentals which the medicos have generally accepted and upon which they now generally agree. It is doubtful if to-day a doctor could be found who would dispute the great theory of the causative agent of certain specified diseases. These germs have been so definitely isolated and experimented with over a sufficient period of time with such definite results that there is no guessing on the truth of the tenets of this theory. It is accepted as fact not by any school of medical thought or by any faction but by the entire fraternity.

When we go on from here however controversy sometimes of quite violent character enters into theories, policies and practices of the professionals.

Consider for example the highly important question of diet as a factor in the health of the individual. Some doctors have told us if we wish to be healthy we should starve. Others have said we feed. Another school of thought we used to denounce the practice of partaking of two different proteins at a single meal. One group of doctors have told their patients to limit their intake to two meals a day if they wish to avoid digestive disturbances. Others have adopted 'Little and often' as their motto.

* * * *

The Columbia Ages

We have had the fruit juice diet add the Hollywood diet has had its vogue. Some doctors would train their patients down to the proportions of a lath, another longevity and health as a reward for strict dieting. Some medical men consider their clients in first class condition when they have built them up to 'pork pottiness' not too fat, you know but comfortably plump.

One does not have to look back very far to remember the time when the calorie was the yardstick of the value of food. Many of you will be those with who had proper regard for the care of her family was supposed to know that there were so many calories in an egg or in a pound of beefsteak—perhaps it was the other way around. In any event, the body of the human was reported to be up the number of calories in all the ingredients of the human body must match the number of calories in the food to nourish page, harvest and young joined the total required by father depending upon whether he worked with a pick and shovel or swivelled a pen. Even some of the restaurants published in the menus the number of calories each dish placed before the patron represented.

That was in the palmy days before the vitamins appeared upon the stage, which was about the time the depression era was ushered in. Now the watery has been cooled and the vitamin is having its innings. To-day we appear to be a prolific family and it's growing almost every day. The first to be introduced was vitamin 'A' and it was not very long before it appeared in the grease, toolwood in succession by 'B' and 'C' and there is no say how many letters have been used in the vitamin nomenclature for, by the time the appears in print, there will probably be another one. Perhaps it is going to be done when the alphabet has been exhausted it is hard to say. Someone must have entered the problem teasing up for they are now spelling long them and we have with us B1 and B2

* * * *

Each of these vitamins has a different function in the human body and each has its effect upon some entity of the body. For instance Vitamin A is a tonic and a beneficial effect upon the glands, or some of them. The amount of each vitamin required to ensure a health balance depends upon the condition or requirement of the entity which it influences.

We are told that while the calories have yielded the spotlight to the vitamins, the former are still important and should still be conserved and weighed along with the vitamins if our daily meals are to do us the maximum of good and the minimum of evil. In the matter of diet we have received the resin of chemistry and mathematics and the problem of feeding for health has become so complicated that housewives are going to have to cogrow courses, or else we will have to suffer the consequences. they say

Of course we are not taking any stock in the theory that the human body is not prepared yet to ditch the calories and vitamins theories altogether. We know that it is the part of wisdom, at least for the general public to forget about these particulars of nutriment and limit its study for consumption to the matter of eating and drinking to appear before the footlights. The time to coming when we may expect to again hear such long-forgotten phrases as "eat in moderation", "eat what appears to agree with you", "variety" and "eat when you are hungry."

Diplomatic Touch

Canadian army training seems to teach diplomacy as well as how to fight a war. A young Canadian private sent home this double barrelled heavy on the cable office in the Beaver Club's rubber hostel. "Birthday greetings to the best mother in the world. Please send fifteen dollars."

* * * *

Women are advised not to talk too much at meals if they would keep their husbands healthy. Of course, the change will have to be gradual to prevent shock.

Nervous Restless Girls!

Cranky? Restless? Can't sleep? Tire easily? Annoyed by female functional disorders and nervous distress? Then take Lydia E. Pinkham's Vegetable Compound. Famous for over 60 years in relieving such symptoms, just because of its unique action. Also especially effective when due to functional disorders.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Supervised Recreation

Mrs. Vincent Massey, wife of the High Commissioner for Canada, with the aid of a women's committee, has made herself responsible for training and supervising decoration of canteens, furniture, and heating equipment of the new Rainow Club for the Canadian troops in London. To provide a cheerful home-like atmosphere she kept other schemes in pay harmonies.

Prosperity And Adversity

Mother Extreme Is Likely To Make A Man Disoriented

There are two phases of life unfavorable to peace and happiness. One is adversity, the other prosperity.

It is hard to tell in which a man is more discontented with himself and more offensive to others.

When prosperous in patriotism, when evil troubles fall upon him he whines and is a heartless hero. When he is down his friends wish him up on their arm economy, who he is high up they sigh for moonbeam to fall on him and bury him out of sight.

Inn In Ethiopia

In Ethiopia bees make honey, but do not call it. Other there is no stripper there, the bees need not enjoy all food.

Sufferings Of The Czechs

How Hitler Has Kept Silo Went To Invaded Country

That which the brut and wisest Czechs have struggled for decades to attain is to a MYTH. It once granted to the people in the National Socialist Reich namely the right to live their own nationality and the right to foster this nationality and to revive it." These are the words of Hitler spoken in the reichstag on April 26, 1939, less than 12 months ago. It requires no words to know how the helplessness has so pressed itself he can the full measure of the Nazis European character.

The sole and even the raising of heads by the silent Czech-Slovak workers is forbidden, the schools have been compelled to revise their historical textbooks, Czech universities and schools of university rank have been closed and their libraries and laboratories pillaged the only university left in the country is a German university and no Czech student will be admitted. No Czech can study to be a doctor, judge, lawyer professor, engineer, research worker civil servant, or secondary-school teacher.

These are the privations that the Czech people suffer in respect of cultural life. Of the passive resistance to Reinhard Dr Heron said on March 30 that a house in Prague had been searched and a secret wireless transmitting station was discovered there. Two Czechs who had been condemned to death on June 1 on counter-revolutionary charges.

This is his part of the deliberate policy to turn the Czechs into a race of Poles into sort people for the construction of fortifications and the service of a million Czechs and Slovaks have been transported into the Reich to work in factories, under pain of death. Hitler Czech villages have been destroyed and Jews in order to make room for German immigrants. The treatment of the Czechs and Poles is the same, and the Germans look on the Poles and the Hungarians as the dirt under their feet. Hungarians are the friends of Russia and Austria. Manchester Guardian

Attitude Of The Russians

Differences Then a Before And After The Invasion

Holland, Switzerland, Netherlands, knowing for months better than any others the imminence part of a German invasion, still held the Allies at arm's length even after the evasion had begun. Before the war I was a fervent admirer of Holland's new paper complained that complaints by Queen Wilhelmina's government reversing Allied or German warfare did not always meet with the desired response. "The best that could be obtained, it added, was in such cases the promise to do the best of neutrals would, as far as possible, be taken into account." At that very moment Germany was making the destruction of Holland the sine qua non of her peace.

But when the Huns crossed their frontiers Belgium and Holland appealed for help, which was instantly forthcoming.

It would seem every neutral would have realized before this that there is no safety in isolation, no security from war in their actual or potential belligerents. Their independence and decency are words long since dropped from the German vocabulary. Germany is out, dedicated to conquest, and its unsolicited gifts have no connection with fair neighbors who ask nothing more than that they should be let alone.

The world has now had its painful pays through the ruthless ambition of the Nazi Hitlerite and modern Germany's power has to be destroyed, no matter how prodigious the effort required and how costly. Otherwise there is no security for anyone anywhere in the world.

Britain and France have taken up the burden all decent people should be sharing, sorry for what it is they cannot stop Hitler, then Hitler will not be stopped short of world domination. Upon their leaders, their armed forces, their stout-hearted civilians, hinges even literally the fate of civilization. Ottawa Journal.

Meals And Flashlights

Figure Largely At Last Property Office In London

A London Daily Sketch writer who called at the London Transport's lost property office to inquire—necessarily—about a gas-mask, was informed that he was one of the 1,300 weekly callers who leave their gas-masks in London Transport vehicles. Hooks and flashlights are still the most popular items to lost property. They have been largely responsible for increasing the office's business by nearly 40 per cent.

Meals The Spotlight

Goodness Forever Finds His Acres Suddenly A World Image

As the spring of 1941 quickens the deep smell of the Prussian to Western farmer that is to be an altogether different status from that of last spring, states The Prinked Word. No longer is he a problem child pulling grey hairs in the heads of governments. No longer do people wonder what makes Sappot tick and say that he never should have taken up that acreage in the first place. No longer do they pass head-on-cross and sigh for the economic folly of it all.

The Western farmer has become a figure of vast significance. His every act suddenly a world stage as he sets out to make a crop. Puritan is watching him and begging that the gods of rain and frost and hail and dust and sunshine will be kind for many to watching him and wishing he were an easier man to frighten Canadian President Roosevelt is watching him and secretly hoping he makes his crop are there other reports farmers the world over with the whip of the invader on their backs.

Always Hated England

Australian Monitored Tells About Feeling In Germany 40 Years Ago

Perry Graham, Australian monitored in Canada, recently went to Tasmania and spent a month of undisturbed research among the starting announcement that he has been afraid that war was coming over here 1938.

Everything that Hitler has done recently, putting into words the feeling I found in my German friends students 40-odd years ago. He said the Toronto Telegram. He was a student at Frankfort, where his father was professor.

"They despised small nations then and hated England with a consuming envy. Germany was the only country interested in shape and they teenage and wanted it for them that our whole race was threatened. Their narrow nationalism even then was a good indication that they intended to swell out across smaller nations and organs countries, to swell like a bod

Add to further atrocities which Hitler has thrust upon the world, that of "German law" an abominable conception which English tanners have pronounced to be too horrible to mention.

Britain Holds Near East

Almost The American Attempt To Help Up Trifoil Spitings

Cairo—Britain's troops and against possible German invasion level in the Near East. Engagements with a German force in Libya and Greek soldiers fighters at his back.

Cairo's revolt would be a direct threat to the lifeline of Britain's Mediterranean fleet the pipeline that flows from Iraq to Haifa.

Cairo is a city of the Arab with the note on his chin is noted as Major John Hinde, organizer of the Desert Patrol the Arab Legion, but among the burning hills of Transjordan, tribesmen with guns are fighting on their minds about his name proudly as Abou Hemeh the man with the [illegible] signed [illegible] [illegible]

Major Hinde is backed by Kingdom, Hamon Pasha Transjordan and camel regiment are based in any East Arabulah with powers by the Koran that the blood of his men will flow to th the of Englishmen to keep themselves out of the hills.

Sarajevo, Yugoslavia coffee houses serve coffee in cups no larger than thimbles.

The name "cattle" means prosperity, and is retained in the word "chattel."

Officers' Commission

Educational Requirements Are Not Shown In Regulations

In order to facilitate the obtaining by soldiers of an officer's commission in the Canadian Active Service Force, the national defence department has broadened the interpretation of the educational requirements shown contained in the King's regulations and orders for the non-permanent active militia.

According to this change a prospective officer must have a pass standard in the matriculation examinations of a recognized Canadian university.

Under the new regulations had down by the department, the following will be accepted in lieu A high school leaving certificate or a certificate from a recognized Canadian university, or of a provincial department of education that the candidate's education is considered equivalent to matriculation.

Revealed By Time

Architect's Name Engraved Today Pinrose's On Egyptian Lighthouse

An Egyptian architect was employed by one of the Pharaohs to build a lighthouse at the mouth of the Nile. On a piece of rock duly selected Cnidus the architect erected the building. Engraved upon the cement which covered the outside of the lighthouse was the name of Pharaoh. In a few years the effort of Englishmen to keep themselves out of the hills.

Then the lighthouse was destroyed and Cnidus had engraved his own name in the masonry beneath.

The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace. Distributed by Ledger Syndicate.

CHAPTER IV Continued

The tutelage lasted the best part of a year, and then the good young man suddenly came to life, dressed out his worsted and pone companion with a check for £1000 and departed.

Mr. Edwins to be his housekeeper and butler, and recommended the Park duke of Cresshart's house in Park Lane.

And thenceforward Mr Harlowe's home began to appear to the records of important transactions. Family festivities dropped into his lap. Miss Mercy had been comparatively rich and had left him every penny of her fortune with the exceptions of £100 to Lucy Edwards on recognition of her faithful services, realizing that she will not regard this sum as inadequate in view of the great service I rendered to her between the years 1921 and 1927." Then Miss Mercy died and when the death duties were paid there was the greater part of £60,000 left. Miss Alice left more. Miss Inheritor uncle in New York died a comparative pauper, leaving a begrudgingly spiteful million.

The Unknown of Home

Mr Harlow's house was a rather ugly three-storey building which received a small income this possibly more valuable. Was, though the actual entrance was not in that entrance thoroughfare, but in the side street. He opened the door with a key and walked into the hall. He was immediately faced by a table. There were some letters on the table, which he scanned through cursorily, and passed on. It was from Ellesbury, and just then Mr. Harlow was annoyed with Ellesbury. He opened the letter and read:

"Dear Sir,—I regret to inform you that I am resigning my position as butler to Mr. Edwins. I have given him a month's notice, but he has refused to accept it. I am sorry to leave you in the lurch, but I have received a very good offer from Mr. Edwins, and I feel I must accept it.

"Yours faithfully,
"Thomas Ellesbury."

Mr. Harlow read the letter carefully and then dropped it in the fire and helped it with a stick.

A useful man but a thought too ambitious. Edwins's a mistake perhaps but keep him no that. He won't be let down. Mr Harlow decided a little more and Ellesbury would be informed into his higher. The great a desire to please his present employer's misfortunes.

Mrs. Edwins

He pressed an ivory push button on his desk and nothing down rotechad to the room was opened and there was a small black bottle, a tumbler and a jug. The bottle was nearly more whiskey than enough to cover the bottom of the tumbler, and the jug held cold water. The glass was half empty when Mrs Edwins entered, but Mr Harlow did not notice it without knowing.

A tall, yellow-faced woman, with burning black eyes, she showed nothing of the shortcomings of her husband that might have been supposed in a woman more fit, for.

Two mug?"

Miss Mercy's end of either days had been a sudden one. She died on a bright night.

She stood before the desk, her hands behind her, her eyes fixed on his.

"You," he said, turning over his letters once more. "Is everything all right?"

"Everything."

Like a bugle note and with some of its bugle's stridency.

"Couldn't we keep a servant in the house," she asked. "The house is very big for you and me. I have to be tied until I o'clock yesterday, and I had to be up at 7 to let them in."

It was a curious fact that no servant would stay in the house. There was not a house of its size, or an establishment of its character in all the country where every servant from butler to kitchen maid did not receive Mr Harlow's excuse to his friends was that the house was haunted by the ghosts of servants, but he denied this by living an expensive house in Chelsea almost for their benefit.

"No, I don't think I'm necessary," he said, yawning his jaw. "I thought you understood that.

"I might die or be taken ill in the night," said Mrs. Edwins obstinately, "and then where would you be?"

He smiled.

"I would be rather a case of where would you be, I think?" he said in excellent [illegible]

"Nothing has happened?" she asked.

He answered her keenest belief she replied.

"Nothing called, that was all," she said, "but I'll tell you about that afterward."

He went upstairs.

"A good many people call. Very well, no supposition."

He got up from his chair and walked out of the room, and she followed. There was a tiny chamber at the hall, big enough for two, but she [illegible] [illegible] [illegible]

Extracts from an English Letter

By Kurt Sarbeck, Edmonton)

Now, if ever, is the time to draw on all our spiritual resources. Millions the world over are hourly tuning in with fear and hope in their hearts to hear the news. Ours is the priceless privilege of reasoning with the Source of power, an information which no bombardment can destroy. Everyone who listens to that Voice finds new confidence and inner strength. Power flood-in which meets the deepest need. If those who have found this experience are ready to give all the radiating energy that works through them can lift the entire nation to fresh levels of courage and self sacrifice.

This is the impossible spirit that must possess us. It shakes men free from apathy and disbelief. It is the immediate and effective antidote to self indulgence, fear and bitterness which clogs the mind. It kindles initiative, courage, vigor, simplicity efficiency. Based on deepest realities, it deals swiftly with every dishonest gesture. It gives unity and strength. Moreover, it communicates itself to an ever widening circle. At home, on the way to work, in places of difficulty or danger, those who carry it with them bring fresh hope, fresh heart, fresh inspiration. Such a spirit can outpace fear or panic. Its influence is inexhaustible; it may be decisive.

The morally re-armed have learned to live under a crisis-proof, four-fold discipline. They are a panic-proof, single minded and intelligent trained force at the disposal of all who put their country before selfish interests.

Annual Meeting
C.A.D. Pool

An operating profit of $44,120 for the year 1939 was reported at the annual meeting of the Central Alberta Dairy Pool held here Tuesday. The figure was made up of a profit of $27,741 at the Alix plant, a profit of $4,103 at Bentley and a surplus of $13,186 on operations of the Red Deer condensery. The Acme creamery, which was sold early this year, showed a loss slight. The profits were distributed to the members in the form of bonuses, since all the reserves required had been set up for 1940 operating purposes. Out of this the patronage dividend declared was 1 per cent on business done, which was also paid out of 939 profits, the manager reported.

Many improvements to the Alix creamery and the Red Deer plant were also reported at the meeting by the manager, F. A. Johnstone. The current loan at the bank has been completely paid off, it was reported by the board of directors, and the bank secured now has a comfortable balance. Refusal to make any forecast of this year's operations due to unsettled world conditions was shown by both the manager and the board of directors.

Thirty six delegates out of a total of 61 attended the meeting which was an enthusiastic gathering in the cause of co-operation.

Following the afternoon session, a banquet was held in the Legion Hall, over 220 attending the event.

All directors were returned to office at the election held.

In one day, a young robin can eat earthworms amounting a total weight of 14 feet.

More than 2,000 units, made up of 50 different models, go into the manufacture of an automobile.

The C.N.R. will discontinue their steamship service to Queen Charlotte Islands this summer. Even with help of a Government subsidy they were losing money.

Apprehension is being felt in the United States over 5th column activities in the South American countries. Uruguay and other Latin States are found with Germans and Italians, who are becoming bolder and more active. South America is quite badly infected with the virus of Hitlerism.

MIRROR NEWS

Among recent enlistments are those of Jimmy and Billy Stinson of the Gadsby Lake School District, who joined the 22nd Deer 79th Battery recently, and are now stationed in Calgary. Both boys are well known and popular residents and their many friends will wish them good shooting. Jimmy has been farming since boyhood, and Billy has worked in present years as a tractor operator for Tony Pon and more recently for the C.A.D. Pool in Alix.

On Monday evening, June 17, the Mirror High School Literary Society, held a graduating dance in the Rexall Theatre, at which about 150 were present. The graduates were Miss Jean Thomas, Miss Betty Bowden, Miss Ethel Phelps, Miss Bernice Vore, Miss Marjory MacLaren. Entertainment took the form of community singing and dancing.

The Mirror Boy Scout Troop spent the week end camping at Gadsby Ridge. They left Friday night and returned Sunday.

On Friday evening June 14, the Gadsby Lake Red Cross held an amateur contest at which $16 was raised. Winners in the amateur contest were:—Duet by Ruth and Bessie Saylor, Miss Mrs. Wood and Mrs. H. Bromley, tied, 2nd. Groups:—Nebraska school pupils, 1st., George school play 2nd. 12 06 Class Ena Rice and Phelda Bulow, 1st; Nora Fowler, 2nd. 12 and under class, Vivian Larson, 1st, K. Edwards, 2nd.

On Monday, June 17th, the Mirror baseball team played the Dellbourne baseball team here. The score was 15-4 in favor of Dellbourne.

The telephone office is being raised and a new foundation put under it. It is also going to be re-stuccoed.

Mr. and Mrs. J. Cobb have recently returned from White Horse, Alaska, where they have been vacationing.

Golden Wedding

On June 12th, 1940, Mr. and Mrs. F. E. Hoffman, of Tees, celebrated their Golden Wedding. Mr. and Mrs. Hoffman were married in Bloomington, Nebraska, in 1890, and came to Canada in the spring of 1903. They have five children; Mrs. Rose Estelle, and Mrs. Emi Estelle, both of Mirror, and William, Fred and Roger Hoffman, of Tees. They also have eleven grandchildren and three great grandchildren.

Their granddaughter Sylvia, 6, and great grandson, Warren Berrett, 4, presented a large bouquet of cut roses to them, from all the grandchildren.

Miss May Estelle, a granddaughter, and Miss Goldie Kelsoe sang two duets; "Put on Your Old Grey Bonnet", to which everyone joined in the chorus, and "When You and I Were Young, Maggie", accompanied by a granddaughter, Miss Ruby Willers, at the organ.

Miss Ruby Walters also played for Mrs. Fred Hoffman, who sang a solo number, "Friends Among the Gold", to those who called in the afternoon and evening.

Mr. and Mrs. Hoffman received many lovely gifts, cards and congratulations from friends.

The family gave them a lovely chime clock which was presented by Mr. W. F. Puffer.

It is enjoyable time was had by all. Friends and relations wish them many more years of happiness together.

Golfer: "If you don't stop chattering you'll drive me clean out of my mind."

Wife: "That wouldn't be a drive. It would only be a two-foot putt."

RED CROSS CELEBRATION DOMINION DAY JULY 1st

THE ALIX FREE PRESS
MIRROR NEWS-RECORD

VOLUME XXX ALIX, ALBERTA FRIDAY JUNE 30, 1939

Crop Report No. 3

(For period ending June 19th)

Issued by the direction of Hon. D B. Mullen, Minister of Agriculture.

Crop conditions in all districts of Alberta are good, with the outlook promising. In the south eastern area of the province and in a small part of the Peace River district good general rains would be beneficial, but crops are not suffering. Many districts describe growing conditions as ideal.

Showery weather has occurred throughout the province during the past two weeks, with rainfall varying from a fraction of an inch to nearly three inches in the St. Paul area where it was urgently required.

Growth of crops is strong and vigorous. In many districts despite the lateness of seeding, wheat has almost reached normal development for the season.

Seeding is completed except for the sowing of grain for greenfeed.

Pastures and forage crops are satisfactory.

Slight damage from grasshoppers and cutworms is reported from the south east corner and the Grand Prairie districts respectively.

Condition of live stock is good, with much improvement noted. Dairy production is mounting as pastures continue to advance. Poultry and bee keeping are normal.

Division No. 8 — Lacombe - Stettler — Growth conditions are almost ideal, with moisture supplies adequate and wind lacking. All seeding is complete. Wheat is from 4 to 6 inches high, with coarse grain doing well. Pastures and forage crops are growing rapidly. No damage is reported, although hail occured south of Stettler. Cattle are making rapid gains, but grasses have not been sold. There are no cases of sleeping sickness reported in horses. Swine are good; large healthy litters being reported. Dairy production is up slightly. Hatching of chicks is below normal.

ORIGIN OF THE TERM "FIFTH COLUMN"

(From Time Magazine)

You were among the first ones to use the expression "fifth column." What is the origin of the saying and what are the other four?

Answer:

Inventor of the historic phrase was Franco's General Emilio Mola. Said he in a broadcast after the fall of Toledo: "We have four columns advancing Madrid. The fifth column (sympathizers within the city) will rise at the proper time." Loyalist response: wholesale executions in Madrid. — Editor Time.

W.I. Work

The members of the Women's Institute Cemetery Committee, wish to announce that they have been obliged to hire an expensive man for the work out at the cemetary, who has made a most marked change. It is the wish of the committee that everyone interested in the work, or the cemetery at large, pay a visit out there, and we are sure they will feel repaid for their trip. signed, — A member of the Cemetary Committee.

LOST - Between Alix and Stettler 1 spare wheel (nobby tire) for 1939 Ford coupe on June 19th. Finder please return or notify Alix Free Press or Edgar's Hardware.

OBITUARY

MRS. PETER RUSSELL

Mrs Peter Russell, aged 82 years, passed away at her home south west of Alix, on June 14 She was born in the Parish of Kirtomuir, Scotland, October 8th, 1857, and married October 31st, 1879.

She came to Alberta in 1894, returned to Bigoted in 1896 came back to Alberta with the family in 1903, to the farm home south west of Alix, where she died.

She leaves to mourn, her husband and five sons, 15 grandchildren and one great grandchild.

Funeral was held on Monday afternoon at 2. p. m. to the Fairview cemetery, the Rev. L. A. Thompson officiating.

Pallbearers were her five sons: John, Charles, Robert, Peter, James and J. A. Nixon.

Many floral tributes were received.

Flewwelling and Son, of Mirror, were in charge of the funeral.

CARD OF THANKS

We wish to extend our sincere thanks for the kindness and sympathy shown, and the flowers sent by friends in our recent bereavement.

P. Russel and family.

GRAVE DANGER

Toronto — Unless Germany is kept busy in Europe and finally defeated, Sir John Puddister, vice-chairman of Newfoundlands governing commission, thinks that there is a grave danger that Hitler might strike at Newfoundland as a stepping stone to Canada. He added that every possible defence precaution had been taken against submarine attacks off the coast.

SCRAP METAL LOADING STOPPED

Work of loading scrap metal aboard the Italian freighter Dino, which arrived in Boston in ballast from Naples last week, was stopped to-day on order of the owners, Capt. Carlo Fava declared. About 2,000 tons of 7,200-ton total of iron and steel have been put aboard. Agents said the vessel would tie up here for the present.

ALBERTA DRILLING FOR OIL SETS NEW RECORD

CALGARY—Breaking all records in the history of Alberta, a total of 374,287 feet were drilled during 1939 in search for oil according to a schedule of oil wells released by F. K. Beach, petroleum engineer of the provincial Department of Lands and Mines.

On an estimated cost basis of $20 a foot, the footage drilled in the province last year represented an expenditure of 7,485,740. This does not include large capital expenditures for drilling rigs.

Nearest approach to the 1939 drilling record was the footage figure for 1929. In that year 370,597 feet were drilled. The 1939 figure includes 201,274 feet or approximately 53 miles drilled in the Turner Valley structure in the foothills west of Turner Valley. The footage was 25,891 and the footage for the rest of Alberta was 47,122.

Local Enlistments

There may be others whose names should be added to this list. If so, please report.

"And so your daughter is about to marry. Do you really feel that she is ready for the battle of life?"

"She ought to be. She's been through four engagements already.

THE VICTORIA CROSS

Last February 22 was the eighty-fourth anniversary of the announcement in the London Gazette of the institution of the Victoria Cross.

One thousand one hundred and fifty-seven men have received it so far.

The scope of the award was increased in 1911 to include Indian troops.

In 1920 women became eligible for the Victoria Cross.

Nurses of all kinds can now receive the award, and civilians of either sex regularly or temporarily "under the orders, direction or supervision of naval, military or air forces of the Empire."

The V.C. is worn before any other decorations.

It entitles a man below the rank of commissioned officer to £10 a year, with £5 a year extra for a bar.

If a V.C. holder is unable to obtain a livlihood on leaving the service the amount can be increased to £30 a year.

The award can be taken away for treason, cowardice, or felony, and it can be restored by the King.

The intrinsic value of the cross is threepence.

THE SIZE OF A

The first envelope he opened contained a money order and a letter from a former resident of the town, now a man of ninety-three years of age. He had been keenly interested in the town ever since he moved away, and had always kept up with the local news by reading the paper. His note expressed optimism in every line, and his money covered a two year renewal.

The publisher says he has stopped worrying and feels a new confidence about his business and the outlook for the world.—Printed Word.

[illegible]

God give us Men. The time demands
Strong minds, great hearts, true faith, and willing hands;
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will,
Men who have honor; men who will not lie;
Men who can stand before a demo-[illegible]
And damn his treacherous flatteries without winking;
Tall men, sun-crowned, who live above the fog
In public duty and private thinking.
For while the rabble, with their thumb worn creeds,
Their large professions and their little deeds—
Mingle in selfish strife, lo! Freedom [illegible],
Wrong rules the land, and waiting Justice sleeps.

Complaining Customer — I haven't come to any ham in this sandwich yet.

Waiter—Try another bite.

Customer (after huge mouthful) —I haven't come to any.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Fred Mattis is home on leave from Calgary.

Maynard Russell and Lee Johnson were in Calgary on Tuesday.

Mrs. H. Butchart and Mrs. Mitie Kerry were Calgary visitors this week.

Mrs. Scharf, of Chicago, Ill., is visiting with her brother, Mr. H. Butchard.

Robt. Oldring has returned home from Stettler hospital and is back at the Creamery.

The Wilton boys were home over the week end. They have joined the signal corps.

Born—To Mr and Mrs Stewart Bonham, of the Great Bend district, on June 20th, 1950, a son.

Mr. Bert McDonald, of the Mental Hospital Staff, at Ponoka, is spending his holidays at the home of his parents, Mr. and Mrs. A. McDonald.

Can you beat this? Mrs. St. Elmo Sanderson, southeast of town, had new potatoes on June 20th. Some dog were the son of turkey eggs.

S. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, July 2nd. On Wednesday of Saturday of each week, consult at Calgary office, 320 210 South-ern Building.

On Thursday afternoon a truck driving at a high speed hit and killed a horse at Gesent Bridge. The driver failed to stop and the R.C.M.P. were called.

Petty thieving is with us again. Recently a citizen of our village was awakened at 3 a.m. to find a thief making away with an auto tire from a private garage. It would be wise on the part of the guilty one to return same immediately before further action is taken.

Mr. S. Allister, horse buyer, from Montreal, is in the district and is shipping a carload of horses to Montreal. Most of these horses are being shipped from the Stettler district. The market in the east is better than it was in the spring, and heavy horses are now in demand.

A large crowd attended the Stampede at Gleichen Bridge, on June 19th. Riders took part from many points in the province. One of the riders (his name not known) had the misfortune of having his jaw broken. Jack Hill from C.P. A. C. Calgary, was in charge of announcing during the Stampede.

Many Mirrorites attended the Contest stampede and dance, Wednesday, June 19.

Mr. and Mrs. F. Southern motored to Edmonton Tuesday, June 20, where they spent a few days.

Drowning Accident

Chester Mattis, age 10 years and 4 months, of the Alix district, was drowned in the Red Deer river at the junction of the Haynes creek, on Monday, about 5 p.m.

He was in swimming with his two uncles, Rev. W. Angel, of Kinsella, Alta., and J. H. Corson, of Macleod. Mrs. Angel and her brother Oliver and sister Connie were also present.

He had been working in the hot sun that day, ate a good supper and went in for a swim. It is believed he took a cramp. His uncles noticed that he was in distress and before he could be reached he had gone down for the last time. They searched for the body and were not able to find it for about an hour.

He has been living in the neighborhood for 11 years. He leaves to mourn his loss, his father and mother, three brothers, Oliver, Elden and Fred; three sisters, Bertha, Winnifred and Connie, who are living at home on the old Kraft farm; Rev. E. Mattis, of Gull Lake and a married sister, Mrs. V. Amneon, of Sask.

George Tattlers

The Ladies Club met at the home of Mrs. Dean, on Thursday. The ladies decided to make a quilt to donate to the Red Cross. Mrs. O. Davidson supplied the entertainment after which the hostess, assisted by Mrs. F. Dowswell, served a very delicious lunch. The next meeting is to be held at the home of Mrs. V. Pilch.

Mrs. Decker and daughter, of Edmonton, are visiting at the home of her parents, Mr. and Mrs. F. Dowswell.

George and Rhoda Nein accompanied by Misses Mary Hotzler and Phyllis Phelps, Cecil Dermott and Paul Reidel, motored to Pine Lake, on Sunday. They reported quite a catch of fish.

Miss Mary Hotzler, of Tees, is visiting at the home of Miss Mary Nein.

TEES TOPICS

T. A. Cunningham, wheat pool agent at this point, attended the monster meeting of pool agents, held in Lacombe Tuesday.

The radio carpet hooked up a radio the other day and failed to get it to work properly, eventually leaving the job as a bad business, a lady neighbor switched the wires after he left and 'presto' perfect reception.

Mrs. Pinatow, of Calgary, is visiting at the home of Mrs. G. A. Pinatow. Although not related these ladies have been visiting for several years.

A carload of black cattle left the Henderson ranch last Monday to take up their quarters near Coronation. Mr. Smith, the new owner, will have to be careful during dust storms as the doggies will be hard to pull out.

All residents on 39th street have been fortunate enough during the past few months to win either a quilt or a comforter, at Ladies Aid draws or what have you. Mr. and Mrs. Cunningham had the wedding quilt brought home to them last Saturday night, completing the list.

MIRROR NEWS

Mr. J. F. Flewwelling has just returned from Vancouver where he has spent a few weeks

Several Mirror people attended the Home Guard meeting at Alix, Friday night, June 23.

Mr. Howard Wells, of Sylvan Lake, is relieving J. Gordon at the C.N.R. station. Mr. Gordon has left for Vancouver where he will take a holiday.

Construction on the telephone office is nearing completion. The office has been raised and stuccoed.

On Friday afternoon and evening, June 21, a garden party in aid of the Red Cross was held at the residence of Mr. and Mrs. A. D. MacMillan. The garden party was well attended and the sum of $35 was realized. The Mirror Branch of the Red Cross plans to hold a dance here, Thursday night, June 27, in the Grand Theatre.

Mr. Ron Retell has purchased the farm, where Mr. Hiles took formerly resided. The house is being built and conversion is well under way.

Mr. Pate, of Stewart & Pate, Stettler, will be in Alix on the 1st, 3rd and 4th Tuesday of each month at the Alix Hotel. He will look after your legal business.

A Ponderous Tome

A ponderous tome ... ranging nearly a thousand pages ... say nothing of innumerable appendices and reams of statistics, the report of the Royal Commission on Dominion-Provincial relations provides plenty of food for thought and a lot of material for discussion and it is a reasonable certainty that what it recommends in a great deal of this before its recommendations are implemented.

It is safe to say that no more important document has been presented to the Canadian people since Confederation and it requires little reflection to realize that it is high time that some of the changes recommended by Mr Bruce and his colleagues were put into effect. A bit of water had flowed under the bridge in the rapidly growing country since the date when the provinces were united in a great geographical entity. Canada by the fathers of Confederation in 1867.

Though the fathers of Confederation can be credited with a great deal of wisdom and some foresight when they subscribed to the Dominion and the provinces their several spheres of jurisdiction even they could not have been expected to predict the immense growth, the great changes, the enormous diversity and scope of problems which would come about in less than three quarters of a century. The truth of the matter is that the country has outgrown the rules and regulations laid down for its guidance and the conduct of its affairs, though those rules and regulations were admirably suited to its needs at the time they were formulated.

As a result of these great and in many cases unpredictable changes, and of the changed conditions under which the national, provincial and municipal governments have to operate to-day, the fathers which laid the fully outlined in 1867 are likely to make the full growth adult of to-day. Hence new cloths must be cut and fashioned to suit the requirements of the present.

* * * *

Favorable Impression

While it is yet too early to pronounce any conclusive opinion on the recommendations of the Royal Commission as a whole its generous and appreciative spirit has already created a favorable impression in the minds of many by those who might be expected to be concerned to give an opinion on its lengthy subjects and based merely on newspaper summaries of the contents of the document.

Certainly there can be no two opinions as to the recommendation that the Federal government assume full responsibility for unemployment relief though some can see no reason to question the decision that this responsibility belongs to the employment, as the depression has shown, has become more and more multiplied enormously during the depression years. It can be safely assumed that strong pressure will be exerted to secure a greater measure of federal aid, if not full responsibility for the unemployable on relief.

On the first appearance of the summary of the report municipal men were also inclined to look askance at the absence of any definite recommendations for relief from excessive municipal indebtedness. It may be presumed however that the Commissioners took the view that the time was not ripe for a body dealing with Dominion-provincial relations, since the municipalities are creatures of the respective provinces which set them up and that matters of a matter which is the provinces should deal with themselves. It would also seem that fact that the financial relations between the municipalities and the provinces are so variable in different parts of the country that the Commission should not delve into this subject beyond making a recommendation that the provinces assume a greater measure of control over municipal finances.

* * * *

A Secondary Function

While, as already stated, it is high time that the country receive such a report as that just assembled by the Bruce body and that drastic changes in the constitution in the direction of better adaptation of government to the present day requirements of the country and its constituent parts, it is unfortunate that it comes at a time when the nation is all but energized to the prosecution of a war, which so evidently to be waged to a finish.

The time, consideration of such matters, while such important issues were in hand as recommended by the Royal Commission are not to be treated lightly, in fact, deserve and should have the most serious and thoughtful consideration before action upon them is taken, if time is taken by the national governments and those of the provinces in the meantime at the present time it might detract somewhat from the country's war effort. On the other hand the fullest relationships between the Dominion and the provinces are too important to be dealt with hastily or without the fullest consideration.

In view of the fact that the country is now engaged in a struggle for its very existence, it may be necessary to defer action on the report until such time as normal conditions can be given such problems without running any risk of interfering with a matter of even greater importance.

Appeal For Funds Missed This One

D H Gibson of Toronto Dominion President of the Navy League of Canada, has issued an appeal for funds to carry on the work of educating men of the navy and the merchant navies and the tankers, we drive on the unconsidered mercantile marine will be launched ready, and protect the hosts of out the latter part of September Oth- chiers with anti-aircraft guns. He also said the appeal will be made to Canadians whether, has arisen to lay Canadian on behalf of the work in connection with the recreation of the small British navy also in Canada.

Thousands have found it helpful in relieving such distress. Dr. Pierre's Compound is made especially to help tone, build strength. Sold by druggists everywhere. Send 10c for trial package. Write Dr. Pierre's Clinic, BUFFALO, N.Y.

Air Pilots

Fighting Airmen Said To Usually Have Blue Eyes

Good fighter pilots in the air usually have blue eyes.

This is not a matter of mere opinion, but scientific tests, carried out with the object of finding the most fighter pilots have proved it.

All pilots must be given good eyesight tests and must pass a strict medical examination. This also tests for speed whether the applicant can with stand the stress of flying at an altitude and all climates.

Eyesight must be first class with correct vision, and with colour balance.

The rare nose and throat examination also has a severe "good hearing a reasonable variations in the sound of the right ear may be important and a pilot must be able to hear messages coming through his earphones under any conditions.

An Interesting Test

Experiments To Determine Whether Bird Wishes Possess Feeler When Cold

Annual Meeting

BUFFALO LAKE LIVESTOCK SHIPPERS ASS'N.

The Seventeenth Annual Meeting of the Buffalo Lake Live Stock Shippers Ass'n held in Mirror on Friday, June 7th.

The President, Mr. J. W. Hume, in the elected chairman for the day.

Mr. J. D. Murdoch, Mr. H. M. Purdy and Mr. Geo. Wheeler were chosen for the resolutions committee.

Minutes of the last Annual Meeting were read and passed on the motion of ...

The financial statement was next read and ... showed with explanations by the president and manager. The manager stated that the association had sands 1,000 head of livestock more this year than last. The motion of Mr. Geo. Bell the statement was accepted as read.

Mr. H. McDonald gave his annual report explaining what ... to the ... by the ... meeting board and called on ... to report. He began by ... the cooperatives as the ... the membership the ... that speaks ... He also stated that the Minister of Trade and Industry Hon. E. ... Manning had instructed him to call his shippers that the ... brandering act will be kept on the Statutes of the Province, and that the Government will ... all in their power to implement the act as soon as conditions will allow.

The executive were instructed to procure copies of a pamphlet entitled "To All Big Producers" put out by the Blind man Valley Ass'n. a copy to be sent to all producers in this district, more that you get ... work, ask your local shipper for a copy.

The following 2 resolutions were moved by Mr. J. D. Murdoch, 2nd by Mr. H. M. Purdy, were carried unanimously:

1st Resolution:

Whereas: The British Empire is engaged in a desperate war against the forces of Darkness, Hate and Greed. And Whereas, it would appear that it will require the combined effort and resources of all the people of the Empire to carry the war to a successful issue. Therefore be it Resolved, That we the members of the Buffalo Lake Farmers Co-operative Marketing Association in convention assembled hereby pledge the Empire our willingness to make all possible sacrifice to bring the conflict to a successful end.

And be it further resolved, That we fully expect our Dominion and Provincial Governments to take every precaution necessary to see that no person, firm or corporation shall be permitted to profit financially from the sacrifices of agriculture nor any other class of society. For if such safeguard is not strictly provided and we are victorious at arms we will have lost in the struggle the very ideals for which we are prepared to fight to the finish.

And be it further resolved That a copy of this resolution be sent to the Prime Minister of Canada, to the Premier of Alberta and Hon. E. C. Manning, Minister of Trade and Industry for Alberta.

2nd Resolution:

Whereas: The price spreads on all hogs other than select bacon which are arbitrarily set from time to time by the Packers without consultation with the producers. And whereas such cuts are not uniform on the various markets of Canada and have no relationship to the value of the animal as the cuts are on a dollars per cwt. basis instead of a percentage basis.

And whereas: The cuts in effect in Alberta at this time on certain hogs are such as to be very near confiscat ry on and in our opinion entirely unwar-

...ted and ... to protect the ...

Therefore be it resolved, That we ... to request the Honourable Trade and Industry ... to urge the Live Stock Board ... to ... manner as through its ... to ... this whole ...

And be it further resolved, That we ... every support and assistance ... to ... in ... toward such an ... Next ... annual meeting ... to be held in Alix.

RED CROSS

Come out and help your ... on Monday, July 1st. Red Cross ... Day, at the Fair ... Alix.

Come out and have a real ... time. Driving exhibitions, ... ball, softball, foot races for ... and girls, races for the grown ups, bicycle races for ... and girls races for the ... decorated bicycle, comic or ... costumes, tug of war, if ... teams enter; tractor races, ... your tractors out, slow ... race, etc.

Ice cream, soft drinks, hot ... refreshments of all kinds ... can be got on the grounds.

Finish off the day by taking in the big dance in the Legion Hall at night.

The Red Cross needs your ... and all proceeds from this ... will go ... Come and help the ... Funds.

Get your entries in now to ... Jack Tebbutt, Floyd Page, Bob ... Whitfield and Len Baldwin.

Navy League of Canada

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of sailors of the merchant marine and their dependents, maintaining sailors' homes and institutes in our large Canadian ports from coast to coast and looking after the welfare of the seamen when ashore; training boys and young men and helping to make better Canadian citizens of them The tribute of Alix amounted to $12.00. Alix $15.00 to this cause, in a recent campaign here, conducted by Fred Hooke, organizer of the Alberta Division, 1107, Lilli Avenue West, Calgary, Alberta

HAYNES

At the dances held in the Community Hall, on Tuesday of last week, the supper was sponsored by the local branch of the Red Cross.

The June meeting of the Ladies Aid took the place of a cleaning bee at the church, and after a potluck dinner served to the home of Mr. and Mrs. Sherburne for the business meeting and the date of the annual picnic was set for July 11th, said to be held over the home of Mr. and Mrs. T. Ralston.

Edmonton Exhibition

Hitch your holiday wagon to the Edmonton Exhibition, and join the thousands of holiday makers who are coming to Edmonton for the summer fair which opens on Monday, July 15th next.

During this week of outer ...ainment and education you have ... chance to recoup and the easiest way to start this economy is to save 50 to 50 by ...paying your admission ticket's in advance at the reduced rate of 4 for $1.00. Agents are selling these tickets in every town and village in Northern Alberta.

More than 300 horses, the fastest performers in Western Canada will be on the race track for a six day meet. The finest livestock in the west and from the eastern provinces will be on view in the livestock rings.

The grandstand concerts provide show ever staged on an ...pecialty platform will be presented in "Flying Colors" a gorgeous stage production, glittering scenery and with ... internationally known vaudeville, radio and operatic stars will hold the stage.

Basketball and horseshoe pitching competitions are thrown in for good measure. In addition there will be a marvellous Indian Exhibit, and not the least interesting will be the Machinery and Industrial Exhibits.

Single fare return tickets will be available on all railways and bus lines, so plan this year to attend the Edmonton summer fair for six days and nights of action, thrills and fascinating entertainment.

VOLUME XXX — ALIX ALBERTA FRIDAY JUNE 30 1939

TOTAL War

New and tragic meaning has been given to the phrase "total war" by the recent march of events.

Millions of Hollanders, their homes in ruins, their parents, friends and children dead, now know what "total" war means.

The citizens of Oslo, ground under the heel of a barbaric conqueror, know what total war means.

The men of Belgium, their homeland overrun by the tanks and flying columns of an implacable foe, know what total war means.

Our own fighting men on land and in the air—face to face with the monster of force the twisted mind of Hitler has created they too know what "total" war means.

We women of Canada living peacefully, and going about their accustomed tasks, appreciate the gravity of the hour—how filled with destiny are the days that lie immediately ahead?

This is indeed a "total" war. It is a war not of arms, navies and air forces alone. It is a war of whole peoples, and to wage it successfully it is necessary that the total resources of our nation be directed to what must be our one consuming purpose—to win the war.

Today a means has been provided whereby everyone in Canada, regardless of their station, can do his bit to further this great crusade.

War savings certificates now being offered by the Dominion Government enable the masters of Canada's wealth—a small fortunate enough to be first to help the Dominion to make a direct and continuing contribution to Canada's war effort.

To buy War Savings Certificates is an investment in patriotism—an investment in our own security and freedom—an investment guaranteed by Canada herself.

It is our plain duty—yes, a privilege to—to buy War Savings Certificates. We too can serve by saving.

FORMS OF GOVERNMENT APPLIED TO FARMER

So-ialism—The farmer has two cows. He keeps one and gives the other to his neighbor.

Communism—The farmer gives both cows to the state, who gives him a small part of the milk.

Fascism — The farmer keeps both cows, gives the milk to the state which lets him buy it back.

New Deal— The government shoots one cow, buys the milk of the other and pours it down the sewer.

Technocracy — Government shoots both cows and manufactures canned milk.

Nazism—The government shoots the farmer and takes both cows.

Capitalism — The farmer sells one cow and buys a bull.

Social Credit—The government shoots the bull — then blames the stockgrasher.

PUBLIC MEETING

To Discuss Home Security

Friday, June 21st, assembled in the Legion Hall was a large number of citizens of Alix and surrounding districts, representing fully the cross section of western Canada people.

On the platform was the Hon. Irene Parlby, J. B. Mackie, (of the village teachers), Mayor Bainbridge, D. B. McMillan, M.L.A., and other persons noted for their zeal and capabilities.

Officiating at the piano was our own Mrs. Cormack, noted for her sacrifice to welfare work and public duty, bringing to bear her talents as secretary of Alix Branch of Canadian Red Cross.

The meeting was presided over by Mr Len Siddons and recorded by our confrere Mr Talpash.

The meeting was opened by singing "O Canada". Mr Siddons then introduced the subjects and objects of the gathering.

Mr Mackie spoke with his usual practical application of the subject matter, [illegible] well noted.

[illegible] gave us a running picture of the things she had seen in France Belgium, Holland, Denmark, Norway and Sweden in her official capacity as delegate to the League of Nations. The happy and advanced peoples, contrasted to their present plight under the heel of a Nazi dictator, our passive the horrors of the Huns from Mongolia. Closing on her exhibitions of sense and exhorting us to renewed duty to the last dollar and life itself that free parliamentary government and the right to prosperity and happiness culture and the Christ spirit should not perish.

Capt Batchelor exhorted us to duty, recounted some of the horrors of the great war that came under his personal observation, sweat, blood and tears, pictured the vulnerability from East, West and North of our non-protected shores examined our potential enemies and our internal enemies, exhorted us to duty as never before to the best cause of material and physical effort stressing the dollar, and moved the Dominion Govt. be petitioned to go the limit without stint or favor.

Mr McMillan then spoke. As the fly in the ointment of the apothecary sends forth a stinking savor, so likewise does political crowds introduced at meetings composed of cross sections of a community proper, called together for a purpose of co-ordination and unity.

We have every respect for the other fellows political view point in it's time and place. It is just too bad that it is typical of certain groups of political parade (we cannot believe that all who applauded approved!) that they must try to cram down the other fellows throat their unique so-called philosophy—an economic theory that has no champion in any body of competent jurisdiction in the English speaking world, that was on the same day voted down by the Canadian parliament 174 to 17, by a government holding the greatest mandate ever accorded a parliament in the history of Canada.

The founder of this so-called economic theory — as well as it's leader in Alberta, cannot be induced to lay their cards on the table and say this is the what and how of it. We stand or fall on the issue.

RURAL RETAILER CAN HOLD [illegible]

Small town business men contain a good trade hold customers, despite increased competition, by neat and efficient store arrangement, regular advertising and personal relations with his customers, according to Robert V. Mitchell, of the University of Illinois college of Commerce.

Mr. Mitchell, whose recently completed study of the small town business situation included interviews with merchants of 300 stores in 72 Illinois cities and "there is still opportunity for success in retailing in a small community."

While there has been a "decided shifting of retail trade away from the small villages to the larger trading centres," he said, "the fate of the retailer is not predestined." Stores with good appearance and good advertising, with managers who establish personal contacts with their customers succeed where others do not, he reported.

"The personal relation between the owner and customer is one of the most effective tools of the village merchant," Mr Mitchell said. "The owner is in a position to know his customers and their wants. He can learn their individual preferences of his customers and thus serve them better."

THOUGHTS ARE WONDERFUL THINGS

Thoughts are wonderful things,
For thoughts have wings.
Oh, thoughts are wonderful, wonderful things.
Thoughts have power, thoughts have sense,
Loving thoughts bring a recompense.
Thoughts bring health or wealth or love;
Thoughts bring Beauty from Heaven above.
Perfect Thoughts bring Perfect Peace;
Our joy and happiness increase
With Perfect Trust. So, guard we must
Our words by day, for what we say
Bring thinking tonight before our sight,
Then hate or joy or sorrow, tomorrow
For thoughts have wings,
Oh, thoughts are wonderful, things.
Thoughts are deep, they haunt our sleep,
Making us sad or making us glad.
Thoughts are our Messengers, swift are their wings.
Oh, thoughts are wonderful, wonderful things.

FATHER

What stone's forerunner in life's storm and strife,
And words of its worst knocks for you
Who sacrifices his own cherished dreams
That you might to success win thru.
Father, with hair fast graying;
Father, with eyes grown dim,
For your happiness and welfare,
There's nothing too great for him.
Who shoulders life's heaviest burdens
To spare you a cumbersome load
Who's always ready and willing
To lend a hand o'er life's hard road,
Father, with shoulders stooped low;
To save you from disappointment
The e's nowhere that Father won't go
And what is a father's recompense
For all his worry and fears
For you throughout those years?
Oh, not disgrace and not sorrow
Could you bring him honor and joy?
Twill make all his labor worth the striving.
That pride in his girl and his boy.

DEMOCRACY FUNCTIONING

(By J. Bruce Drummond)

"The time has come" when Americans are being called upon to pay their back dues to Democracy. The time has come when the first thought of every American must be not of the rights which he receives from his country but of the duties which he owes to his country. The time has come when there must be such degree of national unity national discipline, national self sacrifice that the United States can command whatever strength it needs to guarantee it safety.

The response is already evident. It is evident in the capital. It is evident in the country. It is thrillingly apparent that the American people, quickly sensing the crisis, are ready to perform the tasks which are necessary in order that a free people may be united and united people may be strong.

Democracy is functioning.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Bn. to Mr. and Mrs. R. B. Patterson, of Amisfield, at Alix, on July 2nd, a son.

Born—To Rev. and Mrs. E. L. Miller, of Dunbarton, at the Dunbarton Nursing Home, on June 30th, 1940, a daughter.

Mr. Fair, of Bennet & Fair, Stettler, will be in Alix on the 1st, 3rd and 5th Tuesday of each month, at the Alix Hotel. He will look after your legal affairs.

Lou Lyle returned from Edmonton on Monday. While there he offered to enlist in the British Navy but was turned down because of defective eyesight.

The new Whitney theatre has been opened in Bashaw. Beginning this week regular shows will be held on Friday and Saturday evenings. We wish "J. M." every success in his new venture.

Mr. Geo. Bell, Mirror, was successful in winning the 500 lbs. of Bar-Grain Hog Supplement given in competition by the Canada Packers & Buffalo Lake Co-operative Shipping Association, for the largest percentage of baby pigs shipped through the Mirror branch of the association for the past six months.

Two residents of Bashaw, Pius Wilhauk, Russian, and Rees Vaughan, British born, were both tried before Magistrate Roberts, on a charge of making subversive statements prejudicial to the safety of the state." The first drew nine months and the other a year at the Fort. Neat sympathizers will do well to think twice before they speak.

An unusual sight was witnessed on main street last Friday morning. A flock of sparrows chased a weasel up and down the street. The weasel would at times a hole to hide in and about 20 sparrows hovered over him and kept him on the jump. He finally dodged into the telephone building, presumably for the purpose of phoning Hitler or Mussolini for help.

Alix celebration of Dominion Day was not quite up to expectations, as there was too much competition in the district, but a fair crowd gathered at the Exhibition grounds. The day was fine, with a nice breeze circulating. The baseball game was postponed, and drinks disappeared by the gallon, and the cash was in good demand. The reports on the receipts have not been handed in yet, but will be published later.

A business man asked us where all the money has gone to. He reports very little money in circulation. The ready money is all pouring into Edmonton and Calgary where the government has thousands of men in training. Edmonton and Calgary also has new money coming in as aviation schools are located there, along with other training quarters. Out in the country we are missing most into the cities, where they spend their pay allowance. This cuts down our payroll. This is also a time in the year when our farmers are running short and are asking credit, but is refused them as a result of the war, are tightening credit. As a result of this new condition, currency is becoming scarce in outlying districts. We do not think there is much hoarding.

CORRESPONDENCE

A CORRECTION

Editor Free Press:—Would you kindly make a correction in your paper. The proceeds from the Greenley Lake Amateur evening amounted to $33 (thirty-three) instead of $30 as you had it printed in your paper last week. Thanking you,

Stella Brigland

WEDDING

MARSH—RASMUSSEN

Stettler United Church was the scene of a quiet but pretty wedding Sunday morning, June 23rd, when Mary, only daughter of Mr. and Mrs. J. Rasmussen, of Alix, became the bride of Bert Marsh, only son of Mr. and Mrs. R. C. Marsh, of Bothe. Rev. T. R. Davies-Jones performed the ceremony. The bride, who was given in marriage by her father, looked charming in a high necked gracefui gown of white satin cut on slender lines with tight bodice and tail skirt. Her embroidered silk net veil was held in place by a circlet of orange blossoms and she carried a bouquet of calla lilies. Her bridesmaid, Miss Dorothy Rathbone, wore a charming blue marked front of white sheer and carried pink roses. Mr. Ernest Rasmussen supported the groom.

Following the ceremony, a reception was held at the home of the bride's parents, Mrs. Rasmussen, the mother of the bride, wore a dress of figured navy silk with a white hat, and Mrs. Marsh, mother of the groom, was arrayed in navy crepe with a hat of black trimmed with white flowers.

Later in the afternoon the happy couple left for Edmonton, where the groom will attend summer school.

For travelling the bride was becomingly attired in a smart grey suit with dusty rose blouse and accessories in the same shade. Latter in the summer they will return to the Stanton district where Mr. Marsh is teaching.

Date For Dairy Pool Field Day

In accordance with a decision of the Central Alberta Dairy Pool Convention, a field day at which a large attendance of farm people from a wide area in Central Alberta is anticipated, will be held next month, on the grounds of the Experimental Farm, Lacombe. The date has been set by the Board as Tuesday, July 23rd.

MIRROR NEWS

On Wednesday, June 26, Mr. and Mrs. George Thomas board their motor lorry to Rimbey, Rimbey, where they will visit relatives. Roy Thomas is running the store in Mr. Thomas' absence.

On Wednesday, June 26, the General Shop store taught by G. McLeod, held a display of articles made during the year. About 76 articles were exhibited. The girl's sewing class was taught by Miss E. H. Waite, and a display of their articles. A prize for the best exhibit will be awarded to Barbara Jean McKinley.

Miss R.B. Watts is visiting her brother, Inspector Watts, of the R.C.M.P., Edmonton.

Miss M. Edmonds, teacher of grades 3 and 4, has returned to her home at Hespero.

Miss A. Sturgess has returned to her home in Bashaw.

Many Mirrorites attended the sports days at Alix, Bashaw and Dalhousie, July 1st.

Miss D. Boyer, of Edmonton, is visiting her mother, Mrs. A. M. Boyer, and sister, Mrs. H. Smathers.

On Saturday, June 29, the Ladies Aid held a successful tea and Home Cooking sale.

Mrs. N. Jaques left Thursday evening, June 28, for Ottawa, where she will join her husband.

There are four spaces open on our second team," says a farmer.

This is the greatest exposure to days of sunshine.

The Mighty Atom

One can imagine with what dismay producers of power of all kinds and from all sources must have read the recent announcement from New York of the isolation in a laboratory testtube of a new chemical substance, one pound of which, to quote newspaper description "is said to be capable of yielding the power output of 1,000,000 pounds of coal or 1,000,000 gallons of gasoline."

Significant, indeed, of the potential destructive power and the use to which it might be put by the Germans, if they can perfect it, is the name which has been given it—the "U-235" it that were not sufficient to arouse dread, the New York Times, which first announced the discovery, declared that the German government was aware of the research in this field being carried on in the United States and has instructed all its property custodians to commence work on the problem of improving the process, "one pound of which is stated to have the explosive force of 15,000 tons of TNT." The German custodians to this field have been told to detail a certain number of experts themselves to the task alone, says the New York paper.

Despite, too, to the method of approaches of U-235 in the process of developing explosives. All that is necessary is to immerse some of the new isotope in cool water when it will release energy in the form of steam. The steam can be used to drive the generators of anything from a long ocean liner to a small motor car. Used in connection with U-235 it will develop steam and all that is necessary to stop it is to cut off the supply of water

* * *

For Good Or Evil

While the substance, U-235 has been discovered for some time, it is only quite recently that scientists became aware of its immense possibilities for good or evil, according to the purpose to which it may be put. As the story goes, it was only in February that a professor at the University of Minnesota, was successful in isolating "a minute fraction of a gram" and subsequently a professor at the University of Columbia subjected it to tests with an atom-smashing machine. Since then the yield has been increased 200-fold, indicative of possibilities that a process for making the substance in large quantities may soon be found.

The immense commercial and industrial as well as a wartime potentialities of the U-235 can be easily understood from the fact that 25 pounds of the substance, practically available in many parts of the earth, is capable of driving a battleship or a passenger liner around the ocean "for an indefinite period without refuelling."

While the destructive use of such a substance as U-235, when used as a weapon of war, would be so terrific as to beggar description, the benefits economic efforts are almost beyond the imagination of man. So use to the arts of peace would be so beneficial to mankind as to be revolutionary. It would be the means of providing power for industry at a cost so low as to be unheard of before, almost akin to perpetual motion.

Applied to the motive power of automobiles, it is frankly nothing out for a 1941 around the world in a steam driven automobile with a fuel supply of power not much bigger than a cigarette case, and with a cruising radius of a dozen times as under the hood's nest of the car. All that would be necessary to keep moving would be to occasionally renew a small tank of water at ordinary temperature. Once would be the necessity for a refuelling stop, or 500 miles to instruct a gasoline station attendant to "fill 'er up".

* * *

Might Destroy Civilization

But when and if such a force, if available in quantity, were applied to the work of destruction as contemplated in the kind of warfare being waged by Germany against the Allies, the results would be too terrible to contemplate. They might be expected to rival the oft-related but mythical death ray.

In view of the ruthlessness of the Hitlerian method of conducting war on mass scale against open cities, and the German policy of slaughtering thousand women and children on wholesale scale, and of wiping out densely populated civilian areas by the square mile, it is not surprising to hear that the German military machine is interesting itself in the new discovery and that the assistance of that nation have been ordered to be placed at the disposal of the Germans in the interest of further development of U-235.

In the hands of humanity and of the very existence of civilization it is to be devoutly hoped that the development of U-235 as a practical and feasible source of power will be stayed until the Allied forces have prevailed and the world has once again been made safe for the law-abiding nations of the globe.

God forbid that the mighty atom should be used to destroy democracy

Increased Interest

Shortcomings reported in the annual field of agriculture and the related industries is now having very beneficial application. Horticulture was developed fast in connection with home medics, and, in spite of the fact that out of the hundreds of species of insects known to science only a very few are recognized as causing disease, bacteriology is still considered in the day of the Canadian flora.—Dr. J. M. Swaine, Director, Science Service Dominion Department of Agriculture

Two Good Reads

When Sir Richard joined the Boy Scouts he thought he'd go out better than the others and do two good deeds a day.

So he had a look round to see what he could do.

First, he found a little mouse squeaking in the mousetrap and he took it out.

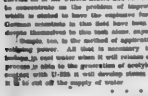
Good deed No. 1.

Then he found the cat was hungry, so he gave it the mouse.

Good deed No. 2.

Despite war, students of 34 nations are studying at the Sorbonne, University of Paris, including Belgium, Canadians, Turks, Chinese, Mexican, Yugoslavs and Brazilians.

The amount of water that an ox and is dependent upon its pasture



Does Not Use Them

Germany Has Never Made Anything Out Of Her Colonies

The idea of a poverty-stricken and over-populated Germany was opposed by Dr E. G. Pleve, geographer of the University of Western Ontario, when he spoke at a dinner meeting of the Lions Club at Stratford, last.

Dr Pleve declared that a myth had grown up that Germany was over-populated. It was not a question of the number of people to the square mile, but a matter of how many people to the square mile that a country could support. Germany, with a population of 380 to the square mile, had stressed the overpopulation claim so long and steadily that it had come to be an accepted fact. But despite claims, they moved to take over two countries, Holland and Belgium that were about twice as densely populated.

After adding whether Germany ever thought of Canada, the speaker said that Germany had never moved over made of Southwestern Ontario that was made in 1937 by a German geographer from the University of Kiel, and in the document that it was a colonization plan. The geographer turned out afterwards to be a high ranking officer in the German army.

The idea that the Germans need colonies had been exploded. They did not know anything with their colonies when they had them. Germany's colonies were a drain on the German exchequer. Figures had shown that an average of some 25 persons per square mile could be supported from Germany to her colonies

SELECTED RECIPES

MADE IN THE KITCHEN

Like a guest of honor, trusty bran muffins are ready to step right to the picnic lunch. Each one is bound in its own paper liner, packed snugly and wrapped in gay wax paper. Every thing about the cooking and what better place to do that than right in the kitchen. Cooked over the open fire burgers take first place in appetite attraction. Let the day's outing and the bran content make a new high in health food and contents. They go in the lunch basket with add a continental flavor to your luncheons.

Bran Muffins

1 egg
1½ tablespoons salt
½ teaspoon pepper
1 cups milk
1½ cups bran
1 lb ground round steak
2 tablespoons chopped onion
1 tablespoon chopped green pepper
2 slices bacon

Beat egg and add salt, pepper milk and bran. Mix thoroughly with onion and parsley. Add the steaks and bacon and mix well. Form to cakes about inch thick and combine and one inch thick. Wrap each bacon around each cake and fasten with skewer then broil over hot coals degrees F for 20 minutes or broil for 20 minutes in the oven. Serve hot. Yield: Five servings.

Note: Half cup grated cheese may be sprinkled over top of Bromburg cakes just before the last minutes of broiling.

Spanish Bun

1½ cups sliced onion
2 tablespoons fat
½ cup chopped green pepper
1 cup canned tomatoes
1 teaspoon salt
½ teaspoon pepper
1 teaspoon Worcestershire sauce
1 cup stuffed olives sliced

Brown onions lightly in the fat. Add green pepper, tomatoes and seasonings. Simmer until mixture thickens. Stir in olives and Pull. Thoroughly Yield: Three cups sauce.

Idea Under Consideration

Manitoba Government Plans Trapping Of Muskrats To Help Industry

Trapping of muskrats and a half muskrats annually in the Saskatchewan River delta area and Lake Winnipegosis is the object of a 10-year program of development under consideration by the Manitoba government.

Premier John Bracken states that such an industry would provide a payroll for the community adjacent to The Pas exceeding $2,000,000 a year. The pelts there are worth more practically no muskrats in this area. It is now estimated that as a result of conservation work done, the muskrat population before present trapping season will exceed 200,000," states Mr. Bracken.

Was Once A Joke

Now Process Of Inside Proofing Of Rhodes Light Suits Started

The Christian Science Monitor credits an international story on how the process of treating cloths light suits on the inside was discovered. The problem was a "pig" force of research assigned new apparatus in one big electrical equipment company. One researcher failed to realize that he was being hoaxed by a fellow-worker with a grouch that any day he took his oiled coat-suit only to the finished tailor's dough.

Ask for BEE HIVE

Vast Picture Crowds

Nine Years Attendance In United States Has Been Billions

Wondering at the size of motion picture audiences at this late day it almost like trying to decide whether the universe has a place to end, or why. Nevertheless there is a film for the imagination in the neighborhood of answering the question of the largest of its kind in the history of the world.

Something between eighty million and ninety million people go every week, the public records show, to and in the course of a week that means half a billion persons about four times the present population of the country a fully stupendous figure But try a moment the specific number of people people a day day after day for six weeks or single the size of attendance the more impressive —New York Times

Had Something To Say

Prospero Center Had Great Opinion Of His Radio Address

Malcolm D. Speer in the Detroit Free Press said years ago when the radio was young there was one man who had something to say and he said it fairly well. A pompous man of the old school who considered to make the speech of the day He was all a-titter because it was to be a broadcast address and I would read to a address to make sure that it came up right and would go over the air I did not have to read it all I had to do was hold it to my ear and listen to it

This my dear sir I told him, would take an hour and a half if it were cut in half And you have only 15 minutes before the microphone

He was stunned I can't, he insisted, reduce that down to 15 minutes

Lawson took only 110 words for it's a Gettysburg Address," I reminded him.

I know that he sputtered, "but then, damn it all, don't you see, I have something to say!"

Old-Fashioned Spelling Bee

Was Good Discipline With Plenty Of Fun Thrown In

The Guelph Civil Mercury, says It is probably true that our grandparents were better spellers than we are They were drilled in the old-fashioned way being obliged to stand up and spell out words announced by Headmarks in spelling classes conducted half of a day a week to get spelt "homorrhage" with one "r" the chances were they never forgot it not the way it was spelled The old-fashioned spelling bee has largely vanished It is good the custom with a lot of fun to boot.

Record Cyprus Production

Deposits Are Found In Many Sections—Gold Is Reported

Gypsum production in Canada set on all-time tonnage record in 1939, when the output amounted to 1,000, the tons valued at $1,922,987 as against 1,009,799 tons valued at $1,-937,386 in 1938, according to the Department of Mines and Resources, Ottawa.

Canada ranked 5th among the world's gypsum producers during 1939, contributing 3.4 per cent of the world production and 35 per cent of total of the British Empire. The Dominion is fortunate in having extensive deposits of excellent grade gypsum, favourably situated for commercial exploitation. Nova Scotia is the largest producer, and is followed by Ontario, New Brunswick, Manitoba, and British Columbia. The materials produced are the hydrous calcium sulphate, commonly known as gypsum, the partly dehydrated material known as plaster of Paris, or wall plaster, and the anhydrous calcium sulphate known as anhydrite.

Prior to 1927 the Canadian production of anhydrite was exported principally for use as a fertilizer for the peanut crop in the Atlantic seaboard states of the southern United States, but there has since been an increasing market for this material in Britain, where it is used for the manufacture of sulphuric acid, ammonium sulphate, calcium chloride and sulphites. Owing to the war, overseas markets have been closed, but there is a possible that an industry will be started in Canada in which anhydrite will be used in the manufacture of products similar to those being exported to England.

The use of gypsum products in the building trades has made rapid progress in recent years because of their high fireproof, durability, fire-resisting, and insulating properties. Gypsum Tiles, wallboards, block, and special insulating and acoustic plasters have been developed.

* * *

Efficiency experts say that happy maids do more and better work than those working under bullying or nagging supervisors. Neglect of the working time of unhappy staffs is wasted, they claim.

England imports more eggs than the rest of the world combined. Its main sources of supply are Australia, Russia, Denmark, Ireland and the Netherlands.

CHAPTER V Continued

No Pullovers

Once or twice he had looked at his watch, a little furtively she thought, yet it seemed that he was prepared to finish any appointment he had made, for he lingered over his coffee until she brought it. Happy evening to an abrupt close by getting on her gloves As they were driving back to her lodgings

"I haven't asked you very much about yourself That is the kind of impertinence which I always warn me," he said, "but I gather that you're an unmarried lady—and unengaged?" he asked suggestively

"I have no followers," she said without smiling, "and I hope that condescension will offer no excuse for impertinence. Continue your stationary"

He chuckled for fully a minute

"That's good," he said at last "Philandering constabulary is taboo into me for good and sometime You're the first woman—"

"Don't!" she warned him.

"I won't disappointed, I expect of something bored," she said. "It's been a long day for me and I'm tired to bed."

"Then," suggested Jim

Sir Joseph shook his head.

"If you can't spend with a rich old man, however unsightly he may be—and, as a matter of fact, he's extremely good looking—you're very perfect to write about. Good night!"

Jim Carlton went reeling all the way to Whitehall Gardens and that thinking sense of amusement still lingered with him when he came into his Joseph Layton's study.

The words "Joseph Layton" are the on all sorts party pamphlet, but he was the Foreign Secretary, a big figure in politics and society fame, and possibly the most controversial politician in Britain.

He looked up over his big-horn-rimmed pleasure as Jim came in with a little bow.

"Sit down, Carlton." He blotted the letter he had been writing, inserted it in a voluminous envelope, sealed an envelope, and addressed it with a broad sweep.

"I've just come back from the House. Did you call before?"

"No, sir."

"Though I"

He settled himself more easily in his padded chair, put the tips of his fingers together and again scrutinized the handsome young gentleman.

"Well, what are the developments?" he asked, and Jim saw then the letter was sent me. Carlton—very curious indeed. You interrogated them?"

Prepared For A Killing

"Some of them, sir," said Jim. "A great deal of the correspondence of the Sixth Syndicate gave through Mr. Lawrence. But there's enough there to show that Sixta is preparing for a big killing I should imagine that every big brokerage house in the world has received similar instructions."

Sir Joseph unbolted a drawer of his desk, and, putting it open, took out a number of sheets of paper fastened together by a big brass clip. He turned the leaves briefly.

"I suppose this one is typical," he said.

It was a brokerage letter to Rais Syndicate Wall Street

"Be ready to sell for 15 per cent drop under mentioned securities

Here followed a long list that covered two pages of writing and against each item a number of hundreds.

Yes, said Sir Joseph stroking his little white beard as he thought fully "Very peculiar very remarkable Are you sure in your letter there are the very shares which would be the very first to feel the threat of war But when on earth are you going to fight? I've been waiting—you never under The Munich question has been settled for a year. Your men sponsor in the House last night?"

Jim shook his head.

Upon my word said Sir Joseph I think I was very careful to avoid anything by unjustifiable optimism, but some king the world from China to Peru, I can see no single sign of the decision

Is there any trouble with Austria I ask I seem to remember we had something about they mandate in Africa

Sir Joseph smiled

Viewpoint

"You can see Austria and Germany as a possible source of trouble he said "We shall have our opinion of Germany, but the real difference between American and British statesmanship is that the difference between the Conservative and the Liberal mentality—the Conservative is the temperamentally We shall never be pessimistic, we shall never be more than the Republicans of the United States will be passionately friendly with the Germans. The real difference between us is solely one of point of view."

"Precisely," suggested Jim

Sir Joseph shook his head.

"If you can't approach with a rich old man," however unsightly he may be—and, as a matter of fact, he's extremely good looking—you're very perfect to write about. Good night!"

Jim Carlton went reeling all the way to Whitehall Gardens and that thinking sense of amusement still lingered with him when he came into his Joseph Layton's study.

The words "Joseph Layton" are on all sorts party pamphlets, but he was the Foreign Secretary, a big figure in politics and society fame, and possibly the most controversial politician in Britain.

He looked up over his big-horn-rimmed pleasure as Jim came in with a little bow.

"Sit down, Carlton." He blotted the letter he had been writing, inserted it in a voluminous envelope, sealed an envelope, and addressed it with a broad sweep.

"I've just come back from the House. Did you call before?"

"No, sir."

"Though I"

He settled himself more easily in his padded chair, put the tips of his fingers together and again scrutinized the handsome young gentleman.

"Well, what are the developments?" he asked, and Jim saw then the letter was sent me. Carlton—very curious indeed. You interrogated them?"

Prepared For A Killing

"Some of them, sir," said Jim. "A great deal of the correspondence of the Sixth Syndicate gave through Mr. Lawrence. But there's enough there to show that Sixta is preparing for a big killing I should imagine that every big brokerage house in the world has received similar instructions."

Sir Joseph unbolted a drawer of his desk, and, putting it open, took out a number of sheets of paper fastened together by a big brass clip. He turned the leaves briefly.

"I suppose this one is typical," he said.

It was a brokerage letter to Rais Syndicate Wall Street

"Be ready to sell for 15 per cent drop under mentioned securities

Here followed a long list that covered two pages of writing and against each item a number of hundreds.

Yes, said Sir Joseph stroking his little white beard as he thought fully "Very peculiar very remarkable Are you sure in your letter there are the very shares which would be the very first to feel the threat of war But when on earth are you going to fight? I've been waiting—you never under The Munich question has been settled for a year. Your men sponsor in the House last night?"

Jim shook his head.

Upon my word said Sir Joseph I think I was very careful to avoid anything by unjustifiable optimism, but some king the world from China to Peru, I can see no single sign of the decision

Is there any trouble with Austria I ask I seem to remember we had something about they mandate in Africa

Sir Joseph smiled

Viewpoint

"You can see Austria and Germany as a possible source of trouble he said "We shall have our opinion of Germany, but the real difference between American and British statesmanship is that the difference between the Conservative and the Liberal mentality—the Conservative is the temperamentally We shall never be pessimistic, we shall never be more than the Republicans of the United States will be passionately friendly with the Germans. The real difference between us is solely one of point of view."

"Precisely," suggested Jim

Sir Joseph shook his head.

"If you can't approach with a rich old man," however unsightly he may be—and, as a matter of fact, he's extremely good looking—you're very perfect to write about. Good night!"

Jim Carlton went reeling all the way to Whitehall Gardens and that thinking sense of amusement still lingered with him when he came into his Joseph Layton's study.

The words "Joseph Layton" are on all sorts party pamphlets, but he was the Foreign Secretary, a big figure in politics and society fame, and possibly the most controversial politician in Britain.

He looked up over his big-horn-rimmed pleasure as Jim came in with a little bow.

"Sit down, Carlton." He blotted the letter he had been writing, inserted it in a voluminous envelope, sealed an envelope, and addressed it with a broad sweep.

"I've just come back from the House. Did you call before?"

"No, sir."

"Though I"

He settled himself more easily in his padded chair, put the tips of his fingers together and again scrutinized the handsome young gentleman.

"Well, what are the developments?" he asked, and Jim saw then the letter was sent me. Carlton—very curious indeed. You interrogated them?"

Prepared For A Killing

"Some of them, sir," said Jim. "A great deal of the correspondence of the Sixth Syndicate gave through Mr. Lawrence. But there's enough there to show that Sixta is preparing for a big killing I should imagine that every big brokerage house in the world has received similar instructions."

Sir Joseph unbolted a drawer of his desk, and, putting it open, took out a number of sheets of paper fastened together by a big brass clip. He turned the leaves briefly.

"I suppose this one is typical," he said.

CHAPTER VI

The early morning found Inspector Flu shearing on the unchanged little platform at Petersfield. There were very few people in the waiting train at that hour; a workman or two on their way to an intermediate station, a commercial traveller who had obviously celebrated, and one fashionably looking lady in the rear part of Flysefield, recognized the fact.

It was a train a minute of starting time and he was beginning to think that he had wasted his time getting up so early, when he saw two men on the far side of the bridge that spanned the line. They were coming from the direction of Cranbourne—in Palmers. He watched them as they came down the steps and crossed the line. The one stopped into the booking office and came back with a ticket, which he handed to his companion.

So long, Ingle" said the other, and held out his hand, which the first man took grudgingly.

He stepped into the carriage and was turning to close the door when his followed him, and the recognition was immediate. Into the heart of Arthur Crewe there came a very deep suspicion.

"Why, bless my life, it is him! Ingle!" said Mr. Crewe, in a high pert—"and on the field of honor."

Almost since the beginning of the war, the honourable Arthur Crewe, flying down the Moselle Valley with the regularity of a bird, had been the object of certain anti-aircraft gunners and to try to escape the German bullets he had developed a habit of flying low, almost skimming the crests of his pines

It is one way to escape out above all things, is to fly low. Mr. Crewe had learned that lesson in the hard school of Hitler's hosts, the Luxembourgers were many height of old on the Moselle champion riding above into the lists. Here was a Colonel or an Archduke, a Duke Camelia or a Regent a bright spirit assisted for slaughter—St. Hubert's Messenger.

R.C.A.F. Gets Yield

As a contribution to Canada's war effort, J. Harold Craig, president of Perfect Products, has placed his 32-foot motor yacht, "Heide", at the disposal of the Royal Canadian Air Force to be used for patrol duties for which her speed and design are specially suited. Announcement to this effect was made by Hon. C. D. Howe, Minister of Munitions and Supply, accepted the offer on behalf of the Government.

Pasture Passed In

A wire fence extending from Calgary to Montreal requires some 1,000 miles of wire and posts, and the fence erected under the plans of the Prairie Farm Rehabilitation Act covers that length of fence for the 1,000,000 acres included.

A Master Strategist

1. What Fellow Officers Call Sir Isaac's Non Army Chief

The new British Imperial staff commander is said once to have had a price of $2 thu on his head

For the rebellious Arab chieftain who offered the price, $2,000 was probably a lot of money to be sure, but under-assessing the value of General Sir John Dill, then in command of the British military forces in Palest he General Dill's reputation for energy and quick decisions had preceded him to the Holy Land on his

The story may be doubtful, but in any case it's still told in British military circles, and has revealed how the Iron Duke, after the Commander-in-Chief, had been disgusted with the conditions he found there. He spent her last years in exploring exotic countries. She had been broken by realities. She was only one of the many who have tried to make the world over and found it too big a job for them, and submitted to the inevitable. Detroit Free Press

Canteen For Polish Army

Supplies Will Be Given To Those Solely In Poland

Lady Wyrzesder, wife of the Polish Secretary to the Admiralty, is going to France shortly with two other representatives of the Red Cross to organized just for the soldiers of the Polish Army in France. The Red Cross already a fleet of canteens operating with the B.E.F., says an item in the Daily Telegraph. The Poles will be able to get anything from soap and razor blades to boots, socks and hot drinks like an ice will also be served. Lady Wyrzesder per the canteens will be used when the ruined the Polish soldiers get very poor pay and have to buy many things from the stage. Every article the canteen will be priced very cheaply.

Manitoba Red Cross Society

Annual Conference Has Request Of Supplies To Cover Period

May 14th, another conference of Red Cross workers, receiving supplies to the value of $1,068.77 and completed 1,000 articles, 1,000 pyjamas, 1,000 pairs of socks, 1,000 pairs of mitts, 1,000 pairs of mitts, 1,000 pairs of mitts

FIRST LINE OF DEFENCE
Further conscription brings the people of the United States nearer than ever to the realization that Britain is their first line of defense. You don't need to emphasize the importance of the British fleet. This country, by adding two and two together, can suddenly sum a great light.

In offering criticism of the United States stand on neutrality, it must not be forgotten that our neighbors, as well as Canada, are open to attack on the Pacific side as well as the Atlantic. Both Japan and Russia are only waiting for an opening to stab Uncle Sam in the back. Their fleet is not great enough at present to guard both the West and East.

A Comparison
Washington, June 29.—Typical of the cynicism with which many Americans regard the antics of their politicians was the remark made to me by a veteran newspaperman the other day. He said:
"The Democrats promise to quick bankruptcy and war before we are ready for it; the Republicans promise slow bankruptcy and war when it's too late to do any good."

SEVENTY-THIRD BIRTHDAY
Canada celebrated her 73rd birthday on Monday and never were we proud of the old Dear Jack than when we saw it waving as they still become then on Monday.

Canada is now on trial. For 73 years we have had a tranquil existence. During that journey days we had a few squalls but they are but a mere ripple to the ocean storms of a generation and as current will be such a trifle to us that down our flag and it will rattle so that is going soon to every section of our being. We are not prophesying destruction for our country, rather we believe that on that hand as to the no-shoe country. We are likely to be tried in a furnace of affliction. May the Lord refine the gold and discharge the dross.

We have many kinds of thought but in this conflict we will be called upon to forget our pet theories and concentrate on the real job of putting our best effort into the fight and live ahead of us. We hope that when the 74th birthday comes around we will still be able to wave the old Union Jack and have more to be proud of than we all that is represents.

"DEMOCRACY OR DESPOTISM —WHICH?"

The recently-published diary of one Dominion's with us and we begin to see how right Mr. Lloyd George was when he was faced with the alternative of such a thought.

"Democracy or despotism! Even yesterday sound to us more like words than realities. Now they come home to us as we been faced with the question. Which is to be our destiny?

"Democracy is a system of life which we are trying to build up. Man has not yet made his home perfect and he is in a constant state of experiments in theory of thought and acts a It is for this reason that the idea of conception that we have to fight.

"Despotism is that which has sent it's blood shadow over Europe and seeks to engulf the world in its folds. Opposed to it stands the British Empire. The heart of that Empire is facing dreadful days with courage and fortitude. It is the outer realms have the high privilege of doing something to help.

Bond issues and Government loans are all very well, but the duty spirit of our people can be shown in buying War Savings Certificates and Stamps. With every purchase, however small, will go a benefit for the Empire and for Christianity. The accumulation of this saving is an accumulation of love and earnest effort on behalf of our country.

C. A. D. Pool Meeting

Cause for gratification is to be found not only in the remarkably good year which President Hanna, the Board of Directors and General Manager Johnstone had to report. The task of rehabilitation has been achieved with great thoroughness. On the basis that Pool has in the past year made new advances. New members have been enrolled in large numbers and of course the surplus of over $100,000 is a fine asset. That the Milk Condensery is now on a thoroughly sound basis and contributing substantially to the success of the Pool enterprise is a fact that brought satisfaction to the delegates and members. All these things are important; but of greater significance still is the complete harmony and the great enthusiasm which prevails throughout the Pool organization. There is a real, social co-operation and effective unity among the members, and the Board has no confidence. All who now or at any time in the past have held office are working together with a single end in view.—Farm Leader.

"How much are rooms here?"
"Two dollars and three dollars a day, sir."
"What's the difference?"
"The two dollar rooms are all taken."

CORRESPONDENCE
Editor Alix Free Press:

Dear Sir:—I wish to voice my own protest and that of members of my community, regarding the servant of Mr. McMillan's speech at the public meeting referred to in your issue of June 20th. We consider it unfair to the point of being vindictive. If it was the mention of finance that drew your fire, what about the following statement on a political record: "Every one in control will wreck any nation Until the control of credit and currency is restored to the government and removed as its most conspicuous and sacred responsibility, all talk of the sovereignty of parliament and of democracy is idle and futile." And the Hon. Mackenzie King is speaking—not Major Douglas or Mr Aberhart.

Thomas Jefferson and Abraham Lincoln can scarcely be classed as Social Creditors, yet they voiced similar sentiments. So did Mr. Gladstone and Ramsay MacDonald. To the unbiased mind it would seem a statement of fact rather than a "unique" economic or political theory.

If further confirmation of the correctness of Mr. McMillan's position were needed, we have the recent tragedy of France. No merchandise to meet Usr man tanks—just the bodies of French soldiers. Three shells apiece, three days supply of cartridges, and capitulation. Why the criminal unpreparedness? Not the absence of skilled men, factories and raw materials, the fact that "sound money" was master on the one hand and on the other that those in high places had less fear of the Nazis than of the possible loss of wealth and power. Hence the internal betrayal of the French nation which one can only hope will not be avenged with the guillotine.

Do you not think it possible, as Mr. McMillan did, in our sensitastic hunt for "subversive influence" to see it may be attacking at a gnat and swallowing a camel—or if we drop scripture and use our modern phrase, that we may be barking up the wrong tree? Those 17 members who had the courage to register their vote in the form of a No in the House of Commons may yet be shown to have been fighting a real grand action for the people of Canada. So may all of us be dare to resist the same opinions. History, as you know, has a queer trick of justifying—sometimes enunciating—small heads of reformers.

Be that as it may, I request that a large section of that public meeting deeply resents the attack on our M. L. A. and considers that an explanation or an apology should be forthcoming.

Leonard E. Barrie,
Ripley, July 2nd.

Children Seeking Refuge in Canada

Ottawa—From 5,000 to 6,000 British children, between the ages of 5 and 16 years inclusive, will be given refuge here from war-trouble Europe, beginning the course of the month of July, according to an announcement in the House of Commons by Hon. T. A. Crerar. They will be placed in Canadian homes for the duration of the war.

Offers to take these children in and give them a comfortable living home have come in to the provincial organizations set up for the purpose. The numbers will far exceed the demands for the present time.

The children will be sent to Canada only with the full approval of their parents or guardians. The British Government will see its medical officers to it that the Canadian authorities overseas for examination of the children before they sail. It will take charge of their reception at Canadian seaports and their transportation and care en route to provincial distribution centres. Welfare organizations in the provinces will co-operate with the Canadian Government in their placement and after-care visitors.

A communication from the Canadian High Commissioner states that about 5,000 evacuees will arrive in Canada about the middle of July and a further 500 every five days thereafter to July 22.

An American loses his citizenship by joining our air force.

Germans calls us swine; what we call them is not printable.

There are no spectators in this war . . . we're all in it.

No freedom . . . no happiness . . . no contentment is possible for any one of us until the end thing . . . the worship of brute force is wiped forever from the face of the earth. But every one is privileged to wear the King's uniform, but we can all make some contribution to our common cause. We can all buy WAR SAVINGS CERTIFICATES this month . . . next month . . . every month, as we are able to.

IT'S THE LEAST WE CAN DO!

The opportunity to buy WAR SAVINGS CERTIFICATES is the privilege of all Canadians . . . the privilege of helping to win the war.
War Savings Certificates are sold as follows:
For a $ 5 Certificate you pay $ 4
For a $ 10 Certificate you pay $ 8
For a $ 25 Certificate you pay $20
For a $ 50 Certificate you pay $40
For a $100 Certificate you pay $80
Ready at any Bank, Post Office or other Authorized Agency.
War Savings Stamps and file cards and one cent every Monday. If Stamps you in one 50 Certificate. Every dollar you invest in War Savings Certificates is an investment in security . . . for you . . . for your children.
Buy them regularly every month. It is your continuing duty.

Serve by saving

My WAR SAVINGS CERTIFICATE every month

Village Council

The regular meeting of the Council was held on Tuesday evening with all members present.

Minutes of June meeting and financial statement read and approved.

Bills ordered paid:
Alberta Lumber Co. ..... $ 1 76
T. Wilson 10 00
Wong & Co. 37 60
Leong Hee 1 00
Public Works Dept. 1 78
Calgary Power Co. 64 00
Govt. of Alberta 2 50
Chas. Wenniger 16 00
Red Crown Sports Club 5 00
J. R. Mackie 25 00
Mrs Sheldon, rent 12 00
Page's Pharmacy 2 50

The application of Leon Hoe and R. Gardner for a meat shop in Alix was recommended to the Trade & Industry Dept.

A letter was read from Transport Commission Board notifying the sitting of a Court in Calgary on July 5th, to consider abandonment of 98 miles of C. N. R. trackage in the Rading sub-division. Secretary instructed to send resolution passed.

Secretary instructed to write Telephone Dept., asking them to use village lanes and not streets for the erection of their poles.

A lighting contravught on the building occupied by the Page Pharmacy was ordered removed.

Next meeting of Council will take place Aug. 7th.

CARD OF THANKS

We wish to express our heartfelt gratitude to all the friends who have been so kind and helpful to us in our great sorrow, also to all those who donated flowers.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

W. K. Jennings and family are on a holiday trip over this Bend Jasper now seems high-way. They are expected to return this week-end.

J. A. Strachan, recently of Alix, has secured a position on the Wainwright Star.

Miss Phyllis Richards returned to Alix on Friday after a business trip to Edmonton.

Master Douglas Chambers, of Edmonton, is in Alix visiting his Grandad.

Mrs. Jos Johnson fell and broke her arm and was taken to Stettler hospital. She is now home and all is well.

Bert Ford, son of Harry Ford, of the Lacombe Globe, who is well known in Alix as a reporter, has joined the Royal Canadian air force, and left for Toronto last Saturday night. The Lions and Carling clubs of Lacombe gave Bert a good send-off on his departure. Happy landings, Bert.

Beehaw people held a public meeting on July 10th to discuss the question of establishing a municipal hospital.

Rev. West is spending a week at Camp Hector summer school.

We are sorry, but we have to delay our answer to Mrs. L. Barritt's letter till next week. Owing to a heavy demand on our advertising columns this week we have to cut down on space for reading matter

Stanley Roberts has enlisted in Calgary. He is working in the capacity of clerk to the District Depot, Military District No. 13.

Mr. and Mrs. W. D. Clark are on a vacation. This week they will attend the Calgary stampede.

At the Rebekah Bridge Party held recently in aid of the Red Cross $30.00 was cleared, with prizes going to Miss Jean Martin, Art Lisbeck, Mrs. G. Lisbeck and Jack Parry. The cushion donated by Mrs. Ole Wenstob, was won by Miss Doreen Elkington.

Mr. and Mrs. J. Stone, Mr. and Mrs. Silver MacDonald, Allister and Hector MacDonald all took in the Calgary Stampede during the early part of this week.

Miss Mary Semple, of Drumheller, is spending a week visiting her parents and is now on a motor trip over the Banff-Jasper high-way.

Mrs. Harry Kraft and Velma went to Calgary last week to join Harry, who has enlisted in the active service force.

Miss Mary Miller has been spending a week visiting relatives at Penoka and Morningside.

Mr. T. Semple was a delegate last week at the annual meeting of the Canadian Co-operative Council, held in Red Deer.

Miss Freda Edgar and Miss Grace Wilton are in Calgary for the stampede. They went Monday night by car.

Mr. and Mrs. Jerry Walter and children, of Edmonton, spent a week-end lately at the home of Mrs. Walter brother, Mr. J. Bahnow.

The purchase of two $1,000 Dominion Bonds was also passed by the Board and purchase of same has been completed.

Mr. and Mrs. Jos. E. MacLaren announce the wedding of their daughter Etta Evangeline, to Mr. James Stanley Reddock, on Saturday, July 28th. The wedding will take place at Huntington, Quebec. Miss MacLaren is well known in Alix, having taught the primary grade in the local school for a number of years. Her many friends, both here and in Hirvel, will extend their best wishes for future happiness.

HAYNES

The picnic and sports day, conducted by the Switzerland Branch of the Red Cross, west of Haynes, yielded the total of $150.

Born—At the Lacombe Community Hospital, on June 25th, to Mr. and Mrs. K. McLeod, a son.

Owing to the absence of Rev. L. Thompson, on holidays, the United Church services have been temporarily discontinued.

The annual community picnic will be held on Wednesday afternoon, July 18th, at the farm of Mr. and Mrs. T. Ralston.

RIPLEY

Complimenting Mrs. Donald Walton, whose marriage took place recently, a large gathering of friends and neighbors met in the Ripley school on Thursday evening.

The early evening was spent in dancing, after which a delightful lunch was served by the ladies. Then came the unwrapping feature when Mrs. Bell with a few remarks, presented the newly-weds with a table laden with all sorts of useful gifts, to which Grace and Dougal, as we prefer to call them, very kindly thanked one and all, and gave everyone a hearty invitation to visit them. We join with a host of friends in wishing this popular young couple all the best of life's affairs.

On Friday afternoon the ladies of the Ripley district met at the home of Mrs. A. W. Carr to bid farewell to Mrs. Stanley Roper, Gladys and Rosemarie. The afternoon was spent in social chat; then came a dainty lunch, after which Mrs. Woodley in a few well chosen words presented Mrs. Roper and Gladys with an electric iron.

Mr. and Mrs. Roper have spent about 23 years in the Ripley district, but have decided to make their home at Prince Rupert. Mr. Roper having already gone there. While we regret losing these people, we wish them the best of everything in their new venture.

Mr. and Mrs. T. Walton and little daughter, of Ripley, motored into Rosemary, attended the reception given in honor of Mr. and Mrs. D. Walton, on Tuesday evening.

Mr. Eugene Barritt has set up handsome quarters on the Rose Farm. It's a dream of bet hies hatein, girls! Eh, what!

Mrs. Jos. Robson, of Edmonton, has been visiting at the home of her brothers, Messrs. Isaac and Hamer Rosson.

Miss Irene Cockrell has returned home after visiting friends in Edmonton, where she attended business college.

Miss Lillian Turner, brother of the Ripley school, has returned to her home at Rumsey Mountain House.

We are sorry to report that Mrs. L. Olson is on the sick list.

Miss Shirley Broom is a guest at the home Mr. and Mrs. Rod Barritt.

Harold Olson motored to Edmonton last week.

Miss Helen Roth, of Red Deer, was a recent visitor at the home of her sister, Mrs. D. Olson.

Mr. McIvor, of Calgary, who has been engaged on Bell Telephone work in Ripley district, was a visitor in town Thursday.

Death On The Highways

The fearful carnage that is the accompaniment of warfare among the belligerent armies on the battlefields of Europe is the subject of shuddering comment daily among the people of this continent. Isn't it awful! Isn't it terrible! Are the queries heard on men and women, home in radio-reports of the conflict and as to the headlines of the daily newspapers.

Yet the slaughter which is taking thousands of lives on the highways on this side of the Atlantic, and a growing toll at that, is passed over with comparatively little more than a shrug of the shoulder. People have become so used to reports of accidents in which two or three are killed here and there or four less three lives there together with a few more injured that they have not awakened to full realization of the loss of life in the aggregate caused by the automobile.

Despite the safety campaigns inaugurated by police forces, motor clubs and groups of citizens who have sufficient facts at their command to appreciate the dire peril which attends the modern vehicle, the toll on American and Canadian highways there appears to be no let up in loss of life and limb. On the routinely recent figures indicate that the number is becoming greater year by year and month by month. Despite the fact that the increase is not in the peak of traffic may be rapid and ominous: are that the grim harvester will take a heavier yield on the highways this year than in 1939. It is already a matter of record that the number [illegible] in February of this year totalled 1,236 as compared with 1066 in the corresponding month a year ago, a startling rise in excess of approximately 50 per cent.

Unfortunately there is nothing to indicate that the situation will not become progressively worse as the summer wears towards fall and motorists on the Canadian highway menace is remembered is likely to be accentuated with the influx of a much larger number of American tourists who are privileged, because of war hazards abroad, to spend their summer vacations on the roads of this continent.

* * * *

Hands Or Drivers?

Very properly the Canadian government, boards of trade and other organizations are doing their utmost to influence the American tourists to turn their wheels on the direction of this country this summer. It is a traffic which should be encouraged for economic reasons as well as in the interests of cementing the growing friendship between the peoples of the two great North American nations. Indeed, most commendable and clever contacts between Canadians and citizens of the United States may go a long way towards amplifying and encouraging the sympathy which the latter have for the Allied countries and the perspective for which they are fighting. But, as has already been intimated, there is an element of danger which must be avoided, if anything can be done to minimize the risks of the road in this country.

The difficulty is to know what to do about it. Pussyfooting for care-lessness and dangerous restrictive legislation do not appear to be the answer to the problem. Even safety first campaigns conducted through various agencies do not seem to be as effective as they might be although their objective, that of awakening the motorist to the consciousness of his responsibility is all to the good.

The school of thought interested in the problem has suggested that much of the blame for loss of life and limb on the highways should be placed on the highways themselves. These authorities assert that with some degree of truth that high speed, high powered and efficient automobiles have outstripped the roads on which they are used. In other words, road designing and road construction is not keeping pace with the rapid improvements to the automobile.

On the other hand there are those who contend likewise with some truth to support their assertions, that the driver is to blame for most of this mishaps on the highways. They say that nearly all accidents are the result of negligence on the part of the driver and quote statistics and compile surveys to show that few accidents are the result of ineffective equipment. Such an item breaken, sticking accelerators and the like. They declare that what is needed to make the highways safe for travel is re-birth of the motorist a new spirit on the road.

* * * *

Two Main Requirements

It is quite evident that the automobile is efficient and that both the highways and the motorists must share the blame for accidents. If accidents are to be cut down as the volume of traffic continues to grow roads and highways must be designed and built to meet, not the immediate needs of the present day but those of the years to come when the present time drivers must be imbued with a greater measure of common sense, courtesy and consideration than have guided them in the past on the roads in the past.

When modern highways, built to match the requirements of the present day automobile and those of the future, are constructed and the motorist has acquired more common sense then, and then only, will the roads of the country be really safe.

Abandoned His Post

General Henri Bedet of the French medical corps, was condemned to six months in prison by the Paris military tribunal for abandoning his post in the Sedan sector during the night of May 15. This was at the time the Germans broke through the Meuse front on the drive that has carried them to the coast.

Flax flowers are blue, pink, or white, depending on the variety.

Discipline Needed

The Benefits Of Experimental Theatre Are Shown

The general idea of progressive education is to grant the pupil an extraordinary amount of freedom with little or no restraint or control. It is an experimental idea who does not develop into a breath of childhood and adolescence which in those moment standards which never very freely generalize to generals: They weaken or spoil when faced with the slightest of adverse circumstances or temptation. Hence the necessity do not know how else to meet the situation. The marks left in him by those people who know childhood discipline, often first, and also could discover themselves when the need arose provided the practical answer to these expert [illegible] Boston Post

With an Electric Range there is no combustion. Therefore no products of combustion spread through your kitchen and home soiling walls, drapes, and furniture. Your home stays clean always. It's modern, too, because Electric Ranges are insulated to prevent radiation of cooking heat. And, in actual cooking, there is no waste or spoilage. Automatic controls give you exact cooking temperatures and times. You get full-flavored meals in less time, with less effort, and at surprisingly little cost.

COOK ELECTRICALLY

The Modern Way to Carefree Days

For those who require their ranges to heat their kitchens in the wintertime, there are Combination Coal-Electric Ranges now available at their dealer's.

In conjunction with an Electric Range, an installation to give a constant supply of Hot Water at Special Low Rates can be obtained.

Lamerton Council

The 5th meeting of Council of the M. D. of Lamerton, was held at the municipal office Alix, on Saturday, July 8th 1944.

Men were present, Councillors Docherty, Dittie, Heckt, Westervelt and Nels.

Secretary read minutes of meeting of June 1st, which were confirmed.

Secretary read By-law No. 63 for third time. It was adopted.

Secretary read by law No. 64, a by-law conversing the rental of Municipal Land, as follows:—

E½ of SW 2-39-23-4, to John Chalmers, for one year at a rental of $10.00.

NW-12-40-23, to Mrs. Leona Barritt for two years at a rental of $20.00 per year.

NW-1-40-23-4, to Mrs. Leona Barritt, for two years at a rental of one third share of crop.

East ½-13-40-22, to Edgar Sibbert for three years at a rental of one third share of crop.

SE 36-39-23, to A. E. Burritt, for four years at a rental of one third share of crop.

NW 14-41-24, to A. C. Wordon, for five years at a rental of one third share of crop.

NE-36-39-23, to H. N. Channon for one year at a rental of $30.00.

North ½ 31-41-24, to Fred Morris for one year at a rental of one third share of crop.

NW 16-39-22, to Abe Docherty for four years at a rental of one third share of crop.

NW 28-39-22, to W. D. & A. Pajune for two years at a rental of one third share of crop.

SE 34-40-23, to J. R. Mackie for one year at a rental of $45.00.

NW 24-38-24, to P. Nugent for one year at a rental of $25.

NW 14-39-21, to F. Dowell, Jr for three years at a rental of $40.00 per year.

By-law No. 64 was read three times and adopted.

Council accepted to readings of By-law No. 65 concerning sale of lot in Two for $10.00.

Secretary read application from L. B. Schultz that Pentre F. H. C. Sykes, be exempted from taxation on the S½ 31-41-24, during his term of office. The application was granted.

Secretary read letter from Sedalum & X-Ray Institute, Calgary, that M. Williams was in need of X-ray treatment and on instructions of Councillor Nels he had guaranteed payment in the amount of $60.00. Council voted approval.

Secretary letter from farm in Smith's Municipal Hospital, advising admission of Mr. E. J. Communication accepted.

Secretary read letter from the Board of Transport Commissioners advising that C. N. Railways had made application for an order granting it leave to s'a'don operation of a portion of its Ensleng Subdivision in the Province of Alberta, between Mile 73.1 (near Nevin) and Mile 84.6 (near Alix), a total distance of 11.5 miles, and on instructions of Councillors Docherty and Dittie he had advised that we are willing to approve above application providing they will transfer land to farmer who own land adjoining the right-of-way and that they leave the fence intact.

Moved by Councillor Heckt to accept communication and that we approve the action of Councillors Docherty and Dittie. Carried.

Moved by Councillors Westervelt that, on account of illness, it is necessary, that we grant Councillor Reynolds leave of absence to Nov. 1st., that Councillor Heckt continue to act on his behalf. Carried.

Secretary read By-law No. 66, a by law concerning the sale of Block "C" subdivision of part of SE-33-38-23-4 to J. W. Simmons, $60.00 on account and $200.00 on Nov. 1st., 1940, interest at 6 per cent.

By-law No. 66 was given two readings.

By-law No. 67 was given its second reading.

Secretary read letter from the Stettler Health District, offering the services of fumigation and advising any person wishing to destroy bedbugs to apply to them at Stettler. Communication accepted.

Secretary read letter from Old Age Pension Dept., advising Mrs. E. L. Sage had been granted pension of $20.00 per month. Communication accepted.

Secretary read letter from the Lacombe & District Community Hospital, advising admission of Mrs. S. Solberg. Communication accepted.

Moved by Councillor Nels that we charge the Village of Alix $6.00 per hour for grading. Carried.

Secretary read Financial Statement as at July 3rd., 1944, which was accepted.

Moved by Councillor Nels that we pay the following accounts:—

A STATEMENT ON FORD WAR WORK IN CANADA

This Company is in the war to the full limit of its resources. Until the British Empire is victorious, until the battle for freedom of nations and liberty of peoples is won, we have pledged all the vast manufacturing facilities of our Canadian and overseas affiliated companies to the service of the Empire.

We regard this to be our simple duty as Canadian patriots, one of the industrial resources of the Dominion. The 8,400 employees in our plants as well as our widespread dealer and distributor organization from coast to coast are Canadians. The Company's shareholders include a large proportion of Canadian investors. No one individual, family or company has a majority control of our shares.

For these reasons, aside from our deep feeling of loyalty to the Empire and its high purposes, it is feeling that Ford Motor Company of Canada, Limited should give whole-hearted support to the national war effort.

From the very beginning this has been our course. Even before war was declared, in co-operation with officers of the Department of National Defence, we laid in our plant the groundwork of military production. Since conflict became a reality we have given our entire precedence over everything else. More than fifty per cent of our production is in vehicles for military use and this percentage is increasing rapidly.

We are now engaged in supplying approximately 15,000 armoured vehicles of many types, of which 10,000 are for the Canadian government and 25,000 for other Empire governments.

We are constructing at our own expense a $700,000 plant addition to provide facilities for the building of Universal machine gun carriers of which we have undertaken to deliver fifty a week to the Canadian government and 1,000 a month to the British government. This addition will also enable us to increase production of other types of military vehicles. Our affiliated companies in Great Britain, South Africa, Australia, New Zealand, India and Malaya are similarly engaged in Empire service.

By virtue of our manufacturing facilities we have been fortunately able to contribute skilled man-power. Four out of Canadian and overseas executives of our company are now wearing special training in transport and other fields concerning vehicular service.

Many other members of our business have been necessarily through loss of export trade and because of dislocation of war industry. We have made these adjustments cheerfully, realizing that now is the successful prosecution of this war on that people of all nations may again be able to work in freedom and peace.

PRESIDENT
FORD MOTOR COMPANY OF CANADA, LIMITED

Statement in Parliament by the Hon. C. D. Howe, Minister of Munitions and Supply

"The president of the Canadian Company has shown perhaps as keen a desire to assist in Canada's war effort as any citizen of the Dominion has shown. His corporation since the outbreak of the war has done and is doing very important work for Canada's war effort, in the way of building armoured vehicles. The company has also been placed in the hands of the government as to the terms of the contract which it has had.

"A contract, providing for a fixed price as low as we could find any basis for asking, was worked out on cost plus basis. Representatives of the auditor-general's department and of the department of munitions and supply have been working in the books of the company would be audited every month. In other words, the profit on the Ford Motor Company of Canada, its standards toward the war, and its ability to assist in Canada's war effort, have been so far as I have been able to observe, beyond criticism."

Statement in Senate by Senator Raoul Dandurand, Government Leader in the Senate

"Ford Motor Company of Canada is doing its utmost to serve the interests of the country, the War Supply Board and the Government."

Statement in the Senate by Rt. Hon. Arthur Meighen, Conservative Leader in the Senate

"They (Ford dealers in Canada) are numbered in the hundreds. And the number of employees of these dealers is very large. The war-time organization is tremendous. For all the purposes concerning us, the Company is a Canadian concern, and I can add on the assurance given by the honourable leader of the House my own feeling that there can be no doubt that Ford Motor Company of Canada and throughout that Company's organization. They will assist us to the utmost in our war work."

Women's Auxiliary Motor Service

Early in the war the Ford Motor Company of Canada, Limited, organized free training courses for women in the care and operation of motor vehicles for possible war service. 284 such classes have been conducted, with an enrollment of 7,943. The number who have completed the eight-week course is 5,475, while 2,456 are under instruction and 1,512 enrolled in new classes about to start. All instruction and equipment has been furnished by Ford dealers and the Company without charge.

Types of Motorized Vehicles for Military Use Being Made by Ford Motor Company of Canada

The Company is engaged in manufacturing 15,000 armoured vehicles for Canadian and overseas government. They include light two-wheel drive trucks, known as 8-cwt., which are used for carrying light stores, personnel or wireless sets; 3-tonne, 4-wheel drive transport lorries; load, personnel, or anti-tank gun mountings; tank carriers, etc.; 30-cwt. 2-wheel drive, used to load carriers; firetrucks, four and six wheels, for hangar loads, for workshops, for wrecking equipment, etc.; four-wheel drive gun tractors used to haul artillery, as well as ambulances and light passenger cars and mission wagons specially fitted and painted for army purposes. Present schedule of deliveries of these military vehicles constitutes more than 50 per cent of the Company's total production. The plant is working day and night.

VOLUME XXX — ALIX, ALBERTA FRIDAY JULY 12, 1940

Funeral of Chester Mattie

(Too late for last week's issue.)

One of the most impressive funeral services ever held in Alix, took place in the United Church, at 3 p.m. on Thursday, June 27th., when the body of Chester Mattie, whose tragic death by drowning occurred on the evening of the 25th., was laid to rest in the Alix Cemetary. Rev A. H Eggleston, pastor of the Nazarene Church at Stettler, conducted the service. He was assisted by Rev. P. L. Chase pastor of the local Free Methodist Church. The Misses Lida and Elsie Eggleston, of Stettler, sang "Jesus Can". After Rev Eggleston's touching address Rev and Mrs. Chase sang "There is no Disappointment in Heaven," and later at the graveside they sang again "I Will Meet You in the Morning Just Inside the Eastern Gate Over There."

The whole community turned out in great numbers to pay their last respects, while friends and acquaintances came from as far as Stoney Plain and Mac Leod in the south. The floral gifts were numerous and beautiful.

RED CROSS

On their vacation trips this summer Alberta women can profitably use spare time knitting shoulder shawls for convalescing Canadian soldiers in hospital. About 30 inches square, plain knitting in bright colours and of any weight soft wool, they are easy to make.

Red Cross hospital visitors in England discovered the need for these shawls and notified Canadian Red Cross authorities. Knitting them is a pleasant odd-time job and fits in well as a vacation pastime. Send your finished work to your nearest Red Cross Branch for shipment to England.

Members of the visitor committee in England are in contact with all hospitals to look after the comfort of every Canadian soldier admitted. If the patient is unable to do so himself the visitor writes to his relatives in Canada, keeping them informed of his progress.

A mother was discussing with her daughter the qualities of men. "Oh," said the daughter impatiently, "but they have no self control."

All the better reply the mother "If they had there would be [illegible] many more spinsters."

Pretty Young Thing—Are you sure there curtains won't shrink. I want them for my bedroom windows.

Candid Clerk—Lady, with your figure, you should worry whether they do or not.

Local News

Mrs. Ray Wilton and baby left for Stanmore, on Tuesday.

A shower was given by friends of Miss M. Rasmussen and Mr. Bruce March, at the home of Mrs. Simons, south of Alix where an enjoyable evening was spent. The couple accepted their gifts with many thanks to their friends.

Mr. and Mrs. C. D. Romer, of Alix, announce the engagement of their youngest daughter, Ruby, to Gunner Roy Siddons, 76th Field Battery C.A.S.F., son of Mr and Mrs. L. H Siddons, of Alix. The wedding will take place this month.

Work shortly will start with the dividing of a wall on the school grounds. This was authorized by the Board of the Alix Consolidated school at their last regular meeting. Miss Mawer, primary teacher, also tendered her resignation which was accepted with regret.

Training for school children and members of the Alix Community Amateur Athletic Club will commence within two weeks, under the supervision of Leo Siddons. Physical training, games and boxing will be carried out as in the past.

Grand growing weather has prevailed throughout our district. Moisture has been plentiful enough to keep back field and root crops on the move. Crops are making splendid progress. Had fell on Sunday evening, but we do not think any damage was done in our immediate vicinity. Hay and fodder crops will be abundant this year. Grant that the prospects may continue. Ex president Hoover expresses concern for Europe during the coming winter and thinks one of the greatest famines in history may prevail. If this prediction comes true our wheat production will be sorely needed for non-belligerents.

War Savings

"Alberta stands first in Canada, in provincial organization under the nation-wide war saving plan," John Burns, chairman of the war Saving Committee for Alberta, stated today on his return from a business trip east, in the course of which he conferred with the National War Savings Committee in Ottawa.

Mr. Burns added that the National Committee was pleased with the work already done in Alberta, and with the whole plan developed in this province and to be completed in the near future.

MIRROR NEWS

Mr. J. Sneddon is visiting at the home of Mrs. A. Boyer.

The following Mirrorites are attending the Calgary stampede: J Kerr, J Ken, Avis Kerr, Arleen Kerr, Mr and Mrs C Hardie, Mr. and Mrs. W. Walker, Mrs. F. Smathers, Margaret and Frances Smathers, Cecil Dermott.

Rev. M. G West has returned from Banff where he attended the Anglican summer school.

Mr. C. A. Dermott has purchased a new Hudson car.

Mr. and Mrs. H Cooney have returned from Detroit and Vermilion, where they visited their son and other relatives.

Mr. J Gordon has returned from Vancouver where he spent his holidays.

On Saturday, July 6th, at the home of Mrs. J Cobb, a shower was given for Miss Velma Beachney, who is to be married to Jack Arlo, of Calgary, shortly. Miss Beachney was the recipient of many lovely gifts. After the presentation a delicious lunch was served on the lawn.

The following pupils of Miss Rose Nelson, of Bawlf passed their Toronto Conservatory of Music exams:

Grade 1 Claire Perry
Grade 3—George Reid honours.
Grade 4 Margaret Reid honours
Grade 9 Margaret Smathers, hon
Miss Jane Cuglow a pupil of Miss K Sedderman, passed her A T C M with honors.

Woman Customer (after the third assistant had pulled down blanket after blanket until there was only one left on the shelf) "I really don't want to buy a blanket today. I was only looking for a friend."

Clerk "If you think he's in the other one, madam, I'll gladly take it down for you."

Mrs. Scarpen (standing in swimming pool up to her neck): "My goodness, Tony, where's da baby?"

Mr Scarpen (beside her): "He's all right. I gotta him by da hand."

Two men were out shooting one day when a policeman approached and politely asked to see their game licenses. To his surprise, one of the men turned around and ran away as though for dear life. The policeman, sensitive to duty, ran after him.

When he caught the man, the policeman demanded to see his license. The up stream promptly produced it and it was found to be in order.

"Why on earth did you run away when you had your license?" asked the policeman, as he mopped his heated brow.

"Because my friend hadn't got his," was the reply.

To know what I must do, and to do it cheerfully and promptly; to keep on pleasing every until the job is done, not to seek praise so much as to ask Have I helped?

To tackle a new job with a renewed vigor when what I have to do is completed, to smile and take the breaks.

There, I am convinced, will make me happier, healthier and more prosperous.

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Sid Mansbridge went to Calgary Tuesday to enlist.

Dennis Walper left Tuesday for the east.

Roy Peare and Clifford Brookbart are home on leave.

On Friday, July 30th., Poppy Watts and his Old Timers will play in Alix.

LOST.—Anyone finding a ring of Keys kindly leave at Free Press Office. Reward.

Eaton's returned last week-end from Winnipeg and Calgary.

Mrs. Sissett returned on Friday last from a six weeks' trip to Manitoba.

Mrs. D. Jewel, formerly of the Mirror district was buried in Mirror cemetery, on Thursday last.

Mr. Jos Johnson returned from Edmonton, on Friday, after a pleasure trip to the big town.

Mrs. Peare and son Mervin, spent a week holidays in Calgary.

Born—At the Lacombe Community Hospital, on July 10th, 1920, to Mr. and Mrs. Albert Stone, of Penhold, a son. Mrs. Stone was formerly Grace Russell.

A quiet wedding took place at the Manse in Lacombe, on July 6th, when Dorothy Evelyn, youngest daughter of Mr. and Mrs. R. A. McKibbon, of Alix, and Gunner Donald John MacKinnon, 78 Battery, C. A. M. C., of Calgary. Miss Hazel Housen attended the bride, and Mr. Wilson Cundal supported the groom. The ceremony was performed by Rev. Carr, of Lacombe. The young couple are at present in Calgary.

The Star Exhibition of Alberta will break loose in Alix on Friday, August 20th. The prize list is now in hand and will soon be in circulation. Get busy on your exhibits and prepare for the big annual event. Stock men, grain growers, gardeners and horticulturists, etc., should pay attention to their intended exhibits. The ladies are also invited to show their interest by turning in a big display of their wares. Our Fair will reflect the interest shown by our people.

Miss A. Taylor, of Halkirk, was the successful applicant for the primary room in the Alix Consolidated School No. 12. Miss Taylor has had 6 years experience with primary grades and the board feels satisfied that the children of this district will benefit from this wide experience.

Ladies Auxiliary

At the meeting held July 8th, a Ladies Auxiliary was formed with the following officers elected:

President, Mrs. R. Whitfield, Jr.

Vice Pres., Mrs. A. E. Hollings.
Secretary, Miss Nan Howe.
Treasurer, Mrs. Pete Clarke.

The executive committee will be elected at next meeting, which will be held August 10th.

All women shall be eligible for membership who have served with the forces of the British Empire Service or her Allies in the Great War, and the mothers, sisters and daughters of such women, or who are widows, wives, mothers, sisters and daughters 18 years of age and over of the men who served with said forces during the Great War and are serving in the present war.

"How are you?"
"Well, thank you."
"How do you find business these days?"
"Say advertising."

Canada is placing new orders in the value of $250,000,000.

MIRROR NEWS

Miss Jean Thomson is visiting at the home of Mrs. C. Brassgrove, at Edgerton.

On Thursday, July 15th, Mr. and Mrs. H. Bowden and family left for Vancouver, B.C., where they will spend a few weeks.

M. and J. Hatcher, of Lac Park, are visiting at the home of Mr. and Mrs. R. Crook.

Harold Brachmer is in the General Hospital at Calgary.

Miss Audrey Reid, of Saskatoon, Sask., is visiting her cousin, Miss Margaret Reid.

Edith McMillan is visiting at the home of J. Owen, at Tees.

On Sunday, July 18th., Jack Arin, of Calgary, and Miss Velma Brachmer, of Mirror, were quietly married at the home of the bride's parents, Mr. and Mrs. J. R. Brachmer. The bride was beautifully attired in a gown of white georgette over satin. The couple were attended by Miss Vera Brachmer, the bride's sister, and Jack Love, of Calgary. Mrs. Arin is one of Red Deer, performed the ceremony. The bride and groom left for Calgary where they will spend their honeymoon.

Sydney Meller is taking a D. P. Tractor Training course in Edmonton.

Mr. and Mrs. George Thomas returned on Friday last from Boise, Idaho, where they have been visiting Mr. and Mrs. Ted Woodall, for the past two weeks.

On Saturday evening, July 17th., Miss Beatrice Woodall and Dorothy Isabel Boyer, were quietly united in the Methodist Anglican Church, Rev. H. G. West performing the ceremony. The bride was attended in a tailored ensemble with white accessories and a corsage of roses. The couple were attended by Mr. and Mrs. F. L. Saunders. The bridal couple left Sunday, July 18th, for Edmonton where they will reside.

Leah and Victor Yakowski, of Edmonton, are visiting at the home of Mr. and Mrs. Leah and uncle, Rev. and Mrs. West.

Mr. J. Fisher is spending several weeks at Kamloops, B.C.

Mrs. D. M. Grant, an old timer of this district, died in Edmonton, Sunday, July 11th. Funeral was held Thursday, July 11th, in the United Church and interment took place in the Mirror cemetery. The sympathy of the community goes out to the bereaved. Mr. D. M. Grant, one daughter, Mrs. J. Fisher, two sons Alton and Wayne.

Miss R. B. Watts, former teacher of grades 5 and 6 has resigned and accepted a position in Victoria, B.C. Miss E. Mc Donald, former teacher of grades 3 and 4, has accepted a position in Vegreville.

On Monday evening, July 19, a general Red Cross meeting was held in the W.I. building. Refugee work, a jumble sale and concert were discussed.

COMING WEDDING

Next Sunday, July 25th, in the United Church, at 12 noon, Rev. C. E. Cosson will officiate at the ceremony when Miss Ruby Rouse will become the bride of Gunner Reg. Siddons, C.F.A., C.A.M.F. Gunner Siddons will act as best man, both boys having received leave of absence for this week.

Dinner will be served at the home of Mr. and Mrs. L. D. Rouse after the ceremony. The couple will leave for Calgary during the afternoon.

The paper committee of Calgary exhibition has issued a folder, here in the Red Cross.

CHANGE TO LIPTON'S
FULL-FLAVOURED (but not) TEA

A Valuable Contribution

Commission is to be derived from the discovery that educational authorities in Western Canada are becoming convinced over the necessity for closer co-operation between the universities and the high schools of the country and of more co-ordination in the curriculum offered at these two entities of the education system, if the purpose for which they stand is to be fully achieved.

If this were THERE ONE WAY ONLY in the student, who is supposed to be "prepared for life" while continuing and completing his or her formal education in either one or both of these educational institutions, there would be much less difficulty changed during the past decade principally due, of course, to changed conditions in the economic commercial and even the cultural domains of life.

It is now realized by educational leaders and students and is beginning to receive the public acknowledgment that both the high schools and the universities may fail in their mission unless some important changes are made in the curriculum of each.

A really valuable contribution to the problem has recently been made in the report of a committee of the Executive of the Manitoba Educational Association, consisting of representatives of the university and of high schools and appointed to study the problem of articulation between the high schools of that province and the university. While the report which is the result of sixteen months of study deals primarily with conditions as they exist in the Province of Manitoba, the findings and recommendations are sufficiently broad to be of general application and interest throughout the west, and possibly throughout the entire Dominion. Indeed, educational organizations in the other western provinces find the report of outstanding importance to warrant close study and consideration in the light of similar and parallel conditions in those provinces.

* * *

Changes Are Needed

To put the matter in a nutshell the committee found that under the courses of study in the high schools were designed to make those institutions preparatory schools for university courses, comparatively few of the students graduating from high institutions and that, because of this, there was inordinately large number who complete their formal education in high school and are being fitted to take their place in the immense life of the country, who, once settled

The committee was given ample and authoritative testimony to the general effect that continuance of the present trend will put out result in increasing numbers leaving high schools unprepared for entry into business life that the university itself may presently find itself in such a state as to limit for lack of sufficient students to enable it to continue to function.

If these premises are well based, and there appears to be every reason to believe that they are, the broadening of the scope of the high school curriculum is the obvious solution, and that is the conclusion to which the committee came. Not only that, but it was suggested that if the high schools are destined to become the "university of the common people", as one learned witness phrased it, the high school course should be extended another year, because, if the curriculum is to be properly covered, and sufficient time on the existing high school span to devote to a completed formal educational system.

On the other hand it was felt that if the university is not to become atrophied and decreated entrance requirements will have to be materially diminished to give an opportunity to a larger number of high school students to enter its doors with the objective of subsequent specialization.

* * *

Wider Objectives

To quote one section in a very voluminous report "The course of instruction in the high school and also in the junior division of the university should cater to the needs of young people of the age levels represented in the secondary schools and these institutions, that is to say, should be related to the natural activities of mind and body at these ages levels. It should not consist to any considerable extent in courses which are only of value if the subjects are carried further. It should be reasonably all-round, while giving full opportunity for the pursuit of individual interests, and it should stimulate as far as possible desire to continue further study after formal school education has been completed. This," it was pointed out, "is in accordance with the recommendations contained in the report on secondary education by the British Board of Education, commonly known as the Hadow report."

It is gratifying to note that while emphasis is given in the report to the necessity of fitting high school students for business and life and that this is not the entire objective of secondary education is not overlooked. The principal of Daniel McIntyre Collegiate Institute is quoted as expressing his belief that the schools should "be free to give the best opportunity for such things as athletic activities of purposeful type, the Literary Society, music, art, handicrafts, mock parliaments, school periodicals, student councils, etc., etc."

Altogether the report is a worthwhile document and it is a remarkable assumption that much of its material will be given more thorough consideration far beyond the confines of the Province of Manitoba.

Just Slips Out

The only surface of snakes is covered with a thin layer of skin known as the epidermis, which is cast off periodically, if the reptile is in good condition. The eye sheath is also covering along with all the rest, and the entire length of shed skin is turned inside-out as the snake slips out.

Main Fine Contribution

Lord Beaverbrook, British minister for aircraft production, announced the sum of £2,000 ($10,000) sent by The Chosser, daily newspaper of Kingston, Jamaica, had been used for the purchase of the biggest and best bomber so far produced."

Engine Likes Silver

Sixty-seven inches of rain fell at Ammon, Idaho, in a single year.

Dressmaking The Hits

There are more than 100,000,000 yards of sheep in Australia.

For the first time since the fifteenth century, when the Lord's Prayer was presented a fortnight of an age in a mystery drama, with each of its petitions portrayed on the stage of the Protestant Episcopal Church of the Incarnation, New York City. It was sponsored by the Religious Drama Council of the Greater New York Federation of Churches. Each petition of the prayer was dramatized in scenes from the Old and New Testaments.

Oxygen Likes Silver

Oxygen tents are so helpful in pneumonia victims because fatigue is one of their most devastating accompaniments. So when a patient breathes air two or three times as rich in oxygen as ordinary air, it permits the patient to get his requisite oxygen supply with much less effort.

... to the amount of $500 which may be purchased in any ... and other conditions remain unchanged.

Under the new regulations, incorporated ... unincorporated bodies organized for the purpose of carrying on, without monetary gain to their members, charitable, educational, national, municipal, athletic, recreational, charitable, provincial, social or sporting character or the like, including service clubs, labor and fraternal ... societies, those acting primarily as ... conference or board ... will be ... to purchase War Savings ... for ... shares.

With the revised authority ... the Order in Council the War Savings ... is authorized to determine ... which ... shall include or ... purchase War Savings Certificates under the provisions of the regulations.

A WARNING REGARDING WILD MUSTARD

Wild Mustard ... sometimes called Charlock or Ontario Mustard, is at ... present ... in scattered patches ... Alberta, particularly in the ... Moisture ... conditions this season have been especially favorable ... the weed and the infestation ... than it has been for some ... past. If the scattered patches ... carrying ... roadways and to some ... cultivated fields are cut or ... shortly ... the setting of seed will be prevented and much time, labor and money saved. Since the plant ... annual it reproduces from seed ... it is essential to destroy Wild Mustard while the plant is in bloom ... before any seed has been formed. The stems of the plant are erect, branched, and grow from one to three feet in height. There is a purplish colouration ... where the branches join the main stem. The plant may be further identified by its bright, lemon-yellow flowers. The Government is taking steps to destroy weed growth along main gravel highways and is paying particular attention to this plan. Farmers are warned that neglect of Wild Mustard this season may cause very heavy losses another year. Scythe, mow or pull immediately all Wild Mustard in your district.

Those who have tried to maintain a budget as a means of saving will endorse this statement by Representative Gifford of the U. S. congress: "Economy is a way of spending money and getting no fun out of it."

CORRESPONDENCE

CORRESPONDENCE

(A Letter from Jim Dinnie)

Dear Fr iends: I am sorry I did not write to you before this but we have been on the move so much that it was nearly impossible to write. I did manage to sign an odd letter to Janie and that was all.

We are still in England. I am putting on weight and have never felt better.

I received your parcel of 320 cigs and must say I enjoyed them. It's swell to get a parcel from home and to know that some of you are here in the old land. I'll be glad to see the back of and war that is causing so much home trouble and make one stop and that's all I want to thank you one and all for it.

I see Leslie and Ernie nearly every day. They are both fine and seem to like the army. I like it myself. Since coming over to England I have been appointed technical storeman with trade-men pay at $1.30 a day.

Speaking of money when we first landed here we had a "new" kind figuring on English money, but now it seems simple.

We have had had a taste of blitzing. We were here one evening and they started at eight, carrying on almost continuously until 5 o'clock.

The people in this district are a great set and very friendly. I stayed with a family a couple months and had a fine time. They were very sorry to leave me when I moved on at last. The last week I was there I was home nearly every night after mealtime and then bedded by 9 o'clock.

Honestly, I thought I was homesick again, and when I left they asked me to come and stay with them again if ever had to return and could get leave.

We were in Aldershot for a spell. The barracks there had a hot water system that was highly appreciated and extremely used. We slept on mattresses for a change.

Upon this occasion we had to leave here again, and I was sorry to leave behind the stamp. But you can't have everything. But you are really appreciative and all ranks have gone up lots so I don't think the cost of living is important nearly now.

I received a very nice letter from Jack Berthelet and Jimmie Magle, yesterday when I was answering their letters. I also hear from Mr. and Mrs. Anderson quite frequently.

I have heard from Lulge, and there is certainly a good time going that I don't get a letter from some friend on a pass.

Yes I am homesick for Canada even though we are England so much like Canada that we are not. We all long for Canada and can't wait to get back. I understand Alix is now as black as it looks. I am still sure we will have a crop on top. As I said in my last letter I still can't spend this Christmas at home, but I'll be home for Christmas dinner, 1941, and still think the same.

Almost three years, and once again I thank you for the cigarettes and hope we can meet soon and be able to go home with lighter hearts. So good luck to all of you and hope to hear from you soon.

Your loving friend,
Joseph.

Canadian Legion
Alix Branch No. 51
Per [illegible]

Just a short note in appreciation of the receipt of shipments of cigs and tobacco. I smoke a pipe and the cigarettes are almost the only ones we can receive from Canada and I know that all of the boys are pleased with them. I wish also to thank the Canadian Legion for all the things that they are doing for all the boys and I hope we are able to carry on the same way when you come back to Canada.

Sincerely yours,
May, 20, 1940. Leslie E. Brown

SERVE BY SAVING!

Now You Can Do Your Bit

Through the purchase of WAR SAVINGS CERTIFICATES every patriotic man, woman and child in Canada, regardless of station, can take active and responsible part in the defence of this Dominion's Way Effort.

When you buy WAR SAVINGS CERTIFICATES you save money for the future and supply dollar ammunition to back up the men who are fighting our battles overseas.

WAR SAVINGS CERTIFICATES are on sale at all branches of the Bank. Backed by the Government of Canada, they are the tried and tested form of investment into which thousands of people are worth 20% more than you pay them. For every $4.00 you invest now, you receive $5.00 in ten short years' time.

Buy your first certificates to-day — then add to your investment regularly by purchasing at least one certificate every month.

WAR SAVINGS STAMPS

If you cannot afford to pay cash for a $5 or $25 War Savings Certificate, buy a 25c War Savings Stamp. Paste these stamps in a book until you have collected enough to buy a certificate. Then take the book to the Bank and we will exchange the stamps for a certificate of the same denomination. Stamps and certificates as well as our booklet, "How to Save Money," may be obtained at any branch of this Bank. Ask for a copy of the booklet entitled "How to Save Money Through the Purchase of War Savings Stamps."

THE WAR ACT

Every farmer under the War Measures Act knows without being told that he cannot sell any of the products of his land as they will "take over" all home grown crops and livestock, and the price which will be paid for them will be fixed by those farmers who are doing all within their power to produce more to meet the measure of protects it against so-call farmers who refuse to take any action beyond tilling the land of weeds this year more than ever, a determination of effort will be made to enforce the Noxious Weeds Act of Alberta. Penalties act we quote in part:

"It shall be the duty of every person who is the owner of any parcel of land and of every person who has any beneficial interest in any parcel of land and of every tenant, tenant or occupant of any parcel of land to prevent any noxious weeds from growing upon such parcel of land, and to comply with all the provisions of this act for the destruction, thereof." Under the Act anyone occupying or having the right to occupy land is responsible for destroying weeds to the centre line of all road allowances surrounding such land.

Local Weed Inspectors, duly appointed by Municipal Councils have full power to see that the terms of the Noxious Weeds Act are complied with and notices will be advised to take prompt action against weeds on their land in the coldrums.

Xen weeds are gradually making their encroachments as a result of weeds encouragement the present. If you find a plant which you think may be a new weed, notify your local Inspector or Municipal Office in your district so that the plant may be identified. Remember, the Weed Inspector is there to serve the community. Co operate with him.

The federal government has passed an ordinance that all young bachelors, who are not exempted after the 15th of July, will go on the payroll as bachelors, and anyone taking a wife after that date will not receive recognition as a married man, but will continue as a bachelor so far as pay is concerned. This is causing a stampede around marriage license offices. As every young man in Canada is liable to be called for home defence, it is stimulating the matrimonially inclined towards the officials who issue licenses.

What remains at the present level and all trading at Calgary

Miss Jones Takes a Holiday

Racing over the sand — playing deck quoits — golf with stones—she's the picture of health. Her bathing sandals match her suit — everything is just so. You see, Summer is a very important season for her.

She got her clothes at EATONS—just like most of her friends. Swim suit, slippers, sunhats, shin holes, all came by Mail, right out of the Catalogue! Her photo is in the mix—she wants to be well dressed—so she chooses EATONS!

T. EATON Co.

Canada to Supply Army with Universal Carriers

UNIVERSAL machine gun carriers will soon be added to the list of ready-to-be-made in Canada for the fighting forces of this and overseas. These are equipped with caterpillar treads and are very manoeuvrable and speedy. They are armoured against small arms fire and will carry three lives guns, or can be used for army ammunition, wireless sets and other necessary equipment. They will be produced in the Windsor plant of Ford Motor Company of Canada, Limited, which has been selected as the most suitable for the production of this vehicle. In the lower photograph, Mr. Wallace R. Campbell, president of the Ford Motor Company of Canada, Limited, and Lieut.-Colonel D. C. Warren, officer commanding the Essex Scottish Regiment, Windsor, inspecting one of the Universal carriers which will be produced very soon in the Ford plants.

Windsor include the powerful four-wheel drive gun tractor pictured above. These and other types of military vehicles are by rolling off the assembly line of the Canadian Ford plant which is expecting nearly 10,000 units to the Canadian army and another 25,000 units for military purposes in other Empire governments. The plant is now being expanded by a $700,000 addition to provide facilities for building Universal carriers and to handle production of other types of military vehicles.

VOLUME XXX — ALIX ALBERTA FRIDAY JULY 14, 1939

George Tattler

A very delightful shower was held at the home of Mrs Geo M Nies on Friday, in honor of Mrs Marjory Sharp, a popular bride elect of the week After a small program Faye Switzer and Iris Clarke presented the guest of honor with a number of gifts on behalf of those present. The hostess served a sumptuous lunch.

Mr and Mrs Glen Humphrey and Mr and Mrs Bill Lakemeir spent Sunday at Pine Lake, on July 7th

Mrs Ted Greening is reported on the sick list Her many friends are wishing her a speedy recovery

Mrs Bill Cook, of Drumheller, is visiting at the home of Mr and Mrs F Bowwell.

Mr and Mrs. R Albers and son visited at the home of Mr. and Mrs T Greening, Monday evening

Mrs. D Wiggins has returned from the Lacombe Hospital. She is now recuperating at her home in Mirror

Collect Waste Metal

The following letter appears in the Edmonton Journal of July 13th. It is timely and practical. There are hundreds of tons of good scrap metal lying on garbage dumps all over Alberta It only needs collecting, and shipping

"The papers are telling of the war effort being put forward by the people of Great Britan, how they are sacrificing even the beautiful metal fences on their public and private parks to secure metal for munitions. Now the question arises: Why cannot we, here in Canada, do something of a like nature?

There are tons of metal going to waste in junk heaps and on our farms. There are few farmers who would'nt be willing to gather up the waste metal and donate it. This metal could be gathered in heaps in places convenient for shipment by rail. Would'nt it be a worthwhile venture to convert our waste material into victory.

If the authorities would issue lists of usable materials, other things beside metal could be collected and the railway companies would surely be willing to transport the material, if not free, at greatly reduced rates."
—A Patriot.

The Daily Mail of London reports the Imperial Government may abandon its plan to send children to Canada and the U.S.

CANADIANA

Edmonton: — Provincial employment service figures show a decrease of 537 in those seeking jobs for the week ending July 6 over the corresponding week of 1939. Registered with the bureau are 6,413 Alberta men and women. This includes 3,394 male applicants in Edmonton and 1,581 in Calgary.

Ottawa: — Price Index for Canadian farm products increased to 65.9 for the week ending July 5 from 64.2 for the previous week, according to the Dominion bureau of statistics. Farm products index for the same week in 1939 was 63.5. General wholesale commodity price index also shows a rise from 81.6 the last week in June to 82.2 for the first week in July. Corresponding index a year ago was 73.2.

Edmonton: - Addressing a public meeting at the Convocation Hall, Professor Norman Mackenzie of the University of Toronto, declared Canadians are at war "to determine our own way of life, which would be imposed de under an alien domination such as that of the German Government." The Allies had been unprepared for war, said the speaker, because of their sincere desire for peace. To meet the foe on equal terms meant casting aside the democratic way of life and this the democracies hesitated to do, stated Professor Mackenzie. He said the immediate cause of the war was the Russo German treaty which released Germany from fear of Russian invasion.

Regina: — Abandonment of 10,000,000 acres of low grade wheat land in western Canada was seen as a possible result of Hitler's drive in Europe by Hon J T Taggart, Saskatchewan's Minister of Agriculture. Domination of Europe by the Nazis and consequent loss of European markets might have this result said the Minister. This land would probably be devoted to sheep ranching he added This would mean a complete readjustment of local government organizations. The Minister said he suggested sheep ranching because, "wool and mutton are the only important live stock products of which there is a deficency at the present time in Canada."

M. M. MANN

System Outlined

"Prairie Sentinels" is the title of an attractive booklet which has just been issued. This booklet deals with the handling and movement of Canada's grain crop and should be in the library of every farmer's home

In its opening pages "Prairie Sentinels" reviews the early history of wheat growing in Canada. The functions of the Board of Grain Commissioners are outlined and details are given concerning the methods which farmers may use in handling their grain at country elevators. The functions of the terminal elevator and the exporter in the movement of the wheat crop are reviewed, and information on the cost of handling and transporting grain is given. Salient facts taken from reports of various Royal Commissions which have investigated the grain trade since 1899 are quoted as well as recommendations which has been given Canada's grain handling system by farm leaders. This booklet is free at any of the Line Elevators.

BOYS' AND GIRLS' FAIR PRIZE LIST

The following is the Prize List for the 1939 Alix Fair for boys' and girls' work (from Grades I to IX, inclusive). This prize list has been drawn to coincide with school work, and it is the desire of the directors in charge to have a large exhibit. We ask school teachers to encourage pupils to take a interest in this prize list and 1939 Alix Fair.

BOYS' and GIRLS' Work

U. S. Congress has been asked to grant another five billion dollars to build up a defence fleet for the pacific. If dollars are the bulwarks of democracy, Americans ought to win.

[illegible]

A warning the request of a number of patriotic groups in Canada, the War Saving Committee today announced the broadening of regulations governing issue of War Savings Certificates. Certificates have heretofore been issued only to individuals, but these will be available in future to specific groups of individuals who wish to act in concert.

Limitations as to the amount of $500 which may be purchased in any single year and other conditions remain unchanged.

Under the new regulations, incorporated or unincorporated bodies organized for the purpose of carrying on, without pecuniary gain to their members, objects of a national, municipal, patriotic, religious, educational, charitable, professional, social or sporting character or the like, including service of the labour and fraternal organizations, excepting those acting primarily as insurance or benefit societies, will be permitted to purchase War Savings Certificates.

With the revised authority, approved by Order in Council, the War Saving Committee is authorized to determine whether any group is eligible to purchase War Savings Certificates under the provisions of the regulations.

A WARNING REGARDING WILD MUSTARD

Wild Mustard, sometimes called Charlock or Ontario Mustard, is at present appearing in scattered patches throughout Alberta, particularly in the central portion. Moisture conditions this season have been especially favourable for this weed and the infestation is heavier than it has been for some time past. If the scattered patches occurring along roadways and to some extent in cultivated fields, are cut or pulled immediately, the setting of seed will be prevented and much time, labor and money saved. Since the plant is an annual it reproduces from seed, hence, it is essential to destroy Wild Mustard while the plant is in bloom and before any seed has been formed. The stems of the plant are erect, branched, and grow from one to three feet in height. There is a purplish colouration where the branches join the main stem. The plant may be further identified by its bright, lemon-yellow flowers. The Government is taking steps to destroy weed growth along main gravel highways and is paying particular attention to this plan. Farmers are warned that neglect of Wild Mustard this season may cause very heavy losses another year. Scythe, mow or pull immediately all Wild Mustard in your district.

Those who have tried to maintain a budget as a means of saving will endorse this statement by Representative Gifford of the U. S. congress: "Economy is a way of spending money and getting no fun out of it."

LOW SUMMER FARES
ALL RAIL or LAKE & RAIL to EASTERN CANADA

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Mr. Hickey, of Bothe, is visiting his daughter, Mrs. Blair.

Mr. and Mrs. Merle Early and family are away on their holidays.

Mrs. Blair, has returned home from Bothe where she has been visiting friends.

Mr. and Mrs. T. Wilton and Mr. and Mrs. Ray Wilton were Red Deer visitors on Tuesday.

A week ago thieves broke into the post-office store at Halkirk, taking clothing, groceries, cigarette and stamps.

Mrs. Zoellner, mother of Shannon, mother of Mrs. Ray Wilton, is in Alix on a visit to her daughter.

Mrs. McLean, of Gleichen, was in Alix last week, visiting her daughters, Mrs. F. Page and Mrs. Roy Johnson.

Miss Margaret Smathers, of Mirror, is visiting her friend Miss Marguerite Smith, this week.

Miss Hutton, of Portland, Oregon, leaves for home on Saturday, after a visit to her sister, Mrs. Beatty, of Alix.

Hail did serious damage in the Harris-Hedgewick district on Friday of last week. Chasins, Stromo, Killam and Edgerton also reported severe damage.

Mrs. Knight, of Halkirk, is taking over the Coffee Shop from Mrs. Brookhart, on Thursday.

The Alix Fair is only a little over three weeks away. Keep this in mind and govern yourself accordingly. Make it a success.

Mr. A. Moller, of Mirror, died Sunday. He was buried at Mirror on Tuesday. Flewelling & Son were in charge of funeral arrangements.

Signalman Ray Wilton is home on leave from Kingston, Ont. There must be a scarcity of cloth down east, Ray seems home wearing a pair of panties in a Boy Scout.

FOR SALE—1937 Ford Truck 1½-ton, new Box, Heater, good rubber, $840.00.—Also 500 gal. ton Water Tank, $45.—R. F. Bawms, Clive. 7-1p

FOR SALE—A quantity of Mink Pens, Pelter Pens and Breeder Pens; price reasonable. Write or see GAUDET & WILSON, Mirror. 7-3p

K. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, Aug. 9th. On Wednesday to Saturday of each week consult at Calgary office, 250 316 Southam Building.

Crop conditions are good in our district. We have had a little too much moisture to suit the haymakers. The grain is starting to head out and every thing points to a successful crop season.

We are sorry to learn of the illness of Mrs. Inman, mother of Mrs. Roy Ramsay, and hope for her speedy recovery. Mrs. Inman, a few years ago, lived in the district, and is well known to many friends. She is now residing with her daughter here.

Died suddenly at Petrolia, Ontario, on Monday, July 26th, Miss Mary Draper, youngest daughter of the late Mr. and Mrs. Draper, and youngest sister of Mrs. H. H. Mann, of Alix. Miss Draper may be remembered by some as a visitor here in 1924.

Commencing Friday 30th, Len Siddons, right after giving P. T. to the home volunteers, will resume, in the basement of the school, with the children of our district. Physical training boxing and games will be in store for all interested kiddies. Senior boys for boxing will commence at 9:15 p.m. Mr. J. Collins will be assisting him.

MIRROR NEWS

A meeting under the auspices of the Alix Legion was called in Mirror, last week, by the Mirror members, to form a volunteer reserve. Captain A.A.S. Batchelor addressed the meeting, at which 70 signed up. It was decided to train every Tuesday in the school grounds.

The following Mirror residents are holidaying: Misses Ruth and Bessie Naylor at Innisfail, Miss Alvis Kerr at Edmonton, Misses June and Grace Coglon in Saskatchewan, and Miss Betty Black, Dick Paul and Keith Sheppard at Vancouver.

Miss Joan Webster has returned from a holiday in Springfield, Olds and Sundre districts.

Miss Audrey Reid, who has been visiting her uncle, Clayton Reid, has returned to her home in Saskatoon, Sask.

At a recent meeting of the Mirror school board, Miss Audrey Dunlap, of Calgary, and Miss P. M. MacDonald, of Wardspite, Alta., were hired to teach Grades I and II, Grades III and IV respectively.

Mr. Howard Wells, of Bonnyville, Alta., is visiting in the C. N. S. station while Mrs. A. Simmons is on her holidays in Edmonton.

The death occured, on Sunday afternoon, July 31st., of Arvid Muller, age 7 years, after a lingering illness. He had resided the past 18 years in Mirror. He leaves to mourn his daughter, two daughters-in-law, Mrs. C. Ray, Red Deer; Mrs. E. Olsen, Alix; and three sons, Halvar, of Innisfail, Ted, of Tabor, and Sydney, at home. The funeral was held Wednesday afternoon.

TEES TOPICS

Mr. and Mrs. G. H. Meadows have as their guests their son and daughter-in-law, Mr. and Mrs. Fred Meadows, of Athabaska.

Miss Mary Hattier, who has been spending two weeks with her friend, Miss Bessie Nain, of Mirror, has returned home.

Mr. and Mrs. Raymond Heath have returned from their wedding trip to Sandpoint, Idaho.

Despite the rain, a very good crowd attended the dance on Saturday night. These Saturday night dances are becoming quite popular with young and not quite so young.

Mr. and Mrs. Ogilvie and daughters, Bessie and Marion, have left for Banff and Jasper for a couple of weeks' vacation.

Mr. and Mrs. Wm. Ferguson and family are holidaying at Banff.

Miss Marvine Lowsen spent the week end with her parents here.

A free dance will be held in the Tees hall on Saturday night, July 31st. Music by Mayo Sisters will furnish the music, but all musicians are requested to attend and help make a twelve piece orchestra.

The Christian Missionary Alliance will hold services next Sunday, in Tees, at 3 p.m. G. C. Anderson will be in charge of the service.

Mrs. Gordon Wilson returned home to Alix on Saturday.

What may have been a serious accident occurred last Sunday, on the bridge over the C. N. R. track, near town, when cars, one travelling on the wrong side, did a quick swerve to avoid a collision. He dumped his car and broke a piece of timber on the bridge. The lady passenger of the following motor then from going over the bridge. Blame for the accident is divided between the two motorists.

The Foe Within

[illegible] which [illegible] and confusion which people are calling World War No. 2, eventually emerge fundamentally the same. Individual human welfare as the chief [illegible] great changes in government, new methods of appeal to the people, new economic problems, [illegible] will nevertheless be the world on an entirely different basis to that we have hitherto known and experienced.

[illegible] in the new world which we dimly divine is coming after the [illegible] of 1939 it has ceased going to be" is it going to be some thing better than we have dreamed, or is it going to be something infinitely worse than we could fear?

Are hate and greed [illegible] and will the brotherhoods between nations and among individuals going to be buried so deep that they will never be resurrected? Are those forces of evil going to be repressed by power exerted by constantly humanity, and the love which so often we have glibly declared should comprise the cornerstone of relationships between man and man and between nation and nation or in the world to be given over to an unbridled reign of fear and, cruelty, suspicion and slavery?

In other words, are the forces of horror and evil against which we [illegible] with those who [illegible] with us going to be allowed to prevail, or are we going to give our lives with determination to conquer no matter how long and bitter the conflict no matter how much we may have to suffer and endure in the meantime and without regard to the cost to each of us or [illegible] and to the nations as a whole?

The answer to these questions is simple. It lies within the heart and mind of each of us individuals and as members of the Canadian nation. Along with our Allies we can and will prevail provided our attitude as an individuals towards the gigantic struggle in the right one provided that all of us are determined to wage this warfare to a finish and provided that each and every one of us dedicates himself and herself to the task in hand with the last ounce of physical ability and will power. And make no mistake. It may well be that these last ounces of reserves may have to be called upon to turn the scales in our direction

* * *

Thanksgiving Message

And what a the attitude which we must bring to bear on our activities and contributions towards this tremendous struggle." In it has true that if we are to win through to the end and be in a position subsequently to say what kind of a world we are going to live and have our being that our strength of arms must be bolstered by high moral purpose. Just as much as the dividends must be endowed with these principles which we hope to be able to impose upon a writhing world once the peace is signed, that we must practice these principles in our dealings one with another that we must arrange them as guiding lights in the conduct of the war and that when victory has been [illegible] and [illegible] and [illegible] and

Note and Comment

The U. S. Government has ordered and obtained from Congress five millions dollars to build a fleet for the Pacific The Americans are doing this for a purpose and it is not intended for a bluff. That huge amount of money is not big a price to pay for a bluff. The Japanese will not feel any easier in mind because of this huge appropriation and the Chinese will feel quite ly encouraged. The Americans are playing a game of watchful waiting. They want to see how John Bull and Sandie Hitler Just as soon as the European situation is cleared Uncle Sam will show his hand in the Far East. And will be in a position to back it up with bombers and battleships.

We venture to say there are few Canadians who are not pleased at the nomination of Theodore Roosevelt for the Presidency of the U. S. A. Hard times would be impossible for a second rat ification country Mr. Roosevelt's nomination is the greatness of the man in the situation of his fellow countrymen. His eight years in office has put him in a position to render greater service than any new man could possibly do He is a man of courage and commanship, and his long training in war reporting gives him an understanding that few of his countrymenpossess. Here's hoping he will win the contest.

Registration Plan

A nation-wide plan for the registration of every man and woman in Canada, twenty-one age of 16 years, has been announced by Hon. James G. Gardiner, Minister of National War Services. National registration is a first step in carrying out the objects of the National Resources Mobilization Act.

Four days will be set aside about August 14 for registration purposes.

John Castongeuay Chief Electoral Officer for Canada, has been appointed Chief Registrar, by order in-council, to supervise national registration. A provincial organization will be set up in each province with the Chief Justice of that province or a Judge appointed by him as the head.

To carry out actual registration members of the Civil Service Commission are asked to name a registrar and a deputy registrar in the constituency they represent. These in turn will appoint two persons to assist in addition of the riding to carry out details of the plan. This plan is patterned along the lines followed in taking the vote in a Dominion election, with the exception that registration will be compulsory, during the four days set aside by the Minister. Each subdivision will be divided in to four polls and the people in each area will register on a given day.

Rates of pay for registration officials will approximate those given to election officials with the pay for rental of registration offices. Enumerators and deputy registrars will be allowed a honorary travelling expenses.

An appeal to make registration a success has been sent out by Hon. J. G. Gardiner and the services of voluntary workers and organizations solicited.

COMPLICATED BUSINESS

Some idea of the complexity of the problems facing the Foreign Exchange Control Board is gathered from the fact that it took officials of the Board 48 hours to explain fully the general broad aspects of foreign exchange control to 31 chartered accountants who were called to the head of the Board one day last week.

CORRESPONDENCE

Alix, Alberta.
July 12th, 1926.

Editor Alix Free Press,
Alix, Alberta.

Dear Sir:—With reference to a so called newscap by J. M. Clive in a letter by Mrs. Barrett.

I am of the opinion that this matter has not gone far enough, the letter referred to might have a bad impression in the minds of many, especially when the writer bitterly complained that Mr. MacMillan had behind one of the few acts that he had accomplished Stettler.

Public, D. R. MacMillan, M. L. A., and I are not opposite sides of the road Democracy gives us that privilege. The meeting was called to gain a cross section view of public opinion for home defence. I therefore Mr MacMillan right ly gave his views and, no doubt, the views of many Albertans of the last four gatherings at the polls have any bearing.

During the war of 1914-18, I stood alongside of Bruce MacMillan (now M.L.A.) for days on end, up to our waists in mud and water protecting our front line, fighting for the privilege of free democratic speech. How long Bruce lasted after I was captured, I cannot say, but he returned with the regiment two years later and was decorated.

After these many years returned for a feasible viewpoint.

The writer resigned to be on the staff of the Public possibly in railroad parlance. Again in railroad parlance Bruce did not pull into a side track in 1914, he just plugged right up to the front line and was fortunate enough to have a return ticket.

Possibly Mr. Clive and others are also on the main line but it happens to be a single track. We would like to see a double track and no danger of a headon crash because they are doing their best to avoid the possibility of a double cross, such as, Germany, Holland, Belgium etc.

Here is something for the writer and others to learn a number. Germany was dismembered until the majority of the sheep elected Hitler, we never agree the majority in that case were wrong.

I am not writing to approve or disapprove any speech made at the meeting under discussion. I went with an open mind, therefore polluted have had no influence on my judgement of the proceedings. The object is a die loyal impression being conveyed to the public through your columns as being the character of one who stood in the front line ready to again serve Canada and the British Empire.

For all who read this, think over the words of Ruth De Vitt, "Be patient and fight while living" and remember them, why the world has a wonderful world. Yours truly,

Jas. F. Nellis.

We had hoped this episode was closed, but Mr. Nellis seems to think otherwise, so we will let him present his views. There is only one point on which we like to hear from him. The meeting in question was not called to gain a cross section of public opinion for home defence. It was a non-political meeting to discuss the conscription (?). It was not called to discuss what caused the war or the events leading up to it. The real purpose was to consider what steps should be taken in the event of Fifth Column activities, by the enemy, in our province. Hence Mr. Earl Mac MacMillan stood to the subject matter and we have been no trouble at all.—Editor.

At Last!

On being asked "What is Social Credit?" Mr. Blackmore, in the House, answered: "There is no question any more but there Alberta is more eager to answer and no person better qualified to explain it than Mr. Low."

This is just what we have been waiting for—a man that can explain Social Credit.

A new Canadian-built war ship was launched at Montreal on Monday.

Albertans think they know something about taxes, but read this: An income exceeding £20,000, the government takes nine-tenths of every pound, and that is what you might call "pushing the risk."

WEDDING

Siddons-Rouse

A quiet but pretty wedding was solemnized in the Alix United Church on Sunday, July 25th, when Elizabeth Anne, elder Baby Winnona, youngest daughter of Mr. and Mrs. C. D. Rouse, of Alix, was united in marriage to Gunner Reg Siddons, R.C.A. — C.A.M.F., 37-70 Field Battery, Calgary, son of Mr. and Mrs. H. Siddons, also of Alix. Rev. C. S. Cowan performed the ceremony.

The bride, who looked charming in a gown of white net over satin, with a veil held in place by a bandeaux of orange blossoms, and carrying a bouquet of pink carnations, entered the church on the arm of her father to the strains of the wedding march, played by Miss M. Sanderson.

The bride was attended by her sister, Miss Ethel Rouse, who wore a floor length dress of Acadia blue crepe with white accessories, and also carried a bouquet of white carnations.

The groom was attended by his brother, Mr. Ken Siddons, of the same battalion.

Elaine Prisco, neice of the bride, and Betty Siddons, sister of the groom, acted as flower girls, and carried bouquets of carnations and sweet peas.

During the signing of the register Miss Leah Walker sang "I Love You Truly."

Following the ceremony a reception was held at the bride's home, the table being decorated with pink streamers and a three tier wedding cake.

The same evening the newlyweds left for Calgary, the bride travelling in a dust rose suit with white accessories. The groom went they will reside there, where the groom will resume his training.

Farm Storage Important

It is feared that many Alberta farmers do not fully realize the importance of the congestion now existing in grain storage. It is a certainty that before harvest promises very far this coming autumn that freight cars will be very scarce to be completely plugged.

Our terminal elevators on both Atlantic and Pacific seaboards, as well as terminals on the Great Lakes and while in the interior, are pretty well loaded with wheat and other grains at the present time. The surplus grain is backed up into country elevators, a delay in the progress carried state of affairs.

What the provincial government may do will not relieve the freight car congestion. The great bulk of the grain that will be thrashed this fall will have to be carried by farm teams, in order to prevent damage and loss. Every effort should be made to provide as much cash farm storage as possible.

It is evident that it may be impossible to market grain in the autumn months, and it is a pleasure that should not be neglected.

It won't be long now before harvest is here and the least possible time is desired in developing farm storage plans.

U. G. G. Plan

A new plan for financing farmers in connection with the marketing of unground wheat, in order to defer grain this fall, is proposed by a board of directors of the United Grain Growers Limited in a statement made public following a meeting held in Calgary last week. To enable banks to lend money on a broad scale to such farmers, on grain stored on farms, it is suggested that they be given a Government guarantee against loss up to a certain percentage of the total lost. This is similar to the plan followed in the last two Home Improvement Loans, experience with which, it is pointed out, has been highly satisfactory both to the Government and to the banks.

It is also noted that the price for wheat to be milled for flour for domestic consumption in Canada be set at not less than $1.25 per bushel basis No. 1 Northern in store Port of Fort

BEER

Offers an Economical Sensible flourish to the Hospitality that graces your home.

Beer is not only a natural part of gracious, considerate hospitality, but it is surprisingly inexpensive. Many people report that Beer is a welcome help in balancing the entertainment budget.

Mr Lyon says the Government is still hopes to pay dividends.

Pat, an inveterate drunkard, was at the point last asked him what to do about it. "Pat," said he, "I'll have to put you on the pledge," the priest said, "but mind you, if you break the pledge I'll turn ye into a toad."

It wasn't long, however, before Pat was found in Donovan Rooney's and ordered home drunk. He sat for some time in silence in a chair, then he turned to his wife and said: "Margaie, if you see me getting number 4 number, let goodness sake keep yer eye on the cat."

Several young men were candidates for commission in an officer's training camp back in the early days of 1917. The instructor called upon a few youth to give and explain the solution of a problem in tactics. The first one rose, approached for a moment or two, then stood the problem was too deep for him. He begged to be excused for his confession.

"You seem to be better fit than I, sajor," said the instructor.

"Yes, sir," replied the candid lad. "You teach me, but I lead squads."

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

ROOM FOR RENT.—Apply to Mrs. A. K. Bissett.

Master Dennis Brenkhart is spending a week in Stettler.

The well drillers will arrive shortly to drill a well on the school grounds.

Anthony Larsen, of Clover-dale, B.C., is visiting friends in Alix and district.

Roy Peare and Cliff Brenkhart left last Saturday for Kingston, Ont.

Miss Lova Shiletto and Master Emery Shiletto, of Hanna, are visiting Mr. and Mrs. W. D. Clark.

Mr. and Mrs. J. Cleaf have taken up residence in the E. Perthy house on Main Street South.

Mervin Peare is visiting in Edmonton for a week, the guest of his sister, Mrs. Olson.

Mr. and Mrs. Gordon Driver, of Edmonton, visited Mrs. Peare on Sunday.

Mrs. Lee Olson, of Edmonton, spent the week with her mother, Mrs. Peare. She returned to the city Sunday.

Alberta Pacific Elevator will be closed for two weeks, starting Monday, August 5th, to August 19th.

Sharpe & Page's Store, at Stettler, was burglarized, Saturday night, to the tune of $1,300 in cheques, none of them endorsed.

Service in the United Church Sunday evening, at 7.30. Mr. Thompson will hold the morning service Sunday, Aug. 13th, at 11 o'clock.

FOR SALE—A quantity of Mink Pens, Pelter Pens and Breeder Pens; price reasonable. Write or see GAUDER & WILSON, Mirror. 7-3p

Mr. and Mrs. E. M. H. Farley returned on Wednesday from a months trip to the Eastern States, visiting among other places New York, Washington and Chicago.

Jack Chinn, son of Lee Chinn, former resident of Alix, was receiving acquaintances in Alix on Thursday last. Jack is with the Sandwich Highlanders training in Calgary.

K. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, Aug. 8th. Go Wednesday to Saturday of each week inclusive at Calgary office, 209 310 Southam Building.

Miss Gleb Marryat, of the C.B.C., Winnipeg, is visiting at Mr. and Mrs. Walter Parlby. Miss Marryat has resigned her position with the C.B.C., and will proceed to the coast in about two weeks time, where she will make her permanent home.

We would like to secure correspondents in Clive and Nevis. It is a good opportunity for older students in school or school teachers to improve their composition and learn the art of writing. Many a writer got his or her first start in the game as country newspaper correspondents. It is good to practice by writing events to your home paper.

Some beautiful gardens may be seen in Alix this season. The general average is good. Comparisons are odious, so we will mention no favorites. The thing to do is to make a tour and take your choice. In this case seeing is better than reading; but it is a very pleasant way to spend an hour. Flowers are in profusion and seem to take up more room than vegetables. The plots in many cases are well planned and all growth in orderly array. The judges have been guessing the county will have to use disinfectants

Mr. and Mrs. A. Keeben were Red Deer visitors last week.

Miss Margaret Semple is spending a week visiting at Lacombe.

Born—To Mr. and Mrs. Stanley Innis, in Red Deer hospital, Tuesday, July 25, a daughter.

The Prize List the Alix Fair will be out next week. If it isn't see Bob about it.

Mr. and Mrs. A. MacDonald, Mr. and Mrs. Webb and families all took in the Red Deer Fair last week.

We are sorry to report that Mr. Charles Stone has been on the sick list and is under Dr. Warren's care at present.

Mrs. Boyd Crocker, of Lacombe, has been visiting, for the past ten days, at the home of her parents, Mr. and Mrs. T. Semple.

Some more of the local boys are enlisting. George Maher and Harold Wilson, south of town, left for Edmonton on Monday last.

Hugh Grieve and his five star band will play for a Dance in Alix, on Friday, August 9th, coming direct from Calgary. Bring your friends and make this a real dance.

A few of our local cream shippers attended the picnic held at the Lacombe Experimental Farm, on Saturday last, and report a most enjoyable time. It was one of the most successful days been held at this popular station.

TEES TOPICS

In honor of Mrs. Raymond Heath, the former Miss Esther Peterson, a miscellaneous shower was held in the hall on Monday night.

Dancing in the Tees hall again revived the where-to-go Saturday night problem for the young people of Tees and surrounding towns, on Saturday last. Owing to the date, the 1st August 17th, these dances will be held every Saturday night.

Posters are out for a big hard time dance in Tees, on Friday, August 18th. The Tees Stokers Club are holding this dance, and the proceeds will be used to help our soldiers.

Quite a number from Tees attended the Lacombe fair this week.

A Red Cross Sports day will be held in Clive on Friday, Aug. 9th, with a big dance in the evening.

A large crowd gathered in town on Saturday afternoon for the baseball game between Nebraska and the Tees boys. Of course the Tees boys won as usual by a score of 11 to 7.

Mr. and Mrs. F. H. Hoffman returned on Saturday from an extended visit to the western states.

WEDDING

WALKER—MATTIE

A quiet but pretty wedding was performed in the Nanaree Chapel, at Aspen Beach, on Saturday, July 29th, at 6 p.m. when Bertha Madeline Mattie and Howard Clayton Walker were united in marriage. Rev. H. H. Mattie, brother of the bride, performed the ceremony.

The bride looked charming in a white flower over taffeta.

After a short honeymoon at Sylvan Lake the young couple will return to Alix.

BIG BEN
PERFECT

Trends In Migration

Due to the events that the war in Europe is taking it looks as if the foundations of the solution of one of Canada's major problems that of additional population are being laid at the present time. Reference is made to the decision of the Canadian government to offer the hospitalities of these shores to refugee children. "For the duration and no doubt before the war is over adult refugees will be invited to make this country their home

During the discussions on immigration which have taken place at meetings of various organizations and in the public press in Western Canada in the past three or four years, while the Hornby and other immigration schemes were under consideration, stress has invariably been laid on the importance and advisability of encouraging the migration of British stock, to be many quarters it was felt that it was desirable to numerically strengthen the leaven of the entire population by infiltration of those who have been nurtured in the principles and ideals for the maintenance of which we are now waging a gigantic struggle.

At that time two or three years ago considerable opposition to additional immigration to Western Canada, and more particularly to the prairie provinces was raised by farmer and labor organizations, on economic grounds. It was felt then by the objectors, that there would be great difficulty in absorbing additional population at a time when the agricultural west was idle and during a period when farmers were unable to make a margin of profit out of their operations.

To what extent these adverse economic conditions will be ameliorated as the war progresses, it is impossible to predict at this stage. Much will depend upon the duration of the conflict and a great deal will depend upon the rapidity with which the reserves sustained during the entire months of the war can be repaired and home effort by progressive gains

* * * *

How Duty Adjusts

While none in this country doubt, or should have any reason to question the ultimate success of the Allied forces, the time that will be necessary to secure a complete Allied triumph is the one uncertain factor. Until the film is yet unrolling one cannot always be certain how long it will take to reach the happy ending.

Because of the uncertainty the economic picture in prospect is dimmed for the time being While markets for some Canadian commodities seem to be improving and others are opening up and the Canadian people are facing a change, perhaps many times, before the fighting is over

Meanwhile it is the duty of Western Canada to carry on its efforts to prosecute the war with the utmost vigor, and, for agriculture, the intervals between that there will always be on hand if plentiful supply of food commodities and other supplies for the fighting forces, so that they may be available as and when required.

As a result of recent developments another duty opens up for the people of Western Canada and that is to welcome and provide a comparatively safe harborage for many children of Britain both whose lives are threatened by the German war machine. The term 'comparatively' is used because while even this country is jeopardized, it is recognized that, for the present at least, possibly homes and their occupants are not subject to the perils which invest the women, the children and the aged in the British Isles.

* * * *

Leading To Settlement

Just how many of these British children of school age from five to 16 years will ultimately find a safer temporary home in Canada, is impossible to say but a first contingent of 10,000 is provided for under an agreement between the British and Canadian governments.

In the light of the large number of school children endangered by air bombards in Great Britain, the Onondaga looks like a drop in the bucket, but there are many limiting factors, not the least of which is the unwillingness of transport facilities. Other institutions are the number of British parents who will prefer to keep their children at home rather than entrust them to others and the number of Canadians who will be found willing to take these children into their homes.

Insofar as Western Canadian people are concerned it can be taken for granted that there will be very many who are willing to throw all selfish considerations aside and will be ready to take into their temporarily 'orphaned' new victims

That this influx of temporary visitors will mean some inconvenience to the permanent citizenry of this country, there can be no doubt. Coming to Canada at inopportune and formatory ages, many of them will readily fall into the ways and customs of the country and will be glad to remain and make their home here, and if the war is of considerable duration do, indeed, it may be, the younger ones will grow up here and when old enough to leave school will have decided that this country is, on the whole, better than make this country their home.

When the war is over it cannot be doubted that many of those who because of circumstances or desire, or both, decide that Canada will be the country of their adoption, will induce older brothers and sisters, parents and other relatives to come and settle in this country.

The Way To Advancement

A Man Must Be Willing To Work In Order To Improve His Position

A year and more ago an ex-news paper man in his early 30's deemed everable need existed his wife could and became a reader man with a true writing a certificate of ment ship has found some matter. This ed. He had no time before it a need he took carried him into the table afternoon hours. He had his grade yet to study to be put.

To-day the newspaper has a much better job and is able to go back to a different type of outlook and to log humanity as in other ways. He out for a (whose commercial travel ner a job in a field of his entire and he uses a motor car instead of a truck.

There is another young man about the same age, who has been idle for a year. He professes to want to be a commercial traveller. He is depending on pull—very largely to get a job. He has not been frustrated bodily, and his character has deteriorated. He is living at home softly. His self-esteem ship is feeble. He has not kept himself in good physical condition. He is poor

What I want to say is Have a job and get a job Take a dissatisfaction with your job, if you can't get any better one and then from it work forward to a better job one step at a time. Good Morning

Library For Troops

Canadian Authors' Series To Be Sent Overseas

"Canadian Authors Series 'a bi-lingual library of books, is formed by the education divisions of Canadian Legion War Services, has been announced in the first two autographed volumes by Prime Minister Mackenzie King Lieut.-Col. Vincent Massey, honorary president of the division, has announced

Mr King's volume "The Secret of Heroism" and Industry and Humanity" will be sent, along with 200 other volumes from the pens of well-known Canadian writers to the C.L.W.S. overseas headquarters in London The books will form the basis of a large library being established for the use of Canadian fighting forces who are studying overseas and will be supplied under the Legion's wartime scheme

In presenting his books Mr King said "I am glad to give my books for educational services and signs the hope they may be instrumental in opening up new worlds by Canadian authors."

Included in the shipment leaves Canadian Authors Series" by F G Scott, Sir Charles G D Roberts and Bliss Carman, by Lieut.-Col. Hon per L M Montgomery Rocker Charlesworth and Bourne Lefroy Leacock, Duncan and many others Most of the books bear the autographs of their authors

Purchases By Tourists

Two Per Cent. Tax On Goods Brought Back From U.S.

Goods brought into Canada by Canadian tourists returning home will be resigned to the 10 per cent sales assessment of the budget, it is value for duty on all imports except under the British preferential tariff.

Canadians tourist returning from the United States could bring $100 worth of goods into Canada free of duty free but now they will have to pay the 10 per cent. import tax.

This applies with the 11 per cent. difference in the exchange rate acting duty rate is equivalent of a 21 per cent. duty on goods being brought into the Dominion from the United States.

Under the $100 exemption during the fiscal year ended last March 31 there was about $11,000,000 worth of goods brought into Canada, estimated revenue department officials estimated.

One of the most popular articles brought in Canada under the $100 tourist exemption clause have been cases of liquor, which will have a total of 81 per cent. that must be paid to get them in Canada. 11 per cent. of this is sales tax, 70 per cent. customs duty, 10 per cent. radio tax and 10 per cent. excise duty. Imports are made under the British preferential tariff.

Gasoline Is Taxed

For months no gasoline has been brought into Canada under the $100 tourist exemption clause from the United States, the customs department officials estimated.

Explanation Is Sought

Mother Tells Why Germans Have Not Landed In England

The demoniacal sort of lie mere- scaling his mass communications for- merly limelight-conscious Nazi special experts in Paris, London and New York could not overcome how- ever much expert advice they had to- gether, to formulate a logical explanation and to the stands out of the crowd. Mr. Fritz Kuhn, leading author of Prima Nas Stories Who Either Shall Have Writing or Now Shall Have Nothing, Nazi authority, have done it.

Hitler, native Mr. Strasburg has spent Washington marks on re- ernment. Where did he learn, get the money? From the people, ex- cures Mr. Strasburg. To-day, there are about 20 million Germans employed overseas. This is nonsense. More than in 1932. But the 20 000- 000 Mr. Strasburg blamed on the fact that the 12 000 000 did in 1932. This is because there have been different sharply, because the mark has, to- prevalent in name and because living costs are up tremendously. In order to encourage farming the fat- herland has established a system of parity which is unfortunately for the farmers. Mr. Strasburg forgets that a day of reckoning must come. Hope of living on the prices of the bone of German workers So far a the Nazis have been successful. The terrorist troops have kept opposition silent As long as Germans were starving the people of Lats-sahre the King and Queen spoke to a parti- cularly Nazi audience. One of the stories who saw that the Queen was very inter- ested in the regimental badge that were all wearing. She began to frow his coat and asked Her Majesty if she would accept it. The Queen thanked the soldier took the badge and pinned it to the lapel on her own coat.

* * * *

Boyish sympathy existed for 15- year-old Cedric Hall of Bath who met once with the King and Queen Billy Brown's hand hidden behind a row of uniformed civil servants. The boy poked his fair-haired grimy head be- tween two of the civil servants The King and Queen saw him and the King asked him "How old are you?" "And What do you do here" "I'm 15, Your Majesty. Billy re- plied. "and I am a check boy at the church the men in at the door."

Escaped The Gestapo

Wife Of Fled Czech In The R.A.F. Outwits Nazis

A story of escape from the Gestapo, representative of the heritage in what you call the original venture of the refusing industry actually the idea of two Englishmen Jack in 1907

With the war on when you reliance are the bosom of the soldier and the housewife at home set up a Hannah under the fact that the medical world assures the quality of canned foods as being equal to that of fresh food, as a matter of fact

When Bryan Donkin and John Hall first had the idea of putting meat and sugar inside a tin at Dartford Iron Works in 1807, their methods were primitive And a can opener wouldn't have been much use The cans had to be opened with a ham- mer and chisel

But the idea caught on and Wil- liam Edward Parry, the explorer, took a supply of canned goods on his quest of the Northwest Passages in 1819 and on three subsequent voy- ages

Arguments against canning are defended by the fact that a can of carrots and gravy contains more iron Parry's third Arctic voyage in 1824 was opened in 1938 and found to contain, even at that date, an equivalent of carotene in fresh carrots a proof that foods do not lose in quality from being canned

Other provisions sealed in 1825 and opened in 1861 were found to be still perfectly good condition.

The Young Refugee

Hate Was But Give Themselves That Will Be Their Undoing

There is a tragic perfection to the relentless logic in the life of Lieut. Col. H. Pinkham, a young English officer who was killed in the brave defence of Calais in the early days of it.

Under the name of Wallace Dou- las he was also an actor and was one of the first of many to play the role of Raleigh in Journey's End, a character that typified all that is best in English youth, and whose life, too, it will be recalled, closed in the glow of a murderous fusillade.

There were many Raleighs in the last war There are many of them in the conflict young men of the type whom dear old Mr Chips saw leave the Cockie Inn and the tried hos- tery by the hundreds. They fight, not because they relish their horrible mis- sion of war, but because they are willing to die that England may live.

CHAPTER VIII Cont nued

He was very prison, and a man not before had been arrested and charged with the murder of a fellow prisoner. He was now in a cell with a man who was insane irritably. And now it was big thing. Aiken" he said raising a warning finger and look- ing at her "Mrs. Gibbins is striving the minds of 18,000 jurymen and, as she must be vexed have the support of the whole brigade of Guards, and every one of them, drivers, doors and theatre people would move with one accord and not one day or night till they found the man who stirred her down and dropped her poor wretched body into the waters of the Regent's Canal!"

His had rose but he motioned her down

"I've spoilt your dinner and I've spoilt my own, too," he said.

"Dead!" she whispered

He nodded

"Murdered"

"Yes. I think so. They took her out of the canal in a sack weighted be- fore I left the office, and there were marks on her throat which I have undisposed. I had the news just be- fore I came in. What was she doing near the Embankment at that hour of night, but no one? Give her tur- key and champagne, Aiken"

The waiter came and stood at his elbow in an attitude of expectancy The girl shook her head

"I can't eat."

"Canadian," said Jim. "That isn't eating: it's just nourishment."

* * * *

Arthur Inglis had the discomfort of a police visitation, but he knew nothing of Mrs Gibbins, knew much less indeed than his niece.

"I may have seen the woman, but I shouldn't recognise her."

This accorded with the informa- tion already in their possession, and the two detectives who called had a whisky-and-soda with him and de- parted.

The landlady of the Rosie could say no more than she had said on the previous afternoon to Sub-Inspector Carlton.

Jim went down himself to see the outfit next, and he had a parties- ular reason, for among the items of "regular as clockwork," some the servings which contained Mrs. Gib- bins' fingerprints. Carlton and the landlady was rather in a flutter, be- cause the latter had never arrested before.

"No, sir, it was never registered that's why I feel so awkward about it," explained the latter in answer to ward in the circumstances.) "Per- sple might think * * * but you can trust me to keep yourself, sir."

"I've asked him," smiled Jim. "Tell me, Aiken, what time before you posted? You must have seen the date stamp at eight time or other

But she couldn't help; she was not inquisitive, indeed regarded in- quisitiveness as one of the worst vices which had come into existence with telephony newspapers. She did not open the letters addressed to the lodgers, but she had looked it up after the Sub-Inspector's departure.

The local police inspector had closed the wardrobe and dressed of Mrs. Gibbins' clothes, handling the bag.

"I told him you found a paper in the bag but he couldn't see it as though he wasn't feel high and low for it."

There wasn't a paper to find said Jim untruthfully.

His position was a delicate one. He had withdrawn important state- ments from what might perhaps be a mendacious line There was only one course to take, and that he followed Returning to Scotland Yard, he re- quested an interview with the commissioner explained what he had done told them frankly his own opinions and stated the position. So much of the evidence he held This evidence of a representative of the police stenographic tal- the rest he had not taken down. This was held in Arc- Mast Gibbins the jury returned an open verdict to the effect that they were satisfied with the statement that the accused was dead and that there was no evidence to show how she met her death.

Jim interviewed him in the parlor of the Rosie landlady set aside for formal calls

"I wish you to come out with me," he said. "Have you dined?"

She had dined

Her duty was to tell him that he was taking risks he not granted, but Jim Aiken was a man who took risks her rout and hat and in the short- est time they were walking side by side through Bloomsbury Square

I'm rather worried about you, Jim."

Are you?" Her surprise was gen- uine.

Yes I am a little Didn't you tell me once that Mrs Gibbins used to order her luncheon from you?" Or were you referring to the other wo- man?"

There was a note of anxiety in his voice

"I was speaking of Mrs Gibbins She was rather confidential at times"

(To Be Continued)

Microscopic Exhibit

Canada Makes Excellent Contribution To Display At New York Fair

Canada can claim to have made the smallest contribution to the 1940 New York World's Fair, but it is cer- tainly microscopic

A display of pure Canadian nickel, just placed on view of about half the size of a mosquito's "stinger tube," has been installed in the Canadian Pavilion Acknowledged to be the smallest piece of nickel ever mined, it is the outside diameter of 10-1000 of an inch and the metal itself is only 5-1000 of an inch thick which means though this last figure is only ap- proximate, that there are two hun- dred thousandth of an inch or on other way

The exhibit shown in a transparent quadrylon filled with oil, is so minute that it cannot be seen with the naked eye in a straight line would reach over three fifths of a foot if the tube were reached over on the other, equal the thickness of a dime. Canada's nickel industry is the largest in the world, and the ingenuity of man can make them."

Answer Quiz Simple

Tomato Is Fruit Which Is Used As A Vegetable

Question: Would you please solve a problem for me? Is a tomato fruit or is the tomato a fruit or a vege- table?—I. A. Toronto.

Reply. This is an old one, but quite simple Botanically, the to- mato is a true fruit. So are the cu- cumber, squash and melon. They are true fruits because they grow from the ovary of the flower and have the seeds in the middle. Other vegetables, such as the potato, the onion and the turnip are not fruits at all, but are the roots, the stem or the leaves of plants, and so on. They are all vegetables. Rhubarb is not a fruit but a vegetable.—London Listener

No Money For Yachts

Discussion of a naturalization ce- remonies does not make a person eco- nomically loyal to Canada. By their acts and their words Canadians show they are loyal to this Dominion. The loyal person is not one who has to be told to be loyal, he knows and he loves Canada. He is proud of the heritage which is his and he is willing to defend it. He is proud to be a British subject and he is willing to defend the rights of that status. He is proud to be a Canadian citizen and he is willing to pay the price they call upon that privilege," he said.

IN U. S. GOVERNMENT

A pleasing announcement was the announcement by President Roosevelt of two prominent Republicans to im- portant posts in the United States Department Colonel Henry L. Stimson Knox by honour L.L.D Secretary for War and Frank Knox to be Secretary for Navy and Home It appears to be just to much steel and concrete relatives to Prime

Extending about 20 miles along the French-Germans frontier from Belgium to Switzerland, the line cost about $300 000,000 and afforded "all the comforts of home" to the hun- dreds of thousands of men as- signed to it

Built by the late Andre Maginot then France s minister of war, push- ed through the first credits for the work in 1929 and it was finished in 1934

The main construction was complet- ed in four years, but the building of minor work was going on almost continuously up to the start of the war

In reality the "line"—as French- men call it—is not a single line, but is a series of fortified belts, from 12 to 15 miles in depth, fronted by a vast portion of its substance reti- cular concrete and reinforced with million miles of matter In this net- ticular cataclysm or convulsion the Germans have found a formidable obstacle to their advance

Cabinet Ministers Of Dollars

But Grandest Port World Ever Saw Was Shambles To France

The greatest system of fortifica- tions of all time—that was the military reports once called France's Maginot Line Here it appears to be just to much steel and concrete relatives to Prime

Extending about 20 miles along the French-Germans frontier from Belgium to Switzerland, the line cost about $300 000,000 and afforded "all the comforts of home" to the hun- dreds of thousands of men as- signed to it

Built by the late Andre Maginot then France s minister of war, push- ed through the first credits for the work in 1929 and it was finished in 1934

Canadian Hospital In England

No Red Cross Signs On Building On Account Of Enemy Bombers

Because of the ruthlessness of Nazi airmen in attacking ambulances and hospitals, the Canadian Red Cross Society has decided not to place Red Cross signs on the new hospital in England, Dr Fred Rout- ley, vice-president, said in an address before a meeting of the Queen's park war service guild at Toronto.

Dr Routley described the institu- tion, which will be established for hos- pitals in the world. He predicted, however, that British soldier and civilian wounded in the Canadian would be evacuated to Canada be- fore the end of the war. Plans were made for hospitalization for them in Great Britain.

Could and department of health officials presented Dr Routley with a cheque for $1,343 to help meet the purchase of three ambulances.

Sudden Some Things

History Proves That We Some Close Calls Before Victory Is Assured

The assertion is sometimes heard, especially by the uninformed, that the country proves what has been asserted by Sir Winston Churchill, Sir Francis Bacon, and many others, that "we never retire anything". Such a statement is a failure, as history proves. Many of the nations have come to the very verge of defeat and ended his dramas and efforts at world conquest. War every the United States, the Peninsular Duke- tion which re-Kaiser Wilhelm sought to establish in 1914. War does settle things. And the issue of this war must be settled right.—Sheldon Mc- Lean

Giving Their Lives

The soldiers offer their lives for Canada and the British Empire. This is the highest duty that can be re- quired of any man. Those who live when they are asked to give their lives are under obligation to do so. page W. L. Clark, in the Winnipeg Free Press.

Color Ranges

List Of Color And Tints Prepared By U.S. Chemical Society

How many colors can you name or identify? Can you name 300? A list of colors and tints has been pre- pared and is accepted by the Chemical Society of the United States Margaret Hayden Rorke She guides the color tastes of America Her first task was to persuade an entire nation on a single definition for each of Canada that the west now is in a man's strongest position to lend effec- tive aid to the nation's war effort than was the case at the start of the first Great War

In a report prepared for delivery at the 24th annual convention. Mr Rhea chairman of the western dis- trict of the association said the pool year saw a general strengthening of the economy of the prairie provinces which had one of the best winters in years.

Petroleum production reached record levels and new mineral pro- fields were established The number of industrial plants and the value of their products reduced and steady growth

Summer improvement was shown in preliminary estimates of provin- cial treasurer Manitoba's ordinary revenue totalled $600 000 and Sas- katchewan s $2,500 000 No definite figure was available for Alberta, but her costs fell in Saskatchewan but Manitoba and Alberta reported in- creased costs

Mr Rhea said debt retirement was a satisfactory feature as well as private provinces in spite of genera- tion Manitoba's municipal revenues showed substantial increases The municipalities had to assume extra- ordinary burdens in the face of declining revenues, he said, adding that the provinces involved co-operated with the municipal boards built up in connection with municipal defaults

A report prepared by R. A. Grey of Winnipeg chairman of the com- mittee on municipal finance and ad- ministration for the western district, showed that conditions give promise of increased industrial activity relief, tions of relief problems and better times for agriculture and other commodities produced in the prairies.

GEMS OF THOUGHT

COURAGE

Courage is that virtue which strengthens the sense of right.—Cicero.

Where true fortitude dwells, sup- ported by conscious virtue, there may be found.—Sir Thomas Browne.

Unaided courage fills the human breast, Inspires the weak and feeds the strong.—Mrs Mary Baker Eddy.

Who, then, is the invincible man? He whom no terrors can shake, the sphere of his moral purpose can dis- concert.—Horace.

Courage is, on all hands, consider- ed as an essential of high character. —Hume.

The bravest are the tenderest, The loving are the daring.

—Bayard Taylor.

World End Wages Costs

All It Means Would Be Lost Under Hitler's Rule

C. H. S. Tupper, Secretary for In- dia, warned that if Adolf Hitler's "merciless" conquest on the "new world order" succeeds, it will be "all and to the Wages Costs and all it means would be lost under the Nazi yoke."

Speaking in London on the 720th anniversary of the Magna Carta, Amery declared that the Government is not going to "waste time" on post-war plans.

"Every man and the Dominions over more than hundred million people are fighting for their existence and by successful pressure or tough opposition by the Germans of Europe opportunity to the Germans of Europe to establish their new order. Canada for defence of their freedom and their future as well as ours, and showing by day the price they will must find particularly," he said.

ED. V. CHAMBERS,
Editor and Publisher

Note and Comment

Beverley Baxter, in Aug. 1st. Maclean's magazine, predicts that dogs will have to go if Germany really blockades England. Ships are being sunk these days, the extent of which is little known. The news however, of the past few days causes to indicate that England is holding her own. There will be little improvement till England is in a position to take the offensive, and that will not be till this fall or winter.

Give fair play to the Canadian branch of the Ford enterprises. Mr. Ford, who, by the way, is a rabid pacifist, does not interfere with his Canadian plant taking part, which has been working steadily on Canadian war orders ever since the war started. The Canadian plant is owned by Canadian shareholders.

REGISTRATION

The Editor, Alix Free Press—I am enclosing a summary of the regulations for National Registration to be held on Aug. 19-20-21. Would you kindly publish these in your paper. Individuals requiring further information may obtain this from my office in Innisfail.

I am also enclosing a list of those polling sub divisions in your area together with the place of registration and the names of the two deputy registrars in charge.

In many of these polls your assistance will be required as assistant deputies. I would appreciate you giving publicity to this fact.

In the appointing of the registrars, we have endeavored to be impartial, favoring returned men as much as possible.

Will be glad to supply any further information. Thanking you for your co-operation

R. T. Thompson, Registrar.
Innisfail, July 30, 1940.

Polling Subdivisions
Strathcona—Mrs. Malcolm Scrimgeour, Mrs. I. Hembley.
Hayes—Mrs. C. M. Sorgeay, Mrs. G. L. Gamon.
Home — Mrs. Catherine M. Gray.
Antrim—Jack Hickox, Harry Johnson.
Grant Head—Charles Norton, Frank Watson.
Alix—J. Tolleth, L. B. Mahon.
Stanton—Jens Nelson, C. M. McDougall.
North Star — R. E. Waddy, Harold Meikle.
Joffre—C. A. Small, Robert Lindsay.

Death Toll Of 20,000 Killed in Germany

New York—The German wireless in a broadcast heard here picked up by National Broadcasting Company, decided that 20,000 civilians were killed in Berlin during the invasion of the Netherlands, declaring that 6 Scheidtmen had been killed during the whole month of May the broadcast followed a note issued by the Netherlands legation in Berne, Switzerland on Sunday night, asserting that 30,000 persons were killed and 70,000 injured in a 7½ minute Nazi air raid on Rotterdam after the Netherlands army had capitulated.

The Netherlands legation added in the record, more destruction the world has ever seen . . . 6 defenseless cities destroyed, open towns bombed almost

IT'S IN THE BRITISH WAY

Also as this is written there is every indication that a furious concentrated attack on Britain will not be long in coming.

Enemy air raids are increasing in scope and intensity. Night after night, more and more people are speeding home from midnight to dawn in shelters and refuges.

We have received a number of letters from people who live in areas which are being subjected to continued air attack, and we are not ashamed to confess that as we read them we get a large lump in the throat. For the spirit of these people of Britain, old and young, thrills to the core. It is unconquerable. Fully alive to their peril, they are filled with calmness, determination and confidence. Their good humor persists.

On the roof of that island fort ress, Canadian troops are awaiting the onslaught with pride to their association with a stock which will fight on if every brick be rooted. He not stamps from other parts of the Empire. Within the hearts of the people of their homelands their pride lies, and an urge to do things worthy of that association. Marison—Magazine.

ALL ELEVATORS WILL SELL WAR SAVINGS STAMPS

All grain elevator agents will assist in the sale of war savings certificates to farmers throughout Western Canada at more than 4,000 country elevators operated by Lake Companies, Pools and the United Grain Growers it was announced today.

Facilities will be arranged whereby a farmer when delivering grain to the elevator will be enabled to have a cash grain ticket made out direct to the Government for whatever amount of War Savings Certificates he wishes to purchase. This ticket will then be forwarded to Ottawa by the elevator agent and the farmer will receive his War bond direct from Ottawa.

E. J. Tarte K.C., chairman of the War Savings Committee for Manitoba, expressed appreciation for the co-operation of the elevator companies for making available more than 4,500 additional sales outlets in rural areas of the Western provinces. He urged all farmers who wished to participate in this war effort to arrange the purchase of their certificates at country elevators.

SECRET OIL CACHES FOR NAVY

LOS ANGELES—Secret oil reserves hidden away in the remot ranges to secure a safe supply of petroleum for the United States Navy are being urged in proposals now before the State defense Committee, recently appointed by the State Legislature.

The plan to camouflage the oil reserves in mountain areas, making them available by pipelines to protect harbor, a cause to the attention of the State Defense Committee in a communication from J. A. Smith, President of the Independent Petroleum and Consumers Association.

CANADIAN RED CROSS

Alberta Red Cross volunteer workers are maintaining their vigorous stride in war work. Since February 1st. their contributions to date of July 19th, have reached Divisional Headquarters to ship 1,298 cases of surgical, soldier and refugee supplies Overseas.

Included in this grand total were 77 cartons containing 3, 614 blankets, 173 cases containing 103,208 surgical dressings, 516 cases containing 183,750 articles of soldiers supplies, and 20 cases carrying 9,729 articles of refugee relief.

D. H. Tomlinson,
Commissioner.

The regular monthly meeting of the Alix Red Cross on Tuesday Aug. 6th., in the Legion Hall.

Hally Selassie is back in our midst again as Emperor of Ethiopia. He has recently had back-ing from the British Government and will now direct the fighting against the Italians.

P.'s Will Pay The On Half Indemnity

OTTAWA, July 30.—Members of parliament will pay wages taxes on half of their sessional indemnities of 4,000 each. This figures at $60 for married men and $80 for bachelor.

Starters it had been thought that they would pay 60 per cent of the indemnity which would have made the taxes $72 and $96. But the finance minister has ruled that half of the sessional indemnity was earned after wages tax went into operation, so the sessional payments are $8 and $12 to $40 and $60.

GASOLINE IN WARFARE

How war uses up gasoline: A day's operation of a fleet of fighting and reserve planes requires enough motor fuel to operate 6,000 automobiles for a year.

Agnes McPhail, well known M. P. for Grey County, Ont., has received the nomination from the United Reform party at a convention held at Hanover.

NATIONAL STOCK TAKING NEEDS NATIONAL REGISTRATION

CANADA CALLS upon all her citizens, regardless of nationality, male and female, over 16 years of age, to register on August 19th, 20th, or 21st. Registration offices will be open from 8 a.m. to 10 p.m.

The object of this registration is to ascertain the human resources of the nation so that they may be mobilized to enable Canada to make her maximum effort in the defence of this country and towards the successful prosecution of the war.

Here are the questions you will be asked to answer. The card for women will be similar but subject to certain necessary variations. Study the questions carefully now so that you may be ready to give full and complete answers to the registration officer.

REGISTRATION DATES:- AUGUST 19th, 20th and 21st

Date of Registration
1940 ELECTORAL DISTRICT No. ..... POLLING DIVISION No. ..... Card No. .....
Month Day Year Name

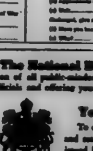
1. Surname ..... Given Names .....
(Print in block letters)
2. Permanent Postal Address (If away from usual residence when filling in card give name of usual residence)
Street and Number Rural Route and Post Office Town or City Province
3. Age last birthday ..... Date of Birth .....
Year Month Day
4. Civilian(s) conditions: Single..... Married..... Widowed..... Divorced.....
5. (If what dependents: (If any) are you the sole support)—
(a) Father.....(b) Mother.....(c) Wife.....(d) Number of children under 16 years.....(e) Number of other dependents.....(f) Do you contribute partial support to any one.....
6. Country of birth (a) Yourself..... Place.....
(b) Your father..... Place.....
(c) Your mother..... Place.....
7. Nationality or country of allegiance—British subject (a) by birth.....
(b) by naturalization.....(c) Foreign citizen.....(d) If naturalized, in what year?.....(e) In what place?.....(f) If not British subject, to what country do you owe allegiance.....
(g) If an immigrant, in what year did you enter Canada?.....
8. Racial origin.....
9. Language or languages: (a) Do you speak English.....(b) French.....
(c) What other language can you speak, read and write?.....
10. Education: (a) Primary only.....(b) Primary and Secondary.....(c) Vocational Training (Business College, Technical High School).....
(d) College or University Degree?.....
11. Is your general health (a) good?.....(b) fair?.....(c) bad?.....12. If blind, deaf, dumb, crippled or otherwise physically disabled, state nature of disability.....
If permanently disabled, are you in receipt of a pension?.....In respect of War Service?.....Canadian?.....Other?.....Of Age or Minor?.....
Signature of Registrant.....
13. Class of occupation: (a) Are you an employer of labour other than domestic?.....If so, state business.....(b) Are you working on own account, but not employing labour?.....If so, state business.....
(c) Are you an employee? (1) working at usual occupation.....(2) working at other than usual occupation.....(3) unemployed.....(4) Not seeking because pensioner, dependent, retired, independent means.....
Signature of Registrant.....
14. Occupation or Craft—
(a) Present occupation?..... Years Experience in
(b) What is your regular occupation?..... (a).....
(c) What other craft can you do well?..... (b).....
(c).....
(d) If an employee, who is your present employer? Name.....
Address..... Nature of business where employed?.....
(state precisely).....
(e) If employed in a skilled industrial occupation or profession, describe specifically the type or types of work in which you are specially employed by training or experience.....
15. Unemployed: (a) How many weeks did you work in the past 12 months?.....
(b) If out of work now, state number of weeks since last employed in any occupation other than work performed in return for direct relief.....(c) Are you totally incapacitated for employment?.....
16. (a) Were you brought up on a farm?.....(b) Until what age?.....(c) Have you worked on a farm?.....(d) How long.....(e) In what province or provinces.....
(f) Can you handle horses?.....(g) Drive motor trucks?.....(h) Drive tractors?.....
(i) Can you milk?.....(j) Are you able to do other farm work?.....
17. Is there any particular occupation in which you would like to be specially trained.....
18. Military Service: (a) Have you previously served in any Naval, Military or Air Force?.....
If so, state (a) Force of which engaged.....
(b) Approximate dates between which services performed.....
(c) Rank.....(d) Trade held.....
(e) Discharged, give reason therefor.....
(f) Have you been rejected for military service in the present war?.....
(g) When?.....(h) Where?.....

This is Your Opportunity to Help in The National Effort. To keep the cost of this registration up a minimum the Government is asking the co-operation of all public-minded citizens in the work of registration. You can help by getting in touch with your local registration officials and offering your services.

WHERE TO REGISTER

Registration offices are being set up by deputy electoral officers in the same manner as in the last Dominion election.

Registrants are required to register in the regular polling subdivisions of their own residential area. For choice of registration in the same urban municipality or district out of the regular polling subdivision see Regulation No. 7 or the city register or any registration office or registration officials. Rural residents see explanation to the local deputy registrar.



Your Registration Certificate

To every person answering the questionnaire fully and satisfactorily a certificate of registration will be issued by the local deputy registrar. This is a card, and which must be carried on the person at all times.

Penalty for Non-Registration.—Failure to register will make any male or female, married or single, over the age of 16 years, liable on a first conviction to a fine not exceeding $100 and costs, or imprisonment for a term not exceeding three months, or to both such fine and imprisonment, and upon conviction on a further penalty not exceeding $500 and costs, after the day upon which he should have registered, during which he shall continue to be unregistered.

V. A. LYLE, TEXACO PRODUCTS and Service Station

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

ROOM FOR RENT.—Apply to Mrs. A. E. Bossett.

The Village Council will meet next Monday evening.

Charlie Wong is exercising his store front.

Born—On August 4th, to Mr. and Mrs. D. Wilson, a son.

NOTICE—Miss Tillie Meyers has bought a share in the White Lunch Cafe. 2 2p

A meeting of the Jr. U.F.A. will be held on Aug 10th. Will all members please attend.

Army worms are ravaging the gardens in Clive and vicinity.

Miss Audrey Sanderson, of Rosebud, was home visiting last week-end.

The Pihlaja Bros. are extending their service by adding the addition of another room.

Mr. and Mrs. Karl Schnepf, of Rosebud, spent last week end visiting with their folks around Alix and Delburne.

Mrs. H. Sanderson, returned last week after spending her holidays with friends in Calgary, Banff and Lake Louise.

Don't forget the Ladies Auxiliary meeting, August 9th. We need your help to give our boys in Active Service all possible comfort.

Lemar Sanger, of Sanger's Service Station, Clive, is joining the Royal Canadian Air Force, and has closed his business.

A demonstration of the Minneapolis Moline Machine will be given next week. See V. A. Lyle, the agent for further particulars.

Mrs. Yarwood returned on Monday from her visit to Vancouver and Armstrong, B. C. Her son is now in charge of the lighting plant in Armstrong.

Mrs. Scarf, who has been visiting at the Bashaschuk, returned to her home in Chinook on Thursday.

The Misses Isobel and Grace Mann are visiting at the home of their parents, Mr. and Mrs. H. H. Mann.

Miss Blanche Hansen, who has been visiting her aunt Mrs. Stewart, at Hytop Lake, returned home on Monday.

During the thunder shower last Thursday afternoon, Mr. Lairsson Church, south of Nevis, had his barn struck with lightning, resulting in damage to the barn and the death of three fine horses and injury to two others.

Gospel services will be conducted during the months, in the Town Hall at Tees, every Sunday afternoon, at 3 o'clock. Special music by duets and quartettes will be featured. These services will be conducted by the Christian Missionary Alliance.

We do not think there will be any lack of potatoes or any other vegetables this year, judging by a sample brought to our office on Saturday morning. Two potatoes, weighing over a pound each, and grown by Miss Peggy Wallace, of Alix, are out evidence that, given moisture, growth is assured. Miss Wallerton is to be congratulated on her produce.

In the last issue it was stated that a rumor was going round that a pastor of a church in Alix from Alix, who was visiting relatives in the States, had completed plans and acquisition of the whole district etc., interest to our enemies. This rumor is absolutely false in all ways. This pastor had only visited his relatives and friends in MacNutt, Sask. and due to the death of his wife's father he was delayed somewhat longer than he had expected. We understand that all such false rumors will cease from now on.

Alex Bossett is spending the week end at Meyerthorpe.

Today, Friday, is sports day at Clive.

Mrs. A. E. Holt and daughter, of Calgary, is visiting her mother Mrs. Elder, of Alix.

Born to Mr. and Mrs. Frankhouser, of Lousana, at the Delburne Nursing Home, on Aug. 2nd, a daughter.

Born to Mr. and Mrs. Bailey, of Delburne, at the Nursing Home, on Aug. 7th, a daughter.

To our subscribers: If any of you have any complaints to make why not come to the office and tell us about it, instead of going around town and telling your grievances to others who are not interested in your trouble. We are not infallable and make no such claims, but we are always ready and willing to rectify errors where errors exist. We are not mind readers and have no proper thing to do is to come straight to the office and let us know what is on your mind. That is the only way we can find out what is bothering you, and if, after you have done that, and we refuse to correct any mistake then you have something to talk about and are justified in doing so. Do not be afraid; we won't bite you.

ALIX FAIR

Alix Fair day is not so far off, only two weeks, have you decided what entries you intend to make? Don't delay too long, all entries must be in the hands of the secretary, Bob Whitfield, before 6 p.m., Thursday 22nd August; all exhibits must be in by 10 a.m. on the 23rd, this is necessary in order to get the judging over early enough to let the public have sufficient time to see the exhibits.

All committees are now on the job, arranging the different phases, besides the exhibits there will be ball games, hard and soft, by senior and junior clubs, horse racing and a gymnasium program of races for children. Come on "Kiddies" bring the old folk and again prove that Alix and district can "Do It".

NEVIS NEWS

Mrs. W. Cunningham and son Neil, returned to their home in Ogen, Saturday, after spending a month with friends in Nevis.

Mrs. Norris is enjoying a visit from her mother and sister, Mrs. Wrangler and daughter Donna, of Turner Valley.

Wild berries are quite plentiful and most everyone is getting a good supply while the red and red gang are quite busy heading out their fields.

D. Land returned after a holiday in the Foothills.

Hilda and Floyd Moore left for Calgary on Monday.

The Ladies Softball team have been very successful in their games this season, but lost to Union Hall ladies last week.

Mr. and Mrs. Kotenko and family, of Espalat, spent Sunday at the Hilsdons home.

Mr. and Mrs. Rathvon entertained friends from Edmonton on Sunday.

The Ladies Community Club meets at the home of Mrs. McCord this Thursday.

Len Johnson and a party of friends left Alix, on Sunday morning, on a trip to Banff and the new Banff-Jasper highway to explore.

Our Specials for One Week:

Winning New Markets

The action of the federal government in appointing a national oil controller is a natural response to the decision of Parliament to vest in the government authority to conscript the mass power resources and productive power of the country with the prosecution of the war with maximum speed and efficiency in this country as its single objective.

When the importance of oil exists, in this instance, means petroleum and all its derivatives, including gasoline and fuel oils, as an agency of warfare in this generation is taken into consideration, the early decision to exercise control over production manufacturing and marketing of all petroleum was bound to be expected almost as soon as the government was clothed with the necessary powers by the people's representatives.

While at the time of writing comparatively few details of the steps that will be taken to convert this valuable Canadian resource into an important auxiliary in the country's war effort, and the extent to which it will be used for this purpose, has not been announced, it can be taken for granted that the needs will be given paramount consideration, in the light of a shortage, but that at the same time the country's ordinary industrial requirements in petroleum will be safeguarded, insofar as they do not hamper requirements for war use. The government and the controller will undoubtedly recognize that agriculture of the present day is largely dependent upon petroleum products and fuel oils for the efficient operation and efficient operation of agricultural pursuits is one of the most important items which Canada is expected to play in the fight against illiterism.

* * * *

A Widening Scope

Combined with the imposition of a new levy on imperia. governmental control and regulation of the oil industry of the Dominion, in addition to spending money for strengthening the nation's war effort, already great as an economic advantage to the west and particularly Alberta, the site of the Turner Valley oil field, proven in the past two or three years as one of the greatest oil reserves in the British Empire.

One of the benefits to be expected from this combined move is a substantial extension of the domestic market for Alberta petroleum. Under the new Alberta product has been restricted to a comparatively narrow market and it has been economically unfeasible to ship it as far west as Vancouver or as far east as Winnipeg. It has thus been virtually confined to a commercial dissimilarity, to a portion of the prairie provinces, where the demand is largely seasonal and the climatic conditions are such as to prevent even in that restricted market it has been subject to competition with oil from fields in the Western States.

As a result of these two factors it has been necessary during the past two years to refuse production in the Turner Valley field, otherwise there would have been overproduction.

Apart altogether from any control measures which the government may impose during the national oil controller, the market for Turner Valley petroleum has been widened automatically as a result of the new war exchange impost of ten per cent. on imports and this measure alone is expected to be the Winnipeg market into the Lake Superior district. It is understood and anticipated that regulations are likely to be devised and made effective which will still further widen the market for Alberta oil and its product, though which of several possible measures will this end in view will be adopted is not yet determined. It is expected, however that the Pacific Coast market will be brought within the Alberta orbit and that the assessor or later Turner Valley oil will be made available to at least, a por tion of the Rhodore Canadian market

* * * *

A Real Objective

One effect of these actual and potential measures will undoubtedly be a marked stimulus to further development of the resources of supply, not only in the Turner Valley oil fields but in other Alberta fields, and steps to be adopted to result in an acceleration of exploration and testing work in the Mackenzie as well as Alberta.

Another and news prospective outlet for Western Canadian petroleum is the manufacture of gasoline of high octane rating for use in the large quantities of aeroplanes which will shortly be in service on the various fronts. While this, it is understood, will necessitate some changes in equipment at the Western Canadian refineries, it is not expected to expect that the necessary alterations will be made and that this is contemplated as part of the new control plan.

With markets for the output of Western Canada's agricultural products materially narrowed as a result of the misfortunes of the entire stages of the war in Europe, it is very vital that other sources of revenue be developed to enable the west to make a maximum contribution to the war effort and to furnish an additional insurance policy in post war days, when they come that Petroleum may be destined to be one of those sources.

Money Passing In

Britain's Chancellor Of The Exchequer Speaks To Canadian Commons From The Empire

Sir Kingsley Wood chancellor of the exchequer told Britons that "no limit can be put to our war effort we must throw everything in."

In a luncheon address the chancellor said more than $4,000,000 (about $17,000,000) had been offered in response to the government's recent appeal for interest-free loans, and that one man signing himself "Confidence" had sent a gift of £200,000 "without any condition"

Gifts to help finance Britain's war effort have come from every part of the Empire School children and old age pensioners are among the donors.

Sir Kingsley said one of the vital reasons for confidence in the future was the fact that the "daughter nations are throwing everything in and are showing in increasing measure, men, materials and munitions."

Rent Famous orchestra leader and composer has invented a new baby grand piano which incorporates an organ, piano, cymbals, harp and harpsichord.

Burns Bug Killer, 85c.

A Famous Workman

Queen's Own Adopted "Old Bakelite" After Famous Member Killed

In a recent interview in Toronto, Sir William Mulock, of that city who is called the Dean of the Senate, described the story of "Old Bakelite."

"Old Bakelite" was the famous chestnut workhorse whose rider was killed. And he never passed but went right on at his regular pace. He was his master gave his life. And they never allowed another rider on his back. He was in it, riderless, as long as he lived. The Queen's Own adopted Bakelite as their mascot after his death. And the empty saddle was kept empty till he died.

Will Of The People

Is Main Thing About Democracy Declares Sir Ned Hall

The whole idea is that the world should be run by a few "supermen," ruled by their trained fighting machines and brute force and that anybody who thinks differently from these "supermen" is an enemy of the state and must be "liquidated". Under this scheme *other things* democracies are doomed because they are based on the will of the people instead of on the will of the dictator. That is the real secret of bitter totalitarian hostility to democracy—Dean of Indianapolis.

Nearly two-thirds of the people of Greece live by farming.

Food Problems

Health Value Of Fruits And Vegetables Is Stressed

The subject of health values of Canadian foods, particularly fruits and vegetables, is receiving an increasing amount of attention and presently problems of national importance will be J. M. Squire, Director, Science Service, Dominion Department of Agriculture in a recent address on Technical Aspects of War Time Economy made the subject of the address. Dr. Squire showed that the Canadian people are paying enormous amounts annually for sugar, molasses, glucose, part or all of which could be replaced by chemically manufactured starches which on purpose—in quality was chemically complete—and known

Dr. Squire urged the necessity of a consulting steel helmet resembling somewhat a motorcyclist's crash helmet and a respirator which will protect the eyes of the plain-dress type. The helmet and respirator are about 1 lbs. German steel helmet and no matter much should not push. The blue-grey steel helmet is painted with a dull textured down and upon at the neck, with the respirator. Both helmet and are tucked in over boots half-knee high and laced at the side Each has a detachable chin strap.

Require Something More

Not All Good Insurance Risks Can Qualify As Airmen

In theory, all males passed as fit for military service should be qualified for Air Force service, but in practice a number of applicants will presume ought flying and flying over severe or bad country create stresses which frighten school masters

This was disclosed in a paper given to the Canadian Club by Wing R.A.F. before the section of military medicine at the Canadian Medical Association annual meeting in Toronto.

One of the first assets necessary Capt Ryan declared is nervous stability and any history of an inability to withstand hitherto attacks or spells before the eyes debars a candidate from flying. Flying after 15 years of age is also a bar.

Capt. Ryan urged a great deal of both men and sports of the applicants and those with successes in team play and preference in the case of the solitary type.

Capt Ryan explained that the mark of artistic temperament is not sought although, he said many successful men have been temperamental and that the Air Force it is necessary to have a balance between temperamental and cases of rising blood pressure are limited to duty as a second pilot.

Slaughter Of Innocents

Enemy Must Be Subjugated Before Any Talk Of Peace

It is difficult to believe at the present time, that there can be any permanent peace for the civilized people. The slaughter of innocents which they have carried through Poland, the destruction of music and art of France, like their bombing of unfortified towns in England, should not be lost sight of. Nor should the bombing of devils with which there can be no compromise and no thought of peace except on the basis of unconditional surrender.

More than ever the truth of Churchill's words can be no survival without victory And for the sake of our children, that victory must not be frittered away in the peace. Toronto Telegram.

Movement Speeded Up

Every Eligible Man Is Needed For Air Training Program

"We want every man we can get," Flying Officer W S Lightbody of Pilot-Recruiting Section, Royal Canadian Air Force, declared at Calgary

Outlining the tremendous training program slated for Canadian airmen, he said 50,000 men be take to the air will be turned out each year by the establishment of another 40,000 in the ground schools. Flying Officer Lightbody said men are being called up more rapidly now and the movement will be much faster from now on.

Good Hide To Follow

A distinguished woman recently made comment, "I learned a long time ago that what I left unsaid I never had to regret or to be sorry for." This is a wholesome rule that applies equally to both sexes.

Educational Problems

Fitting The Student To Succeed In The World Of Business And Industry

Eighty-five per cent of high school students never go to college so university Tel for the most part secondary education is geared to meet the needs of the 15 per cent who are continuing their studies. Throughout the country are pondering the problem of providing a better secondary curriculum to provide the various needs of the 85 per cent. who leave the high schools. In the United States and Canada to which the Rose Bowl Game is the annual football classic, educators in the west of the country have been giving their sheltered investigation.

Dr. Alexander Inglis of Harvard has been commissioned by the high school boys and boys who had specific jobs waiting for part of the regular academic course were able to adjust themselves that much. The boys who made special students who received no opportunity to master academic lost out and especially in the high school subject adjustment much easier afterward.

Substitute Cloth

Cotton And Cloth Made From Flax Now Available

Cotton and cotton substitute manufacturers today announced plans to popularize cloth made from flax, which they said would lessen the demand for cotton, thus further running dangerously short of cotton supplies for the war and increasing the nation's flax crop.

Three special fabrics would be made, they said, from flax fibre. They are: Duck, a heavy canvas-like material; Crash, a coarse toweling, and Osnaburg, a lightweight material.

Canadian research and development work in the laboratories were named Knight Commanders of the British Empire (K.B.E.) by King George VI.

Colonel Samuel Hughes and Colonel Herbert Bell-Smith were made Companions of the Order of the Bath (C.B.).

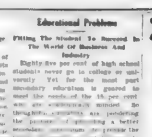
Honorary knighthoods were conferred on five Canadians in the Honours area of New Year.

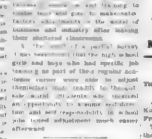
Figure It Out

Motorist Drives Good Part Of Way With Eyes Shut

Scribner's Commentator Magazine gives us this information:

What's in a wink? Well, that has its price and come but to a scientist it is an operation of the eye which requires one-fifth of a second, and occurs 25 times a minute. This experiment need to nothing to the layman but actually means that if you are driving at an average of 35 miles an hour you will drive a total of 1,400 feet—more than a city block—without your eyes shut.





The Park Lane Mystery
By Edgar Wallace
Copyright, by Edgar Wallace. Serialized by Ledger Syndicate.

CHAPTER IX—Continued

"She was your left you anything about that post?"

"Oh, no," said Alison quickly. "It was nothing—just a few words we had about four years ago."

"Did she tell you about her Christmas name—the mother's, I mean?"

"Lenin," answered the girl promptly. "They're awfully mysterious, Mr. James Carlton. What has this to do with Mr. Lang's murder?"

"Nothing except that her name was Annie Mead, and the letters on the envelope probably came to her quarterly were addressed to Miss Annie Mead, Post Office, Hale, and re-addressed by the postal authorities. A letter came this morning—"

"Poor soul!" said the girl softly "Yes."

It was surprising how well she understood him, remembering the shortness of their acquaintance. She knew, he reasoned, when he was thinking of something, or when he was sad or lone

"Isn't that queer? Do you remember my telling you of the 18,000 policemen who were bribed at Easter, and the whole congregation of the blessed? And now they are all agitated because Miss Annie Mead's name was named Lenin! That discovery—I thought we have solved it, because I knew it already—proved two things: first, that Mrs. Gibbing committed a crime, and that you're sane and recently, that this is the maniac who has been dead?"

He solemnly rubbed, and laughed softly.

"Don't tell me," he warned her "I know just the suggestive character which I am thinking. Don't say anything to rather complicated. Did I say—and—or either?"

"Neither—either," she said.

The popular restaurant into which they went was just a little over crowded, and after being served they began to talk in undertones.

They were passing along Coventry Street when a big coupe rolled slowly past. The man who was driving was in evening dress * * they saw the diamond shirt stud, the flash of the tip of his cigar.

"Nobody on earth but the Splendid Harlow!" said Alison, scandalized, said Jim. "What does he do in this part of the world at this time of night?"

The car turned to the right through Leicester Square and passed down Orange street at a pace which was strongly suspicious. It was an hour later when they got into a congested part of the city, and the man-driven "pressure" The same car they observed in both Oxford Street. "He should really travel with a band!"

"I was thinking that the girl "He frightened me terribly the night he came to the flat I mean when I opened the door to him And I so not easily scared He looked so big and powerful and ruthless that my very soul cowered before him."

They passed up deserted Long Acre it was too early for the market cafés to have assembled and the street was a wilderness Suddenly the girl found herself held hard in Jim Carlton s He was swinging it to and fro as he had done years before when they walk hand-in-hand The brewer lads of Miss Abner Brown's class at Sunday school used to see.

"I've got a very friendly feeling for you, and Jim hurriedly "I don't know why but I just have And if you talk about the philandering commissionary I will never forgive you."

There came a sudden interruption Out from a side street they were talking noisily and violently and they were moving slowly toward them Jim looked round the only thing in sight was walking in the opposite direction having passed them a minute or so before.

"I think it was the road," he said and took her arm and quickened his pace "Now, Alison, you were telling me—"

The quarrelling three turned back and had passed them.

"I want you to run back to the end of the street," said Jim "There is a policeman—no, no, don't look back Obey me, I tell you for Mr. Ham Chesterfield's sake you must run and never let on one of the three came after being turned back."

What's the idea?" he said loudly "Can't we have an argument with out you butting in?"

Riley where you are Downman was of Jim, and Jim knew and I knew just what you're after."

"Get him," unceremoniously angrily and the three rushed at him The inch length of jemmish that he carried in his hand flashed in the air and Jim caught the descending arm as the Beside hole the man was the man dropped like one that In a moment the two companions had sprung at the detective and Jim, who was fighting if not for his life at any rate for consciousness, was in the midst of a most desperate bout of fisticuffs.

Again the jemmish reached home, a second man rushed And then a rushed to the assistance, or by aiding a constant person, rush on him like cobblers or pyrotheca, directly to the pests themselves. Planting sucking pests, among which are aphids, mealy bugs, scale insects, leafhoppers, and mites, do not blow about from one plant to another.

Almost all of these sulphate, pyrethrum dusts and lead arsenate may be used without fear of damage to most crops. Calcium arsenate is less safe but if applied with care and diluted with hydrated lime, will seldom cause serious injury except to the most delicate plants. Particular caution should be used with nicotine sulphate and should be used with extreme caution except on very hardy plants.

Exception Of British Spirit

During an old raid when the Most Canada of England on secondary bomb fell through a roof and landed on the floor of a room in which women who had been sheltering were praying. Instead of exploding the bomb is reported to have turned on its side and remained there without moving. Fire brigade workers who found her at a table playing patience.

HAWAIIAN PATTIES

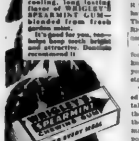
1 cup ground, uncooked veal
1 cup Cream of Wheat, (crumbled fine)
1 egg
1 teaspoon salt
1 tablespoon minced onion
1 slices pineapple
1 tablespoonful butter
1 cup brown sugar
½ cup pineapple juice
½ teaspoon ground cloves

Mix first five ingredients and shape into six flat patties Brown pineapple in butter, remove and add brown veal patties. Place veal patties on pineapple slice in a greased baking dish. Put remaining butter and sugar into the frying pan and melt over low flame Add pineapple juice and cloves, heat and pour over patties Bake covered 20 minutes in a hot oven (425 degrees F.) Six portions.

For Entire Service

When Hungary was at peace first class hotels, bars and restaurants in Italy ruled that employees dealing with the public must speak at least two of the three languages, English, French and German, in addition to their native tongue.

The Russian has cups when the war comes he will be led, God knows.



Using Insecticides

Reducing Losses In Plots And Gardens Crops Be Wet An Uses

Insecticides and the enhancement used in the chemical content of insects and related plants. They are widely employed in many branches of agriculture, and in the Prairie Provinces serve not only as an effective instrument in reducing losses in field and garden crops but also in protecting livestock against the disease bearing and obnoxious plantations by insects.

Generally speaking, insecticides are divided into two classes—stomach poisons and contact poisons, writes Lloyd Petersons, Officer in Charge, Dominion Entomological Laboratory, Indian Head, Sask. This classification is based on the manner in which the poisons are taken into the body of a pest to cause death Stomach poisons, among which are arsenate of lead arsenate calcium arsenate and Paris green are only effective if they are eaten, whereas contact poisons such as nicotine sulphate, pyrethrum dusts, lime sulphur and oil emulsions kill only by coming in contact with the pest by entering the breathing pores or penetrating the thin membranous portions of its skin.

The application of insecticides is a comfort poisons, and the importance of knowing their limitations becomes apparent when it is remembered that most plant pests of economic importance belong to the group of sucking habits, into two groups—sucking forms and piercing-sucking forms. Examples of the former are such insects as grasshoppers, cutworms, caterpillars, beetles, and wireworms bite portions out of the plants and eat them. They can be killed by covering the plants on which they are feeding with a stomach poison, such as lead arsenate, or by applying a contact poison, such as nicotine sulphate or pyrethrum, directly to the pests themselves. Piercing-sucking pests, among which are aphids, mealy bugs, scale insects, leafhoppers, and mites, do not bite portions out of the plants, however, but thrust their tube-like mouthparts deep into the tissues and suck out the juices. Since they cannot swallow any poisons are ineffectual and consequently must be applied.

Where chemical control involves the spraying or dusting of plants, it is also necessary to know if any of the particular interest in the Technician Handy" near Tewkesbury, with the inscription

Edmund Attwood, of the Vine Tree, at first erected one.

And freely he did this butter Though trenchers he scraped for it.

Then there is the wooden post at Broomhills, near Lichfield, dated 1777, and pointed out by the locals as the "Dead Man's Finger" because near Chopping Campden is one supposed to mark the grave of a suicide. It is said to mark the site of a gibbet where once swung the body of a man executed for the alleged murder of his master, who was later found to be alive and well. A yew tree post that nearly encloses the eye of travellers is one in Dorset pointing the way to the "Hardy Monument" erected in memory of the village of Stinsford (Hardy)—Manchester Guardian.

About 225,000 grains of pollen are produced by a single dandelion blossom.

Woolen garments will not shrink if they are hung out to dry while perspiring wet.

Food Shortage In Europe

Herbert Hoover Predicts Most Disastrous Famine In History

Herbert Hoover ranged his war relief experience of 30 years ago and his observations on present conditions abroad into a prediction that the world is "the most disastrous famine in history" hangs over Europe.

If the present way it s short one he said, there will be a "short famine" but if it continues for many months the problem of feeding Europe s millions will be unparalleled in the history of human suffering.

The Belgian city of Brussels, Hoover added, is faced with the problem of food in 10 to 60 days unless aid is provided.

He said he had communicated with Germany, Great Britain and the "refugee governments" of Belgium and seeking control for some "fairly good intervention" to feed the starving Private charity could not handle the problem, he declared recalling it took $30,000,000 a month to feed Belgium in the last war.

Common House Fly

A Well Known Pest Is That Often Found In Kitchen And Closet

Toilet Together

The common and maladies that can be attributed to the common house fly are hardly be overstated. It has been definitely established that more than 30 different disease organisms are carried by these pests on their feet, in their mouths and in the body of a single fly is sufficient to infect an entire household. And in spite of warnings by medical authorities that the fly season is not far off, many people are too often inclined to be careless in their attitude to this dangerous pest.

Happily year, unfortunately, we pay dearly for the mischievous work outbreaks of infectious disease for the most part, are due to infection carried by flies. Typhoid fever, tuberculosis, dysentery and other intestinal troubles can be traced to ordinary house flies.

Many methods have been devised to control this deadly menace to our national health, it is practically impossible to completely eliminate it. As individuals, however, we can take precautions to prevent the flies from coming in contact with us and our food. Screening is the most effective method of keeping flies out, but there are other things that happen to get in.

A very effective, convenient and inexpensive method is to burn pyrethrum powder in a small saucer or flour of flame, placed in strategic points throughout the house, the work quickly, cleanly and kill all the flies in the room. This should be done with the first sign of the fly season and continue throughout the summer months.

If every home and eating place would adopt this precaution, another month would be accomplished in banishing the insect pest altogether and thus make our community a safer cleaner place to live in.

GEMS OF THOUGHT

PRAYER

A prayer is its simplest definition is merely a talk turned God-ward.—Henry Ward Beecher.

Practice as life whatever you pray for, and God will give it to you more abundantly.—Pusey.

Prayer is the utilization of the love opportunity He leaves us.—Mary Baker Eddy.

He prayeth best who loveth best.—Coleridge.

In prayer it is better to have a heart without words, than words without a heart.—Bunyan.

The simple truth that freely asks in love, obtains.—Whittier.

How Source Of Income

Soldier From Yorkshire Had Clover Mine For Making Money

When recruits receive their Army pay they usually spend it. Their "crew" boss by post. When these do not arrive as expected, the mother of a Yorkshire recruit wrote to him to ask the reason.

In reply she received another, I am letting out my boss of it. a night, and my overcoat is in for the duration.

It only remains to be said that the scared Yorkshire lad is stationed in Scotland.—News of the World.

Bluebill has put himself to the front class for all time.

A Common Cause

Christian Science Monitor Comments On Canadian Pro War Policies

The Church Reporter, Sandwich, Ont. says

The disaster to the Allies in France is too crushing to be the fault of and we are able to compre hend it with the passing of the days. It will become more realistic and terrifying.

Much can be viewed in different lights. And here is one of these. The Christian Science Monitor, Parliamentary Secretary of the Minister, in a broadcast address:

"It will not be on the dry land of Europe that this war will be won. It will be won upon the seas and in the air: in distant continents, as soon as we can transport armies to them. Britain and the Americans can be mobilized to turn the tools."

That is what is, and a member of the British Government would scarcely say it, if it were not. It will be got after darkness on the side of Britain. There is still hope at least so long as we can say that. And if there is still hope for Britain and America will also be saved. Why should we in Canada, become too nervous?

SELECTED RECIPES

MAPLE FUDGE

1 lb maple sugar, broken small
½ cup Rich Golden or White Corn Syrup
1 cup milk
1 tablespoon butter
1 cup Canned Milk
Few grains salt

Mix all but nuts together and boil slowly until desired. Boil without stirring. Add nuts. Pour into cold water. Let stand until just warm then beat until creamy. Pour into pan to cool immediately in buttered pan. Add nuts while boiling.

Use Source Of Bread

LAMERTON COUNCIL

The fifth meeting of the M. D. Lamerton No. 26 was held at the Municipal office, Alix, on Saturday, August 3rd, 1940

Members present: Coun. Ohrn (Acting), Dinn, Hecht, Weatherill and Nies

At 10:30 a.m. the Reeve called Council to order and the business was transacted as follows:

Secretary read minutes of meeting of July 6, 1940.

Moved by Councillor Weatherill that the minutes be confirmed. Carried.

Secretary read By-law No. 65, Third reading accepted.

Secretary read By-law No. 66, Third reading accepted.

Secretary read By-law No. 67, Third reading accepted.

Secretary read letter from A. A. McKenzie, Commissioner, appealing to municipalities to find and report any vacant habitable buildings or build ings that could be made habitable and small expenditure, to relieve the province could place relief families from its urban centres. Council agreed to state that we have no vacant buildings.

Secretary read letter from the Royalty Securities Ltd., appealing that $10.00 per month rental be credited against arrears of taxes outstanding against lots 9 and 10, block 3, Hamlet of Alix.

Moved by Coun. Doherty to accept communication and that we advise the Royalty Securities Ltd. that they lost their opportunity to pay taxes before the Tax Sale and that we now sue the registered owner.

Secretary read application for Old Age pension by William Wallace Illingsworth.

Moved by Coun Docherty to recommend that Mr Illingsworth be granted pension of $20.00 per month.

Secretary read letter from the Stettler Municipal Hospital advising admission of Mrs. Lee Ness.

Moved by Coun. Docherty to accept communication and advise the Stettler Municipal Hospital that Mrs. Lee Ness is a resident of the Waverly M.D.

Secretary read letter from the Lacombe and District Community Hospital, advising admission of Mr. Ewald. Secretary ordered to reply that Mr. Ewald is not our charge

The Reeve reported that he had had letters from the Salvation Army, re maintenance of J. N. Amos, and that he had recommended that Mr Amos be allowed $1.00 per month from his pension to be advanced to him in small amounts, as he desired, Mr. Amos to stay in the Home. Report accepted.

Secretary read letter from J. H. McCormick, Solicitor for Mr. J. B. Craik, Tees, claiming damage of $40.00 he has suffered by reason of the manner in which a road was constructed near his property.

Moved by Coun. Weatherill to accept communication and advise J. H. McCormick, Solicitor, that the road in question has been inspected by Coun. Hecht and he reports that the water courses has not been diverted in any way to affect Mr. Craiks' property.

Secretary read letter from the Old Age Pensions Dept. advising that Mr. J. N. Goss has been granted pension of $15.00 per month. Communication accepted.

Secretary read letter from the Board of Transport Commissioners, advising that appeal of the C. N. Railways, to abandon the operation of a portion of their Bodinger Subdivision, between mile 74.1 (near Nevis) and mile 84.6 (near Alix,) had been granted. Communication accepted.

Secretary read letter from A. Scottier, Deputy Minister, advising the Dominion Govern ment has enacted legislation requiring employers to deduct from salaries and wages a tax, which may be 2 per cent of the wage or salary if the amount exceeds $600.00 per year or $ per month, if the tax exceeds $1.200.00 per year or $ per month, and to remit the amount per month to the Receiver General of Canada, and that a statement per year of the amount deducted, and to be replied.

Secretary re [illegible] the Dept of [illegible] issuing [illegible] all the present [illegible] payment of bridge A. [illegible] signed by [illegible] steps to prevent any would-be [illegible] by closing [illegible] Communication received.

Mr. J. Wellington President of Alix Fair, put in an account and requested for grant

Moved by Councillor Weatherill to accept appeal and that we make grant of $25.00 to the Alix Fair. Coun. Docherty and Hecht dissenting.

Moved by a Councillor that we apply to the Railway Commission that the C. P. Railway be required to put in crossing on road from C. N. Station through N.E. 20-39-22-W4th, leading to Highway No 12.

Moved by Councillor Hecht that we build Tax Sale Notice Municipal Office, Alix, on Saturday, Nov. 2nd, 1940, at 2:00 p.m.

Secretary read application of F. W. Jones in the matter of Soldiers Home Property Tax Exemption. Exemption ordered.

Secretary read letter from the Rural Credit Adjustment Board, advising that they had accepted $160.04 as settlement in full of 1935 and 1936 Arrears Assessments to A. Kirkham, L. H. McKinnon and J. A. Wolper. Communication accepted.

Secretary read letter from the Lacombe and District Community Hospital, advising admission of Mrs. Fred Hewetson. Communication accepted

Secretary read Financial Statement as at July 31, 1940. Accepted.

Moved by Councillor Docherty to pay the following accounts:

Hoyt Pool	$ 10 00
Wm Crawford	16 00
J. D. Aimes	19 27
Richardson Road Machinery	87 37
Dom. Tractor & Equipment Co.	84 87

MIRROR NEWS

Mr. and Mrs. C. Reid and family left Friday, August 2nd, for Kimberley, B.C., where they will visit Mrs. Reid's sister, Mrs. F. Derry.

Mr. and Mrs. E. Stonehouse and Vera have returned from a six weeks trip to Toronto.

Mr. and Mrs. Archie McNair, former residents here, were in town last week renewing acquaintances.

Those visiting in town the week are: Mrs. P. Cavanaugh and sons, of Calgary, at the home of her sister Mrs R. Armstrong; Miss J. Blair, of Banff, at the home of her friend Miss M. Estell; Mrs. J. O. Littleton and family, of Grande Prairie, at the home of her mother, Mrs. J. Cook; Leslie Weathers, of Calgary, at the home of his parents.

Mrs. F. Brough and Misses Mary Eyestone, Berniece De Voss, Ruth and Bessie Naylor, are spending two weeks at Sylvan Lake.

Miss Marion Hetherington, of Calgary, is spending a few weeks with friends of Mirror and Alix.

Mrs. E. Fairbairn, who has resided in Singapore for the past five years, is visiting at the home of Mr. A. Jaques. Mrs. Fairbairn states that she had an enjoyable crossing and is pleased with Canada and Canadian hospitality. She plans to meet her two daughters, Faye and Marion, who are attending school in England, in Mirror where they will make their home for the duration of the war.

There will be a vacation Bible School at the Gospel Tabernacle every forenoon from 9 to 12, from August 5th to 9th. There are classes for all ages. Kay Finch will be in charge.

The Young People of Gospel Tabernacle will visit the Young People of Tees district, on Thursday night, at the home of Rueben Baines.

G. C. Anderson, Pastor of Christian and Missionary Alliance, will conduct gospel services in Tees Town Hall, Sunday afternoon at 3 o'clock. All are cordially invited.

Christian Science

"Spirit" is the subject of the Lesson Sermon at all Christian Science Churches on Sunday. The Golden Text is Psalm 143:10. One of the scriptural citations is "And Jehoshaphat bowed his head with his face to the ground and all Judah and the inhabitants of Jerusalem fell before the Lord, worshipping the Lord" (II Chronicles 20:18). One of the correlative passages from Science and Health with Key to the Scriptures is "There is no power apart from God. Omnipotence has all-power, and to acknowledge any other power is to dishonor God."

Mr. and Mrs. Harry Jaques, of Mirror, who have been working on the farm for Mr. Bellhouse, near Edmonton, left Saturday morning. Mr. Jaques returning to his fathers farm to assist in the harvest, Mrs. Jaques and Gwendolyn having secured employment in an Edmonton hotel.

Grain cutting should be general about August 10th.

The rain on Friday night brought cooler weather. Last Thursday and Friday readings scored as high as 90 degrees.

Born — To Mr. and Mrs. F. Wilson, of the Great Bend district, on Aug. 5th, a daughter.

On Saturday Mr. and Mrs. Geo. Whitfield motored up from Calgary, returning on Sunday. They were accompanied by Miss Muriel Turner, Mrs. Jack Roberts and Bobby Strunk.

Harry Chapman, who lives about two miles from Mirror, had the misfortune to have his home burned down on the night of August 8th. They were just sitting down to supper when Mrs. Chapman heard a crackling noise and went to the kitchen to investigate. Fire was breaking through the roof. The contents of the house went with the building. Partial insurance was carried.

As Friday the 21st, is a holiday in Alix the stores will keep open on Wednesday afternoon.

Mr. and Mrs. Evans, of Edmonton, have been visiting Mrs. Evans sister, Mrs. J. Stone.

Mr. and Mrs. A. Keeton spent a week-end recently at Sylvan Lake.

Miss Rose Roth, of Red Deer has returned home after visiting her sister Mrs. D. Stone.

Last Thursday was clean up day at the Fairview cemetery. Plans were made for gravelling the driveway and trees will be planted some time in future. For next years officers were all re-elected to the Board. Finances are in a satisfactory condition.

Mrs. A. R. Hollings returned last week from Winnipeg, where she spent ten days with her husband, Sergt. A. E. Hollings. Mrs. Hollings reports a very nice trip and that is real cool and busy, and wishes to be remembered to friends in Alix and district.

Miss Ellen Slade, of Rosa, was a visitor at the home of Mr. and Mrs. Walper, last week.

The wind storm of Monday evening caused some damage to trees and telephone poles in town. A pole in front of the Roman Catholic Church is only kept standing by the wires attached.

Mrs. Van Carlson and small daughter, Jean, are visiting at the home of Mr. and Mrs. W. D. Clarke.

Grandma Mitchell, who has been visiting friends at Red Willow and Mirror, is home.

The Ladies Aid of the United Church will meet at the home of Mrs. Sanderson, on Wednesday, August 21st.

NOTICE—Miss Tillie Meyers has taken a share in the Mirror Lunch Cafe. 2-2p

Mr. and Mrs. Angus McLeod and daughter Dorene, of Turner Valley, visited Mrs. Mitchell and old friends last week end.

Special Gospel meetings in Alix U.F.A. Hall, by Evangelist J. R. Dunn, commencing on R. Wiens, on Thursday evening at 8 o'clock, August 27. Every body welcome.

Changing Publishing Day

Beginning with the first issue in September, The Alix Free Press will be published on Thursday instead of Friday.

The reason for this change is to enable our readers at Haynes to get better service. Under present postal deliveries it takes several days for our paper to reach Haynes, hence the need for a change. Advertisers and correspondents please make a note of this.

MIRROR NEWS

At a school board meeting here, on Saturday morning, August 15th, Mr. Roy Bromley was hired as the school janitor for the following year.

On Wednesday afternoon, August 7th, at the home of Mr. J. Paul, a miscellaneous shower was held for Miss Muriel Hopkins, whose marriage to Andrew Lahey, of this district, will take place Sunday, Aug. 11th, at Prince Rupert.

Mrs. F. Smethurst and family, left Saturday night, Aug. 15th, for Gull Lake, where they will spend a week.

Mr. Gordon C. Anderson, pastor for the Christian Missionary Alliance Tabernacle, Mirror, gave another gospel message, in Town Town Hall, Sunday afternoon. Forty-five people were present. Misses Kay and Byrnell Finch, sang a duet. Services every Sunday at 3 o'clock.

The summer Bible school of the Christian Missionary Alliance concludes their two weeks course Friday evening, August 21st, with a splendid program. The school theme was: "The Word of God". Every class enrolled in their pertinent features and was warmly appreciated by the audience. Miss Kay Finch was in charge.

Mr. Arthur Leslie, a graduate of the Western Canada Bible School, Calgary, gave the gospel message in the Christian and Missionary Alliance Tabernacle, Sunday evening. Miss Jessie Grieve, Mirror, a graduate of Seattle Bible School, rendered a piano selection.

The Y. P. Society, of Town district, are taking charge of the Y. P. program in the Christian and Missionary Alliance, Mirror, Friday night, 8 o'clock. Miss Ruth Ardley in charge.

OBITUARY

George Lees, of Alix, died on Thursday, Aug. 13th. Funeral service at the United Church, Alix, on Sunday, August 16th, at 2 p. m.

Civic Holiday

At a meeting of the Village Council, held on August 12, 1925, it was moved by Coun. Whitfield and carried: That August 21, 1925, be declared a Civic Holiday in the Village of Alix.

A Task For All

If anything were needed to dispel the impression which prevailed among some people in some of the countries of the world that the British were decadent and lethargic in their prosecution of the War, Prime Minister Winston Churchill certainly provided that requisite when he took the drastic but necessary measures which he did to prevent the French fleet falling into the hands of the Germans and the Italians.

That the battle of Oran was a serious affair when under the stress of the moment the British government a section of the British navy had no other alternative but destroy several units of the fleet of a recently ally, while ally and in no doing to cause loss of life among those who only two or three weeks beforehand had been fighting alongside them as comrades in a common cause against a common foe

But as was pointed out by the prime of Great Britain, immediately after this lamentable affair it would have been unthinkable to allow a single unit of the powerful French fleet to fall into the hands of Hitler and Mussolini, if by any means on earth it could have been prevented. The history of the past six years has demonstrated that Hitler's word is not to be trusted under any circumstances. Indeed Hitler himself, in his book Mein Kampf has told the world that he considers it justifiable to break his pledge if it will result in a gain for Germany.

So that on his own testimony reinforced by his subsequent actions Hitler could not have been believed when he gave his undertaking to the several chiefs of French fleet, while in the custody of Germany and Italy would be placed on cold storage and not used against Great Britain after the fall of France.

There is no doubt what would have happened had the British placed a blood and children trust in the Hitlerian promise. Within a few days or a few months, a huge armada, comprising the French fleet and the Italian and German craft would have been engaged in mortal combat with the British fleet in an effort to invade England and

It Is To Laugh

It was almost laughable to read of the indignation of the Nazis when they learned of the heroic steps taken by Churchill to prevent the sale of the great French fleet becoming an adjunct to their own naval, military and air forces and of their righteous horror over the action taken at Oran, when they asserted that, because of it, the name of Churchill would be remembered down to the greatest scoundrel in all history or words to that effect. One can imagine their rage and chagrin when they found that the initiative and courage of Churchill had deprived them of an ace up the hole.

For one thing it proved, not only to Hitler and his Nazis, to Mussolini but to Fascism as well to the whole world, that British leadership is not vacillating nor weak. Then on the contrary the leadership is of the strongest and that means our very effort, is vested in men of courage, daring and initiative, and with such leadership the Empire, even though alone, will fight to the last ditch and will ultimately conquer. Hitler himself has said that of all foes the British are the most dangerous when cornered and since Hitler spoke the words he himself said that truth unpalatable

* * * *

Next will Alix

Not only was Churchill's action at Oran lauded and received with admiration in Great Britain and throughout the Empire, but it found justification in the eyes of the whole democratic world, including the United States, where it was accorded practically unanimous approval in the public press. not only on the ground of necessity but of moral certitude.

Apart altogether from the fact that Churchill's momentous decision and action means saving the burden on the United States of defending her own Atlantic shores against a potential Nazi invasion, the American people recognize now that in Prime Minister Churchill, the Empire has a leader worthy of her great traditions that the cause of democracy is in safe keeping and that when necessity decides, Britain can rise to the occasion and might be expected of the descendants of Drake Raleigh, Wellington and Nelson.

There are names to conjure with and Churchill, whose courage and resourcefulness have never been doubted among his people, has joined their ranks. Instead of his name going down in history in the tremendous role assigned to him by Hitler his name will be set on one of that great company of illustrious men who built and helped to maintain intact the greatest Empire the world has ever seen. The spirit of Wellington and Nelson still lives and has its counterpart in Britain and throughout the Empire.

No, the British, nor their scattered offspring throughout the world are not decadent and they will conquer at all costs, but the resourcefulness, initiative and energy of us all must be bent to the task in hand.

Bounding Ambulance

Blocked Of Crew's Next Pass In Rolling Hospital Only Good Work

A cheque for $5,000, to be used for the purchase of three fully equipped ambulances was presented to the executive of the Canadian Red Cross Society at Calgary by Rev. Richard Upjohn of Bellevue on behalf of citizens and nursery union in the Crow's Nest Pass, 170 miles southwest of the city. Two ambulances were dispatched yesterday from the district and another has been promised.

Parcels For Navy

Arrangements have been made at Ottawa for acceptance of parcel post for personnel serving in the Navy, the navy's ships abroad at the rate of 12 cents for each pound or fraction thereof up to a weight limit of 11 pounds. Parcels should be addressed care G.P.O., London, Eng.

Bad Eggs

Saskatchewan Strikes Huge Large Quantities Of Materials Overseas.

The Saskatchewan Division of the Canadian Red Cross Society has shipped to date to the east for transportation overseas 1,000 cases of field comforts and hospital supplies, 68 cases of surgical dressings and clothing, and 214 cases of blankets. These shipments contained, besides large quantities of other supplies: 52,000 pairs of socks, 4,051 sweaters, 34,470 bed gowns, 10,000 suits of pyjamas, 6,616 children's garments, 1,000 quilts, 7,810 blankets. The following articles have been supplied to military units in Saskatchewan: 3,394 pairs of socks, 1,000 sweaters, 1,000 pyjamas jackets, 24 bed gowns, 10 overalls.

The Rebel Continues

At a dinner party in London a lady talked for a long time to the Japanese Ambassador, Baron Hayashi. Then, realizing how long she had been talking, she said, "I should you must think I like to hear the sound of my own voice."

To which the Baron gallantly replied, "Madame, I know that you have fond of music."

In the steel industry, "shipping" refers to the removal of ingots from the hot mould.

Italian Gold In London

Britain Has Seized About $50,000,000 Which Was On Deposit

The British are getting no use from at Italy which doesn't show in the battle accounts it is the seizure of about $50,000,000 of gold which the Bank of Italy has had on deposit in London. This is about one-third of all the gold owned by Italy and is a notable addition of financial backers

When Italy was fighting with the Allies against Germany in the last war the Bank of Italy used their credit to finance great purchases abroad. The Italian government borrowed gold from the Bank of Italy and deposited it in London against the British purchases for Italy. The war over Italy began reducing its debt to Britain and London released gold to Italy as the debt was lowered. Italy by some stopped payments and Britain suspended what gold remained estimated at that date one.

Italy's poor financial position is well illustrated by the drain of gold from that country in 1936 before beginning the costly Ethiopian invasion. Italy had $215,000,000 of gold By the end of 1935 only $163,000,000 remained. This was further reduced to $146,000,000 after Dictator Mussolini had at that time $42 million of Italian gold has come to the United States alone to settle for trade balances

Intervention in Spain and decline in tourist trade have virtually drained Italy of foreign exchange reserves. If a quick victory does not reward Mussolini's dagger in the back effort Italy's collapse will be inevitable and rapid. Dividend Builder

Christian Science

"Soul" is the Lesson-Sermon at all Christian Science Churches on this day. One Testimonial reading is: "I sincerely the Lord with my soul but not of his many iniquities" (Ps. 26:9). The [illegible] Science textbook, Science and Health with Key to the Scriptures, by Mary Baker Eddy, is found in the reading room of the church in Edmonton, Canada. Yesterday was the day listed [illegible] Testimonial meetings are held in Christian Science churches throughout the world, at which members testify to healings through prayer alone. The following [illegible] was arranged a dozen for the [illegible] to put in an appearance.

AT THE CHURCHES

ST. PANCRAS ANGLICAN CHURCH
Rev. S. C. West, B.A., L.Th.
Services at 3 p.m. every Sunday, except on the Second Sunday in each month when it is at 11 a.m.
Sunday School every Sunday at the same time as the service.

ALIX UNITED CHURCH
Rev. L. A. Thompson, Minister
11:00 a.m. Church Service.
First Sunday in month 7:30 p.m.
10:45 p.m. Sunday School.
You are cordially welcome.

The Gospel Tabernacle of the Christian and Missionary Alliance
Gordon C. Anderson, Pastor
Sunday Services—11:00 a.m. and 7:45 p.m.
Sunday School—12:20 to 1:00.
Young People's Society Meeting every Friday night at 8 o'clock.
Prayer Meeting every Tuesday evening at 8 o'clock.
Cordial Welcome to All.

FREE METHODIST CHURCH
Rev. C. E. Cowen, Pastor
10:30 a.m. Sunday School.
11:30 a.m. Preaching Service
7:30 p.m. Young People's Meeting.
2:00 p.m. Preaching
Wednesday, 8 p.m.—Prayer Meeting

Yesterday was the day listed [illegible] Testimonial meetings are held in Christian Science churches throughout the world, at which members testify to healings through prayer alone. The following [illegible] was arranged a dozen for the [illegible] to put in an appearance.

EXTRA PRIZES for Ladies Domestic Classes at Alix Fair

White Bread, Parker House Rolls, Light Layer Cake, Chocolate Cake, Doughnuts, Raisin Pie, Short Bread, Angel Cake, Jelly Roll, Tea Biscuits.

The Millers of Robin Hood Flour will duplicate in Cash the Prizes given on the above, provided the winning exhibits are baked with Robin Hood Flour. Wish your estate submit Grocer's Sales Slip showing purchase of Robin Hood Flour within a reasonable time prior to the date of the contest.

YOUR SALES SLIP MUST BE ATTACHED TO YOUR EXHIBIT.

YOU CAN BUY YOUR ROBIN HOOD FLOUR FROM WONG & CO., ALIX

Extra Prizes

Extra prizes will be given pupils for Group Work in Grades 7, 8 and 9—Marionettes. (According to the dictionary a marionette is a puppet moved by strings.)

Grades 4, 5 and 6—Boys' handiwork, Girls' embroidery.

Boys and girls not over 13 years. Handicraft, any articles made from wood.

ALIX FAIR

Arrangements are being made to have an Old-Timers' meet at the Alix Grounds on Fair Day on Aug. 23rd. This will make it possible for the old-timers to renew acquaintances and spin a few yarns together.

NEWS NOTES

The new order for women in France, under the Petain Government is, to put it briefly, "They will return to their prime traditional purpose in life—living in their homes, having children and living only to raise strong useful men."

About 600,000 hogs were marketed in Alberta this year, an increase of 60 per cent over last year.

The Provincial Government, by order-in-council, calls for the licensing of all dealers in firearms, ammunition and big explosives. The licenses are free to all dealers authorized by the Dominion police. All shot guns and rifles must also be registered. This includes .22's.

The gross value of gold produced in Canada during 1964, is set at $104,115,051. An all time record.

A young man, Derrick Whitney, was drowned at Sylvan Lake, on Saturday. He was out in a boat, but later the boat was found drifting and the man had disappeared.

Added Storage Space

In order to assist in relieving the acute shortage of storage space brought on by congestion of grain in Canada, Line country elevators will hold approximately 750 tonnery storage bins throughout Western Canada. This announcement was made today by The Canadian Line Elevators Association. The bins will have a capacity ranging from 25,000 to 50,000 bushels each. Total capacity will exceed 15,000,000 bushels.

J. C. Garrit, of Sunday, has a wealthy apple tree in full bearing this year. He also has three plum and a cherry tree. Gladiolus are also in bloom in his garden.

Village Council

The regular meeting of the Village Council met on Aug. 12, 1965, in the Council Chamber. Mr. R. Whitfield and Mr. Todd present.

The minutes of July meeting were read, also the Financial Statement presented.

Both accepted on motion of Mr. Todd.

The following bills presented and ordered paid on motion of Mr. Todd.

Calgary Power	$ 44 00
Alix Fair	10 00
Alix Lumber Co.	257 19
R. R. Todd	62 16
R. Walper	30 30
Alix Free Press	1 00
Bert Hansen	62 70
C. Willett	52 00
Wong & Co.	37 70
Page Pharmacy	1 70
Mothers Allowance	3 30
L. E. Pethick	17 70
S. D. of Lacombe	62 00
Gov. of Alberta	62 00

The accounts from University hospital for G. Lismok for $67.70 and the account from Stettler Clinic for Mrs. Wenger for $18.00 was tabled until the matter be taken up with Dr. Warren.

The following By-laws received 1st. and 2nd. reading:

Lot 11, Blk. H, plan 5676 JK, to Florence A. Harper for $10.00, No. 10. Lot 7, Blk. H, plan 5676 JK, to Mr. Carmichel for $10.00, No. 66. Lot 11, Blk. H, plan 3442 A. I. to be sold to Mrs. J. Roberts for $1.00 per ft. frontage.

On motion of Mr. Whitfield, Aug. 23rd., 1965, to be declared a Civic Holiday in Village of Alix.

A letter from R. W. Peacock resigning as Auditor for Village.

A letter from Mrs. Hedlin, of Fawcett, saying she would not rent her house for $5.00 per month for Lismok family.

A letter from Alix W. I. telling us that they were "giving up" the cemetery work and the Village will be responsible for the care in future.

The Council expressed their regret, as they are very pleased with the very splendid work done by that organization, for which, we believe the whole district is very grateful. Many thanks to the faithful members.

A letter from J. R. McClure, Red Deer, re Biscuit mix. They were resolved to have a court decision.

A letter from J. Dixon, asking for trail rent, that he thinks owing him. Secretary to look into matter, and pay $—if we owe it.

A letter from telephone plant superintendent acknowledging our request regarding poles on street, and promising to [illegible] our requests as far as possible, and to say that we have not ground enough there having left

Safety Tested
TO GIVE YOU LONGER AND SAFER MILES

INDIANAPOLIS SPEEDWAY — For 7 years Firestone has been winning more of the Indianapolis 500 Mile Races than any other tire.

PIKES PEAK — For 15 years Firestone has been the choice of Pike's Peak climb where 3 out of 4 cars are Firestone equipped.

LAKE BONNEVILLE — 231 miles per hour on the Bonneville Salt Beds was the record established by an Indianapolis Firestone Special.

Firestone CHAMPION TIRES

WITH this great record of achievement, no longer can there be any question of which tire is safest. One tire—and only one—has the exclusive safety features demanded by race drivers — *Firestone* — the tire that has been tested on the speedway for your safety on the highway! Have the nearest Firestone dealer put Firestone Champion tires on your car now. Specify Firestone when buying your new car.

The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace. Distributed by Ledger Syndicate.

CHAPTER X.—Continued

One night it happened that he found himself walking along the street at the back of Pecheringay Mansions and, looking up, noticed a bright light burning behind the green blind in an upper room. Mr. Ingle's apartment was very rarely tenanted. There was a narrow parapet to identify the height; the lumber room where the light showed was four windows from the frontage.

He was with him, and to that unsentimental man he confided his impressions.

"We'll start to squeal about police persecution," suggested Bill.

Undeterred, Jim went up in the elevator, though the man in charge disapproved him.

"I don't think Mr. Jackson is at home," he said. (This was the name by which Ingle was known). "A gentleman called an hour ago and departed home but could get no answer."

"Maybe I can knock louder," suggested Jim.

But ring and knock as he did, he had no answer. Yet, as he listened at the letter-box aperture, to make certain that the bell was ringing, he could have sworn he heard a stealthy shuffling inside. Why was he hiding?

There was, of course, the possibility that the man was engaged in some new piece of roguery. But from his experience of swindlers, Jim Carlton knew that they were never fortunate, when they were planning it very.

The landing was deserted, and he could wait without attracting to himself the suspicion of the lift man. Again he stooped and listened, and now he heard a sound which puzzled him—a whirring like the rapid turning of a ratchet. He had heard that noise before somewhere, and yet he could not locate it or imagine its cause. It came very faintly as through a closed door. . . .

He saw the ascending light of the elevator and walked to the gate. The car pressed to the next floor to discharge its passenger, and then came down to his level.

"Couldn't make him hear, I suppose, sir?" asked the elevator man, for the satisfaction of one whose discretion has been retained. "He won't see anybody there days. Why, he doesn't even come out for his meals

"He has a servant hasn't he?"

"Chap," said the lift man disparagingly, as they sank slowly down the well. "Used to have two, but one of them . . ." He told the story of Mrs. Cabanne. "The other comes every morning, doesn't stay more than an hour down a bit of shopping and goes away for the day. I think Mr. Jackson is going in for something unusual," he added as they reached the ground floor and he pulled back the gate.

"What do you mean by 'unusual thing unusual'?"

The man scratched his head.

"I don't know exactly about four days ago a man came here with a long black box — the sort of thing that they use for carrying flies——"

"Flies?"

Now Jim Carlton understood. This was the sound he had heard, the whir of a cinematograph projector!

"He took it up and left it. I asked him if Mr. Jackson was taking an film work, but he said nothing—the man who brought it. I mean, of course, if I knew for certain that he had any celluloid stored on the premises, I'd have to report it. These things are not allowed in the building, y' see."

Jim listened without hearing. He was dumfounded by the discovery. Every man has his secret vexation, but though he had credited Mr. Arthur Ingle with many peculiarities he had never suspected him of a passion for the screen.

Bill was waiting outside, the stub of a cigar between his teeth, a large, unfurled umbrella in his hand, and in a few words Jim told him what he had learned.

"Phonies!" said Bill, shaking his head. "Never thought he would have listened to that! Queer thing how films create sort of run in weak-minded men one way or the other. I knew a man, the cleverest underwriter in Europe, who's risk a tagging to get a game of ping-pong! There was another fellow named Moses who had the finest long-firm business in England——"

"Let us go round and look at the back of the house again," Jim impatiently interrupted the reminiscences.

The bright light was observable again, clear through the dark green blinds, but even as he looked it was extinguished, but when his eyes had become accustomed to the darkness he could see the reflected glare of an other light. It was in that room that the Mr. Ingle was engaged in his hobby.

Jim looked reluctantly at the fire-escape. There was a way to be found or, easier perhaps, a door into the courtyard of the building might be opened with one of his keys. But the door seemed so forbidding; it was unlocked and gave only entry to a stone-paved yard, whence a flight of iron stairs led up to the roof. At the first floor two fastened across the rails at the bottom, for what purpose was not clear, since it was possible to step around the handrail and ascend at the end of the bar. Yet only on the windows. I shall have to see if I can get in that way," suggested Bill as he set up the first bars who are not buried to death. Going up?"

Jim nodded and inspector Bill followed him. Then hooking to landing until they came level with the floor on which Mr. Ingle's flat was situated. Without a word Jim Carlton swung himself over the rail and balancing precariously upon the narrow ledge of stone fell forward and gripped the nearest window sill. Projecting in front of the windows was an ivy matter to one with his nerves! It was in the intervening spaces where he had to depend for his life upon a few rusty of holdfast that he longer by fifth watched him, anxiously as he moved nearer and nearer to the window fastening. Knowing against the wall and edging forward inch by inch in his perilous fashion he came sailing to the window from behind which came the ceaseless rattle of the projector.

The moment he reached his objective Jim knew that his effort had been in vain. Behind blind and window he could see the small projector at work, was dazzled by the flicker of the light, and Arthur Ingle showed clearly in the glare Thereon back from the invisible screen. He was turning the handle his eye steering at the picture which he was projecting, and the first thing the detective noticed was that Mr Ingle was in need of a barber. For his face was covered with a ragged white stubble and his grey hair was long and unkempt.

But what was the picture he was viewing so intently? Jim screwed his head round, but on the left-hand side of the window the blind ran flush with the sash. There was nothing to do but to make his way back, and noiselessly he edged toward the fire ladder.

He had not gone more than half-way before he had a shock. He felt a stone yield beneath his feet, the edge broke off and fell into the courtyard below it might be one cut-ten piece, he argued, but stopped more gingerly. If the parapet gave under his weight while he was traversing a vast space nothing could save him from death, but he did not allow his mind to dwell upon this aspect of the adventure.

He had reached the window nearest to the iron stairs and was feeling cautiously along with his feet when, without warning the narrow parapet beneath him crashed. He managed to grip the wooden window and in another second was hanging with his legs in space. He heard Ela's agitated whisper, saw the elderly detective thrust up the creaking sash, and knew that the man was beyond his reach.

There was only one hope. Taking off his soft felt hat he put his head inside and drove straight at the glass of the window The shock of the blow almost dislodged him, but clearing off the broken edge of glass, he took a firm grip of the window sash and drew himself up. A second pane was broken in the same way and, reaching in, with some difficulty he turned the window catch and pushed up the sash. In another second he was in a room. He stopped to listen The smashing of the glass had evidently not aroused Ella's suspicions and he passed out the room to be ejected Ella.

"I don't know whom God it is," he whispered. "Send me at the front of the building."

Tiptoeing across the room, he felt for the light and turned it on. He was in a small bedroom, which had evidently not been occupied for some time, for a thousand for a very considerable film, for dust by thick upon the furniture and upon the folded blankets at the foot of the bed. Yet the room was handsomely furnished. The general furnishing of Ingle's bed in a style that harmonized with apartment. Evidently this was one of the rooms which he had not visited.

He opened the door sensibly. The living had was in darkness, from the lumber room came the ceaseless clicking-click of the projector.

Should he risk being discovered and outcry his curiosity? It was almost worth while. As he debated the point, the telephone, which was in the dining room, rang noisily, and as Jim drew back into the room, pulling the door close behind him. He heard the song of the button as Ingle turned on the lights.

Worked Out All Right

Issues Of Early Pioneer's Almanack Lately In Wooden Possession

The Christmas Boston Monitor says Isaiah Thomas, early printer of the Farmer's Almanack, was asked by one of his printer's devils what he should put after "July 32." No provision having been made.

Thomas, giving little thought to the question replied hurriedly, "Anything. Which accounts for the Almanack of a little 18th century year carrying after its July 31 date, month to the amusement of the populace, "Rain, hail, and snow."

But stronger than fiction, it did rain, hail and snow on July 32 of that year giving the Almanack's calendar a man's deserved boost.

Land Army Popular

Girls Are Making Good On Farming Work In England

Mrs. Lindsay Sweet, organizing secretary, West Suffolk Land Army, says of "land girls": "They have made a great success in the county. All through the bitter winter 300 girls on forestry work at Culford Camp back their job. Many farmers say that they are as good as any man, the most grudging say 'nearly as good'. Just a Brooke, who farms 1,200 acres, employs 40 girls, hopes to double them, says "I wouldn't be without them, and intend to build bungalows and send hostel for them." They include ex-mannequins, florist, partner's daughter, grandmother of 60.

Bird Trapping

Thriving Of Fur-Dealing Anthrax Out Of Question

Northern Ontario is infested with an organization or ring engaged in one of the most despicable of law transgressions . . . the taking of furbearing animals which enjoy protection for one purpose, conservation to prevent extermination and heavy fines, in some instances accompanied by jail terms, have failed to compel observance of regulations.

While trappers, Indians and white men, are responsible for illegal trapping, the greatest locality rests upon those who provide a market for the skins for and, in the humanity of man, amongst the transgressors of law.—North Bay Nugget.

Australia Is Ready

Private Secretary Assured For Any Number Of British Children

Australia has informed the British government that thousands of British children can be accommodated in the Commonwealth if Australia can so desire, and that as British children are concerned a private home has been secured for every child that is sent. Citizens in Melbourne have already offered homes for 10,000 children and more, boys can according to

Precipitous Of Diving

An anti-aircraft shell fired at an enemy plane 20,000 feet in the air is not immune although it takes about 15 seconds to reach its mark. A single second's miscalculation by the shell is enough to explode it 1,000 feet above or below the intended target.

Unknown Resistance

Field Marshal Earl Cavan, commander of the British army which in conjunction with the Americans in the first Great War, has removed citizens of Native Grasmeres given him at that time.

Caring For Soldiers

Red Cross Societies Operate In Britain

One of the services provided overseas by the Canadian Red Cross Society for the comfort of Canadian troops in the Imperial Victory Club. Hostels of the commonly visited on women now resident in England are assigned to hospitals throughout the Old Country to look after the comfort of every Canadian soldier admitted. The Hospital Visitor reports on his needs to the Maternity Committee of the Canadian Red Cross in London and is passed to dispatched immediately. If the patient is unable to do so himself, the Visitor writes to his relatives in Canada, keeping them informed of his progress

The Overseas Advisory Committee of the society has accepted the very generous offer of a lovely Worcester home for two convalescent officers The donor, Mrs. Hurd, will bear the cost of operation, estimated at £5,000.

Big-Leg Chicks

Hard On Birds To Help Dodge Hunters' Submachine

Britain mercilessly slings all carry "leg-rag" stocks to help them avoid enemy U-boats, it was explained at a Ministry of Shipping inquiry by David Richard marine superintendent of the Union Castle Line.

His boat, and the instrument, which worked like an alarm clock, was set to ring at regular intervals, and the boat warned the submarine steering a zig-zag course that it was time to change course.

The inquiry was into the loss of the 7,016-ton motor schooner Rothesay Castle which struck a reef off the west coast of Scotland in January and broke her back.

HOME SERVICE

COLGOFF'S SERVING DISH MADE FROM PICTURE PLATE

Clean Easily With Damp Cloth

Perfect for Summer refreshments —these gaily decorated serving plates! And you can make them yourself of picnic plates and scraps of bright paper

The pressing done in light blue enamelled by pry Bonnie and the border is of alternating light and dark blue leaves

For the horseshoes you have a printed pattern which you trace and cut wrapping paper and cut out. Using the wrapping paper pattern, cut out 16 horseshoes of light blue and 16 of dark blue In the same way you trace off and cut out the design for the deer and Bonnie.

Now, after giving your plate a coat of shellac, paste the design in place and then give the plate 2 more coats. You'll have a smart and practical plate you can clean with a damp cloth.

Just as easily you make pinies using clever geometric designs, pretty flowers.

For complete directions for these and many more novelties, see our 32-page booklet. Gives patterns for the "deer" plate; tells how to make a wallhanger for plants, a sewing set, book-ends, a Victory footstool, other attractive items.

Send 15c in coins for your copy of "Decorative and Useful Objects from Picture Can Made" to Home Service Dept., Winnipeg Messenger Union, 175 McDermot Ave. E., Winnipeg Man.

Australia's War Effort

Unemployed And Gasoline Rationed And Waste Material Salvaged

Australia is tightening her economy belt to do her part to help win the war

An order has gone out from the Commonwealth government to commandeer waste the States having been called to encourage and supervise the salvaging of such waste as household refuse paper cardboard, tallow scrap metal rags and rubber

The Victoria Red Cross is already receiving £150 (~$600) daily from the sale of waste. States governments will conduct a corps of collectors.

Effective July 1, rationing of newsprint cut the size of Australian newspapers Metropolitan dailies and large weeklies are limited to 35 per cent of the-/ 1939-40 tonnage, other papers 20 to 30 per cent.

This rationing alone is expected to save 11,000,000 (~$44,000,000) pounds in sterling exchange

Gasoline will be rationed to August with private automobiles allowed eight to 10 gallons monthly according to horsepower and commercial vehicles 20 gallons. These trucks will be grouped so as to reduce haggle mileages and each group will receive special rations.

Regulations Broadened

War Certificates May Now Be Bought By Certain Groups

In response to requests by a number of patriotic groups in Canada, the war savings committee of the Bank of Canada announced a broadening of regulations covering issue of war savings certificates whereby the certificates will be issuable to certain specific groups wishing to act as canvassers for war savings certificates.

Previously certificates have been issued only to individuals.

Incorporated or unincorporated bodies organized for the purpose of carrying on objects of national, provincial, patriotic, religious, educational, charitable, professional, social or sporting activities "without pecuniary gain to their members," will be allowed to purchase not more than $500 worth of certificates.

Service clubs and labor and fraternal organizations, among those acting primarily as insurance or benefit societies, are also included.

Sanford Electric Heater

Burns Windshield Oil But Is So Fused To Fix

Solution of the Burns Sandwell fire inhibitor at Burrah last summer included the smallest electric heater in the world. It weighed 12 grams, and was constructed by M. Fernand Hogarnie, a watchmaker, of La Tour de Peilz, near Vevy.

M Hogarnie has now established an even smaller heater, weighing only 36 grams (less than 1-200th of an ounce). He had to use very powerful magnifying glasses in constructing his masterpiece, which must positively an current adjusted by a pocket battery The heater has been made into a tie pin and set in a band cut in two and hallowed out. London Times.

Who Admits Old Safety

The Old Bailey is going to look to its laurels in London. The centre of interest in the judge and court proceedings has been the question whether sound hangings of the worst, girls dramatic harlot is to be regarded as a "woman of the town" or a "woman of the street." Whether the custom has changed; the last time it was in the World War.

Wheat From Spiked Awns

A system now near Creston, B.C., produces about half a million bushels or wheat each year. This year 1,000 acres have been planted with grain. Another venture in the production of sugar beet seed.

THE PRICE WE ARE PAYING

Alberta is paying a heavy price for the lack of co-operation between the Dominion and provincial Governments in the matter of taking advantage of the Dominion offer of loans for building purposes. This lack is responsible for the slump in the building trade. It is retarding the development of every municipality in our province. Other provinces are drawing on this fund to the extent of millions, but Alberta is at the foot of the class, all because of a purely fancied grievance on the part of our local Government be cause they are not allowed to pass laws that even the highest court in the Empire have pronounced ultra vires of the B. N A. Act.

MAYOR HOUDE

With reference to the internal Mayor of Montreal, there is no incident that is not generally known. Previous to his statement about registration, he said: "Fourth Canadians were Fascist by blood and, if England went to war with Italy, their sympathy would be with Italy."

Knowing that his popularity in Montreal was slipping and re-election uncertain, he is now making a bid for martyrdom.

REGISTRATION

Dominion Government Registration for Polling Division No. 125, Red Deer Federal Riding, will open in Alix Consolidated School building at 9 a. m., on Monday morning and will continue for three days.

Everybody over the age of 16 are required to register and no one is exempted.

The officials in charge, J. Tebbutts and Leo Skidmore, are asking for assistance. High School students are particularly requested to lend a hand.

Please bear in mind that this registration is not optional, but absolutely compulsory, and anyone neglecting this notice is open to a penalty. Forgetful ness will not be taken as an excuse. Both males and females must register.

WEDDING

Bernice Marjorie (Dottie) third daughter of Mr. and Mrs. Dave Robison, Ledger, B. C. formerly of Alix, and Norman Alfred, son of Mr. and Mrs. John Harris, Crescent Island, B. C., were united in marriage August 2nd., at 2:30 p.m., at the home of the groom's parents, by Pastor Don Hills.

The bride was lovely in an afternoon frock of delicate pink sheer with white picture hat and matching accessories and carried a bouquet of pink and white carnations and sweet peas. Miss Ruth Robison, who acted as bridesmaid to her sister, was also dressed in delicate pink with white picture hat and carried a similar bouquet. Little Arline Harris, niece of the groom, who was flower girl, wore yellow organdie and carried a basket of sweet peas.

Mr. Lorne Hagmit supported the groom, and Miss Vera Harris played the wedding march.

The table, covered with a lace cloth, was centered by the bride's cake and the other dainties was served out in pink and white.

Assisting were Miss Reuben, who presided at the urn, Mrs. F. Lund and Mrs. H. Robison cut the lens, and serving were Miss B. Harris and Mrs. H. Harris.

The happy couple left by motor, on their honeymoon to Harrison Hot Springs, the bride wearing a dark navy suit with a bouquet of fawn tweed and white accessories. On their return, the will make their home on Crescent Island.

George Tattler

home of the Ladies Club met at the home of Mrs. G Nash for a quilting bee, on Wednesday afternoon. The quilt being made for the Red Cross.

Mrs. Mary Clarke is visiting at the home of Mr. and Mrs. R B. Clarke.

Mr. and Mrs. W. Flick and daughter, of Washington, are holidaying at the former parents, Mr. and Mrs. V. Flick.

Mr. and Mrs. Glen Humphrey are holidaying at Edmonton and Jasper.

Vernon Nels, son of Mr. and Mrs. V. Nels, had his tonsils removed in the Lacombe hospital on Monday.

The dance at George School was very well attended last Wednesday evening.

Mr. and Mrs. Clarence Nels, Harriet and Kelly, of Dalburn, Marey Hottler and Wilfred Walton, were visitors at the home of Mr. and Mrs. G. Nels, on Sunday.

Mr. and Mrs. P. Carr and family were Sunday visitors at Mr. and Mrs. E. Barlow.

The Ladies Club meets at the home of Mrs. G.o. Land, on Thursday, August 26th.

Miss May Bodow, of Washington, is visiting at the home of her parents, Mr. and Mrs. E. Bodow.

Switzerland, is to become installation in so far as its industrialization and ethnical structure will allow

"The Government," said the President, "will no longer be able to explain and justify its decisions by private meetings held from quickly. It will, therefore, not confide in the press and the press, if not muzzled will at least be kept in the dark. Neither will Parliament be consulted with vital matters of state. The Government will honor its decrees, and speeches in Parliament will be curbed.

On the 1st phase, the President announces Communism shortly inspired by the Fascist method. The Swiss people will have to give up "some" except a greater solidarity," suppress unemployment entirely. The social insurance of Fascism and National Socialism will, therefore, be introduced in a large measure.

HAYNES

We expect services to be resumed in the United Church, on Sunday next, August 22th, at 3 p.m.

Mr. and Mrs. Jack Peal are being congratulated on the birth of a son, at the Lacombe Community Hospital, Aug. 1st.

A meeting of the women members of the local Red Cross, was held, on Wednesday the 14th, in the United Church.

A number of Haynes residents were planning at Sylvan Lake, on Sunday last.

The recent spell of hot, dry weather has ripened grain very rapidly and cutting will soon be general around this district

Fister's GENERAL STORE Nevis

REGISTRATION STARTS ON MONDAY August 19th

Commencing Monday, August 19th, Canada calls on her citizens, 16 years of age and over, regardless of nationality, to register. Because of the magnitude of this task the Government asks those who must register to study the questionnaire carefully. Every question must be answered truthfully and without evasion. It is imperative that every one 16 years of age and over register. You will make the whole task easier for yourself and the Government by registering early. Registration will last for three days only.

REGISTRATION DATES August 19th, 20th, 21st

EVERYONE CAN HELP—To keep the cost of this registration at a minimum the Government is asking the co-operation of all public-minded citizens in the work of registration. You can help by passing in touch with your local registration officials and offering your services.

WHERE TO REGISTER

Registration offices are being set up by electoral districts in the same manner as in the last Dominion election.

Registrants are required to register in the regular polling subdivision of their own community. But should a registrant be in some other province or district out of the regular polling subdivision on Registration Days, he or she may register at any Registration Office in Canada, upon their own declaration to the local deputy registrar.

Your Registration Certificate

To every person answering the questionnaire fully and satisfactorily a certificate of registration will be issued by the local deputy registrar. This is a small card which must be carried on the person at all times.

Penalties for Non-Registration—Failure to register will make any male or female, married or single, over the age of 16 years, liable to a fine not exceeding $500 or imprisonment for a term not exceeding three months, or to both such fine and imprisonment. Any person who is shall continue to be liable to registration for such day, after the day upon which he should have registered, if he

B-orn—To Mr. and Mrs. M. E. Nelson, in the Stettler hospital, on August 18, a son.

George Goldberg spent Sunday at home returning to Calgary Monday.

Special Flower Service in the United Church, Sunday, Aug. 25th., at 11 o'clock.

The services at the Anglican Church in Alix have been changed from 3 to 3:30 for the summer.

Janet Tallman left for Calgary on Sunday to visit her Uncle and Aunt, Sergeant and Mrs. Mellhagga.

Mrs. Graeme MacKinnon and baby daughter, of Edmonton are visiting at the home of Mrs. Agnes Larkins for a couple of weeks.

Sergeant and Mrs. Mellhagga were Sunday visitors in Alix, returning to Calgary accompanied by Jack, Bob and Allen, who had spent several weeks with Mr. and Mrs. W. C. Tallman.

Mr. and Mrs. A. S. Bissett enjoyed a week-end visit from the former's mother, Mrs. D. Bissett, who has recently returned from Montreal and Ottawa, where she met Canadian Trade Commissioner C. S. Bissett.

The Alix Free Press wants a correspondent at Clive, and we want one right away. We furnish paper and self-addressed envelope, just turn in the flap and I cost will pay the postage. If the correspondent also receives his copy of the paper free.

The famous picture "Gone with the Wind" will be shown at the Whitney Theatre, Bashaw, on September 2nd and 3rd. All seats reserved. Better get your tickets early. Tickets on sale at McDonald's Office, Mirror, and at the Free Press Office, Alix.

Registration has been active during the week, and many have come from afar to comply with the request for registration. The work was completed on Wednesday, thanks to those who gave their assistance freely.

H. G. L. Strange, in his weekly letter to the press, recommends to the farmers that the best and cheapest way to meet the present emergency for wheat shortage is to go back to the old way of stacking wheat till spring. It necessitates a second handling, but, to the man who has more time than money, it is the best way out of the present muddle.

Weather conditions have been good, during the past week for harvesting. The binders are humming all over the district, but many are anxious to cash in on their crop and await issuance of Government restrictions on marketing. We advise our farmers to sheer up. Some method will be found to finance the crop. If the Government wants revenue they have seen enough to know that they cannot check the flow of wheat. If the primary producer is defeated the flow of dollars to the treasury will receive a terrible jolt. Dollars can only follow the flow of wheat. The latest suggestion is that the provincial governments must step in and make their own deals.

Change of Publishing Day

Beginning with the first issue in September, The Alix Free Press will be published on Thursday instead of Friday.

The reason for this change is to enable our readers at Hayter to get better service. Under present delivery it takes several days for our paper to reach Hayter, hence the need for change. Advertisers and correspondents please make a note of this.

Through the courtesy of the postmaster at Clive we learn that the mail carrier on the R.R. No. 1 (to Hayter) leaves Clive at 9 a.m., just 10 minutes before the arrival of the Alix train on Friday.

MIRROR NEWS

Mrs. H. Shepard entertained at tea Thursday afternoon in honor of Mrs. Mitchell from Alix, and Mrs. McCormack from Corone, Cal. There were present Mrs. Jackson, Mrs. R. Conway, Mrs. Fray, Mrs. Cantelon and Mrs. J. G. Russell.

Mrs. J. Janes, of Banff, is visiting at the home of Mrs. Earl Estell.

Miss Peggy Newman, of Calgary, is visiting at the home of Mrs. G. Bell and Miss Mae Estell.

On Sunday Mr. and Mrs. Earl Estell, Mrs. J. Astle and Mrs. C. Pascoe spent Sunday at Monty Mt. Home.

Mr. N. Jaques, M.P., and Mrs. have returned from Ottawa, after the dissolution of parliament.

Rev. and Mrs. Blewett, of Calgary, are spending a few days renewing acquaintances and visiting at the home of Rev. and Mrs. S. West.

Registration is well under way with the help of many volunteer assistants. There was very little waiting.

A few farmers have started cutting their crops and by the end of the week cutting will be general. The early crops are reported to be very good, while the late ones are suffering from drouth.

Mr. Henry Plowwilling is spending a few days in Stettler relieving Mr. J. Brenner, undertaker, who is away on holidays.

Mr. and Mrs. Norman Bay left Tuesday for a motor trip on the Banff Jasper highway.

Mrs. R. Cogles, left recently for Yorkton, Sask., to attend the funeral of her brother who was killed in a motor accident.

We wish to announce the engagement of Miss Pearl Bannister, of Mirror, to Mr. Leslie Slater, of Mirror. The wedding will take place the tenth of September. Miss Bannister is a granddaughter of Mrs. Stumpp, of Mirror.

Mrs. Stumpp's nephew from Drumheller, Lorne Jackson, and his two sisters, Mrs. Mitchell, of Calgary, and Mrs. Trusler, of Kirkland, Lake Ontario, were visitors over the week-end.

Miss Joyce Bay and Miss Doreen Williamson, both of Calgary, are visitors at the home of Mrs. George Thomas.

Manufacturing Speech

In the light of the public-mindedness and enthusiasm of former days one must be surprised at the apparent indifference of the present to the purity and vigour of their mother tongue. Everywhere we look we find unpardonable inroads in the attitude of the use of the English language and the pronunciation thereof through sheer facilities.

In discussing this topic it seems to be forgotten that every English speaking country, in the progress of time, develops its own speech and its own dialects, which in the people of other English-speaking countries, it might be referred to as its own idiosyncracies of dialect. In some of the older countries accent and pronunciation have become more or less stabilized, but Canada, as a young country, has not yet reached this stage. It is in process of formation and when one listens to radio announcers broadcasting the news from the various centres in what direction are we heading.

The question which naturally rifle through the mind is whether we are developing as an orderly business group of speech which will eventually become characteristically Canadian, and which will eventually be recognized as such or are we promoting confusion and chaos so extensively that in some time, the accustomed boundaries between the various countries will be narrowed to the pinhole of unclear?

The people of such a question might on first glance appear slight but required in some quarters as lively, yet the simplest personality in our [illegible] [illegible] [illegible]

While Britain Stands

(Christian Science Monitor)

So long as Great Britain remains unconquered hope remains for a real peace which will release Europe constituting the German people—from the prison of totalitarian terror.

While Britain stands France, Belgium, the Netherlands, Norway, Denmark, Poland, Czechoslovakia are only temporarily slaves.

While Britain stands there is hope for a genuine "new order" under which control of raw materials, and a general federation will preserve the liberties of small nations.

While Britain stands there is a chance to stop the trend toward utter lawlessness and anarchy which today spreads the threat of robbery by violence round the world.

While Britain stands there is hope that the ideals of Christianity, liberty, justice, enlightenment, and tolerance will free opportunity to develop.

While Britain stands pagan lies, despotism, injustice, imposed ignorance and calculated intolerance will not have official sanction by the dominant governmental power of Europe.

While Britain stands Japan, Russia and Italy remains somewhat restrained.

While Britain stands Monroe Doctrine is not hardly be seriously menaced.

While Britain stands totalitarian trade cannot coerce the markets of the globe.

While Britain stands the U. S. is not a democratic island in a world dominated by dictatorships.

While Britain stands the oceans are barriers to, rather than highways for, aggression.

While Britain stands "fifth columnists" in America remain unorganized and unsupported by any great military or economic support.

While Britain stands American men spend some time on building a two-ocean navy.

While Britain stands there is time left to read the lessons of history can my she is fighting only her own battle.

While Britain stands it is possible for Americans to debate whether aid short of war should be given her.

Britons are now asking for American soldiers. She does believe that her greatest present need, her best assurance of standing is an increased supply of destroyers. The United States has some destroyers which have been laid off as "over age." They might be of use if America were attacked next year. But there is good hope that if they were sold now to Britain there would be no possible attack next year. Gen. Pershing has urged that 50 of these obsolete ships be allowed to pass to Britain.

We believe that the importance of British continuing to stand is such that the risk involved should be taken. We believe it is the next of risk military commanders have always taken. We believe it is the quickest and surest step to national defence for the United States.

Hybrid corn is not good for seed.

A DECLARATION OF INTERDEPENDENCE

An American named Clarence K. Streit has supplied the copy for a full page advertisement in the New York Times which makes the proposal that the United States, Canada, United Kingdom, Ireland, Australia, New Zealand, and the Union of South Africa form at once a Federal Union, open to other free principals in a common declaration, set up a provisional International Congress to declare, then sit, and establish the nucleus of a world federal union, modelled on constitution of the United States. It is to be a Federal Union of democracies against Nazism. The British needs a dollar offer to France just before the latter capitulated. It is evident that a big change of opinion is taking place in the United States.

BOARD MUST OK. BEFORE DELIVERY

Ottawa, Aug. 17.—Permission of the Canadian wheat board will have to be obtained before wheat, oats and barley may be delivered to meet their quotas, handling platforms, mills or terminal elevators during the 1940-41 crop year.

The new regulation was contained in an order-in-council published Friday in the Canada Gazette amending the Canadian Wheat Board act of 1935.

The order-in-council also provides that at the time of receiving the permit, "the producer shall select one delivery point for his wheat, oats or barley, which point shall be recorded on the permit, and no wheat, oats or barley shall be delivered at any point other than the one shown on the permit."

The aggregate deliveries from the farming unit described in the permit must not exceed quotas established by the Canadian Wheat Board.

It is specified also that every person who delivers wheat, oats or barley contrary to any of the established quotas, or infringes any of the regulations regarding quotas, "shall be guilty of an offence and liable on summary conviction to a fine not exceeding $300 or by imprisonment for three months or both."

OBITUARY

George A. Lane, of Alix, passed away in Lacombe Hospital, on Wed., 1940, aged 73 years.

He was born in Caledon, Elgin County, Ont., on March 14, 1868. Married March 17, 1890 to Esther Ann Wilson, of Springfield, Ont. In 1906 they moved to Strathcona, Alta. His wife passed away in July, 1915. He later married Mary Mac-Gillivray Campbell, who passed away Sept. 2nd, 1934.

Left to mourn his loss are a daughter, Mrs. A. D. Richard, Wainwright, Alta.; James A., of Vancouver; and Vernon E., of Alix. He had eight grandchildren and one granddaughter.

The funeral service was held in the United Church, Alix, Aug. 19th, at 2 p.m., with interment in Memorial Cemetery.

Rev. J. D. Richard, of Wainwright, assisted by Rev. J. W. Wright, of Rimbey, officiated.

Thedford Hargreaves, of Lacombe, funeral director.

CARD OF THANKS

The family of the late Mr. George A. Lane, wish to thank their friends for their kindness and sympathy in their recent bereavement, and also the pall bearers.

Mr. and Mrs. A. D. Richard.
Mr. James A. Lane.
Mr. and Mrs. Vernon E. Lane.

A tractor says the B Globe-Times-Journal is "still getting the people to climb."

GUN REGISTRATION

Registration in Alberta of all rifles and shot guns, as ordered by the Federal Government, began last Monday. The registration will be carried out in Edmonton, Calgary, Lethbridge, Medicine Hat, Wetaskiwin, Red Deer and Drumheller, by city police. In the country districts census will register with the R.C.M.P. detachment. It is not necessary to take the rifles and shot guns with you, but the following information is needed:

Name and address of owner, along with nationality.

Type of gun, make, model, number of guns, calibre (guns, pump, automatic or otherwise).

Serial number.

The police ask for co-operation and all information given with least possible delay.

REGISTRATION

Registration of all persons in the Alix Polling Division No. 153 under supervision of the Deputy Registrars of Vital Statistics, Len Biddaw, was made easier and more efficient by the voluntary assistant Deputies for which many thanks are due. Heavy registration on the opening day was taken over by Mrs. Ben Maslin, Mrs. Palmer, Mrs. Yarwood, Mrs. A. T. Ditto, Irene Cockrall, Miss Howe, Miss Sanderson, C. Wolfenden, Mrs. A. G. Hall, C. Wilson, Wm. Fladlester, and A. R. Bissett, all of whom were sworn in as assistant Deputies. Many others offered their services if needed, which is typical of the will to serve the government in the present crisis. This also is proved by a large number of volunteers drilling on the school grounds and also on the Fair grounds weekly.

NEVIS NEWS

(From our regular correspondent)

General topic: The heat. However it is good weather for haying and harvest, which is well under way. Geo. Summers and H. Plotter have done a little threshing.

Mrs. Kingston and Miss Geraldine Straley motored up from Oregon and are visiting at the home of Mrs. Straley's brother, Roy McCord. They are leaving for Saskatchewan for a short visit and will return to their home in the west.

Mrs. L. B. Summers, of Edmonton, is visiting with relatives in the Nevis and Erskine districts.

The Ladies Community Club met at the home of Mrs. Roy McCord, last week, with a number of members and visitors present. Business was soon refilled, the lonely member going to a lady in Lacombe. A delicious banquet was served by the hostess. The next meeting to be held at the home of Mrs. Hinston.

Mrs. Sophie Clark and family returned home from the Edmonton House district, Tuesday, having gone in search of blackberries. Found only a scrap not an abundant this year.

We are pleased to report that the other patient, Mrs. Jas. Mitchell is about to be operated on by the Lacombe Hospital staff for Mrs. Mitchell, who is also very well known in the Nevis district.

A number of men with teams started the ball rolling on the new skating rink, last week. But owing to the busy season work has been delayed, but they hope to see it in good shape before the closing season.

Registration is being carried on at the Post Office and we notice a large majority of the district received their cards the first day. E. McNeil and H. Williams being in charge of the booth.

Nevis Ladies Ball Ball team opened league play with the Red Deer Buffalo Lake team on the home diamond, Tuesday evening. This game being a fi

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

K. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, Sept. 10th. On Wednesday to Saturday of each week consult at Calgary office, 229 210 South am Building.

Mr. Walper, fte., is having his house enlarged.

Born—To Mr. and Mrs. J Drumhiller, on August 22nd, 1940, a son.

Miss Hazel Hemmes was a visitor in Alix last week.

Miss Hattie Biddy spent last week in Calgary as guest of Mr. and Mrs. Reg Biddeen.

Reg Biddeen was the lucky winner of the quilt at the Alix Fair.

During the registration at the Stone School, last week, a total of 72 persons registered.

Mr. Maynard Rozell has been spending the past few weeks at McLeod, Alberta.

This week ends the weekly Wednesday afternoon closing of stores for this season.

Boys and girls will be answering the school bell next Tuesday morning. Some are the happy days

Young folk just turning 16 should not forget that the post offices are continuing the work of national registration.

Mrs. A. McDermand has been visiting her sister, Mrs. I. Sweet, at Sylvan Lake, during the past week.

Frank Siddons went to Calgary on Sunday to join the R.C.A. Lee Siddons now has all his sons in the Active Service Force.

Mr. and Mrs. Ellis Stone and Mr. D. MacDonald, of Drumheller, visited at the home of M. and Mrs. Chas. Stone, on Sunday.

Correspondents and advertisers should remember that our next issue will be on Thursday, Sept. 5th. The paper will be in the post office on Wednesday evening, to catch the out going mail on Thursday morning. Send your copy in one day earlier.

Mrs. A. C. Hall, who passed through here on her way to Edmonton from California and the coast, where she has been visiting for some time, and while here called on friends. She also boarded after her interests on her farm.

Douglas Chambers, on Tuesday, returned to his home in Edmonton, after spending his holidays with his Grandad and Aunt. Doug sure had a swell time in Alix, putting on two parades and a heavy tan.

Mr. Aberhart, while holidaying at Vancouver, spoke of his probable retirement from the Social Credit party in Alberta. It is thought Manning may be his successor.

The post office was entered on Thursday night of last week, but no damage was done or anything of value removed. Boys were responsible, for no grown up man could have entered through the transom. The police are on the case and the bosher is well known for his "sticking" ways. It is only a matter of time till his career will end for the next two or three years. Boys who break into post offices are seriously dealt with.

HAYNES

We are sorry to report that Mrs. J. Davidson has been quite ill, and is now a patient in the Lacombe Community Hospital.

Mr. Harvey Paull was home from Lacombe on a recent business trip.

Mrs. J. Docherty, of Edmonton, is visiting at the home of Mrs. A. Norquay.

A number of the Haynes and surrounding community was recently held in the United Church when an Auxiliary of the Red Cross was formed and plans were made for the coming tall and winter.

Rev. L. Thompson was welcomed back on Sunday, Aug. 18th. Next service on Sept. 1st, at 3 p.m.

George Tattler

Mr. and Mrs. M. Sharpe and family, of Bashaw, and Mrs. Archie Allen and son, of Edmonton, were Sunday visitors at the home of Mr. and Mrs. L. B. Clarke.

Cecil Land, now a soldier in the Calgary Highlanders, spent last week end with his parents, Mr. and Mrs. H. Land.

Mr. and Mrs. D. Wiggins were visitors in the district this last week. We are glad to hear Mrs. Wiggins is feeling much improved.

Mr. F. Dorosewil and Bob Cohen were in charge of the National Registration at the school.

Miss Pauline Stoneman, now working at the Joe Kanagimow home, is leaving shortly for Ontario where she has accepted a job in a factory.

Mr. and Mrs. T Truman and family and Mrs. Holland were Sunday visitors at the home of Mr. and Mrs. G. Nein.

TEES TOPICS

E. D. McGregor was a business visitor to Edmonton, on Wednesday.

Mr. and Mrs. Al Sim have on their guests, Mr. and Mrs. Anderson, of Vancouver.

Mrs. E. Sim, Edmonton is spending a few days with her parents south of town.

Miss Lillian Coburn is leaving this week to visit friends in Medford, Sask.

The dance on Saturday night was well attended and all report a good time.

A free dance will be held in the Tees hall, on Saturday, Aug. 3rd.

OLDEST PRESS FOUND IN EAST

TORONTO — Lost for 15 years, the oldest existing printing press in Canada has been discovered in the basement of the Ontario legislative building here, it was announced Wednesday. The press, built about 1793, was presented to the Toronto normal school museum by the late John Ross Robertson. The press was set up at Niagara-on-the-Lake, Ont., in 1798 to print the Upper Canada Gazette.

Potential Weapons

Despite dire forebodings, promises and threats, the present war has progressed to within measurable distance of one year without the appearance on the scene of any startling new destructive agency which might make combat between armed forces futile or impossible.

It is true that due to the greater use of mechanized equipment it has been possible to mete out death and injury to human and mechanical property on a scale hitherto impossible, but that is the result of organization and improvement of implements and equipment which were known and in use in Great War No. 1. No new chemical or physical agency of destruction has been employed, so far as the general public is aware.

The only new device was heralded in advance by Hitler some time ago when he announced that he had something new and terrible with which he was going to sweep the British navy off the ocean. This hugely mendacious utterance turned out to be the magnetic mine. Insofar as effectiveness was concerned it was more or less of a dud. The British speedily found methods of coping with it. Within a few weeks of its debut, the German navy had disappeared from the non issues with the exception of a few prowling submarines and the Royal Navy continued to patrol the high seas at will and enforce its blockade of supplies for the Hun.

* * * *

Insane Fiendishness

This does not necessarily imply, of course, that science may not or will not reveal some secret which may place in the hands of one or other of the belligerents some new agency of inconceivably powerful power or of unthinkably meager than anything that has yet been employed in the science of warfare. If such an agency, that nothing could withstand, does exist, however, it is to be hoped that it will be discovered in Allied or friendly laboratories and that the most extraordinary precautions will be taken to see that it does not fall into the hands of the enemy, for the sake of the very existence of all of us.

In recent months there have been hints of two scientific discoveries, either of which, if capable of practical adaptation to the cause of Mars, would have an overwhelming effect on the course and probably the final outcome of the war. Both, or either, could be utilized as a weapon of such tremendous scope and power, that the contemplating of their potentialities as an agency of warfare can only inspire awe and terror. Details of neither of these discoveries are not greatly exaggerated.

Perhaps, fortunately, if there is any truth in these stories and if the reported discoveries have scientifically and commercially possible, they are not available in the United States and it can be taken for granted that the authorities of that country will see to it that either of these secrets do not fall into German hands, lest it lead to their own undoing.

One of these is a so-called death ray which, according to newspaper reports is so powerful that it could be trained upon an aeroplane 200 miles away and at that distance could melt the plane's engine, causing immediate destruction to any aircraft which came within the scope of its rays.

The other source of potential destruction is a new form of power which, according to the New York Times, is not far from perfection and which is to revolutionize industry. It reads with the invention of the steam engine and later, with the discovery and invention of the principles underlying the internal combustion and Diesel engines.

* * * *

Not Yet Certain

This new source of power, according to the New York Times, is a natural substance found abundantly in many parts of the earth which, when thoroughly separated in its pure form for the first time at Columbia University, was discovered to be capable of yielding such energy that a pound of it is equal in power output to 5,000,000 pounds of coal or 1,500,000 gallons of gasoline.

All that is necessary to make this tremendous power available to the use "or slaves" of mankind is an improvement in the method of extraction. It is said.

For generations physicists and scientists have dreamed of the possibility of converting the cheap and plentiful energy of the atom into a source of almost unlimited power for the general use of humanity, but so far no commercially practicable method of doing so has been found. Perhaps the same fate in store for the new discovery hailing from Columbia's laboratories. Perhaps it would be just as well if that fact story remains insulated until the war is over in case the secret gets into the wrong hands in the overwhelming disadvantage of the Allied cause

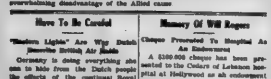
* * * *

How To Be Cavalier

"Modern Lights" Are Why Dutch Recently Arrived Air Heads

Germany is doing everything she can to hide from the Dutch people the efforts of the continual Royal Air Force raids on western Germany. Recently Netherlanders were forbidden to visit after dark a line of hills within give a view for into Germany. The British Broadcasting Corporation reported.

"The Germans have to be careful what they say about it (the raiding), but here is one description," the B.B.C. said. "The civilians across the frontier is perfectly normal except for that curious new phenomenon we observe every night, the 'modern lights.' Great iron can be seen every night after the Hitlers have been over."



Long Record Of Service

Scheme For Canada's Government Ammunition Started 25 Years Ago

Canada's government amenities today a big business with the Dominion, a business which forms part of the working capital of the country has celebrated 25 years of service to the country.

The scheme was first suggested by the late P C Larkin in a letter to the late Rt Hon Sir Wilfrid Laurier in a letter dated July 8, 1914, and emanated from Ripon England where Mr Larkin was on holiday. Two years later the Act which authorized some of government amenities became law.

It was not until 1926, however that the annuity branch shed its moulding clothes and started out to become a real force in the business life of the Dominion. Hon Vincent Meredan then minister of labor made special efforts to bring the system up to attitude of the Canadian people Some 60 agents, trained for the work under E. G Ellis senior branch superintendent, were placed at points across Canada among them A. E. Hilton, who was appointed Regina agent in 1929, with headquarters in the post office building.

The method of procedure remains the same today as of 25 years ago. In a single year the Dominion increased 300 per cent. In 1925-26 annuities to the number of 1,000 were made under the direction of the late Hon. Norman Rogers, then minister of labor, and the total of annuities issued totalled 7,308 and receipts for the fiscal year totalled $1,000,000.

Money comes on account of the purchase of government annuities is deposited with the superannuation fund of Canada and forms an integral part of the working capital of the country.

SELECTED RECIPES

DELICIOUS SALMON STUFFING

1 cup dry sausage
¼ cup margarine
1 cup bread
1 egg
½ teaspoon salt
¼ teaspoon pepper
1 tablespoon onion juice

Add All-Bran to moistened and milk and allow to soak for 15 minutes. Heat egg and add to first mixture Stir lightly to blend ingredients and combine with All-Bran mixture Fill grapefruit halves with two-thirds full and bake in moderately hot oven (375 degrees F.) for 30 minutes. Yield 10 muffins (2½ inches in diameter).

CHERRY PIE

2 tablespoonfuls Durham Corn Starch
2 cups Pitted Sour Cherries
Pinch of salt
1 cup Sugar
1 cup Juice from sweetened cherries
2 cups drained canned cherries
½ teaspoon almond extract
Pastry for upper crust
Rich pie paste

Combine corn starch thoroughly with sugar and salt. Stir in hot juice and cook until thickened. Add cherries and almond extract. Turn into pie pan lined with pastry paste and top with butter Dampen rim of lower crust and cover pie with rolled-out pastry, slit for escape of steam. Seal, trim and crimp. Bake in hot oven, 450 degrees F., until pasta is nicely browned.

New York In Factories

London's Second Days And Girls Have Practically Disappeared

London's petty errand boy has virtually disappeared. When he does appear whistling along the park or is engaged in cheering a policeman he is generally the son of the small shop proprietor instead dawn to succeed his dad, and in some cases assisting his mother, the dad having more serious uniformed business in hand. The errand boy has now gone into the factories, and he seems to have taken his sister with him, for errand girls are almost as scarce as their brothers.

The errand boy with his bicycle or tricycle was the small shopkeeper's standby The big stores always had their delivery vans and carriers. But customers are sympathetic and helpful, and the rule is "cash and carry" for the London housewife's sugar and bacon, as well as for American munitions.

Canadian For French Warships

According to Canadian Naval headquarters it is possible some officers of the Royal Canadian Naval Volunteer Reserve now in England, at the disposal of the British Admiralty, may be assigned to French warships taken over by the Royal Navy. These officers were recently commended for "business and bravery."

Skilful Loggers

The 3,150 skilled loggers from Newfoundland, now cutting pit props in Scottish lumber camps, are to have special legal badges during the campaign "Newfoundland Forestry Unit."

Plans Should Be Disregarded

Any Fund Sent To Europe Will Go To Germany

An authoritative statement, read, and that Germany was shipping coal, pied territory at certainly all food stocks and raw materials and, as a result, food shortages were likely to develop. Sufficiently warned the U.S is disregard plans for food from the occupied countries.

Germany will be responsible for the feeding of the territories she occupies," the statement said. Plans which many come from the occupied territories, therefore, certainly will be made at the instigation of the German government, and if food is shipped there, it will be sent only to Germany

In Denmark, according to the statement, such pretense is rationed to is about 3½ pounds of sugar monthly, while the ration is 2½ in Germany The coffee ration is slightly more than a pound and monthly white tea is limited to about two ounces monthly (The British tea ration is four ounces a week, it is stated.)

Danish pigs are being slaughtered at such a rate that even the German demand is unable to keep pace with the supply, the statement said. Fattening of oil and fuel is said to be affecting the fishing industry while drought is ruining the pastures and impairing the milk yield.

In Norway, according to the statement, there is an acute shortage of milk and eggs in the towns. No meat or cattle is issued in small industries or households They are restricted to one meat meal.

New Tax Idea

An Arab man who was being taken to a car across a very bumpy patch of desert in what was going that was at last the car overturned and the sheik was thrown out. Instead of protesting to the driver, the Arab reached himself up and apologized profusely, saying: "I'm so sorry I've not learned to ride one of these things yet."

In British Hands

Germany missed a good deal when Norway was captured by virtually the whole of the Norwegian merchant marine, totalling 4,000,000 tons, is in British hands and all of the gold reserve, $16,000,000, is in safe storage in Canada or the United States —fish that Hitler must admit got away from him.

An Unusual Accident

Train Bumped Buffers In Grand Central Terminal, New York

Considering the multitude of trains the speed the passenger and freight that have to be planned day and night the number of accidents is amazingly few If there were as many people killed and injured on railroads in a year as there are in automobile accidents public patronage would be very small. Accidents to happen occasionally chiefly at the junction or out on the road and one of the rarest kinds of accidents occurred the other day right in the crowded central terminal New York, where the train from White Plains was so near stopped that many passengers had got their seats and were standing if the doors preparatory to getting out. Indeed safely the terminal has just there. The train was not slipped a note in time, only nearly the locomotive having the brakes on, but another was the engineer failing to apply the brakes in time, with the result that it crashed into the buffers. The jolt was so severe that about 100 people were injured, but not a few seriously

Hundreds of thousands of trains enter terminals on this continent in the course of a year and rarely if ever has such a thing as this or even always buffers at the end of each platform. The reason is that engineers put them there in case. We surmise they are a survival of the old days before the advent of the vacuum brake. Without the vacuum brake, it could never have fallen to the speed they have. And they would have to start slowing down long before the end of the run if an accident is ferred to was probably fairly fresh at the time.

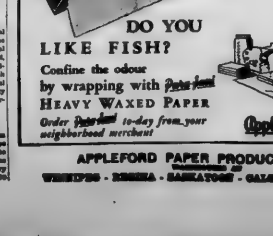
But it is still desirable to have buffers when the human factor fails.—H. Thomas Tracy Journal.

Change In Regulations

Any Canada Annuities Purchased After June 16 Are Taxable

There appears to be a misconception as to what has happened with respect to Dominion of Canada annuities which are purchasable up to the point where they will provide an income of $1 200 per annum to the holder at a stated age—as income which has been tax exempt—granted free of income tax. This guarantee will still hold good with respect to annuities purchased before June 24 of this year, but incomes from those purchased after that date will be taxed. Many people have in the past taken out such annuity by paying a dollar or other small sum per year, because they thus got a contract guaranteeing them the same interest rate and freedom from taxation on any larger annuity they had purchase later This tax-free contractual right is now being abrogated, and will only be exercised by already purchased, but with respect to increase of such annuities no privilege now annuities. If a man has an annuity of $600 and increases it to $1,800, the extra $600 will be taxable.—Toronto Star

A nonspill coffee cup, invented for use on boats and trains, has an inclined rim to fit inside well.



Forests More Valuable

Committee Should Take Extra Care To Prevent Fires

War-time places a new and higher value upon the forests of Canada and the new value in this case goes almost wholly to the wage-earners, merchants supply houses and others furnishing the employment and services of men. That is the manufacturers of lumber and paper, according to a statement of the Canadian Forestry Association.

The statement goes on: "Now that the Dominion Government has issued a call for the organized defence of Canada, a new reason is provided and a new opportunity given for every citizen to include the protection of the forests from fire with his patriotic training The defence of Canada applies to forest fire prevention as well as external enemies Defending the forests is an immediate personal contribution that every citizen can undertake.

"It is sometimes forgotten that forests never destroy themselves. They are laid in ruins nearly always by the carelessness of human beings. Thousands of forest rangers work from morning till night to save the splendid resources of the provinces from reckless actions of fishermen, campers, smokers, berry-pickers and hunters.

"Every forest fire is a blow to our own home-land, and the consequences of fire grow steadily worse as the timber supplies become less and the distribution of forest wages grow greater."

The Mysterian

The mystery of how Mussolini Hitler met his death—like the similarly sinister mystery about Gen. von Fritsch when Hitler hated at letter ex Mussolini hated Hitler—will remain covered as long as dictators don't have to answer their own subject people's unvoiced questions.

The Northern Lights

The aurora borealis, or northern lights, is caused by streams of electrons that fly out from the sun and strike the gases in the upper part of the atmosphere of the earth

Irish pigeon took the principal prizes at a hoggine tournament in Dunoon, Scotland.

CHAPTER XI—Continued

They carved their find back to the department store and Allen Stebbings threw it out. When the letter had lessened in bulk and importance, Jim stripped the flap of the envelope and carefully withdrew its contents.

Dear Mr Stebbings

I am afraid I must disappoint you, I am not in a position to be having a project on theories that I cannot afford to risk. I will tell you frankly that I have not the $1,000 and what is more I cannot be a female organized by my friends the police, and I think that it would be to say the least, foolish on my part to go into a venture of which I know your requirements, or at least, have written proof that you have approached me

Yours sincerely,
ARTHUR INGLE

The two men looked at one another.

"That beats the band," said Elk. "What do you make of it, Carlton?"

Jim read with his back to the fire, the letter in his hand, his brow wrinkled in a frown.

"I don't know * * * let me try now * * * Harlow asked Ingle to meet him at Victoria. Ingle promised to go, changed his mind and wrote this letter, which has obviously never been opened by Harlow, and as obviously could not have been written by Ingle before the interview, because, as I know—and I find it strange—he had no appointment to-day. It was one of London's quiet nights. The streets were almost deserted — the deserted pavement was very inviting. She was still and cramped through sitting so long in one position, and a quarter of an hour's walk was not only desirable but necessary. She decided. Pulling on her coat Bill had she opened the door, and, after a moment's hesitation, set out, resisting to distract the other inmates of the house.

It was one of the first flight of stairs she had a surprise. The door of Allen Rivers' room was wide open, and when she came abreast of it she saw him sitting in an armchair, a pipe in his mouth, and his teeth, his head cropped unromantically across the head he was reading sleepily. But she made sufficient room to warn him and suddenly he sat up.

"Hello!" he crushed, in the manner of one awaking from slumber. "Are you going out?"

The impertinence of the man took her breath away.

"I thought of going for a stroll, too," he said, rising inherently. "I am not getting enough exercise."

"I'm going to post a letter, that is all," she said, and had the humiliation of making a present to him on imaginary letter into the gutter box under his watchful eye.

She brushed past him as he stood in the doorway, blew up great clouds of smoke from his pipe, and followed her up the stairs, angry with herself that she should have so impudently invited a playful to irritate her.

She did not see the man at breakfast, but as she walked up the steps to the office, she happened to glance around and, to her annoyance, saw him lounging on the corner of the square, apparently interested in nothing. She entered the office and the man almost came abreast which formed the corner block.

She had no time to grieve for Allen Rivers something of an ecological nature, she was saving up his desk preparatory to leaving the office when Mr. Stebbings' bell rang. She went in with her notebook open.

"Yes, no, no letter; I just have a curious request," said Mr. Stebbings, looking past her. "A very curious and yet a very natural request. Are all clerks of mine * * * his curiosity has a rare thread or something. He seemed to know if you'd go round after dinner—curious, a scrawl."

Why certainly Mr Stebbings," she said surprised that he should be so considerate.

He is not a client of mine now, he I think I've told you before." she stood Mr Stebbings went on ed—frowning the considerer "And I don't know that I should care to be a client either Only * * *

"Mr Harlow?" she gasped, and brought his gaze down to her level.

"I'm Mr Harlow 104 Park Lane. Why do you ask?"

She stood her head

"I suggested it I said that rather late but he told me that he had a dinner engagement. He was most insistent and Mr Stebbings his eyes returning to the Adam ceiling that this matter should be kept as quiet as possible

"What matter," she asked wonder ingly

"I don't know" — Mr Stebbings eyes returned to examine "— rather hazy it may have been the contents of the letter, or, on the other hand he may have had a row with his wife and he wanted

Director of Wheat Pool estimates 193,000,000 bu. of wheat on Alberta's contribution to Canada's wheat crop.

OBITUARY

There passed away at the Westlock hospital on Aug. 5th Mrs. Harry Hudkins, an old timer of the Alix district, after a brief illness.

Almira Delong was born in Michigan, USA, Jan. 1875. She was united in marriage to Harry Hudkins in Jan. 1892. To them was born two children, Percy in Dakota and was buried at Alix several years ago, and one daughter, Isabel, Mrs. Floyd A. Fawcett, Alix, with whom Mrs. Hudkins made her home since the death of her husband two years ago. Mr. and Mrs. Hudkins and children came to Alberta about 1906 and settled on the homestead now owned by A. Few years later they moved in to Alix where they resided until eight years ago, they decided to try home steading again and moved with the daughter and family near Fawcett.

Relatives at Clive received word on Thursday night she was very ill, and only lived until Friday, Aug 5th. She leaves beside her daughter, three grandchildren, two sisters Mrs. Dan Hudkins of Clive, and Mrs. Lee Jennings, of Washington, and numerous nieces and nephews.

Mr. and Mrs. W. Kosher, Mr. and Mrs. Dan Hudkins and Del Hawley, a nephew, left to attend the funeral.

Mr and Mrs. Hudkins are buried in the little new cemetery that was laid out a few years ago, near their home.

The deceased was a kindly friendly soul and will be missed by neighbors and friends as well as relatives.

THE ALIX FAIR

The exhibition of Alix and district agricultural products on Friday, August 23rd., was a very creditable affair, especially in the way of women's and children's exhibits, garden products, flowers, etc. The total represented a lot of work and and this year was the back bone of the fair. There was a poor showing of live stock. The horse class, was fair, but could have been better.

In the live stock class our farmers did not do nearly as good as they could have done. The possibilities in this line are far in excess of what was really done.

The girls did well in their team play and were well worth watching. The physical training they are getting in their team play is beneficial, and with improved health they are hap pier and getting prettier every day. Any stories that makes our youngsters stronger is a good thing to encourage. Let us have more sports by all means.

While we are on this subject, we would suggest that attendance of town people might be improved if a different approach to the Fair ground could be found for pedestrians. To walk on the highway is a dangerous experience, and in our opinion, is one reason why so few attend. If they can ride it is not so bad, but to walk in a perfect cloud of dust kicked up by madly driven motor cars, is to court disaster to clothing and footwear. The average car driver seems to have no consideration for those on foot. The more dust he can raise the better he likes it. There is a sign on the road that states 30 miles p.h. is the speed limit. On Friday about 20 or 30 cars passed us on the way to the Fair grounds, and the slowest one was not less than 35 miles p.h. and one rushed into town at about 60 or 60 p.h. An example should be made of one of those speed demons. That speed is dangerous on any day of the week and should be looked before somebody gets hurt or killed. Turn the corner at the creamery at 80 miles p.h is begging for trouble.

We think if an appeareh can be found, away from the dusty road, there will be more people patronize the Fair grounds.

The dance in the evening was quite a successful event. The music was good and everybody enjoyed them selves.

The King will be at his through our Fall Fair was a very successful occasion. There were the entries.

The list of prize winners has not come to hand yet, but will, we hope, be received in time for next issue.

Mr Whitfield is deserving of special mention for his looks after the efforts he make the Fair a success. He has never spared himself in any way in carrying out his duties as secretary and manager, and it is with deep regret that we hear of his intention to resign. The Society will find it difficult to replace him. He deserves something more substantial than a mere "thank you."

Following is a list of old-timers who registered at the Fair grounds:

Smoke Screen

We all know we are in a fight for liberty to a finish. Do the Pool Officials? If the Pool officials do then why try and capitulate on the war? This is no time for such abominable tactics.

Why mix up knowledge of momentous national decisions with Pool propaganda such as recently appeared under the headings of "Humanity Has Struck Its Tents" and "Eternal Vigilance Is The Price of Liberty"?

If the officials really desire to give Pool members worthwhile information and believe that "eternal vigilance is the price of liberty" we would suggest two questions that must be frequently in the minds of former Pool farmers.

When will a payment be made on the $29,000,000 that was taken for Elevator and Commercial Reserves?

Do these officials realize that not one cent has been paid in interest on that money for ten long years?

There are many more questions might be asked but there is a war on.

Line Elevators Association

WHY WORRY?

I wonder why folks worry? There are only two reasons for worrying, one is successful, or you are not successful. If you are successful there is nothing to worry about, if you are not successful there are only two things to worry about. Your health is either good or you are sick. If your health is good there is nothing to worry about; if you are sick there are only two things to worry about. You are going to get well or you are going to die. If you are going to get well there is nothing to worry about; if you are going to die there are only two things to worry about. You are either going to heaven or you are not going to heaven, and if you are going to heaven there is nothing to worry about; if you are going to the other place you'll be no busy shaking hands with your old friends you won't have time to worry. So why worry?—Exchange.

TATTOO GIVES ALL STATISTICS

MAN'S SEVEN MISTAKES

Man's imperfections lead him to make mistakes in life, and the pursuing out of these mistakes engaged the attention of philosophers and reformers at all ages. Seven of the commonest mistakes which he considers to be the even greatest mistakes of man, as follows:

1—The delusion that individual advancement is made by crushing others.

2—The tendency to worry about things that can not be changed or corrected.

3—Insisting that a thing is impossible because we ourselves cannot accomplish it.

4—Refusing to set aside trivial preferences in order that important things may be accomplished.

5—Neglecting development and refinement of the mind by not acquiring the habit of reading.

6—Attempting to compel others to believe and live as we do.

7—The failure to establish the habit of saving money.

Mrs. Smathers and family returned Sunday after a two weeks vacation at Gull Lake.

Mr. and Mrs. W. Frost returned Saturday from a honeymoon at Banff and Jasper

Miss Mary Eyestone returned saturday, after a short visit at the home of her grandparents, Mr. and Mrs. D. Pearson

A beautiful Flower Service was held at the Mirror United Church on Sunday evening.

"Gone With the Wind" will be shown in Bashaw, September 2nd. and 3rd. Matinees reserved Tickets on sale at McDonalds office, Mirror, and at Free Press office, in Alix.

School will reopen Sept. 3rd The staff is: Principal, D. Aitken; Assist. Principal, A Frost; J. Henderson, Miss A. Morgan, Miss F Macdonald, Miss G Dunlop.

Mrs. G. McCormack, of Corona, Cal., a former resident of this district, has been renewing acquaintances Mrs McCormack plans to travel to Tennessee, Buffalo and New York where she will make extended visits.

Mr. and Mrs. N. Jaques, Nanette and Mr. Harry Jaques motored to Edmonton, on Tuesday, where they will spend several days.

Mrs J B Scanlan, of Calgary, is visiting at the home of her mother, Mrs A M Boyer.

Seven hundred and sixty four people registered at Mirror on Monday, Tuesday and Wednesday, Aug 19, 20 and 21.

There is a great deal of evidence showing that many Mirrorites spent their holidays at beaches, from the healthy suntans they are sporting around.

On Sunday, Aug 25, Mr. and Mrs J Naylor attended the Veteran's Declaration day at Godsby.

In future the Veteran Volunteer Reserves will train in the skating rink by electric lights donated by the Calgary Power Co.

NEVIS NEWS

The cool morning reminds us that fall is fast approaching.

Mr and Mrs George McCord, of Lacombe, spent the week end at the R. McCord home.

Word was just received of the passing of an old time resident of Nevis, George Knapp

Mrs Moore and Dennis returned from their holiday last week end

John Barton had the misfortune of breaking his wrist while cranking a small engine.

Mrs. Kingston and Miss Strayler left for their home in Oregon after a pleasant stay at the McCord home.

The J Milasin's family spent the week end at Loyalist.

School opens on Tuesday, Sept 3rd. So be on hand kiddies.

Carroll News

Mrs. A C Mull, of Edmonton, spent the week end at the home of S. R Sutley.

Mr. and Mrs. Merle Early and family visited at the Sanderson home last Sunday.

Nevis Ladies Soft Ball team played a game with the Carroll Ladies team, on the home diamond. Sunday afternoon the score was 7-8 for Carroll team.

Mr. N. Webster and son Roy, spent the week end at the home of Mrs. J. Dorherty.

School opens on Tuesday Sept. 3rd. Miss Ruth Handyside as teacher.

MEET THE "JEEP"

A GREAT PULLER

Minneapolis, Minn., Aug. 23. —"The Jeep" a high-speed adaption of the ordinary farm tractor, may be the answer to one of the United States Army's needs for the modern, swift mechanized warfare.

Strenuous tests of "the Jeep" at the recent Camp Ripley war maneuvers, brought wide acclaims from both officers and enlisted men who saw it perform It rode roughshod over almost any obstacle, swiftly moved five-ton howitzers, transported troops quickly in trailers and cleared the way for light and heavy tanks.

Designed and built by the Minneapolis-Moline Implement Company, the tractor stresses quick maneuverability, low center of gravity, a speed of 30 miles an hour and a 7,500 pound drawbar pull. These are the things the Army looks for in what is known as a "prime mover."

A seven ton job "the Jeep" will carry a five-ton load up a 40 per cent incline; has a fording depth of 40 inches, is equipped with air brakes and pneumatic tires and has a pneumatic jack on the rear which enables the operator alone to hook up the heavy howitzers, the latter a task usually requiring six men.

CHINA WILL NOT QUIT

"The more and heavier the Japanese bombs, the deeper the hatred of the Chinese people for the Japanese people and their works, and the stronger the will of the people to resist. So long as we have breath in our bodies, our resistance will continue until Japan has collapsed."

BENNETT DECLARES

FLIERS 'SUPERMEN'

Toronto, Aug. 27.—Rt. Hon. R B. Bennett, former prime minister of Canada, wrote in a letter received by a Toronto resident, Tuesday, that members of the Royal Air Force "are not airmen but supermen."

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

K. Roy McLean, Optometrist and Optician, will be at the Alix Hotel on Tuesday morning, Sept. 10th. On Wednesday in Stettler all day each week until after the new office, 329-219 South an Building.

W. F. Vergowe was a visitor to Stettler on Tuesday.

Wilson Gundell is away on his holidays.

Tourist-traffic in western Canada is up 18 per cent this season.

The smokey atmosphere is caused by bush fires in the Didsbury district and also up north.

The Government Telephone department is putting up a string of new poles on Prairie Ave.

Roy Pearn and Cliff Brockhart who have been in hospital, are out again. Roy has been transferred to driving a truck.

The Red Cross is after another $6,000,000. The first lot is already diminishing to the vanishing point.

Born—To Pte. and Mrs. J. Scott, at the Alix Nursing Home, on August 31, 1940, twin girls.

Born—To Mr. and Mrs. G. Clutton, of the Belgrove School District, at their home, on Sept. 1, 1940, a daughter.

Mrs. Hunter and baby came down from Lacombe on Thursday on a visit to her mother, Mrs. A. S. Hewett.

Mrs. C. E. Yarwood, clerk of Alix Municipality, has the necessary forms for those who wish to register Swarms.

Mrs. Reg Biddons has returned from Calgary and is spending a few days with her parents before going to Brandon to join her husband.

Ernest Silverman and Gerald Thrifty, of the Calgary Highlanders, were week-end guests of Miss Grace Wilton and Miss Freda Edgar.

Johnnie got your gun—registered. The authorities do not look with favor on those who procrastinate, and stiffer penalties will soon be applied to those who fail to register.

Every farmer has to have a permit before he can deliver his grain. Get yours early. The elevator men will have the necessary forms.

On Friday night, Sept. 6th, "The Modernaires" will furnish the music for a dance in the Legion Hall. Step out, folks, and enjoy yourself.

Harvesting is well under way and some good yields are reported. The threshers have plenty of work to do this season and will be fortunate if they get through before frosts-up.

Alex Blezzit has secured employment at Red Deer, working on the building of soldiers huts He may be away two or three months. Mrs. Blezzit will join her husband this week.

The provincial secretary has ordered that the British flag must be unfurled at every school 15 minutes before closing and taken down after school closes. This order has been made at the request of the Coronation Legion.

Two hundred men are hard at work on the new military training centre at Red Deer. Frames have been erected for the majority of the 20 buildings. The carpenters are putting in a 10 hour day and the truckers, hauling lumber, are working till 10 p.m., the three-hour-a-day conscientious objectors on deck till about midnight. This is the job Alex Blezzit is on as explained above.

A GOOD FLOW

With the wheel well completed at a depth of 132 feet the Board of Trustees are more than satisfied with the supply of water obtained. After going through 41ft. of rock, water was struck and comes within 30 ft. of the top, giving 100 ft. of water and after pumping for 3 days by power, the depth of the water remained at the same level. It has already been well patronized by the townspeople for a shortage of water in some sections of Alix is apparent. The drillers were Chadwick and Son of Lacombe, who did a thorough job. The Board at this time wish to thank Mr. Chas. Pinnell for the use of his well for many years, which has been the school's supply. Under school regulations the supply must come from a drilled well for the children and this should be an school property.

MIRROR NEWS

Mr. and Mrs. F. Everley and children of Flaxcome, Sask. are visiting at the home of Mr. and Mrs. J. Napier for several days.

Mr. and Mrs. J. Tosienk of Trail, B.C. were visiting friends and relatives here the past few days.

Quite a few people of Mirror have been attending the series of ballgames at Penola.

Miss Virginia Brassnoor, of the Royal Alexandra Hospital, Edmonton, is visiting at the home of Mr. and Mrs. Roy Taylor.

Pte. Charlie Ingram of Camp Borden, Ont. is visiting his parents Mr. and Mrs. R. Ingram for two weeks.

Miss Mary McAlpine, of Rocky Mt. House is staying the week with her friend Miss Thelma Chisholm.

A miscellaneous shower was held Wednesday last for Miss Pearl Benjamin at the home of her grandmother Mrs. W. Stamp. After the bride-to-be received many lovely gifts, a dainty lunch was served.

Mr. and Mrs. H. Oldring and son Darrell of Alix, stayed the weekend with Mr. and Mrs. G. De Vore.

Mrs. M. Paterson, of Camrose, will be visiting around this week at the home of Mr. and Mrs. G. Parry.

Many Mirror young people attended the free dance at Tees Saturday night.

Sgt. F. G. Pym, S.A.H., is home on leave for a few weeks. Pte. C. Ingram is also home on leave.

Mr. Harry Jagues left Friday, Aug. 30th, for Edmonton where he will begin his new job with the McKenzie Oil Co.

Mr. Naylor, butcher here for the past six years, and Mr. P. L. Hembert, merchant here for the past 17 years, have enlisted and have been ordered to report Monday, Sept. 2nd, at Calgary.

Brushing is being done on the prospective highway north of Lacombe—Stettler highway. It is rumored that the road will be complete to Lamerton this year.

Mr. and Mrs. H. Jaques and Nanette motored to Edmonton Sept. 1st, where they will spend a few days.

Happy day! The Germans are now getting a taste of their own medicine, with bombs dropping on Berlin and blasting holes in their concrete pavement seven feet deep.

A staff of pilots are being hired in the United States to fly planes across the Atlantic to Britain. The pilots get a bonus on every trip delivered.

Powerful But Mysterious

Blood pressure is not mysterious in the drug business. And the business is a big one to cope with. It is a big one, but it has taken millions of scientific brains for mankind to move that far, so far and so little. Various potencies, dangers surprising to non-chemists, are in the realm of medicine subscribers has been used in minute doses with beneficial effects in the treatment of gout. Used recently on a small experiment, it was found that it will destroy the poisonous tumours in the other hand that it will cause cancer.

In the field of horticulture and arboriculture, it has very recently been discovered that colchicine can be utilized to very materially increase the productive power of certain forms of plant life. Colchicine has been used to produce new varieties of plants, to increase the size of plants, blooms and seeds of existing varieties of plants and to hasten the maturity of some varieties.

The Toronto Daily Star reported an experiment at the University of Illinois College of Medicine in which colchicine was used to treat four hopeless cases of cancer. Following the discovery of the healing armistice this sub-house was stop or delay the division of cancerous tissue cells. While the lives of these four patients were not saved, some interesting and perhaps important effects were revealed. In all four cases, in a week or two the colchicine caused large cancers to start breaking down, but two of the patients died of a lung pneumonia and the other two cancer treatment began for

In the other two, to quote the Toronto Star, "large cancers mostly disappeared after several weeks. "It was then that the effects appeared which the physicians report was startling. Around their edges the malignant tumours began to grow again and the second growth was much more rapid than the original. One patient became mad while the cancer was breaking down. When the tumour began it grew again a full head of hair reappeared.

* * * *

Some Good Qualities

It is quite evident that colchicine has an important influence upon cell division. This has been confirmed by investigations in the other than medicine. They have discovered that, in point life, colchicine has the power of multiplying chromosomes within the cells, and more particularly those which contain a normal number of cells, known as diploids, can be treated with polyploids, or those plants which contain a large number of cells.

Among them in the forefront of this type of experimentation is plant life in the F H Peto of Ottawa who has found that colchicine can be used beneficially on diploid plants to materially increase size productive power and to hasten maturity and it is in this field that colchicine is destined to yield early and important benefits to mankind.

Working first with flowering plants Dr. Peto discovered that the use of colchicine resulted in doubling the size of snapdragons and pansies with remarkable increases in size of stem, leaf and seed. Similar results were secured with clarkia and larkspur and in addition the period of bloom was lengthened and fragrance strengthened.

But later Dr. Peto found that by using colchicine on sugar beets that he could produce a new polyploid beet yielding a 13 per cent. increase in size and a 13 per cent increase in sugar content, a discovery which should be of immense value to the sugar beet industry in Alberta and opens up the possibility of developing a beet seed export industry in British Columbia.

* * * *

Value To The Prairies

Perhaps the greatest value of the application of colchicine to plant life in the prairie provinces lies in the possibilities of reforesting and afforestation. Then Hopes are held out of not only developing new and valuable varieties of trees but of speeding up growth and thus reducing the cost of production of trees of timber value. Such a discovery has great potential value in the northern reaches of the prairie provinces where forest areas have been denuded by fires or exploitation, and on the open prairies where quick growing trees, possessing both an economic and aesthetic value would be more than welcome. It also opens up the possibility of developing fruit trees of real economic value suitable to prairie conditions.

The task of improving on Nature in the development of trees until now has only been attempted by selective and hybridization processes. "Chromosome doubling, however," according to Sidney M Hale, in a recent issue of the Magazine Digest, "has presented a new approach. Seems impressive of trees," says this writer, "have been treated with colchicine, and while it will take the better part of a lifetime to pass final judgment, there is evidence on hand that rich new varieties will be induced without great difficulty."

"One of the main reasons for the forest breeder's optimism," continues Mr Hale, "is that in Sweden polyploid forms of some native Canadian trees exist in a natural state. They are trees of great economic importance. Basing their opinions on observations made in Sweden, biologists speculate that the new polyploid trees in Canada will grow more rapidly than the diploid. Rapidity growth is an important economic factor in forestry, because, as Dr. Walter Muldrof of the University of California estimated, "To end the growing time of a tree at any stage, will reduce the growing cost exactly 50 per cent."

Laboratory work to date appears to indicate that colchicine is likely to render material benefits on mankind in the realm of horticulture and arboriculture in the very near future. What we hope it holds for man in the treatment of disease seems more remote. Although this avenue is not being neglected, for experiments are now being made in an effort to secure the beneficial effects without the destructive after-effects.

India Stops Hoarding

To combat silver hoarding the Government of India announced an immediate issue of one-rupee bills, as in the First Great War. The rupee is normally the equivalent of one shilling, sixpence (about 25 cents).

Not Really Incurable

Canada Might Find Way To Control Of Cancer

There has been no really important in United States papers and magazines a good deal of discussion as to the possibility of Canada becoming the victim of the British Empire. Such a consequence is not altogether unlikely. Writers on the prospects of imperial relations have had much to say on the question in the past, pointed out in previously. But still does seem to be hardly necessary to anticipate disturbances in Europe or because of the vexing geographical position of the Dominion, but to have at the power that it is worthy of the name.

Recent events have of course sharpened the discussion. Channel across the seven from the ravages of aggression and the war in bound to have a considerable effect on its industrial development. Channelon industry has already become an important factor in its activity and in future, as capital seeking safer investments pours into the country Canada's financial organization has been enormously expanded. The last 18 years too while its broad natural resources can make a home for a much greater population. Taken along with these things much will depend on the strength of Canada's political organization, on the breadth of its world view and his steadiness of a peaceful outlook in its own affairs.

Against the time come that there is a parliament of the British Commonwealth of Nations, Canada would. After all be the logical place for it to assemble. Shall Emily Star

Idea In Education

College Professor Advises Studying What Interests You Most

Here's a new phrase "The law of increasing returns." Latter is to be a great educator Professor William Pepperell Montague, of Barnard College Columbia University says about the law of increasing returns as it applies to student will. It is at variance with the views held by Mr Hutchins Dr Mulligan says. If you will but disregard as well meaning advice to disperse your attention over a wide field and if you will take instead something like the highly unified course of study prescribed at Oxford or Cambridge then you will realize the truth of the law of increasing Returns For what ever your chosen field may be geology or literature, or economics or mathematics, there will come a time, a magical moment in your life, when you will feel the body of essential and unified and painfully acquired knowledge within you become suddenly not only to give emergency truth newly quickened and alive in its own right. You will have acquired an attitude and will grasp by what it affords upon and be to you an ever mounting joy.

If, on the other hand, you pursue the will-o-the-wisp of two grounded upon the old-world liberal education supposedly befitting a gentleman and consisting of a polite nibbling at this a dash at that and a little of everything then you will be left with a mind stuffed with undigested facts, of cultural odds and ends, which you cannot use, and which will not give you any genuine satisfaction.

Equipment Is Complete

Aerodrome at The Pas Home Promoted To Rank of Emergency Field

The second first disaster aerodrome to be completed in Manitoba is now functioning at The Pas, it was announced at a meeting held with almost any sort of calamity. The big field with its runways of a speed of 60 miles per hour is equipped with everything necessary for emergency landings. A night operating plant and flood lighting system, a two-way radio, a movie camera, telegrams and cable for the public, private use a field kitchen and a hospital with its operating room, equipped with the latest in medical and surgical equipment.

The aerodrome is equipped not only to give emergency treatment for all sorts of accidents, but to cut through heavy metal or wood, over high-voltage power lines or burst girders or other heavy objects from any to a ladies

SELECTED RECIPES

HONEY BRING CAKELESS

½ cup lard
½ cup honey
1 egg
½ cup sour cream
1½ cups flour
1 teaspoon baking powder
½ teaspoon salt
½ teaspoon soda
½ cup chopped nut meats
½ cup chopped dates
½ teaspoon nutmeg or
½ teaspoon vanilla extract
1 cup Kinnep's Rice Krispies

Cream fat and honey. Add well beaten eggs and sour cream. Sift flour with baking powder, salt and soda, combine with first mixture. Stir in nut meats, dates, flavoring and Rice Krispies. Drop from a dessert spoon onto greased shallow baking sheet and bake in moderate oven (375 degrees F.) about 20 minutes. Yield: Two dozen cookies (4 inches in diameter).

BRAN LOAF

1½ Christie's Bran Wafers
2 cups scalded buttermilk
1 teaspoon cinnamon
1 teaspoon allspice
1 teaspoon salt
1 teaspoon black pepper
1 cup coarsely chopped, cooked meat
1 tablespoon fat
Cheese

Crumble bran wafers and add cinnamon and seasoning. Brown meat in hot fat and add to the bran-cracker. Pour into greased baking dish, sprinkle with cheese and bake in a hot oven (425 degrees F.) 15 minutes. Six portions.

Trouble in Store

At a concert at which one man was given the job of collecting tickets at the door. After a time he sought out the secretary.

"I think there is going to be trouble for you," he whispered, mysteriously.

"Why, what's the matter?"

"Hungary, no less," was the [illegible] collector's sweet reply. "I've let in two Hungarians who said they were the manager's wife, and now there's a third wanting to come in."

Cider Menace

Possibility Of Use By Nazis For Invasion Of Britain

Possible invasion of Britain by fully-equipped German troops in giant fleets of raised gliders is disclosed by Lt Col T T A Lean of the London Daily Mail.

In commenting on Berlin reports that huge fleets of gliders were being assembled in Norway and that training centres were being organized, Col Lean suggests threat of such an invasion was far more serious prior to the "annihilation of the Luftwaffe" in the Battle of Britain.

Defence Volunteers whose 1,200,000 strength are now known as the Home Guard. Even yet he says the possibility of such an attack cannot be overlooked.

Reminiscent in the surprise factor which gliders have contributed to Nazi successes in the Low Countries and carrying six men each they can transport a battalion in the night to the continent.

They did that on the roofs of an impregnable fortresses in the Maastricht district of Belgium. The gliders deposited their crews in silence. The men were trained grenadiers they rolled bombs down the interior floors of the casemates and put the Belgian garrisons out of action almost before they realized there was to be a battle.

Gliders are towed by aircraft up to a great height before they are loosened for work on their own. They are then at the mercy of the air current, but in settled heads they can be steered to advantage and the glider pilot descends within a reasonable distance of its objective.

"Little imagination is needed to show that it would be quite a practical proposition for thousands of gliders to start above the French coast and subsequently to arrive in Britain.

"They would be more formidable than parachutists, in that a glider carrying six men can also carry an complete equipment for men and a number of ammunition.

"It is not to say that every in the night-and-day watch provided by the Home Guards in many towns and hamlet in Britain the glidein would be quickly seen and located. In handling they are a considerable size in comparison with the parachutists, they cannot concentrate their landings in a definite area.

"Against that, however, they have much in their favor; silence and the opportunity of making a landing without accident.

"The glider may be a military proposition with which we shall have to reckon in the near future It may even provide the Germans with that element of initial surprise which has been such an asset to their plans in Norway, Belgium and France . . .

Children In Bomb Area

Queen Victoria Could Not Have Missed Seeing Bally Eye

The St Thomas Times-Journal holds this story: Visiting a rifle factory at Coventry a few days ago the King went to the testing range, and using a small bore rifle scored a bull's eye.

There seems to be no doubt that His Majesty hit the centre spot of the target because he is noted as handling a rifle But his great-grandmother, Queen Victoria, scored a bull's eye at 300 yards with a regular army rifle when she opened the National Rifle Association's ranges at Wimbledon in 1860. The old iron target with the dent of the bullet on it can be seen at the museum at Bisley to-day and the rifle with which the Queen shot.

It meant a wonderful thing for a woman to score a bull's eye with a service rifle, but the reputation of the Queen's feat is simple. A rifle was laid on a sort of trestle and a rough shot sighted and aimed so that he got a ball. The rifle was then clamped tight in that position and could not be moved. A new target was set up, and all that the Queen had to do next day was to make a gesture of squinting along the barrel and press the trigger There would have been something seriously wrong if she had not hit it.

Incidentally, Wimbledon was the cradle of H.M. shooting, and from 1860 when they were transferred to Bisley Wimbledon had to be abandoned because London was growing, and occasional bullets which missed the targets fell among the houses. Nothing Wimbledon is no longer synonymous with shooting, but with lawn tennis.

With Canadian Troops

First Canadian Division Enjoy Camp Life Somewhere In England

Members of the First Canadian Division in Britain is learning to do without some of the conveniences of home equipment that would impede the striking power in the event of a German invasion "Improvise is the keyword of the Canadians When away from h bels and the proper camp equipment is not readily available, the men soon find a military substitute This is a hardship to soldiers with experience of hunting fishing or trapping in the Canadian woods In fact they much prefer the wild beauty of a camp in the woods to the bleakness of army barracks.

Some of the browners are made adhe.rs to the bottom of their boots pressed up on short pikes Others are mere rubber-soled shoes Reminiscent of saplings covered with rather brass bra and forms A few of the members of the Canadian Division sport long hair

One New Brunswick regiment has solved the long-standing problem of what to do with old razor blades Into the bottom of the regimental hatchets of a tree Beds have been built out of saplings Rough benches have been made from small trees. But there's nothing primitive about the Canadian soldiers' diet Non-coms don't have to waste their time inducting soldiers to eat them Cooks rubbing two sticks together in light a fire All the cooking is done with the latest army issued field supplies at first. This type of stove also has the advantage of not identifying the position of the kitchen with the clouds of smoke. There are three cooks to each company. Each provides kitchen for ten and coffee and all sorts of other ingenious gadgets to ensure that the men get well cooked food

Napoleon said that an army marches on its stomach, with the men Canadian soldiers it isn't a march. It's a mechanized advance. Here is the latest information about the medical and dental equipment which guards the health of the troops. Camouflaged trucks, hard to spot amid the sun-flecked foliage, are the mobile dental units are complete with special chairs and drills. So that they will be able to operate on the electricity supply. These drills are driven by a small motor, a unit the same principle as the old-time sewing machine. Even amid the further-flung battle-lines Canadian pipes and the bombers, the dental unit of a Saskatchewan regiment preserves the authentic atmosphere of a rural-ter dentist's office . . . there's even a waiting room with comfortable armchairs in the waiting room.

Armored Hoarders

Hoy To Recently Two Passengers To Be Built By U.S.

The U.S. army has begun a building program which contemplates a fleet of from 600 to 800 powerful armed battleships. The largest ground, high speed tanks weighing from 60 to 70 tons, it was disclosed today.

That information sources estimate that Germany, which concomitantly has been using armored battleships in its campaign against France, probably had about 100.

Officials of the army's advisory defense commission revealed the program was begun with a $1,000,000 contract to the Baldwin Locomotive Works, Philadelphia, for "heavy tanks."

War department officials refused to discuss the program further, but informed sources described the projected tanks as 60 to 70-ton juggernauts, capable of speeds up to 40 miles an hour and equipped with heavy guns and mixed-type automatic weapons.

Construction of the huge tank is a departure in army planning. Adolf Hitler's swift conquest of the low land countries and France prompted the building of the new armored fleet.

The army now has using "light" and "medium" tanks, weighing approximately 14 and 18 tons, respectively, and is estimated to have 2,000 of them on hand or on order. It was said that the projected program envisages doubling this total.

Scandal Marriages At Gretna Green Have Been Annulled

Scandal of marriages at Gretna Green can no longer be contracted, and even the popular and economical form of marriage by declaration before the sheriff has been established. At midnight on Sunday, June 30, the 200-year-old law of Scotland which recognized such weddings ceased to be valid. In place of marriages before the sheriff there has been substituted a surrogate somewhat similar to the register office wedding familiar in England. Only three forms of marriage are now recognized in Scotland —marriage by a minister of a church, marriage before a registrar and the ancient "marriage by habit and repute," which requires a declaration by the Court of Session to establish its legality.—London Times.

CHAPTER XIII.

Allison surveyed some pelts commonplace and wondered what was coming next. Nothing, apparently, but with a quick glance round the room, the woman sailed out, he heard her call to some one her, leaving the girl to her pensiveness and misgivings. And these statesmen were themselves. A prying kitchen maid (she told herself; she read her employer letters and poked into the pockets of ladies' dressing-gowns was a picture of domestic composure when compared with these statesmen who were lolling and yet must respect the vanity pique of a chauffeur. She had made two copies of the letter within a few minutes of her departure. There were certain words to be considered she and back to her mind dashed those words on her top sheet.

"Yes—" She wondered what was coming next.

"My housekeeper" he spoke slowly—"is the most unshakeable female I have ever known! She is the most suspicious woman I have ever known and the most annoying woman I can ever think to know."

She could not move her face.

(To Be Continued)

One Scheme Failed

Hitler Planned To Upset International Cartwheeler By Forgery

Not the least important among Hitler's crafty schemes to weaken the British Empire was the amazing plan to upset international cartwheeler by means of large-scale forgeries. Adolf had an idea that the pound of his counterfeiters would be worth more than Britain's democratic sounds.

The plan was doomed and aged at 41,000,000,000 marks (nearly $20,000,000 at par) or one hundred, and 2,000,000,000 marks.

So Hitler set about forging British currency notes. He knew that the best way to do this was to get the men who engraved the notes, to do the work. Therefore he approached a number of heavy engravers.

The forging and type came in the fireplace where the red coals were drying. On the white-lined board lay a few pounds of notes. A little screw of paper had been thrown on which was the sentence of the letter had opened into a crumpled ball. This was a personal error!

"Hello!"

He spent the week—Bonniglit at first it was thought that he was dead something which shocked her even in the act she stooped and read quickly as though she must get the sense before the sudden and regard some of propriety intervened.

I really must ask for my writing materials, Miss Allison," he said. How can I prepare my MANUSCRIPT.

The hands of the door burst, and he took the crossed paper into the fire, which was open on the hobs and closed the flap on the glowing ash. Then he turned to the room.

She came to the desk where the girl sat, her big, great hands folded, her disparagement conveyed rather than expressed.

"You're the young woman," she stated.

"I'm the young woman," smiled Allison, who had a soft spot for ugly girls. She grew in the estimation of her employer.

"Yes—" he said slowly, measuring, "I would like you to take a letter for me."

"Shorthand?"

Mr. Harrow's voice was surprisingly harsh and loud. The sudden change which came to her face was so startling that Allison stared at her.

"Oh—that's it!" Relief unmistakable.

And here it finished on the gist that this asset to Mrs. Blewell—that Mrs. Blewell—had been made to the evil of the hill. Miss Merry Harlow Portage her name—sat on edge, the woman reported the thought, for she said quickly:

"I am Mrs. Lucy Edwards—Mr. Blewell's housekeeper."

CHAPTER XIII.

Allison surveyed some pelts commonplace and wondered what was coming next. Nothing, apparently, but with a quick glance round the room, the woman sailed out, he heard her call to some one her, leaving the girl to her pensiveness and misgivings. And these statesmen were themselves. NEWS NOTES

It is rather a strange calling in the heart of the Wheat Belt that farmers cannot even discuss some of enough of their wheat to throw value per them really to settle their debts. It looks as though the Wheat Board is determined to throw farmers into bankruptcy. What differ what does it make whether the wheat is in the hands of the miller or producer? It is still wheat and has a pegged value to be dealt with by Government boards to transfer, and those who are owned looking for trouble simply get what they are looking for.

Gardiner says the provincial Government and Municipalities must do something for the farmers this winter. But he says he has to say how. Take the case of Alberta. How is Alberta to borrow money? We have no credit in the money market. Ontario cannot borrow a dollar from any money institution of any kind unless in advance it might have been provided for in their yearly estimates, but that is too late now. It will take a huge sum of money to finance 180,000,000 bu. crop, even if the federal government does take care of five acres on each farm. It means not only that the farmer will have to endure his hell, but the business men also. It means that merchants in order to save himself will have to do a stroke by cash business, but in this case there will be no cash.

"Business as usual" is the slogan in London. There is no shortage of fuel. Theatres are doing a rousing business; newspapers have never sound as confident, and the milkman comes his daily rounds.

"TWELVE O'CLOCK AND ALL'S WELL"

(From "The Canadian", Atlantic, Ont.)

There must be today, millions of spirits that walk, heavily across the length and breadth of beleaguered Britain. The spirits of those men of the ancient race who gave to her the greatness that is hauling miraculous resurgence as once more, the fate of human liberty is laid upon their hands and hearts and courage.

It is good to think that, among those spirits, walk the ancient watchmen of the night, carrying their lanterns to light the dark hours and crying, as they walk, "Twelve o'clock and all's well." All's well with Britain, as her sons and daughters stand, undaunted, a final rampart to the nations foe.

All's well because the tongue of Chaucer, of Shakespeare, of Milton, of Pope, of Keats, of Shelley, of Kipling, of Tennyson, of Barrie, of the King James translation of the Scriptures, can never be the tongue of an enslaved race.

All's well because the blood of Frobisher, of Drake, of Rawleigh, of Cook, of Hall, of Wellington, of Nelson, of the million of fighting men who have died to keep Britain free, can never course through the veins of an enslaved people.

All's well because the passion for human liberty and human rights that inspired the men of Runnymede, that set all time the bards of men to the duet of their all that dreams shall be crushed, that forced British democracy ever to march on, side by side and step by step with the growth of empire, can never be quenched under the oppression of any master.

All's well in British homes, from the ordinary, average people from whom England's greatest have ever come, there still arise that same quarable spirit which cannot live en-lave.

The worst seers among men cannot say what yet is to come. But this all men may know: There is very lately left to civilization and of freedom threatened by an inhuman force, and inhuman voice to savagery sparked by monorel and lust. The shadow today lies over an ancient and a noble land. It darkens the hearts of poets and philosophers and martyrs. It hangs, threatening, over the very birthplace of human liberty and human progress.

The vultures soar over England's green fields and stately homes, they even descend into the humble cote and quiet hills.

We on this side can know little of the awe, the horror that must, in the final assembling, descend the issue. That is, the spirit of a people awakened and determined. There must be many a valiant story, being told on the pages of history, in Britain today. The question of a people arising as one, to defend to death the land they love so dear, must be a tremendous thing to watch.

The vultures gather, but still the spirit of the ancient watchmen walks in England and still his brave voice rencurses, "Twelve o'clock, and all's well!"

The first new wheat of the season arrives in the Alberta Pacific elevator on Labor Day, Sept. 3.

TEES TOPICS

Buddy Conrad, son of Mr. and Mrs. O. Conrad, was rushed to Edmonton with appendicitis. He is reported, however, recovering rapidly.

The Sim family, accompanied by Miss Elsie Cunningham, and Mr. and Mrs. H. Anderson, of Vancouver, motored to Penhold on Thursday to see Dan.

The first 1000 bushel wagon brought into the Independent Elev. or by Mr. S. Pinetree. It is said to be very good grain.

Bob Bright, of Lacombe, has been passing his buddies with the Bell Telephone.

Mrs. Crampton and son Stanley, of Vancouver, are spending a few days here with Mr. and Mrs. Ed. Sage.

The meeting of the Tees Boiler Ines Club will be held Thursday, September 6th. Everybody welcome.

Mr. Bernard Lawrence had the misfortune to fall and hurt his ankle. We wish you a quick journey back to health, Bernard.

Mr. and Mrs. Jim Street and family, of Wainwright spent the week end with Mr and Mrs. S. Ogilvie and family.

Reg Wilkinson left for Trail, B.C., on Tuesday last week.

Don't forget folks the Saturday night dance in Tees, Saturday, September 8th. Special prize given by K.D. McDougall to the lucky winner. Be sure and come.

Here's wishing a certain lady of Tees District better luck next time in her driving.

K. D. McDougall, Bud and Wayne motored to Edmonton, Friday, on business.

Pastor Gordon Anderson has been holding services in Tees Hall the past few Sundays. Everyone is cordially invited.

Mr. and Mrs. T. W. Newton returned from their holidays at Banff, to re-open school for another term.

Mable Davis and Marion Ogilvie re-enter their physical examination in Hall Dec., August 28th.

Mr. and Mrs. P. Hoffmer, Sr., returned their car once while returning from Lacombe. Mrs. Hoffmer suffers a broken rib, and Mr. Hoffmer bruised and minor cuts about the head.

Mr. and Mrs. W. Cramer is to make their farm, and are about to ing for B.U. where they will reside. We wish them luck in their new home.

Miss Irving, the new nurse-at-tendee has arrived in our district, to take up her duties here.

The Misses Bercisse and Ellen Brenner have left for California where they will go to school.

BIRTHS

Charles Percy Peterman was born in Bowmanton, Ill., May 23, 1890. He came to Alberta with his parents in 1906, settling in the Talesa district. He came to the Alix district in 1920. He married Miss Ida Stone there on August 29 and is survived by his wife, a daughter, Mrs. M. D. Webster, of Stettler, and a mother and sister, Mrs. Lida Peterman and Mrs. George Gleason, both of Bakersfield, Cal. He is also survived by four brothers.

Funeral services were held on Sept. 31, at 10:30 a.m., from the United Church in Alix, with the Rev. L. A. Thompson officiating. Interment was in the family plot in the Union Cemetery in Calgary.

CARD OF THANKS

We wish to thank our friends and neighbors for their many kindnesses and words of sympathy to us in our bereavement in the loss of a loving husband, father, brother and brother.

Evelyn Peterman.
Catherine & Richard Webster.
Lida E. Brooks.
Ethel Gingras.

Under an Ottawa date line, it is stated that, in a good many trades there are fewer quarrels being submitted about a month's time. The other week only seven were spoken.

WORLD OF WHEAT

By H.G.L. Strange, Director "The Crop Turning Point"

Many lots of wheat being hauled by farmers to elevators from this new crop contain split kernels to an extent that others grad No. 1 is being degraded down to 2 and 3 and sometimes to 4 and lower grades. This represents a serious loss to the farmer.

Wheat containing split kernels is being degraded by the Government inspectors in agreement for the reason that millers strongly object to it, for split kernels are almost impossible to separate from sound wheat in milling. And not all the split kernels that are present in this year's crop could be avoided if particular care is taken in threshing. Concaves should be opened up wider, or fewer used; perhaps even blank concaves may in some instances be necessary.

In any event farmers should watch carefully that the first few bushels coming over from the machine are clean, and then should adjust their concaves so that wheat will not be split. The loss from having a few white kernels or unthreshed spikelets in the grain will be very much less than the loss from threshing close, and so of running the risk of splitting kernels.

Christian Science

"Man" is the subject of the lesson-sermon to all Christian Science churches on Sunday. One of the Scriptural citations is "But we all, with open face beholding as in a glass the glory of the Lord, are changed into the same image from glory to glory, even as by the Spirit of the Lord." (II Cor. 3:18). One of the correlative passages from the Christian Science Text-Book with Key to the Scriptures" is "No God made man in his own image, in the image of God created He him; male and female created He them." To emphasize this connections thought, it is repeated that God made man in His own image, to reflect the divine Spirit. It follows that man is a genuine hero."

THESE THINGS ARE WORTH WHILE

1 The Wheat Pools introduced orderly price stabilization as an improvement in Western Canada. It is now a recognized policy.

2 It and the Pools did more than any other known agency to bring about the present high prices for wheat. The Pools are responsible for the high initial payment for the Alberta Wheat Pool it can be said the price advantage of from 30 to 40 cents per bushel over the previous 4 years.

3 The prosperous Wheat Board was financed either directly or indirectly by the Wheat Pools and farmers' organizations. From 1921 to 1928 a couple of years of the prairie trade fought like dogs against the Wheat Board and its principles.

4 The Wheat Board and other prosperous wheat price stabilization schemes have added at least $300 millions to the incomes of the west in the past ten years.

5 Farmers could get little or nothing for their wheat today but for the Pools.

6 Pool elevators have prevented dozens private elevators from charging prohibitive rates in many ways. The Pools now admits there are no large profits left for private business to prey upon.

7 Prior to the creation of Pool elevators, country elevator rates were the profits in grain companies were big. Inducements at Port William and Port Arthur were 2½ cents per bushel for from trade away from Pool rates to the Pool elevators. A couple year (Prior Wheat Board) These huge profits are now in the pockets of farmers in the Wheat Pools.

8 What grain producers patronage of Pool elevators they did so through ownership of shares in the elevators. Today a Pool member has no more say in the management than a non-member. A farmer is able to have a million bushels of his own better money and he cannot get it. Pool elevators are run in the interests of the Pool members.

9 Ten years ago the grain-growers practically financed the elevator system and financed for the most part since. To-day Pool members own a few shares of stock and are entitled to dividends of all kinds, and the dividends of all kinds, and the dividends of all kinds, and the

LOCAL AND OTHER ITEMS OF GENERAL INTEREST

Mr. and Mrs. Butchard and Dorothea were Camrose visitors over the week-end.

Mrs. H. E. Early, of California, is visiting friends and relatives in the Alix district.

Robert Rex Beattie is listed in The Gazette as a commissioner for oaths in this province.

We will pay five cents per copy for five copies of the Free Press of August 30th, 1968.

The first new wheat of the season arrived in the Alberta Pacific elevator on Labor Day, September 2.

Mr. and Mrs. T. McGarty, of Drumheller, were recent Sunday visitors at the home of Mr. and Mrs. C. E. Stone.

Stone school re-opened on Tuesday, Sept. 3, with Miss Dorothy Pethybridge, of Tees, in charge.

Mr. and Mrs. H. V. Shaw, of Edmonton, and Dr. and Mrs. H. Moore, of Lacombe, visited Mr. and Mrs. W. D. Clarke over the week-end.

Born to Mr. and Mrs. O. Carter at Mrs. Carter's mother's, A. McDonald's home south of Alix, on September 10, 1968 a 9½ lb. son.

The Womens Institute held their monthly meeting at the home of Mrs. Duff. During the afternoon Mrs. Tompher gave a paper on "Legislation and Information Relations."

One of Clives old timers passed away, last week, in the person of Mr. John Reynolds, aged 55. He was buried on Saturday. He is survived by his widow, one daughter and two sons.

A good crowd attended the dance on Friday last, when the Modernaires appeared at the Legion Hall. This popular Orchestra have left for a short trip to the Pacific coast, and it is hoped they will play in Alix when they return, to open the winter season in Edmonton.

Knocked down by her own car, which was coasting down a hill on a road in the Joffre district, Mrs. W. J. Gould received serious injuries to her head and back, last week. She was attempting to help a neighbor, whose car was stalled, and she is now a patient in the Lacombe hospital. Mrs. Gould is a sister of Mrs. J. Brown and Mrs. H. Kraft, of this district.

Mr. H. A. Mann who farms seven miles south west of Alix, showed us some fine specimens of which were grown on his place. The young trees were planted three years ago, and this year a fair crop is being taken off. They look like good preserving stock. He also has grown some black cherries, produced from seedlings three years ago. These are only samples of the kind of fruit that can be produced in Alberta. In the northern part of the Okanagan, B. C., winter apples are profitable to abandonment, and the same can be done in Alberta. Our growing season is short, but we don't have to wait in the spring as from winter killing. There is no more danger from spring frosts in Alberta than there is in B.C.

The Ladies Auxiliary Branch of the Canadian Legion wish to thank all those who helped to make the lawn dance and bridge party a success. Especially the musicians Mr. Wilton and Bert Hollings and Floyd Page who all so kindly donated their time and material. We realized $10, clear which will be used to send parcels to all the boys who have enlisted from this district and are now overseas. Once again, "Thank You"

WEDDING

Mr. and Mrs. Howard Rogers, of Vancouver, announces the marriage of their daughter Gladys Myrtle, to Mr. Harry Thorburn Douglass, on Thursday, August 22nd, 1968, in Vancouver, B.C.

Mrs. Douglass is a former Alix High School student, a graduate of Calgary Mt. Royal College, and the Prairie Bible Institute. Later she was connected with Young Peoples Evangelistic Work in Calgary and Vancouver.

The couple will reside in Vancouver for a time.

George Tattler

Retired sgeant at Gonage on Monday last with Mrs. Virgil Hoe as teacher.

Iris and Jeanne Clarke are confined to their home with chickenpox.

Parent Dr Vore and Walter Bassow are both sporting cars. We don't blame you, boys, as some of the girls live quite a ways off.

Mr. and Mrs. F. Hettinger and Mr. H. Hettinger, of Calgary, visited over at the home of their mother Mrs. E. Hettinger, last week-end.

Mr. and Mrs. O. Ide were Stettler visitors on Tuesday.

Howard Todd returned to the J. Kemphaver's on after being home for the past six months at Rochester visiting relatives.

Miss Loella Lund is now employed as the V. Sale house.

Cecil Lund, R.P.C.C., was back on his last home leave on Sunday before he goes East, where he will take a visiting course at an undisclosed.

The C.W.L. met at the home of Mrs. Herb Lund on Sunday.

HAYNES

Mr. and Mrs. T. Ross, of New Westminister, B.C., renewed acquaintance with old friends in the district, while spending several days at the home of Mr. and Mrs. Sherborne. They motored up from the coast.

Miss Evelyn Paull is attending High School in Lacombe this year.

Mr. J. Davidson was a Lacombe visitor a couple of days last week, where Mrs. Davidson is a patient in the Community Hospital.

The local branch of the Red Cross served lunch at the dance on the Monday night. The orchestra was from Bentley, was, and a good crowd was reported in attendance.

ANOTHER COLLISION

Mr. Alex Brown in returning from Alix, last Thursday in his car 4 miles of Alix, collided at the Gasmick corner east of Alix, with Mr. McLeod, shop instructor of Mirror, resulting in considerable damage to both cars, especially Mr. McLeod's which was rolled over twice. No one was hurt in what might have been an otherwise serious affair. The principal cause lies in the inability of car drivers to have any view of intersections at corners, and a condition that should be remedied without delay.

Now Is The Time

"The invasion of Canada seems to be planned to take place between the months of July and October when full use may be made of the northern waters of Hudson Bay which are practically undefended.

The foregoing quotation is an article under the caption 'Is Invasion Near' which appeared in the August issue of New World, a particular journal published in Toronto, as not edited here with any desire to create unnecessary alarm, but the editor admits does consider the situation to require more of the steps which have been taken by the government to make for the defence of Canada and demonstrates the necessity of every citizen of the country being on the alert to thwart fifth column activities and to report any suspicious circumstances to the proper authorities when, suspected. Liberally they should be thoroughly investigated.

The latter recommendation is made on the assumption that the statements made in the article in question are based on facts and, in any event it must not be forgotten that Hitler's avowed objective is not merely the subjugation of Great Britain but the destruction of the entire British Empire with Canada as one of the richest plums in prospect for the Nazi gang which could be carried out

A German invasion of Canada, as pointed out in the article, pre-supposes defeat of Great Britain but it would not be out of character for Hitler to make such an attempt without waiting for such a dire consummation of his plans and get the "right little bite if liberally it would further his policy of creating diversions in other parts of the world and causing embarrassment to the U.S.S.R., the British and Empire arms as in many quarters as possible

The history of the first year of the war in Europe which has now spread into Africa and Asia demonstrates full well that the Hitler-ite plan of conquest always incorporates fifth column activities as a prelude to the use of guns and tanks, aeroplanes and bombs, armed might and torpedoes as the weapons of invasion

* * *

Not Pantaloon Perhaps

Briefly, the article referred to, accompanied by a map, reveals the purported plans for the armament and occupation of Canada, said to have been adopted by the German high command in 1938, based on the recommendations of one Colin Ross, a Nazi spy, who surveyed the country the previous year and blue-printed the routes for the invading army His words are said to have conveyed the Dominion from the Atlantic coast to Regina and from the Arctic to the U.S. international boundary.

Using Iceland, Greenland and the Faroe Islands as stepping stones, the army of invasion is to be brought to Canada as shown in a great fleet, which, when eight hours above divisions will make their approaches through Labrador and Quebec, through Moosonee on St. James Bay and through Churchill on Hudson Bay Route is said to have reported that if his plan is followed, Canada could easily be dropped into the Nazi basket

The plan may sound fantastic to residents of Western Canada who geographically, at least, appear at the present time to be remote from the battlefields of Europe but, as the author of the article declares, "This Nazi agent's worst case will be a warning of events to come After all, did not Hitler always boast of his plans for conquest? That he was not believed was not his fault."

In the light of events of the past few months, there is nothing fantastic about Hitler's plans They have been only too successful up to the time he undertook to tackle Great Britain. Two or three months ago, probably the whole world, outside of Germany would have scoffed at the suggestion that France could be subdued and occupied and brought under the Nazi heel in the short space of two or three weeks Was there not the Maginot line and was not the French army acknowledged by experts as the best in the world? But it happened and apparently, according to

Only One Insurance

The people of Canada and of Great Britain have complete confidence in their belief that Britain will not, and cannot, be conquered. But, there is no assurance that some attempt will not be made against Canada, if Britain should suffer temporary reverses

The only insurance against defeat, in the events of such an attempt being made against this country is full and complete preparedness, not only in men but in all resources of wealth and arms, high morale, unflinching determination, the will to sacrifice, a stern sense of duty and alertness against fifth column activities and subversive propaganda. And that means now Tomorrow may be too late.

Attempts to Close With Peace

Are the strength of Canada's armed forces increase from day to day, applications for allowances pour into the Separation Allowance Board in Ottawa in rising numbers. At present are about 1,000 applications a day are being received. About $2,000,000 are of the fruit has arrived in the United each year monthly in advantage Kingdom, Mr. Cameron said. report, about 70,000 in number Five hundred accountants and clerks are kept busy dealing with these

Second Experience

History repeated itself for William Taylor, special agent, Canadian National Railways at Antwerp, Belgium, when he flew to the German Invasion in 1914, Taylor again got into the "skin of my teeth" as the Huns entered Antwerp in May last.

Fruit For England

A. G. Cameron, Australian minister of commerce and the navy, announced the sale to the British food Department Alliance Board in ministry of 750,000 cases of Australian canned apricots, peaches and pears, valued at $1,500,000 (£1,071,429). Part of the fruit has arrived in the United Kingdom, Mr. Cameron said.

The Red Fox Canary

This story of an ex rural resident is from a northeast England town. A German bomb fell in the town; the explosion caused the bottom of a canary's cage to fall out; the canary fluttered to the floor, and the cat pounced on the canary and ate it.

School teaching in Chicopee, Mass., in 1713 was not a profitable profession. It paid 24 cents a week.

Invasion Of Children

How They Are Being Looked After In Their Own Country

We have been reading to want about the evacuation of children from Britain to Canada that we may find our interest dulled in the matter of how the evacuation from London children are being looked after in their own country And in the following taken from an English woman's letter to a friend in Canada we are reminded by what is rendered

I am fairly busy Can assess day? if I am needed. I help at the children's reception house in connection with the King Edward Hostel Gallery arrives down to hundreds of London children, and preparing a dinner for them. Some of the women doing this are getting very tired of the new house to furnish of Rumors. All the unpaid work, and it is great benefit to the houses where children are billeted as it saves the women's time preparing a dinner for them. Some children arrive

The War has caused a tremendous domestic upheaval Scarcely any families are together It has now become quite usual to take a child into your home Most of the children are now happily placed, and have got used to their new homes The Government now pays about 10 shillings a week to the hostess for each child The parents add to this if their means permit and also supply clothes for their children The Wool Other parents pay full board and lodging Others pay the very poor pay nothing and the Women's Voluntary Service make clothes for them The whole situation is made harder by the number of Dutch, Belgian Polish and Czech refugees

The Channel Tunnel

Lucky For England That It Was Never Born Built

The London correspondent of the Ottawa Evening Journal says: Surely we may take it for granted after recent events that we have heard the last of that Channel tunnel scheme" It used to crop up, with mild misinterest and pleasantness, every few years and was always turned down by our military authorities. Recently the advocates of the Channel tunnel seemed to be gaining strength however, and even the military opposition to be weakening a bit

What would be the position to-day if a Channel tunnel existed and the Germans held, as they would have done the French end of that scheme? It is all very well to argue that we could easily have destroyed it but the moment the German higher command have taken it into their pos-

[illegible] the French end, also have made it relatively easy by means of airborne troops and para-bombs to get command of that section of the railway from the battles"

And apropos pressing the button that would have the tunnel up might not we have been faced by the dismay that the tunnel was packed with troop trains? The recent experience of the Meuse bridges, and Fifth Column activities, would be enough to give any Channel tunnel project a future years Ha crap de grace

Picture Better Than Words

Ellison Tarbuns Shows Up Press At Nazis For Fool

The Chinese, as we have observed before, have the One eye picture is worth 10,000 words The truth of that was exemplified the other day by a cartoon in the New York Post, by Hollis Kirby, which tells of the German plans to the United States and Canada more effectively than an article of many columns.

The cartoon shows a refugee seated at a table, stuffing himself with food Before him is a plate of fish, labelled "Norway." There is a big ham from Poland, butter from Denmark, cheese from Holland, and a bottle of wine from France. Below, it says "If anybody in Europe starves it won't be he."

That is the attention as it is, and as it would be if the British were not hounded around, but the picture tells no food. The Germans are robbing the occupied countries of food and taking it to Germany. If the blockade is lifted to admit "relief" food the Nazis would take that, too, to keep their armies in fighting trim. —St. Thomas Times-Journal.

A German squirrel by the French last year, on hand of a spy ring, has been appointed ambassador to occupied France. He ought to find right at home now.

Raised Over Rich Province

Maharajah Of Mysore Dies After Reign Of 25 Years

The Maharajah of Mysore, Krishnarajendra Wodeyar Bahadur, of Bangalore, died recently at the age of 53 years. He succeeded to the throne in 1902 and was invested with full ruling powers on the 8th December 1902.

He was a great sportsman and a keen polo player and was a familiar figure at many polo tournaments and meets in India.

The Maharajah belonged to the Yadava Kshatriya race of Hindus. It is said of a huge palace in Mysore he used to entertain many of his acquaintances and some was honored King Edward when Prince of Wales. The Maharajah was entitled to a salute of 21 guns.

The Maharajah's brother, who would have been 50 years of age March 30 next, at the age of 51.

The Maharajah married his father Chamaraja Wodeyar Bahadur in 1895 and he was in the 18th year of his reign.

BILLETED RECIPES

BANANA CREAM FROSTING.

2 tablespoons granulated sugar
2½ tablespoons Durham corn flour
1 banana
1 tablespoon milk
1 tablespoon butter
Confectioners sugar thoroughly sift the granulated sugar and corn flour with a little confectioners sugar. Add milk and butter and cook in double boiler until thick and smooth, stirring constantly. Remove from fire and cool. Mash banana and add to cooled mixture, beating until smooth. Add enough confectioners sugar to make spreading consistency.

Cannot Be Concealed

British Unable To Hide Contempt They Feel For Hitler

Shorn in British nature when they is reflected to cannot be concealed. The contempt felt for Italy is not hidden by Churchill or anyone else Cooperation, a truly disgraceful end. It reminded Spanish spectators did notice big to remove the stain from Italian arms after their shameful thinking into war with no vestige of glorious except gain after Germany had overrun Holland the whole land fighting of the first campaign for the time. Italians have proved nothing but timid Huns

The Prussian is remembered chained back with their tails down at Dunkirk, moment that arrived demanding the fulfillment of the Bordeaux rejoicing loot. On the border of Egypt and Libya a party of 3 French civilians and reminded of their duty to have been bombed over to a British escort but they did not turn up. A British officer in an armoured car hearing a fog of cries, accordingly drove across to the Italian fort and found that their party and the Italian escort or this the week, the escort not during in up French closer The party was handed over, but the climax was reached when the Italian officer commanding the escort asked the British officer to give him a safe conduct back to the most fortified post through Italian territory."

A couple of years ago British and German diplomats were engaged in a diplomatic game of the latter passed and out that, at the event of war Italy would be Germany's ally. Oh, well, answered the British, we had better be her last time. A little prior to Hitler's black-shirting entry into the war, a French general is credited with the following: "If Italy stays out of this war we have to do for such two divisions to watch her. If she goes to us on the side of Germany it will take four divisions to defeat her. If she comes in on our side we will have to send three divisions to support her."

So far as the French are concerned, things did not work out quite that way, but it was not any surprising exhibition of valor on Italy's part that made the difference. It was indeed an exhibition of a pretty low type of cowardice that enabled Italy to count another Caporetto.—St. John, N. B., Telegraph-Journal

Might Influence Reason

British People Advised To Ignore Lord Rothermere's Broadcast

The Ministry of Information to-try-ing to persuade Britons that Lord Mine-liner of Season, Germany's ace English language propaganda broadcaster, isn't entirely listening to

One ministry advertisement given the same question of "What do I do if I come across German or Italian broadcasts when tuning my wireless?"

"I say to myself, 'Now this nighter trash is not going to be true. Am I going to do what he wants? I remember that German lies over the air are like parachutes—they descend on Britain they are all part of a plan to get us down—which they won't.'

"I remember nobody can trust a word Hitler says. So, just to make them vexed their time, I switch 'em off or turn 'em out."

Lord Haw-Haw supposed to be a British traitor broadcasts frequent programmes containing the slogan by which the British Commonwealth of Nations was formed.

He has a harsh voice with a loss of transmitted emotion.

His last talk, closely following in Britain, largely because the British listen to to funny." The government, however, has been worried by him since last January, believing that coming week-ended persons, he does a certain amount of harm to morale.

Saved By Fussy

Two comic saved George F. Dobney, 48, of Chelsea, from a jail sentence. Dobney was arrested by New York Central Police and found in possession of loaded a vagrant. Arguing his own case before a police court judge, Dobney patiently explained that because he had two cents, he could not be classed as a tramp.

From Artisan Tribesmen

Word having ground in the far corners of the British Empire that "the great white King" needs help in war against Germany, gifts have arrived at London from African tribesmen and Pacific islanders to swell Britain's war chest. They included 30 live turtles and 1,000 cases of rum.

Nearly 4,000 racing pigeons were supplied the Royal Air Force by British pigeon fanciers in one month.

Eggs with thin shells are laid by hens that get a diet poor in calcium.

What Everybody Knows

Any Fool Does It, Or Europe Would Be Taken By Storm

The following letter by W W Cornes, Hove, London, New Brunshire, appeared in the New York Herald Tribune

To the New York Herald Tribune

Sir—England is just now beginning to win. The second so-called "Appeal to Reason," dropped from Hitler's airplanes, indicated that England's blockade is shutting off food from Germany while a long hard winter, after Russian crops, approaches. Hitler has been warned by his generals against an attempt to send armies across the Channel in broad daylight. It is a slow method, but the food-bomb method, and will end the war. Hitler is beginning to realize this. It is well.

Now what is finally during." It is this. A staggered "Feed France" is used beneath a staggered, Allied France and "Feed France," Americans and nullify the British blockade and read Hitler by certainly rejoicing on his way to the conquest of America. Send food to France, 100 miles of Dover to Le Havre or Bordeaux, and who gets 97 of the 100 barrels? Can any one with a grain of sense doubt that Hitler and Goering and Goebbels and Ribbentrop and Rosenberg would fail to appreciate and secure and use this American spirit in France, or anything in that country?

The French politicians, Laval, stirring on his vast fortune, and the Bourbon royalists, Petain and Weygand will surf and can not see that the "Feed France" is carried out. They humbly and obligingly sit and wait at Vichy and—die.

If we Americans send in "Feed France" for we must feed the Free French Army in England that is now placed under sentence of death by the Vichy government and every Free Frenchman that is putting the finishing touches to the running of the second armada. If we "Feed France" we feed Germany and crush Great Britain, and send the Hitler wrath nearer to the U.S.A. To "Feed France" is to feed Germany, to destroy Britain's last weapon for defending herself (and us)—the blockade!

U.S. Audacious

Only Four Are Remaining In The Whole Country

The Washington state department is facing the strange blackhood of having every one of its diplomatic embassy in the United States then at their posts.

With several diplomats already returned and others on their way home, only four American embassies remain in the married capitals across the Atlantic.

One of these—Joseph Kennedy in London is at the end of a government aid your Ambassador—Kennedy—former diplomats without the full standing of an ambassador—are being Alexander W Weddell in Spain and John Van A. MacMurray in Portugal. Laurence A. Steinhardt is making his way back to Moscow.

Help Keep Britons

World Needs People Who Are Adaptable, Says Author

The scientific mind is well known to have a quality of detachment, and the shrewd-minded professor is a fine example of this character.

The world is large. There is room in it for a great many varieties. There is room also for those whose absorption with matters of commerce is so great as to shut out all that world. The collector of butterflies' wings or of postage stamps, the student of parliament in the time of Cromwell, or the man found in hard-ing a perfect game, goes right ahead as though nothing were happening.

Perhaps that is just as well. It is these little aberrations that show the rest of us that life goes on, still going on, supplying that which is to be done to stop it. Out near Pasadena, Calif., four eccentric young people have just completed a set of photographs of the sunset on Venus.

There are sunsets on Venus, in the sky, and on the earth, and in the spirit. But perhaps sunsets on Venus are important, also. The young men reported that the pictures indicated that they are having violent weather up there, too.—Willa Thornton.

Artists Worked Fast

A mural showing every phase of the Empire's war effort was completed in five weeks by three students of the Royal College of Art working on an enlarged section of the painting pavilion at the New York World's Fair.

SURVIVORS OF LINER SUNK AFTER NAZI PLEDGE

The British Navy saved 1 600 persons from the French liner Massilia Bank on her way from Southampton to Bermuda with 1 200 repatriated French naval officers and men aboard Germany had guaranteed the safety all they were able to save

A Jest Decision

No Distinction Between Enclosed Men And Those Called Up

Announcements by the minister of defence, and other information from Ottawa, reveal that no distinction will be drawn between the men called for training and the other men in the Canadian militia. This is just as it should be. Regimental esprit de corps is the military secret of the British Empire have been opened since the present war began. The original The H. Founded by the Rev. F. B. History Turns The Tables

Duchess Of Kent Figures In Strange Coincidence

A strange refugee story is told by a writer in the London Daily Sketch At the end of the last war the Bel church Revolution cost streams of refugees to France. Princess Mafalda, then a little child having fled from Russia, was invited to stay in the home of a wealthy family in Francheomme of noble family, her mother's greatest friend The only son of this Francheomme reached London the other day as a refugee from France Immediately he received an invitation from the Duchess of Kent. History had turned the tables

A Wide Variety

Here is a list of articles collected during the first week of Southgate's salvage campaign, scarcers motor cycles, bicycles, guns, swords, spears, cooking machine, refrigerators, air compressors, lawn mowers, motor cycle sidecars and sports models.

Thanks To Canadians

Residents of a Welsh village thanked about an unexpected bounty of fish which appeared on breakfast tables on the coast of a raid by Canadian bombers The Maids dropped several barrels along the banks of a river, throwing a large quantity of fish on to adjacent marshland.

Air travel in Canada increased by almost 100 per cent. in 1939.

Name Describe The Man

Statesman To Sir Edmund Ironside Is Called "The Wizard"

The new commander-in-chief of the British home forces, Lieut. Gen. Alan Brooke is mentioned the six ranks of his remarkable skill in handling every sort of gun from the 12 gauge squirrel gun to a 16 inch coastal defence cannon.

General Brooke comes of fighting Irish stock In fact his fighting rights ranged the Fighting Brookes still has a carrying on the family traditions by making every preparation in Britain to give any invading German the doggonedest fight ever

Sir Alan replaces Sir Edmund Ironside who was promoted to field marshal General Brooke has been going to meet the British utility man, because of his most complete and up-to-date knowledge of all gunnery at once and every kind of gun. His manoeuvre from the old mass formation attack staff to the new highly mechanized open, swift and deadly forms

His organizing ability, too helped win this new post for him which, along with the other promotions, is reported to put the army in the best way of resisting the German threats to conquer the little island

Already Britain's home commander-in-chief has his plans well under way If you were to go on a tour of England's southern defences, you would see almost the same type of barricades that you would have seen last winter between Lille and Dunkirk, between the Germans and the second corps of the B E F Sir Alan constructed both Then, in the south coast of England, beginning at the beaches, are lurked-over sea mines, machine-gun nests (some fixed and both houses, some of them, and filled with pebbles).

What About The Men

Hitler Has Made an effort to lose all those planes sacrificed in raids over the Channel and on the British coast. But how about the men? Does Hitler have an inexhaustible supply of young men who have time to serve as pilots, gunners, etc?

A food expert is one who can bolt in a cafe and tell how many chicken sandwiches it will make.

Many Following Practice

Sixty Farming Has Proved Pioter In Preventing Soil Drifting

Considerable progress in the prevention of strip farming in the control of soil drifting, to the Prairie Provinces was reported by the Regional committee on Soil Drifting at the recent meeting of the National Advisory Committee on Agricultural Service held in Ottawa, by Dr. E. S. Hopkins, Associate Director and Dominion Field Husband, Experimental Farms Service, Dominion Department of Agriculture, Chairman of the Committee

In 1935, the Committee reported, only a very small area in the Melfort district of Southern Alberta adopted strip farming but by 1939 it was estimated that approximately 20 per cent of the Farmers in Southern Alberta and about 60 per cent. in Southwestern Saskatchewan were following this practice.

Further accomplishments of the Regional Committee on Soil Drifting are to be found in the tillage methods that have been changed with adoption of surface tillage by the use of ploughing in many districts. This practice has materially controlled soil drifting and drifting. Many agencies have undertaken excellent work in the application of soil control measures, including activities under the Prairie Farm Rehabilitation Act and The Regional Committee has functioned in bringing together in view of the various co-operating agencies and promoting the dissemination of this information.

Among the results of the future work of the Regional Committee, plans have been made for the continuation of the present program until complete soil drifting control is, accomplished through the extension of the program to areas where up to the present time no effective control methods has been undertaken. Those regions include the parts belt rain and certain regions in the three Prairie Provinces.

Included in the work of the Regional Committee is the improvement of existing methods relating to tillage practices, strip cropping and crop rotations so as to latern the most efficient use of these various regions, the undertaking of investigational work to overcome loose soil structure and to increase surface roughness and consideration of the advisability of studying water flow and run-off as a method of extending the work throughout Canada.

Britain's First Sea Lord

Sir Dudley Pound Able To Deal With Italian Navy

Nobody is better able to deal with the Italian Navy than Admiral Sir Dudley Pound, the First Sea Lord, who has had already considerable experience of their tactics He was in command of he Mediterranean Fleet when Italy entered the war, and there are many good stories told of the way he dealt with Italian over-inquisitive Italian vessels. On one occasion he sent destroyers to investigate a deeply disguised vessel off Malta. Within a few minutes several Italian destroyers appeared on the surface, their commanders apologizing and saying they "thought they were the United States of Greece."—London Daily Sketch.

Egypt Protects Treasure

Display Ancient Art Of Camouflage To Deceive Enemy

Besides black - out precautions against air raids, steps have been taken in Egypt to protect that country's historical treasures from damage. Among the subjects reserved to a place of safety in the first example of the employment of camouflage to deceive an enemy in war time. It consists of an ancient carving of a group of Egyptian soldiers at the time of Ramesses II. Their yellowish-brown uniforms and shields are painted with irregular black stripes that gives the effect of tiger skins. So far from being a modern masonry camouflage is 3,000 years old.

Probably They Would

British cases of horses cropped up in the House of Commons in the question-time J J Davidson, Labor (Seaham), asked A. V. Alexander, First Lord of the Admiralty:

"Is it true that British ponies are at an end and 'mother' and Bulgar submarines come to the top?" Mr. Alexander replied, but made no reply.

Fish Rain Prompts

Two rotund Portuguese sailors paid their debt promptly Commander of the crew of the torpedoed Greek steamship Phoebe, were on a pier at Lourenco, Portuguese Indeed, they noticed two Irish bobbies in obliquity. Diving fat feet, the Portuguese hurled the bobbies to safety.

Great Britain is ready for the threatened German invasion by air, over the water, or on land. These soldiers are on guard somewhere on the east coast. A gun emplacement is at the right.

NO OTHER TIRE LIKE IT!
Firestone
CHAMPION

FROM the enormous files of the phenomenal new Gum-Dipped Tread, everything in modern sport, records, Firestone Champion has been selected as the one tire on earth to actually new standards of safety and long mileage because it is the result of Firestone's quarter-century of experience in building tires for more speeds.

Here are some of the things you get in Firestone Champions now—new Safety Locktreads treated with a new and improved Gum-Dipping process. 27% stronger bead between tread and body. 29% greater heat protection against blowouts; 20% amazing new tread with thousands of sharp-edged angles for quick stopping traction. And all at more new-low mileage.

Buy now, at the Firestone Champion engineering triumph for less than the tire alone is sold—for with Firestone Champions you get Firestone Dealer per-mile service.

CHAPTER XIV.—Continued

"A lawyer . . . But he knows so much about finance as law. I've got an idea he's on the crook. We've never had a prosecution against him, though we've a whisper once about his financial position. He did days ago, but he isn't for some mighty queer people, and I think he lost money on the Black Birchwoods."

"He's the man who lives at Norwood?"

Hill nodded.

"Invested," he said dolimorship; "the place where the letters were posted to Mrs. Gibbins. I wondered you hadn't seen him before—no, I haven't, though I've remembered. You didn't want to make Harlow your friend, I'll bet. Not after the time business." He strolled his nose thoughtfully. "Yah, that's it. He doesn't love you. You might call on him on some excuse, but you'll have to be careful."

"How does he get from Norwood to the City?"

Hill shook his head.
